(i) despite diligent good faith efforts to obtain a contract or other arrangements for an adequate and reliable supply of coal or other fuel, it is likely that such supply will be available at a cost (taking into account associated facilities for the transportation and utilization of such fuel) which, based upon the best practicable estimates, does not substantially exceed the costs, as determined by rule by the Administrator, of using petroleum derived from imported crude oil as a primary energy source during the useful life of the installation;

(ii) despite diligent good faith efforts, site limitations would permit the location of an installation using coal or other fuels as a primary energy source;

(iii) the prohibitions of subsection (a)(1) or (2)(A) could be satisfied without violating applicable environmental requirements; and

(iv) the required use of coal or other fuels would allow the petitioner to obtain adequate capital for the financing of such installation;

(B) the issuance of such exemption furthers the purposes of this part; or

(C) in the case of any installation other than a boiler—

(i) the use of a primary energy source, other than natural gas or petroleum, is technically infeasible; and

(ii) a substitute heat source is not possible due to process requirements.

(2) The Administrator, upon the filing of a petition, may, by order, grant a permanent exemption from any prohibition under subsection (a)(1) or (2)(A) applicable to a new major fuel-burning installation, if the petitioner certifies that—

(A) such installation uses, or proposes to use, a mixture or combination of petroleum or natural gas and other fuels as a primary energy source, and

(B) the petroleum or natural gas used in such combination or mixture will not exceed, during any 12-calendar-month period, 25 percent of the total Btu heat input of the primary energy sources of such installation or a greater percentage which is the minimum percentage needed to maintain fuel efficiency of such mixture or combination, as determined under rules prescribed by the Administrator.

(e) Any new major fuel-burning installation issued an order before the effective date of this part pursuant to section 2(c) of the Energy Supply and Environmental Coordination Act of 1974 shall, notwithstanding the provisions of such 2(c), be subject to the provisions of this part, except that if such order became final before such date, the preceding provisions of this section shall not apply to such installation. Nothing in this subsection shall be construed to affect the validity of any such order or to require the Administrator to reissue any such order.

EXISTING ELECTRIC POWERPLANTS AND EXISTING MAJOR FUEL-BURNING INSTALLATIONS

SEC. 313. (a)(1) No existing electric powerplant—

(A) shall use natural gas as a primary energy source on or after January 1, 1990;

(B) if such powerplant used petroleum as a primary energy source on or before April 20, 1977, shall convert to the use of natural gas as a primary energy source; or

(C) shall use natural gas as a primary energy source in greater proportions than the average yearly proportion of natual gas which—

(i) such powerplant used as a primary energy source in calendar years 1974 through 1976, or

(ii) if such powerplant began operations on or after January 1, 1974, such powerplant used as a primary energy source during the first two calendar years of its operation.

(2) The Administrator may prohibit any existing electric powerplant from using

petroleum or natural gas, or both, as a primary energy source, if—

(A) such powerplant had on April 20, 1977, or thereafter acquires, the technical capability to use coal or other fuels as a primary energy source; and

(B) the use by such powerplant of coal or other fuels as a primary energy source is financially feasible (as determined under rules prescribed by the Administrator).

(3) In the case of any existing electric powerplant in which it is technically and financially feasible (as determined under rules prescribed by the Administrator) to use—

(A) a mixture of coal or other fuels and petroleum as a primary energy source, or

(B) a combination of coal or other fuels and petroleum or natural gas as primary energy sources,

the Administrator may prohibit, by order, such powerplant from using petroleum or natural gas, or both, in amounts in excess of the minimum amount necessary to maintain fuel efficiency of such mixture or such combination.

(b)(1) The Administrator may prohibit any existing major fuel-burning installation from using petroleum or natural gas, or both, as a primary energy source, if—

(A) such installation had, on April 20, 1977, or thereafter acquires, the technical capability to use coal or other fuels as a primary energy source; and

(B) the use by such installation of coal or other fuels as a primary energy source is financially feasible (as determined under rules prescribed by the Administrator).

(2) In the case of any major fuel-burning installation in which it is technically and financially feasible (as determined under rules prescribed by the Administrator) to use—

(A) a mixture of coal or other fuels and petroleum as a primary energy source, or

(B) a combination of coal or other fuels and petroleum or natural gas as primary energy sources,

the Administrator may prohibit, by order, such installation from using petroleum or natural gas, or both, in amounts in excess of the minimum amounts necessary to maintain fuel efficiency of such mixture or such combination.

(c)(1) The prohibitions under subsection (a)(2) and subsection (b)(1) shall be established—

(A) by rule, in the case of powerplants or installations in a category of powerplants or installations, respectively, identified by the Administrator in such rule, or

(B) by order, in the case of any powerplant or installation which is not, at the time the proposed order is issued, within any such category.

(2) In prescribing any rule under paragraph (1)(A), the Administrator shall take into account any special circumstances or characteristics of each category of powerplants or installations (such as the technical feasibility of burning coal or other fuels and the size, age, or location of such powerplants or installations). Any such rule shall not apply in the case of any existing electric powerplant or major fuel-burning installation subject to such rule pending a resolution of any petition for any exemption for such powerplant or installation which may be filed with the Administrator not later than 60 days after such rule is published under section 321(g).

(d)(1) Any person who proposes to use natural gas or petroleum as a primary energy source for any existing powerplant or major fuel-burning installation, and such use would be prohibited under subsection (a)(1) or under any rule prescribed under subsection (a)(2) or subsection (b)(1), may file a petition with the Administrator requesting a temporary or permanent exemption for such powerplant or installation from such prohibition. The prohibition of subsection (a)(1)(A) shall be stayed with respect to any existing powerplant, pending a resolution of any petition for any exemption from such prohibition which is filed at any time after the effective date of this part, but at least one year before the date such prohibition first takes effect.

(2) The Administrator, after consideration of a petition for an exemption from a prohibition under subsection (a)(1) or (2) or subsection (b)(1) and any comments thereon, shall grant such exemption, by order, for such period as the Administrator determines appropriate if he finds that the petitioner has demonstrated that for the period of the proposed exemption—

(A) despite diligent good faith efforts to obtain a contract or other arrangements for an adequate and reliable supply of coal or other fuels as a primary energy source, it is likely such supply will not be available to such powerplant or installation at a cost (taking into account associated facilities for the transportation and utilization of such fuel) which, based upon the best practicable estimates, does not substantially exceed the costs, as determined by rule by the Administrator, of using petroleum derived from imported crude oil as a primary energy source during the useful life of the powerplant or installation;

(B) natural gas will be used as a primary energy source by the petitioner in a powerplant which is a peak-load powerplant (determined only with regard to its usage of natural gas);

(C) despite diligent good faith efforts, site limitations exist which cannot reasonably be expected to be overcome;

(D) such prohibition could not be satisfied without violating applicable environmental requirements;

(E) in the case of an existing major fuel-burning installation—

(i) such installation is not technically capable of using coal; and

(ii) despite diligent good faith efforts to obtain a contract or other arrangements for an adequate and reliable supply of synthetic fuels derived from coal, such supply will not be available to such installation and the petitioner has a contract or other similar arrangement binding on the petitioner and the supplier of such fuels to provide such a supply at the end of the period of the proposed exemption;

(F) the issuance of such exemption furthers the purposes of this part;

(G) in the case of an existing major fuel-burning installation, the use of a primary energy source other than petroleum or natural gas is technically infeasible, and a substitute heat source is not possible due to process requirements; or

(H) in the case of an existing electric powerplant, the Federal Power Commission has certified that there is no alternative electric power supply which can be obtained without impairing reliability of service.

(3) The Administrator, upon the filing of a petition, may, by order, grant a permanent exemption from any prohibition under subsection (b) applicable to an existing major fuel-burning installation, if the petitioner certifies that—

(A) such installation uses, or proposes to use, a mixture or combination of petroleum or natural gas and any other fuels as a primary energy source, and

(B) the petroleum or natural gas used in such combination or mixture will not exceed, during any 12-calendar-month period, 25 percent of the total Btu heat input of the primary energy sources of such installation or a greater percentage which is the minimum percentage needed to maintain fuel efficiency of such mixture or combination, as determined under rules prescribed by the Administrator.

(4) If a petition is filed with the Administrator for a permanent exemption from the prohibitions of subsection (a)(1)(B) for the use of liquefied natural gas by a powerplant as a primary energy source, the Administrator shall grant such exemption, by order, if the Administrator of the Environmental Protection Agency has certified that the use of coal by such powerplant as a primary energy source would not comply with applicable environmental requirements.

(5) No exemption (other than a permanent exemption) under this subsection, including any extensions or renewals thereof, may exceed a period of 5 years' duration, except that—

(A) any exemption based on paragraph (2)(E) may, upon petition, be extended an additional period of 5 years, but such exemption shall not be effective after December 31, 1994; and

(B) an exemption based on paragraph (2)(B) shall not be effective after December 31, 1994.

(6) The Administrator shall not issue an order under subsections (a) and (b) to any powerplant or installation if it is demonstrated that such powerplant or installation would have been granted an exemption if such prohibition had been established by rule pursuant to subsection (c)(1)(A) rather than by order.

(e) Upon publication of any proposed order under subsection (a) or (b) in the case of any existing major fuel-burning installation or upon the receipt of any exemption under this section, the Administrator shall request the Federal Trade Commission to evaluate the impact of the proposed order or a denial of the proposed exemption on competition and provide to the Administrator, within 120 days of receipt of such request, written views and recommendations, if any, concerning such impact. Any such views or recommendations shall be available to the public. The Administrator shall consider such views and recommendations in issuing any such order or exemption.

(f)(1) Notwithstanding any other provision of law, no proposed order under subsection (a) or (b) (or modification thereof) which may result in the use of coal as a primary energy source may be issued—

(A) until the Administrator of the Environmental Protection Agency notifies the Administrator under section 119(d)(1)(B) of the Clean Air Act, or

(B) if such notification is not given, until the date which the Administrator of the Environmental Protection Agency certifies, pursuant to section 119(d)(1)(B) of such Act, is the earliest date which the powerplant or installation will be able to comply with all applicable requirements of section 119 of such Act.

(2) Such order (or modification) shall not be effective during any period certified by the Administrator of the Environmental Protection Agency under section 119(d)(3)(B) of such Act. Notice or certification pursuant to this subsection shall be provided within 270 days of the date the Administrator of the Environmental Protection Agency receives notice of such proposed order (or modification).

(g) The provisions of this section shall not apply to any powerplant or installation for which an order issued pursuant to section 2(a) of the Energy Supply and Environmental Coordination Act of 1974 before the effective date of this part is pending or final or which, on review, was held unlawful and set aside on the merits. Nothing in this subsection shall be construed to effect the

validity of any such order or be construed to require the Administrator to reissue any such order.

(h) The Administrator shall, by rule, require that existing electric powerplants which, on or after April 20, 1977, uses a mixture or combination of petroleum and coal or other fuels as a primary energy source may not increase their use of petroleum as a primary energy source unless a permit is issued by the Administrator authorizing such increased use of petroleum. Such permit shall be issued if—

(1) the Administrator finds that the petitioner has (A) demonstrated that the powerplant cannot comply with the requirements of the Clean Air Act, including any applicable implementation plan, as defined in section 110(d) of the Clean Air Act, without the issuance of a permit and (B) established the duration of the need for increased petroleum to comply with such plan; and

(2) the appropriate State regulatory authority, as determined by the Administrator, has certified to the Administrator that the increased use of petroleum by such powerplant is necessary to permit the powerplant to comply with such implementation plan. Such permit shall be issued only for such period as the Administrator determines a need exists for such increased use of petroleum.

(i) making a determination of financial feasibility under this section, the Administrator shall take into account costs, as defined in section 302(17).

SUPPLEMENTAL NATURAL GAS BOILER FUEL CONVERSION AUTHORITY

SEC. 314. (a) The Administrator may, by rule, prohibit the use of natural gas as a primary energy source in any existing boiler (other than a major fuel-burning installation) if the Administrator determines that—

(1) such boiler is used to produce steam for space heating purposes;

(2) such boiler had the capability on or before April 20, 1977, to use petroleum as a primary energy source;

(3) such boiler consumes 50 Mcf or more of natural gas per day on a peak day; and

(4) such prohibition is consistent with the purposes of this part.

(b) The Administrator may, by rule, prohibit the use of natural gas as a primary energy source in any new boiler (other than a major fuel-burning installation) if the Administrator determines that—

(1) such boiler will be used to produce steam for space heating purposes;

(2) such boiler will consume 50 Mcf or more of natural gas per day on a peak day; and

(3) such prohibition is consistent with the purposes of this part.

(c) The Administrator shall exempt any person from any rule prescribed pursuant to subsection (a) or (b) if such person demonstrates to the Administrator that an adequate and reliable source of petroleum is not likely to be available to such person during the period of the exemption.

(d) For purposes of this section—

(1) The term "new boiler" means any boiler the construction of which the Administrator determines commenced on or after the date of the enactment of this section.

(2) The term "existing boiler" means any boiler other than a new boiler.

PROHIBITION ON USE OF NATURAL GAS FOR DECORATIVE OUTDOOR LIGHTING

SEC. 315. (a) Not later than 180 days after the effective date of this part, the Administrator shall, by rule, prohibit any natural gas pipeline or local distribution company from providing natural gas service to any residential, commercial, or industrial customer for use in outdoor lighting. The Administrator shall take into account any special circumstances or characteristics in prescribing such rule.

(b) The Administrator shall, by order, exempt any natural gas pipeline or local distribution company from the rule required to be prescribed under subsection (a) concerning the continuation of such service in effect on the date of the enactment of this title upon the filing of a petition therefor by such pipeline or company, or by any interested person. Such exemption shall be for such period as, and to the extent that, the Administrator finds—

(1) such exemption is necessary to protect public safety;

(2) such exemption is necessary to permit the installation of substitute lighting where no outdoor lighting (other than that using natural gas) exists on the date of the enactment of this title;

(3) compliance with such rule would entail extraordinary expense by the petitioner and would not be cost justified; or

(4) the issuance of the exemption furthers the purposes of this part.

(c) As used in this section, the term "outdoor lighting" means lighting by any stationary source which is not located inside any building.

EXEMPTION FOR QUALIFYING COGENERATION FACILITIES

SEC. 316. The Administrator, upon the filing of a petition, may, by order, grant an exemption from any prohibition under this subpart applicable to any qualifying cogeneration facility, if—

(1) he finds that the petitioner has demonstrated that economic and other benefits of cogeneration are unobtainable unless petroleum or natural gas, or both, are used in such facility, and

(2) includes in the order a statement of the basis for such finding.

EXEMPTION FOR HIGH BTU SYNTHETIC GAS DERIVED FROM COAL

SEC. 317. (a) Any person who is prohibited by any provision of section 311, 312, 313, or 314, or any rule or order, thereunder from using natural gas as a primary energy source may petition for a permanent exemption from such prohibition pursuant to this section.

(b) The Administrator shall grant an exemption, by order, from any prohibition on the use of natural gas as a primary energy source under this part or any rule or order thereunder if the Administrator finds that the petitioner has demonstrated that—

(1) such petitioner owns, or is entitled to receive, at the point of manufacture, synthetic gas derived from coal;

(2) the Btu content of such synthetic gas is equal to, or greater than, the Btu content of the natural gas to be covered by such exemption plus the approximate Btu content of any natural gas consumed or lost in transportation;

(3) such petitioner delivers, or arranges for the delivery of, such synthetic gas to a pipeline or pipelines which by transport or displacement are capable of delivering such synthetic gas, mixed with natural gas, to such person;

(4)(A) in the case of any such transportation in interstate commerce (within the meaning of the Natural Gas Act), such transportation has been certified by the Federal Power Commission;

(B) in the case of any other transportation, such transportation has been approved by the State authority which exercises regulatory jurisdiction over the rates and charges applicable to such transportation; and

(5) all necessary permits, licenses, or approvals from appropriate Federal, State, and local agencies (including Indian tribes) have been obtained for construction or operation of the facilities for the manufacture of the synthetic gas involved.

(c) In granting any exemption under this section, the Administrator shall, after consultation with the Federal Power Commission, consider the appropriateness of the use of the synthetic gas involved for the benefit of the petitioner rather than for other possible uses, including residential and small commercial users which consume less than 50 Mcf of natural gas per day on a peak day.

(d) Nothing in this part shall be construed as affecting the use by any major fuel-burning installation of synthetic gas which is derived from coal and which is not mixed with natural gas as the primary energy source of such installation.

(e) If, at the time the Administrator makes his findings under subsection (b), the petitioner has not demonstrated that all necessary permits, licenses, and approvals from appropriate Federal, State, and local agencies (including Indian tribes) have been obtained for the construction and operation of the facilities for the manufacture of the synthetic gas with respect to which such exemption is sought under this section, such exemption, if granted, shall not be effective until the Administrator determines that such permits, licenses, and approvals have been obtained.

TERMS AND CONDITIONS OF EXEMPTIONS

SEC. 318. Any exemption from any prohibition under this subpart shall be on such terms and conditions as the Administrator determines appropriate, including, in the case of any such exemption (other than from a prohibition under section 315), terms and conditions requiring the use of effective fuel conservation measures which are practicable and consistent with the purposes of this part. The terms and conditions applicable in the case of any temporary exemption shall be designed to insure that upon the expiration of such exemption, the persons covered by such will comply with the otherwise applicable prohibitions.

SUBPART C—ENFORCEMENT; ADMINISTRATION ADMINISTRATIVE PROCEDURES

SEC. 321. (a) Except to the extent otherwise provided in this section, rules prescribed under this part shall be made in accordance with the procedures set forth in section 553 of title 5, United States Code.

(b) Before prescribing any rule or issuing any order imposing a prohibition under this part, the Administrator shall publish such proposed rule or order in the Federal Register, together with a detailed statement of the reasons for such rule or order, and in the case of a rule, a detailed statement of any special circumstances or characteristics required to be taken into account in prescribing such rule. In the case of any such order, a copy shall be transmitted to the person who operates any such powerplant or installation subject to such order.

(c) Any petition for an exemption from any prohibition under this part or for any permit under section 313(h), shall be filed at such time and shall be in such form as the Administrator shall by rule prescribe. The Administrator, upon receipt of such petition, shall publish a notice thereof in the Federal Register together with a detailed summary of the reasons set forth in such petition for requesting such exemption or permit, and provide a minimum of 45 days for written comments thereon. Rules required under this subsection shall be prescribed not later than 90 days after the date of the enactment of this title.

(d) Any denial of any petition for an exemption or a permit under this part shall be published in the Federal Register, together with the reasons for such action.

(e) In the case of any rule or order by the Administrator imposing a prohibition or granting an exemption (or permit) under this part, any interested person shall be afforded an opportunity to present oral data,

views, and arguments, including an opportunity, by means of conferences or other informal procedures, to question—

(1) other interested persons who have made oral presentations, and

(2) employees and contractors of the United States who have made written or oral presentations or who have participated in the development of the proposed rule or order,

with respect to disputed issues of material fact, but only to the extent the Administrator determines that such questioning is likely to result in a more timely and effective resolution of such issues.

(f) A transcript shall be kept of any oral presentation made in accordance with this section.

(g)(1) Any rule or order to be prescribed by the Administrator imposing a prohibition or granting an exemption (or permit) under this part shall be published in the Federal Register and shall not take effect earlier than the 60th day after such rule or order is published.

(2) Any person aggrieved by a rule or order referred to in paragraph (1) or in section 331, or by the denial of such a rule or order, may at any time before the 60th day after the date such rule or order is prescribed (or denied), file a petition with the United States court of appeals for the circuit wherein such person resides, or has his principal place of business, for judicial review thereof. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Administrator. Such agency thereupon shall file in the court the written submissions to, and transcript of, the written or oral proceedings on which the rule was based as provided in section 2112 of title 28, United States Code.

(3) Upon the filing of the petition referred to in paragraph (2), the court shall have jurisdiction to review the rule or order (or denial thereof) in accordance with chapter 7 of title 5, United States Code, and to grant appropriate relief as provided in such chapter. No rule or order (or denial thereof) may be affirmed unless supported by substantial evidence.

(4) The judgment of the court affirming or setting aside, in whole or in part, any such rule or order (or denial thereof) shall be final, subject to review by the Supreme Court of the United States upon certain certiorari or certification as provided in section 1254 of title 28, United States Code.

(5) A copy of any proposed rule or order to be prescribed or issued by the Administrator which imposes a prohibition under this part (other than under section 314, 315, or 332), or which grants an exemption, shall be transmitted by the Administrator to the Administrator of the Environmental Protection Agency and the Administrator shall request such agency to comment thereon within the period provided to the public unless a longer period as provided by the Clean Air Act. In any such case, the Administrator of the Environmental Protection Agency shall be afforded the same opportunity to comment and question as is provided other interested persons under subsection (e).

(6) The Administrator, within 6 months after the initial public comment period applicable to any petition for an exemption or permit, shall grant or deny such exemption or permit, except that the Administrator may publish a notice in the Federal Register extending such period to a specified date. Such notice shall include the reasons for such extension.

ENFORCEMENT AND PENALTIES

SEC. 322. (a)(1) Any person who violates any provision of this part, or rule or order thereunder, shall be subject to a civil penalty, which shall be assessed by the Administrator, of not more than $25,000 for each violation. Each day of violation shall constitute a separate violation.

(2) In the case of any electric powerplant granted an exemption as a peakload electric powerplant, any person who operates such powerplant during any 12-calendar-month period in excess of that authorized in such exemption, shall be liable for a civil penalty, which shall be assessed by the Administrator. The amount of such civil penalty may not exceed an amount equal to $10 per barrel of oil or $3 per Mcf of natural gas used in operation of such powerplant in excess of that authorized in such exemption.

(3) Any person operating a major fuel-burning installation granted an exemption under section 312(d)(2) or section 313(d)(3) which, for any 12-calendar-month period, uses petroleum or natural gas, or both, in excess of that use allowed by such exemption shall be liable for a civil penalty, which shall be assessed by the Administrator. The amount of such civil penalty may not exceed an amount equal to $10 per barrel of oil or $3 per Mcf of natural gas which were used in excess of such use allowed by such exemption.

(4) Before assessing against any person any civil penalty under this title, the Administrator shall provide to such person notice of the proposed penalty. The determination to assess a civil penalty after such notice shall be made on the record after an opportunity for an agency hearing pursuant to section 554 of title 5, United States Code. The order of the Administrator assessing such penalty shall state the Administrator's findings and the basis for such assessment. If the person against whom a civil penalty is assessed fails to pay the penalty within the time prescribed in such order, the Administrator shall file a petition for enforcement of such order in any appropriate district court of the United States. A copy of the petition shall promptly be sent by registered or certified mail to the person against whom such order is sought to be enforced. At the time a petition for enforcement of such an order is filed, the Administrator shall certify and file in such court the record upon which such order was issued. The court shall have jurisdiction to enter a judgment enforcing, modifying, and enforcing as so modified, or setting aside in whole or in part, the order of the Administrator, or the court may remand the proceeding to the Administrator for such further action as the court may direct.

(b) Any person who willfully violates any provision of this part, or rule or order thereunder, shall be subject to a fine of not more than $50,000, or by imprisonment for not more than one year, or both, for each violation.

(c) Any individual director, officer, or agent of a corporation who willfully authorizes, orders, or performs any of the acts or practices constituting in whole or in part a violation of this part, or rule or order thereunder, shall be subject to penalties under this section without regard to any penalties to which the corporation may be subject, except that no such individual director, officer, or agent shall be subject to imprisonment under subsection (b), unless he also knows, or reasonably should have known, of notice of noncompliance received by the corporation from the Administrator.

(d) No person shall be subject to any penalty under this section with respect to the operation of any powerplant in excess of that allowed by an exemption granted on the basis of the operation of such powerplant as a peakload powerplant if it is demonstrated to the Administrator that such operation was necessary to meet peakload demand and that other peakload powerplants within the same system as such powerplant were unavailable for service due to unit or system outages.

(e) Whenever it appears to the Administrator that any person has engaged, is engaged, or is about to engage in acts or practices constituting a violation of this part or any rule or order thereunder, the Administrator may request the Attorney General to bring a civil action to enjoin such acts or practices, and, upon a proper showing, shall grant, without bond, mandatory or prohibitive injunctive relief, including interim equitable relief.

CITIZEN SUITS

SEC. 323. (a) Except as otherwise provided in subsection (b), any aggrieved person may commence a civil action for mandatory or prohibitive injunctive relief, including interim equitable relief, against—

(1) any person who is alleged to be in violation of any provision of this part, or any rule or order thereunder; or

(2) any Federal agency which has a responsibility under this part if there is an alleged failure of such agency to perform any act or duty under this part which is not discretionary.

The United States district courts shall have jurisdiction over actions brought under this section, without regard to the amount in controversy or the citizenship of the parties.

(b) No action may be commenced—

(1) under subsection (a)(1)—

(A) before the 6th day after the date on which the plaintiff has given notice of the violation (i) to the Administrator, and (ii) to any alleged violator of such provision, rule, or order; or

(B) if the Administrator has commenced and is diligently prosecuting a civil action to require compliance with such provision, rule, or order, but, in any such action, any person may intervene as a matter of right; or

(2) under subsection (a)(2), before the 60th day after the date on which the plaintiff has given notice of such action to the Administrator.

Notice under this subsection shall be given in such manner as the Administrator shall prescribe by rule.

(c) In any action brought under subsection (a), the Administrator, if not a party, may intervene as a matter of right.

(d) The court, in issuing any final order in any action brought under subsection (a), may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(e) Nothing in this section shall restrict any right which any aggrieved person (or class of aggrieved persons) may have under any statute or common law to seek enforcement of this part or any rule thereunder, or to seek any other relief (including relief against the Administrator).

(f) For purposes of this section, if a person owning, operating, or controlling any electric powerplant or major fuel-burning installation complied in good faith with a provision, rule, or order under this part, then he shall not be deemed to have violated any provision of this part by reason of the invalidity of such provision, rule, or order.

PRESERVATION OF CONTRACTUAL RIGHTS

SEC. 324. (a) The provisions of this section shall apply to any natural gas the use of which is prohibited by the provisions of section 311, 312, 313, or 314, or any rule or order thereunder.

(b)(1) Any person who receives such natural gas for such prohibited use pursuant to a firm service contract, in effect on April 20, 1977, between such person and any interstate pipeline, may transfer all or any portion of his interests under such contract to such interstate pipeline and receive in consideration therefor just compensation (as determined by the Administrator) from such pipeline.

(2)(A) Any person who receives such natural gas for such prohibited use pursuant to a contract, in effect on April 20, 1977, between such person and any person other than an interstate pipeline, may transfer his

contractual interests under such contract to any person and receive in consideration therefor just compensation (as determined by the Administrator) from the person to whom such contractual rights are transferred.

(B) Any person who would have transported or distributed the natural gas subject to a contract with respect to which contractual interests are transferred to any other person pursuant to subparagraph (A) shall be entitled to receive just compensation (as determined by the Administrator) from the person to whom contractual rights are transferred.

(c)(1) Any provision of any contract which prohibits any transfer authorized by subsection (b) or terminates such contract on the basis of such transfer shall be unenforceable in any court of the United States and in any court of any State.

(2) No State may enforce any prohibition on any transfer authorized by subsection (b).

(d) For purposes of this section—

(1) The term "just compensation" means—

(A) in the case of paragraphs (1) and (2)(A) of subsection (b), an amount not to exceed the amount by which—

(i) the reasonable costs (excluding capital costs) incurred during the remainder of the period of the contract described in subsection (b) and directly associated with the use of an alternative fuel by the applicable existing electric powerplant or major fuel-burning installation,

(ii) exceeds the price of natural gas, to which the provisions of this section apply, during such period; and

(B) in the case of subsection (b)(2)(B), an amount equal to any loss of revenue, during the remaining period of the contract with respect to which contractual interests are transferred pursuant to subsection (b)(2), to the extent such loss is directly incurred by reason of the discontinuation of the transportation or distribution of natural gas resulting from the transfer of contractual interests pursuant to subsection (b)(2) and is not offset by revenues derived from other transportation or distribution which would not have occurred if contractual interests had not been transferred.

(2) The term "interstate pipeline" means—

(A) any person who transports natural gas, the transportation of which is subject to the jurisdiction of the Federal Power Commission; and

(B) any person who receives natural gas, from a person described in subparagraph (A), for distribution to ultimate consumers.

(3) The term "contractual interests", with respect to a contract described in subsection (b)(1), includes the right to receive natural gas as affected by any applicable curtailment plan of the interstate pipeline filed with the Federal Power Commission or State regulatory authority.

(4) The term "State" means each of the several States, the District of Columbia, Puerto Rico, any territory or possession of the United States, and any political subdivision of any of the foregoing.

(e) For purposes of paragraphs (1) and (2)(A) of subsection (b), in determining the amount of just compensation the Administrator shall, to the maximum extent practicable, apply any liquidated damages provision set forth in the applicable contract, but in no event may such amount exceed the maximum prescribed in subsection (d)(1)(A).

(f) The amount paid by any interstate pipeline pursuant to any transferred contractual interests and any amount paid by such pipeline as just compensation pursuant to subsection (b) shall be deemed just and reasonable for purposes of sections 4, 5, and 7 of the Natural Gas Act. If a transfer of contractual interests pursuant to subsection (b) requires the sale of natural gas to an interstate pipeline by any person other than the person whose contractual interests are transferred, such former person and such sale shall not thereby become subject to the jurisdiction of the Federal Power Commission under the Natural Gas Act.

(g) No supplier of natural gas under any contract, with respect to which contractual interests have been transferred under this section, shall be required to supply natural gas in volume amounts which, on an annual basis, exceeds the lesser of—

(1) the annual volume determined by reference to maximum delivery obligations specified in such contract;

(2) the volume which would have been delivered or for which payment would have been made during such annual period pursuant to such contract but for the application of section 311, 312, 313, or 314 of this part; or

(3) the volume actually delivered or for which payment would have been made pursuant to such contract during the 12-calendar-month period ending immediately before such transfer of contractual interests pursuant to this section.

INFORMATION

SEC. 325. (a) For purposes of carrying out his responsibilities under this part, the Administrator may require, under the authority of this part or any other authority administered by him, any person owning, operating, or controlling any new or existing electric powerplant or major fuel-burning installation or any other person otherwise subject to this part to submit such information and reports of any kind or nature directly to the Administrator with respect to implementing the provisions of this part and insuring compliance with the provisions of this part and any rule or order thereunder. The provisions of section 11(d) of the Energy Supply and Environmental Coordination Act of 1974 shall apply with respect to information obtained under this section to the same extent and in the same manner as it applies with respect to energy information obtained under such section.

(b) In the case of responsibilities expressly given by this part to the President or the Federal Power Commission, subsection (a) shall be applied as if the references to the Administrator were references to the President or the Federal Power Commission, as the case may be.

SUBPART D—MISCELLANEOUS PROVISIONS

EMERGENCY POWERS OF THE PRESIDENT

SEC. 331. (a) If the President—

(1) declares a severe energy supply interruption, as defined in section 3(8) of the Energy Policy and Conservation Act, or

(2) finds, and publishes such finding, that a national or regional fuel supply shortage exists or may exist which the President determines—

(A) is, or is likely to be, of significant scope and duration, and of an emergency nature;

(B) causes, or may cause, major adverse impact on public health, safety, or welfare or on the economy; and

(C) results, or is likely to result, from an interruption in the supply of coal or from sabotage, or an act of God;

the President may, by order, allocate coal to any electric powerplant or major fuel-burning installation, in accordance with such terms and conditions as he may prescribe, to insure reliability of electric service or prevent unemployment, or both.

(b) In the event the President declares a severe energy supply interruption, as defined in section 3(8) of the Energy Policy and Conservation Act, the President may, by order, prohibit any new or existing electric powerplant or major fuel-burning installation from using natural gas or petroleum, or both, as a primary energy source for the period specified in the order. Any such order may authorize a waiver or modification of any Federal, State, or local law, standard limitation, or other requirement applicable to emissions of environmental pollutants or any applicable environmental requirement if the President finds, and publishes such findings in the Federal Register, that such waiver or modification is necessary by reason of the prohibitions of such order (and the supply interruption on which it is based) and that no alternative means are practicable which would result in compliance with such environmental requirements. Any such waiver or modification shall be made under such terms and conditions as the President may prescribe to insure compliance with applicable environmental requirements to the maximum extent practicable under the circumstances. Such waiver or modification may cause or contribute to a violation of a primary ambient air quality standard only to the extent the President finds and publishes his finding that no alternative means are practicable to avoid such violation.

(c) The President may, by order, stay the application of any provision of this part, or any rule or order thereunder—

(1) in the case of any provision, rule, or order applicable to any new or existing electric powerplant, if the Federal Power Commission finds, and publishes such finding, that an emergency exists, due to national, regional, or systemwide shortages of coal or other fuels, or disruption of transportation facilities, which emergency is likely to affect reliability of service of any such electric powerplant; and

(2) in any other case, to the extent the President determines is necessary to alleviate or prevent any emergency adversely affecting the public health, safety, or welfare.

(d)(1) Except as provided in paragraph (3), any order issued by the President under this section shall not be effective for longer than the duration of the interruption or emergency, or 90 days, whichever is less.

(2) Any such order may be extended by a subsequent order which the President shall transmit to the Congress in accordance with section 551 of the Energy Policy and Conservation Act. Such order shall be subject to congressional review pursuant to such section.

(3) Notwithstanding paragraph (1), any order issued under this section shall remain effective throughout the 15-calendar-day period during which any order described in paragraph (2) is subject to congressional review under section 551 of the Energy Policy and Conservation Act.

(e) The authority of the President to issue any order under this section may not be delegated. This subsection shall not be construed to prevent the President from directing any Federal agency to issue rules or regulations implementing such order.

(f) Any order issued under this section shall be published in the Federal Register. To the greatest extent practicable, the President shall, before issuing any order under this section, but in no event later than 5 days after issuing such order, report to Congress of his intention to issue such order and state his reasons therefor.

FEDERAL ACTIVITIES

SEC. 332. (a) No Federal facility (or unit thereof)—

(1) constructed by or on behalf of the United States or any agency or instrumentality thereof, after the effective date of this part, or

(2) effective beginning January 1, 1985, owned by the United States or any agency or instrumentality thereof,

shall use natural gas as the primary energy source for such facility or unit, unless the President determines in each case and in-

forms the Congress of his determination, and the reasons therefor, that such use is necessary for national security reasons or to meet other requirements of law. The President shall review each such determination every 2 years and submit a report to the Congress on the results of such review. Any such facility permitted to use natural gas by the President shall establish and carry out effective fuel conservation measures, as determined by the Administrator.

(b) In order to implement the purposes of this part, the President shall, not later than 30 days after the effective date of this part, cause to be issued an order—

(1) requiring each Federal agency which is empowered to extend Federal assistance by way of grant, loan, contract, or other form of financial assistance, to promptly effectuate the purposes of this part, particularly those relating to the conservation of petroleum and natural gas, by rule, in such contracting or assistance activities within 180 days after issuance of such order, and

(2) setting forth procedures, sanctions, penalties, and such other provisions, as the President determines necessary to carry out such requirement effectively, including procedures for each agency to annually transmit to the President, and make available to the public, a report on the actions taken and to be taken to implement such order.

(c) The President may exempt by order any specific grant, loan, contract, or other form of financial assistance from all or part of the provisions of this section if he determines such exemption is in the national interest. The President shall notify the Congress in writing of such exemption at least 60 days before it is effective.

(d) The President shall annually submit a detailed report to the Congress on the actions taken to implement this section, including the progress and problems associated with implementation of this section.

IMPACT ON EMPLOYEES

SEC. 333. (a) The Administrator shall conduct continuing evaluations of potential loss or shifts of employment which may result from the issuance of any rule or order imposing any prohibition under this part, including, if appropriate, investigating threatened plant closures or reductions in employment allegedly resulting from such rule or order. The results of such evaluations and each investigation shall promptly be made available to the public.

(b) On a written request filed with the Administrator by or on behalf of any employee who is discharged or laid off, threatened with discharge or layoff, or otherwise discriminated against, by any person because of the alleged effects of any such rule or order, the Administrator shall investigate the matter and, at the request of any party, shall hold public hearings, after not less than 30 days notice, at which the Administrator shall require the parties, including any employer involved, to present information on the actual or potential effect of such rule or order on employment and on any alleged employee discharge, layoff, or other discrimination relating to rule or order and the detailed reasons or justification therefor. At the completion of such investigation, the Administrator shall make findings of fact as to the effect of such rule or order on employment and on the alleged employee discharge, layoff, or discrimination and shall make such recommendations as he deems appropriate. Such report, findings, and recommendations shall be available to the public.

(c) Nothing in this section shall be construed to require or authorize the Administrator to modify or withdraw any rule or order under this part.

ANNUAL REPORT

SEC. 334. The Administrator shall submit to the Congress on March 1 of each year a detailed report prepared by him in conjunction with the Administrator of the Environmental Protection Agency of the actions taken under this part and under section 2 of the Energy Supply and Environmental Coordination Act of 1974 during the preceding calendar year, and the actions to be taken. Each such report shall include data on the effectiveness of this part in achieving the purposes of this part.

AUTHORIZATION OF APPROPRIATIONS

SEC. 335. (a) There is authorized to be appropriated to the Administrator for fiscal year 1978 $11,500,000, including such sums as are authorized in section 29 of the Federal Energy Administration Act of 1974, to carry out the provisions of this part (other than section 336(a)) and section 2 of the Energy Supply and Environmental Coordination Act of 1974.

(b) There is authorized to be appropriated to the Administrator of the Environmental Protection Agency $2,000,000 in fiscal year 1978 for the report required under section 336(a).

STUDIES

SEC. 336. (a) The Administrator of the Environmental Protection Agency shall conduct, on a continuing basis, a program of monitoring, to the greatest extent possible and in accordance with the applicable authorities and provisions of the Clean Air Act, the emissions from new and existing electric powerplants and major fuel-burning installations required to use coal or other fuels by reason of this part or otherwise using coal or other fuels and the effect thereof on the public health, safety, and welfare. Such Administrator shall submit an annual report to the Congress on such program. In carrying out his responsibilities under this section, the Administrator of the Environmental Protection Agency shall consult with the other Federal and State agencies concerned with the health effects of such emissions.

(b) The Administrator, in consultation with the National Governors' Conference, other Federal agencies, interested persons, and organizations, shall conduct a study of the socioeconomic impacts of expanded coal production on States, including local communities, and on the public, including the adequacy of housing and public, recreational, and cultural facilities for coal miners and their families and the effect of any Federal or State laws or regulations on providing such housing and facilities. Within 1 year after the date of the enactment of this part, the Administrator shall submit a detailed report on the results of such study to the Congress, together with any recommendations for legislation he may consider appropriate.

(c) The Administrator shall conduct a detailed study of the uses of petroleum and natural gas as a primary energy source for combustors. In conducting such study, the Administrator shall—

(1) identify those categories of major fuel-burning installations in which the substitution of coal or other fuels for petroleum and natural gas is economically and technically feasible, and

(2) determine the estimated savings of natural gas and petroleum expected from such substitution.

Within 1 year after the date of the enactment of this part, the Administrator shall submit a detailed report on the results of such study to the Congress, together with any recommendations for legislation he may consider appropriate.

EFFECTS OF OTHER LAWS ON PROCEDURES

SEC. 337. The procedures applicable under this part, or section 2 of the Energy Supply and Environmental Coordination Act of 1974, shall not—

(1) be considered to be modified or affected by any other provision of law unless such other provision specifically amends such part or section, or

(2) be considered to be superseded by any other provision of law unless such other provision does so in specific terms, referring to this part or such section, and declaring that such provision supersedes this part or such section.

CONFORMING AMENDMENTS

SEC. 338. (a) Section 11(g) of the Energy Supply and Environmental Coordination Act of 1974 is amended—

(1) by striking out paragraph (2), and

(2) in paragraph (1) by striking out "(g)(1)" and inserting in lieu thereof "(g)".

(b) The preceding provisions of this part shall not affect any order issued under subsection (a), or any final order under subsection (c), of section 2 of such Act, and the authority of the Administrator to amend, repeal, rescind, modify, or enforce any such order, or rules applicable thereto shall remain in effect notwithstanding any limitation of time otherwise applicable to such authority. Except as provided in the preceding sentence, the authority of the Administrator under such section 2 of such Act shall terminate on the effective date of this part.

EFFECTIVE DATES

SEC. 339. Unless otherwise provided in this part, the provisions of this part shall take effect 180 days after the date of the enactment of this title, except that the Administrator may issue rules pursuant to such provisions at any time after such date of enactment, which rules may take effect no earlier than 180 days after such date of enactment.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. ROBERT C. BYRD. Mr. President, has the order entered into earlier today been fully consummated?

The PRESIDING OFFICER. The order has been fully consummated and the proper amendments have been put forward.

The bill having been read the third time, the question is, Shall it pass?

The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Montana (Mr. METCALF), and the Senator from Alabama (Mr. SPARKMAN) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. HUMPHREY) and the Senator from Alabama (Mr. SPARKMAN) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senastanding job that he has done in contor from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from Virginia (Mr. SCOTT),

the Senator from Connecticut (Mr. WEICKER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. BAKER) and the Senator from Oregon (Mr. HATFIELD) would each vote "yea."

The result was announced—yeas 74, nays 8—as follows:

[Rollcall Vote No. 356 Leg.]

YEAS—74

Anderson	Glenn	Moynihan
Bayh	Gravel	Muskie
Bentsen	Hansen	Nelson
Biden	Hart	Nunn
Bumpers	Haskell	Pearson
Burdick	Hatch	Pell

Goldwater	McClellan	Weicker
Griffin	McClure	Young

So the bill (H.R. 5146), as amended, was passed.

Mr. HASKELL. Mr. President, I ask unanimous consent that H.R. 5146 be ordered printed as passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make such technical and clerical corrections as may be necessary in the engrossment of the Senate amendments to H.R. 5146.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HASKELL. Mr. President, I very briefly take this occasion to compliment the members of the Energy Committee staff that worked on this bill. I particularly want to mention Richard Grundy, who has spent a great deal of time and without whose assistance this bill would not have been passed. I also mention Thomas Loughlin.

I also wish to mention Ted Orf, who is on the minority staff. They have all worked very well together and without them, this bill would never have come to the floor.

Mr. JACKSON. Will the Senator yield?

Mr. HASKELL. Yes.

Mr. JACKSON. I want to express my appreciation to the able Senator from Colorado (Mr. HASKELL) for the outstanding job that he has done in connection with the legislation just passed. It has been a long, tedious task for any Member of the U.S. Senate and he has handled it in a professional way, ably assisted by a very fine staff.

The same goes for the minority side, Senator HANSEN and his staff, who have made possible this legislation. I commend the Senators most highly for what they have accomplished.

Mr. HASKELL. I thank the Senator.

Mr. ROBERT C. BYRD. Mr. President, I would be remiss if I did not join in complimenting the distinguished Senator, the very distinguished Senator, from Colorado (Mr. HASKELL) on his superb managership of this difficult but important energy measure. He has demonstrated a very thorough knowledge of the subject, a superb prowess in the handling of the bill, and the Senate is justly proud of his performance.

I also compliment his comanager (Mr. HANSEN) and express appreciation to both for their cooperation and their fine craftsmanship and their patience and dedication to duty, which has eventuated in the enactment of an important segment of the President's energy package all in 1 day, several controversial amendments.

Let me also thank the staff and the Members of the Senate on both sides of the aisle for standing together during a long day and completing action on the bill at this hour of 8:41 p.m. on our second day back from the statutory recess.

Mr. HASKELL. Mr. President, I thank the majority leader.

FURTHER ROUTINE MORNING BUSINESS

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, and the withdrawal of the nomination of Peter E. Corning, of New York, to be U.S. attorney for the northern district of New York, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 3:25 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that:

The House agrees to the amendment of the Senate to the bill (H.R. 5294) to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors.

The House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7933) making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes; that the House recedes from is disagreement to the amendments of the Senate numbered 20, 30, 40, 41, 46, 47, 54, 63, 67, 71, 76, and 82 and concurs therein, each with an amendment in which it requests the concurrence of the Senate.

ENROLLED BILL SIGNED

At 6:15 p.m., a message from the House of Representatives delivered by Mr. Berry announced that the Speaker has signed the enrolled bill (S. 1153) to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communication which was referred as indicated:

EC–1840. A letter from the U.S. Consumer Product Safety Commission, the U.S. Environmental Protection Agency, the Food and Drug Administration, and the Occupational Safety and Health Administration advising that the four agencies have resolved jurisdictional problems in the regulation of chlorofluorocarbons.

Mr. CRANSTON. Mr. President, I ask unanimous consent that a communication from the U.S. Consumer Product Safety Commission and other agencies relative to coordinating agency efforts to control hazardous materials for the protection of public health, be referred jointly to the Committees on Environment and Public Works; Human Resources; and Commerce, Science, and Transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. ROBERT C. BYRD:

S. 2067. A bill for the relief of Cesar B. Ibanez, II, M.D.; and

S. 2068. A bill for the relief of Nelio S. Abrenica, M.D.; to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 2069. A bill to amend section 312 of the Immigration and Nationality Act; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 2070. A bill to amend title II of the Social Security Act to provide that widow's and widower's benefits shall be based upon the amount of the monthly benefit of the deceased individual in the case of a deceased individual who delayed his retirement; to the Committee on Finance.

By Mr. HART (for himself and Mr. HATHAWAY):

S. 2071. A bill to establish a commission to study the laws and policies of the United States and major industries for their effect on competition, and for other purposes; to the Committee on the Judiciary.

By Mr. DECONCINI:

S. 2072. A bill to amend the Jury Selection and Service Act of 1968, as amended, to make the excuse of prospective jurors from Federal jury service on the grounds of dis-

tance from the place of holding court contingent upon a showing of hardship on an individual basis; to the Committee on the Judiciary.

By Mr. JOHNSTON:

S. 2073. A bill to amend the Emergency Petroleum Allocation Act of 1973 concerning domestic crude oil pricing and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DECONCINI (by request):

S. 2074. A bill to amend title 28, United States Code, to provide in civil cases for juries of six persons, to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend the coverage of the Federal Employees Compensation Act to all jurors in U.S. district courts; to the Committee on the Judiciary.

By Mr. DECONCINI (for himself and Mr. WALLOP):

S. 2075. A bill to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service; to the Committee on the Judiciary.

By Mr. MATHIAS:

S.J. Res. 80. A joint resolution to authorize and request the President to issue a proclamation designating November 8, 1977, as "National Law Student Recognition Day"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATHIAS:

S. 2069. A bill to amend section 312 of the Immigration and Naturalization Act; to the Committee on the Judiciary.

Mr. MATHIAS. Mr. President, I am today introducing a bill which would amend section 312 of the Immigration and Naturalization Act to exempt certain applicants for naturalization from the requirement of a working knowledge of the English language.

Since 1906, naturalization has been denied to any alien who could not speak the English language. At present, section 312 provides for an exemption from the English literacy requirement for anyone wishing to become a naturalized American citizen who has reached the age of 50 and has been living in the United States for periods totaling 20 years, as of 1952. As applied today, this exemption would only affect those who are over the age of 75 and have lived in the United States for at least 45 years.

My bill would bring this section up to date. It would provide that any person who is "over 50 years of age and has been living in the United States for periods totaling at least 20 years" at the time of the filing of his petition for naturalization, would be eligible for the exemption specified in section 312.

This bill presents no new policy question. Long ago the Congress decided that persons over 50 years of age with 20 years of residence, who were otherwise qualified for naturalization, should be excused from the test of their ability to read, write, and speak the English language. There is no reason this exemption should not be continued and updated to apply to all those wishing to become American citizens.

The House Judiciary Committee has before it a similar proposal, H.R. 667, introduced by Congressman PETER RODINO earlier in this session. I invite my colleagues to join with me in supporting both of these bills.

Since the founding of this great Nation, immigrants from around the world have been welcomed to our shores. This bill if enacted, will enable many long time residents of this country to realize a cherished objective—to become American citizens. We should not thwart this objective merely because they came to this country too late in life to learn a new language.

As it was so aptly put by one of my constituents:

The Congress can demonstrate its understanding and recognition of the so-called "heritage groups" or "ethnic groups" of our country by the enactment of (such) an amendment to Section 312.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2069

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, the first proviso contained in paragraph (1) of section 312 of the Immigration and Nationality Act (8 U.S.C. 1423) is amended by striking out "or to any person who, on the effective date of this Act, is over fifty years of age and has been living in the United States for periods totaling at least twenty years" and by inserting in lieu thereof the following: "or to pay person who, on the date of the filing of his petition for naturalization as provided in section 334 of this Act, is over fifty years of age and has been living in the United States for periods totaling at least twenty years".

By Mr. HART (for himself and Mr. HATHAWAY):

S. 2071. A bill to establish a commission to study the laws and policies of the United States and major industries for their effect on competition, and for other purposes; to the Committee on the Judiciary.

COMPETITION REVIEW ACT

Mr. HART. Mr. President, today Senator HATHAWAY and I are introducing the Competition Review Act. This bill is patterned after a similar measure by Representative UDALL and 27 consponsors. The purpose of the bill is to promote increased competition wherever it can be shown to be economically feasible and desirable.

We have seen such an increase in concentrated economic power—and the inevitable expansion of Government regulatory power to control it—that there is a real danger free enterprise may go the way of the dinosaur. Before it is gone for good, it deserves one last, hard look. This bill, therefore, calls for a thorough examination of the degree of competition and concentration in 11 basic U.S. industries, as well as the laws and regulations which affect the operation of the marketplace. It should provide comprehensive data and recommendations for revitalizing the free enterprise system.

The bill would establish a Competition Review Commission, comprised of experts representing the academic community, labor, management, consumers, and the executive and legislative branches of Government.

The Competition Review Commission would first undertake a comprehensive study of the laws, regulatory policies, enforcement procedures, and any other governmental practices which have a significant impact on competition and concentration. The Commission would then determine the extent and nature of competition within 11 basic industries, and within any other sectors of the economy as the Commission deems necessary for a complete analysis of competition in America.

The Commission would then evaluate the effect of the current structure and operation of the marketplace on: Employment, price levels, profit levels, efficiency, innovation, the quality of goods and services produced, the ability of U.S. corporations to compete with their foreign counterparts, regional economic development, the political and social impact of industrial concentration, and the net benefit or harm of such elements to the U.S. economy.

The Commission would be required to submit a preliminary report to the President and the Congress within 3 years and its final report within 5 years following the enactment of this bill into law. The Commission would terminate within 90 days after submitting its final report.

This study would produce the first, comprehensive, scholarly and independent assessment of the state of competition in our economy. It would examine the trends toward greater economic concentration in both business and labor, and would evaluate the effectiveness of Government intervention in the marketplace. It would identify and demonstrate those areas where fair and open competition—the lifeblood of our economy—has been threatened, and why. It would establish the costs and benefits—both social and economic—of steps needed to increase competition. And it would enable intelligent decisions to be made to insure the long-term health of our economy.

Mr. President, the concentration of economic power—especially corporate power—is on the rise. By the end of 1974, the top 200 corporations listed on the "Fortune 500"—which comprises less than one-tenth of 1 percent of all manufacturing companies—accounted for two-thirds of the manufacturing assets and three-fifths of the sales, employment and net income after sales taxes. These 200 companies held a greater share of U.S. assets in 1974 than was held by the top 500 firms in 1954. If corporate power continues to grow at this rate, the top 200 corporations in the 1980's will have roughly three-fourths of all U.S. assets—about the same share as is held by the top 500 corporations today.

There is a great debate as to the significance of such statistics. While concentration is thought by many economists to mark an absence of competition,

it is considered by others to be merely a characteristic of industries with extremely high capital requirements. The data collected by the Competition Review Commission should help to resolve some of the issues raised by such competing theories of concentration, and to narrow those areas in which objective conclusions cannot be reached.

On this question and others, the information provided by the Competition Review Commission would give the Congress a basic tool which would otherwise be unavailable, but which is essential if Congress is to more fully appreciate the impact of our laws on competition generally.

The Competition Review Commission would also help delineate the proper roles of the Congress, of the executive branch and of the judicial branch in preserving our free enterprise system.

Attorney General Bell has recently noted the burden imposed on the courts by antitrust cases, and he specifically expressed concern about the power of the courts to resolve certain cases, such as those in which excessive market power that is not solely attributable to predatory or strictly anticompetitive practices is alleged. He suggested that Congress may be the better forum for determining those kinds of "political judgments"—especially where the pattern of market dominance is such that industrial reorganization may be the only practical remedy to insure sufficient competition and to curb political or social influence.

I agree with Attorney General Bell that we need to wrestle with these kinds of questions. This study will aid the Congress in developing a coherent antitrust policy which can be applied consistently in a way that makes sense and that the American people can support.

Mr. President, we should not abandon the idea of an open, competitive free market system before it has been given a fair chance. We should encourage the development of a healthy small- and medium-sized business community—threatened by neither monopolistc or oligopolistic firms on the one hand, nor a mountain of Government redtape on the other.

It is not a question of simply "busting the trusts" or removing Government from the marketplace. Deconcentration and deregulation must go hand in hand if we are to restore genuine competition to overconcentrated, overregulated industries. That is why the scope of the proposed study includes an examination of both our Government and our private sector, within the context of a global economy.

The measure we are offering today does not say, "big is bad" or, "small is beautiful." This measure says, "let's make sure we're heading in the right direction."

I ask unanimous consent that the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and the analysis were ordered to be printed in the RECORD, as follows:

S. 2071

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Competition Review Act".

ESTABLISHMENT

SEC. 2. There is hereby established as an independent instrumentality of the United States in the executive branch a Commission to be known as the Competition Review Commission (hereinafter referred to in this Act as the "Commission").

MEMBERS

SEC. 3. (a) The Commission shall be composed of the following individuals:

(1) The chairman and ranking minority member of the Subcommittee on Antitrust of the Committee on the Judiciary of the House of Representatives.

(2) The chairman and ranking minority member of the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary of the United States Senate.

(3) Four individuals appointed by the President of the United States, from among individuals in private life who shall be specifically qualified to serve on the Commission by virtue of their education, training, or experience, and who shall be selected from the fields of labor, business, consumer interests, and the academic community.

(4) The chairman of the Federal Trade Commission or his designate.

(5) The Assistant Attorney General of the United States in charge of the Antitrust Division of the United States Department of Justice or his designate.

(6) The Secretary of Commerce or his designate.

(b) Members shall be appointed for the duration of the activities of the Commission.

(c) A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(d) The Chairman of the Commission shall be appointed by the President.

(3) The Commission shall meet at the call of the Chairman, or at the call of a majority of the Commission members, but shall meet at least every other month during the life of the Commission.

DUTIES

SEC. 4. (a) The Commission shall conduct a comprehensive study of the laws, regulations, policies, and any other governmental practices of the United States which have a significant impact on competition including, but not limited to, the antitrust laws and exemptions to the antitrust laws, the patent laws, the internal revenue laws and regulations, the National Labor Relations Act, regulatory policies, and Federal contracting and bidding practices.

(b) The Commission shall study the major industries of the United States to determine the extent and nature of competition within such industries. Such studies shall include the following industries:

(1) chemicals, pharmaceuticals, and other ethical drugs;

(2) electrical machinery and equipment;

(3) electronic computing and communications equipment;

(4) energy;

(5) iron and steel;

(6) nonferrous metals;

(7) motor vehicles;

(8) transportation;

(9) newspaper publishing and communications;

(10) financial institutions;

(11) the food industry; and

(12) such other sectors of industry or commerce as the Commission deems may be necessary or useful for comprehensive understanding of the competitive status of American industry and commerce.

(c) In the course of the studies conducted under subsections (a) and (b) of this section, the Commission shall evaluate the laws, enforcement procedures, policies, and other actions of the Federal government and the degree of concentration within the major industries considering the effect of such concentration and such laws and regulations and policies on: employment, price levels, profit levels, efficiency, innovation, the quality of goods and services produced, the ability of the United States corporations to compete with their foreign counterparts, regional economic development, the political and social impact of industrial concentration, and the net benefit or harm of such elements to the United States economy.

(d) The Commission may make such additional studies as it deems appropriate to carry out its other duties under this Act.

DIRECTOR AND STAFF

SEC. 5. (a) The Commission shall have an Executive Director who shall be appointed by the Commission and who shall be compensated as provided in section 10 of this Act.

(b) Subject to such rules as may be adopted by the Commission, with the approval of the Commission, the Director may appoint and fix the pay of such additional personnel as he deems desirable.

(c) Subject to such rules as may be adopted by the Commission, with the approval of the Commission, the Commission may procure temporary and intermitent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates for individuals not to exceed $200 per diem.

(d)(1) The President may detail to the Commission, on a nonreimbursable basis, such employees of any department, agency, or other establishment in the executive branch as he determines to be necessary to assist the Commission in carrying out its duties under this Act, with special consideration being given to the detailing of employees of the Federal Trade Commission and of the Antitrust Division of the Department of Justice who have professional training and experience in dealing with issues relating to competition and to the economic impact of regulatory activity. No individual shall be detailed to the Commission for any period in excess of ten months unless such individual volunteers to serve with the Commission for such longer period.

(2) For purposes of carrying out the study required by section 4 of this Act, the individuals detailed to the Commission pursuant to paragraph (1) of this subsection shall be organized into such task forces as the Commission determines are necessary. Each such task force shall have at least one individual assigned to it who has professional training and experience in dealing with issues relating to competition and to the economic impact of regulatory activity. Not more than half of the professional positions on any task force may be filled with individuals detailed from independent Federal regulatory agencies which are being studied by such task force.

POWERS OF COMMISSION

SEC. 6. (a) The Commission may for the purpose of carrying out this Act hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission may deem advisable. The Commission may administer oaths or affirmations to witnesses appearing before it.

(b) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this Act. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(c) (1) The Commission shall have power to issue subpoenas requiring the attendance and testimony of witnesses and the production of any evidence that relates to any matter which the Commission is empowered to study or investigate by this Act. Such attendance of witnesses and the production of such evidence may be required from any place within the United States at any designated place of hearing within the United States.

(2) If a person issued a subpoena under paragraph (1) refuses to obey such subpoena or is guilty of contumacy, any court of the United States within the judicial district within which the hearing is conducted or within the judicial district within which such person is found or resides or transacts business may, upon application by the Commission, order such person to appear before the Commission to produce evidence or to give testimony touching the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

(3) The subpoenas of the Commission shall be served in the manner provided for subpoenas issued by a United States district court under the Federal Rules of Civil Procedure for the United States district courts.

(4) All process of any court to which application may be made under this section may be served in the judicial district wherein the person required to be served resides or may be found.

(d) The Commission may exercise all powers of the Federal Trade Commission under section 6(b) of the Federal Trade Commission Act and all powers of the Attorney General of the United States under the Antitrust Civil Process Act.

LITIGATION

SEC. 7. An action brought in any court of the United States challenging any provision of this Act or any action of the Commisison pursuant to this Act shall be filed only in the United States District Court for the District of Columbia Circuit or the United States Court of Appeals for the District of Columbia Circuit as the case may be and shall be advanced on the calendar of such courts in advance of all other matters.

REPORTS

SEC. 8. (a) Not later than six months after the last member of the Commission is appointed and qualifies the Commission shall transmit to the President and the Speaker of the House of Representatives and the President pro tempore of the Senate a specific plan for the organization, structure, and accomplishment of the studies required under section 4 of this Act.

(b) Not later than six months after the transmittal of the plan required by subsection (a) of this section the Commission shall transmit to the President and the Speaker of the House of Representatives and the President pro tempore of the Senate a specific timetable for and preliminary outline of the studies required under section 4 of this Act.

(c) The Commission shall make such interim reports as it deems advisable and shall make a preliminary report not later than three years after the date of the transmittal required under subsection (b) of this section.

(d) Not later than five years after the date of enactment of this Act the Commission shall transmit its final report and the studies required under section 4 of this Act to the President and Speaker of the House of Representatives and the President pro tempore of the Senate.

CONFIDENTIALITY

SEC. 9. Notwithstanding any other provision of law, all information obtained by the Commission shall—

(1) remain in the custody of the Commission or of the Administrator of General Services without disclosure except to the staff of the Commission while engaged in the duties of the Commission; and

(2) be held under seal by the Administrator of General S· ·vices for a period of not less than five years after the termination of the Commission pursuant to section 11 of this Act.

TECHNICAL AMENDMENT

SEC. 10. Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(141) Executive Director, Competition Review Commission.".

TERMINATION

SEC. 11. The Commisison shall cease to exist ninety days after submitting its final report pursuant to section 8 of this act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.

COMPETITION REVIEW ACT OF 1977

SECTION-BY-SECTION ANALYSIS

Sec. 1. The act may be cited as the "Competition Review Act".

Sec. 2. Establishment of Study Commission—The "Competition Review Commission" is established as an independent instrumentality in the executive branch.

Sec. 3. Commission membership—(a) The Commission shall be composed of 11 voting members: (1) the Chairman and ranking minority member of the Subcommittee on Antitrust of the Committee on the Judiciary of the House of Representatives, (2) the Chairman and ranking minority member of the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary of the United States Senate, (3) four individuals appointed by the President from among individuals in private life selected from the fields of labor, business, consumer interests and the academic community, (4) the Chairman of the Federal Trade Commission or his designate, (5) the Assistant Attorney Geenral in charge of the Antitrust Division in the Department of Justice, and (6) the Secretary of Commerce or his designate. (b) Members are appointed for the life of the Commission. (c) A vacancy is filled in the same manner in which the original appointment is made. (d) the Commission Chairman will be appointed by the President. (e) The Commission will meet at the call of the Chairman or the majority of Commission members, but will meet at least every other month.

Sec. 4. Commission duties—(a) The Commission will study the laws, regulations, policies and any other governmental practices which have a significant impact on competition. This would include, but would not be limited to, the antitrust laws and exemptions to them, the patent laws, the internal revenue laws and regulations, the National Labor Relations Act, regulatory policies, and Federal contracting and bidding practices. (b) The Commission will then assess the state of competition within major industries including, but not limited to: chemicals, pharmaceuticals, and other ethical drugs; electrical machinery and equipment; electronic computing and communication equipment; energy; iron and steel; non-ferrous metals; motor vehicles; transportation; newspaper publishing and communications; financial institutions; and, the food industry. (c) The Commission will then evaluate the practices of the government and the degree of economic concentration, considering the effect of each on: employment, price levels, profit levels, efficiency, innovation, the quality of goods and services produced, the ability of American corporations to compete with their foreign counterparts, regional economic development, the political and social impact of industrial concentration, and the net benefit or harm of such elements to the United States economy. (d) The Commission may make additional studies as it deems appropriate.

Sec. 5. Commission director and staff—(a) The Commission will have an Executive Director appointed by the Commission and compensated at Executive Level V pay. (b) Subject to Commission rules, the Director may appoint and fix the pay of additional staff as he deems necessary, with the approval of the Commission. (c) The Commission may procure temporary services, but may not exceed $200 per diem as a level of compensation. (b) The President may detail to the Commission any employees of the government on a nonreimbursable basis for up to ten months. However, not more than half of the Commission staff on any task force may be filled with individuals detailed from independent Federal regulatory agencies which are being studied by that task force.

Sec. 6. Powers of Commission—(a) The Commission may hold hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission deems advisable. The Commission may administer oaths or affirmations to witnesses appearing before it. (b) The Commission may secure directly from any department or agency of the United States information it deems necessary for completing its task. (c) The Commission has the power to issue subpenas requiring the attendance and testimony of witnesses and the production of any evidence it deems necessary to complete its task. Anyone refusing to obey a subpena issued by the Commission would be subject to a contempt of court citation. Subpenas will be served in the manner provided by a United States district court under the Federal Rules of Civil Procedure for the United States district courts. (d) The Commission may exercise all powers of the Federal Trade Commission under section 6(b) of the Federal Trade Commission Act and all powers of the Attorney General of the United States under the Antitrust Civil Process Act.

Sec. 7. Litigation—Any litigation arising from the enactment of this bill into law shall be filed only in the United States District Court of Appeals for the District of Columbia Circuit or the United States Court of Appeals for the District of Columbia as the case may be and will be advanced on the calendar of such courts in advance of all other matters.

Sec. 8. Commission reports—(a) Not later than six months after the last member of the Commission is appointed, the Commission will submit to the President, the Speaker of the House and the President pro tempore of the Senate a specific plan for the organization, structure and accomplishment of the studies required under Section 4 of the bill. (b) Not later than six months after submitting the report required by (a) above, the Commission will submit a report to the President, the Speaker of the House and the President pro tempore of the Senate a specific timetable for and preliminary outline of the studies required under Section 4 of the bill. (c) The Commission will make any interim reports it deems advisable and shall make a preliminary report not later than three years after submitting the report required by (b) above. (d) Not later than five years after the date of enactment of this bill, the Commission will submit its

final report and the studies required under Section 4 of the bill to the President, the Speaker of the House and the President pro tempore of the Senate.

Sec. 9. Confidentiality of data collected by Commission—All information obtained by the Commission will remain in the custody of the Commission or of the Administrator of General Services without disclosure except to the staff of the Commission while engaged in the duties of the Commission. The data will be held under seal by the Administrator of General Services for at least five years after the termination of the Commission.

Sec. 10. Technical amendment—Provides for pay of Executive Director of the Commission.

Sec. 11. Termination of Commission—The Commission will terminate ninety days after submitting its final report.

Sec. 12. Authorization of appropriations—There are authorized to be appropriated such sums as may be necessary to carry out the purposes of the bill.

Mr. HATHAWAY. Mr. President, it is my pleasure to join Senator HART in introducing the Competition Review Act of 1977.

The small businessman in America is an endangered species. Large corporations dominate the industrial scene, both in this country and aboard. Their enormous resources and power enable these corporate giants to exert tremendous influence over the economic, social, and political spheres of American life.

I am deeply concerned that, unless action is taken to correct the structural imbalances of our economic system, the free enterprise system and the independent and resourceful entrepreneurs, as we have known them, will become only memories.

It is imperative that we enact this legislation.

Both Senator HART and I believe this is an essential bill, and we will both press for its immediate enactment.

For years, debate has continued on the causes and effects of economic concentration. However, complete details of corporate structure, marketing techniques, technological imperatives, et cetera, have not been available. This Review Commission is charged with obtaining and analyzing all pertinent data. Its final report shall recommend legislative changes and regulatory modifications necessary to insure a vibrant and dynamic free enterprise system for this country. American business, labor, and consumers deserve no less.

By Mr. DECONCINI:

S. 2072. A bill to amend the Jury Selection and Service Act of 1968, as amended, to make the excuse of prospective jurors from Federal jury service on the grounds of distance from the place of holding court contingent upon a showing of hardship on an individual basis; to the Committee on the Judiciary.

JURY ACT AMENDMENT

Mr. DECONCINI. Mr. President, I am today introducing a bill which would amend section 1863 of title 28, United States Code, by eliminating therefrom subsection (b)(7). The elimination of this section will alter the method by which prospective jurors shall be excused from jury service in the U.S. district courts on account of hardship resulting from the distance between their residence and the place of holding court.

The adoption of this proposed legislation and the consequent elimination from the jury selection plans of the "mileage excuse" under section 1863(b)(7) does not mean, of course, that persons may no longer be excused from jury service because of hardship in travel. Rather, such requests for excuse would have to be handled by the district judge on an individual case-by-case basis upon a showing of "undue hardship or extreme inconvenience" under 28 U.S.C. 1866 (C)(1). It is the view of the Judicial Conference that this sort of request for excuse should be handled individually, avoiding the blanket elimination from jury service of all persons residing beyond a given geographical area surrounding the place where court is held. Experience has shown that most prospective jurors eligible for such a blanket mileage excuse will exercise their right to it, with the frequent result that only a relatively small portion of the geographical area of a judicial district is represented on the jury ultimately empaneled.

Employment of blanket "mileage excuse" in the jury selection plans of juries in this manner, seem undesirable from a policy viewpoint, and perhaps on a legal or constitutional basis as well, although I am unaware of any judicial decision holding that the elimination of prospective jurors on a geographical basis in this manner is violative of the "fair cross section of the community" guarantee of section 1861 or of the sixth amendment guarantees with respect to trial by jury.

Since most places of holding court are relatively urbanized and densely populated as compared to the outlying portions of judicial districts, the implementation of a mileage excuse specifying a relatively short distance as the determinant for an excuse from service could obviously have a drastic effect on the demographic composition of the juries empaneled in that district. With the passage of this bill, the wholesale exclusion of major geographical segments of a judicial district from jury service will be avoided, particularly in those judicial districts encompassing great distances and in which grand juries (or, less commonly, petit juries) are selected on a districtwide basis, rather than from each statutory or other division of the district [see 28 U.S.C. 1863(a) and 1869(e)].

The Judicial Conference and the Department of Justice both support this legislation. No cost is involved in this legislation. I hope this bill will receive early consideration in order to eliminate present inequities that could exist in the selection of Federal juries.

By Mr. JOHNSTON:

S. 2073. A bill to amend the Emergency Petroleum Allocation Act of 1973 concerning domestic crude oil pricing and for other purposes; to the Committee on Energy and Natural Resources.

Mr. JOHNSTON. Mr. President, today I am introducing S. 2073, the Crude Oil Pricing Amendments of 1977. The purpose of this legislation is to correct a crude oil pricing system enacted in December 1975. Since December 1975 it has become painfully apparent that the mechanism enacted then has not worked.

As you will remember, Mr. President, Congress established, in the Energy Policy and Conservation Act of 1975, a composite price of $7.66 per barrel for all domestically produced crude oil. The President was given the authority to establish ceiling prices for different classifications of crude oil so long as the weighted average composite price of domestic crude oil remained at $7.66 per barrel, which was allowed to increase with inflation. Unfortunately, the legislation and initial Presidential action setting ceiling prices was predicated on certain facts and assumptions which have proven to be incorrect. The result has been a series of price freezes and price rollbacks since February 1976, which have caused the real dollars received for certain crude oil production to decrease since February 1976. The Congress did not intend this result. However, it is a result which logically follows from the establishment of a mandatory composite price level.

This legislation, Mr. President, proposes to abolish the composite pricing system, but to continue price controls on "upper tier" and "lower tier" oil. The controlled price of these two classifications of oil would be the February 1976 price established under the composite pricing system plus inflation since that date. Both "upper tier" and "lower tier" crude oil would be allowed to rise in the future with inflation, as determined by the GNP deflator.

In addition, the legislation allows the President to establish different categories of oil which may receive ceiling prices higher than those established for "upper tier" and "lower tier" crude oil if the President makes certain findings. The findings are extracted from the composite pricing system and, in general, must indicate that such classifications and higher ceiling prices are needed to encourage increased production of domestic crude oil.

Finally, this legislation proposes to exempt two classifications of crude oil from price controls. First, the legislation continues the exemption for crude oil produced from stripper wells. This exemption is the same exemption which was enacted as part of the Energy Conservation and Production Act of 1976. Second, the legislation creates a new classification referred to as "newly discovered crude oil" which is exempt from price controls. "Newly discovered crude oil" is defined as that crude oil produced from a reservoir which was first penetrated by a well the surface drilling for which commenced on or after April 20, 1977. This exemption reflects the proposal President Carter made when he announced his energy proposals on April 20. However, the President intended that this new classification of oil be made by the Federal Energy Administration through a rulemaking procedure and that the classification be subject to the existing composite pricing system.

Mr. President, I am convinced that this legislation is needed to encourage maxi-

mum domestic crude oil production. Producers should not be subject to the freezes and rollbacks the present pricing system has caused. Further, maximum price incentives should, as the President suggested, be given to newly discovered domestic crude oil. Crude oil pricing cannot be ignored in a comprehensive national energy plan. Therefore, I urge my colleagues to give serious consideration to this pricing proposal which will be fair to the consumer, while encouraging maximum domestic crude oil production.

By Mr. DECONCINI (by request):

S. 2074. A bill to amend title 28, United States Code, to provide in civil cases for juries of six persons, to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend the coverage of the Federal Employees Compensation Act to all jurors in U.S. district courts; to the Committee on the Judiciary.

JURY ACT AMENDMENT

Mr. DECONCINI. Mr. President, I am today introducing at the request of the Judicial Conference of the United States a bill to amend title 28 of the United States Code in several respects.

The bill would make five separate changes in existing law:

First. The enactment of specific statutory authority for the use of six-person juries in civil cases in the district courts, and a reduction in the peremptory challenges available to each party in civil cases from three to two;

Second. The establishment of a statutory presumption that the use of voter lists as the source of juror names is consistent with the requirement of the Jury Selection and Service Act of 1968, 28 U.S.C. 1861, for grand and petit juries to be "selected at random from a fair cross section of the community in the district or division wherein the court convenes";

Third. The clarification of 28 U.S.C. 1865(b)(5) with respect to the qualification for jury service of persons who have been convicted of a crime and have subsequently had their civil rights restored;

Fourth. The addition to the definitional section of the Jury Selection and Service Act of 1968, 28 U.S.C. 1869, of certain definitions respecting the jury selection and summoning process, in order to clarify the authority of district courts to employ automatic data processing in the selection of their juries; and

Five. The extension of Federal Employees Compensation Act coverage to all persons serving as jurors in the United States district courts.

A hearing on this bill, and four other related bills have been scheduled for September 26, 1977.

Mr. President, I ask unanimous consent that the letter of transmittal from the Judicial Conference of the United States be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ADMINISTRATIVE OFFICE OF THE
U.S. COURTS,
Washington, D.C., March 31, 1977.

HON. WALTER F. MONDALE,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: At the direction of the Judicial Conference of the United States, I am forwarding a draft bill which would make several changes in existing law with respect to the administration of the jury system in the United States district courts. Each of the proposals contained in this bill has been previously recommended by the Judicial Conference, and each of them was submitted to the 94th Congress without being acted upon. This draft bill would make five separate changes in existing law:

1. The enactment of specific statutory authority for the use of six-person juries in civil cases in the district courts, and a reduction in the peremptory challenges available to each party in civil cases from three to two;

2. The establishment of a statutory presumption that the use of voter lists as the source of juror names is consistent with the requirement of the Jury Selection and Service Act of 1968, 28 U.S.C. § 1861, for grand and petit juries to be "selected at random from a fair cross section of the community in the district or division wherein the court convenes";

3. The clarification of 28 U.S.C. § 1865(b)(5) with respect to the qualification for jury service of persons who have been convicted of a crime and have subsequently had their civil rights restored;

4. The addition to the definitional section of the Jury Selection and Service Act of 1968, 28 U.S.C. § 1869, of certain definitions respecting the jury selection and summoning process, in order to clarify the authority of district courts to employ automatic data processing in the selection of their juries; and

5. The extension of Federal Employees Compensation Act coverage to all persons serving as jurors in the United States district courts.

The Judicial Conference at its latest session in September, 1976, directed that these legislative proposals be joined together in the form of an omnibus bill to make changes with respect to jury administration and the service of jurors in the federal courts. Accordingly, I am transmitting the enclosed draft bill. A discussion follows of each of the separate proposals which would be effected thereby.

I. SIX-PERSON JURIES IN CIVIL CASES

The Judicial Conference of the United States has since 1972 been recommending favorable consideration by the Congress for the amendment of title 28, United States Code, to provide in civil cases for juries of six persons.

A total of 82 out of the 94 federal judicial districts have by local rule adopted provisions for civil juries of less than twelve. The attached draft bill would make the use of the six-person civil jury uniform in all United States district courts. The use of juries of less than twelve persons by rule of court in civil cases has been sanctioned by the United States Supreme Court in *Colgrove* v. *Battin*, 413 U.S. 149 (1973).

Besides reducing the number of jurors sitting in civil cases to a uniform number in all Federal courts, the draft bill would also provide amending language reducing the number of peremptory challenges in civil cases from three to two per party. The bill further authorizes additional peremptory challenges and flexible treatment of peremptory challenges to cover multiple parties in light of varying circumstances.

This bill would expressly preserve the principle of unanimity of verdicts in civil cases; however, the statutory provision for unanimity would also allow for stipulation by the parties to a less than unanimous verdict.

Bills virtually identical to title I hereof were introduced in the 94th Congress as S. 237 and H.R. 6039. Earlier, two bills providing the essence of this draft bill, H.R. 8285 and S. 2057, had been introduced in the 93rd Congress. At its March, 1971 session, the Judicial Conference originally approved in principle a reduction in the size of civil juries (see the 1971 Report of the Proceedings of the Judicial Conference at page 5). Subsequently, the Conference proposed draft legislation which was introduced in the 92nd Congress and later in the 93rd Congress as H.R. 8285. Hearings were held thereon by the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice on October 9 and 10, 1973 and January 23, 1974. Following the Judicial Conference re-endorsement of H.R. 8285, a counterpart bill, S. 2057, was introduced in the Senate. After study, the Judicial Conference voted (see the 1973 Conference Proceedings at page 54) to recommend S. 2057 because of its specific provisions preserving the principle of unanimity of verdicts and a more flexible treatment of peremptory challenges in multiple party cases. Title I of the attached draft bill incorporates these features of S. 2057.

II. USE OF VOTER LISTS IN JURY SELECTION

It is presently provided by section 1863(b)(2) of title 28, United States Code, that the plan for random selection of grand and petit jurors which is required to be maintained by each United States district court shall specify that the names of prospective jurors shall be selected from the voter registration lists or lists of actual voters of the political subdivisions within the judicial district or a division thereof, and that:

"The plan shall prescribe some other source or sources of names in addition to voter lists where necessary to foster the policy and protect the rights secured by sections 1861 and 1862 of this title."

Title II of the draft bill which is being submitted to you would amend this subsection to (1) establish a presumption that those jurors selected from voter registration lists or lists of actual voters do affirmatively represent a "fair cross section of the community" in the district or division, as required by 28 U.S.C. § 1861, and (2) require the district court to find that voter lists do not represent such a fair cross section before it may prescribe any other source or sources of juror names.

Since the enactment of the Jury Selection and Service Act of 1968, an issue has emerged as to whether the selection of jurors exclusively from voter lists in each judicial district is sufficient to implement the mandate of the Act. Sections 1861 and 1862 of title 28, which were added by the Jury Selection and Service Act, provide that all litigants in federal courts are entitled to trial by grand and petit juries selected at random from a fair cross section of the community in the district or division wherein the court convenes, that all citizens shall have the opportunity to be considered for jury service, and that no one shall be excluded from such service on account of race, color, religion, sex, national origin, or economic status.

Litigants, particularly criminal defendants seeking a basis on which to challenge their indictments or convictions, have persistently contended that juries selected exclusively from voter lists do not meet these requirements because of the limited constituency of the lists in some localities and the tendency of certain groups and segments of the population not to register or vote. Accordingly,

they have asserted in numerous instances that the district courts have been derelict in not prescribing supplemental sources of juror names as authorized by 28 U.S.C. § 1863 (b)(2). These contentions have been raised with increasing frequency in recent years and in several different forms—as challenges to the jury selection process under 28 U.S.C. § 1867, as pretrial motions, as points on appeal, and as allegations in petitions for post-conviction relief.

When confronted by such challenges, the federal courts have consistently upheld the exclusive reliance on voter lists to supply the names of jurors, as sufficient on constitutional grounds and also as a permissible method of achieving the "fair cross section of the community" required by statute as the basis for jury selection. *See, e.g., United States* v. *Whitley*, 491 F. 2d 1248 (8th Cir. 1974), *cert. denied*, 416 U.S. 990, and *United States* v. *Test*, 399 F. Supp. 683 (D. Colo. 1975), affirmed, No. 73-1337 (10th Cir., decided Nov. 12, 1976). It has further been held that those persons who choose to exclude themselves from jury service by failing to register to vote do not constitute a cognizable class or group for the purpose of establishing systematic and intentional exclusion from the process of jury selection. *Camp* v. *United States*, 413 F. 2d 419, 421 (5th Cir. 1969), *cert. denied*, 396 U.S. 968, and *United States* v. *Lewis*, 472 F. 2d 252, 256 (3rd Cir. 1973).

Useful summaries of the decisional law which has developed with respect to (1) permissible disparities for jury selection purposes between the proportion a particular class bears to the population at large as against those persons registered to vote and (2) the showing required to successfully challenge a court's jury selection plan are contained in *An Analysis of Jury Selection Decisions* by Judge Walter P. Gewin, appendix to *Foster* v. *Sparks*, 506 F. 2d 805 (5th Cir. 1975), and the *Report of the District Court Panel on Jury Selection in the District of Massachusetts*, 58 F.R.D. 501 (1973).

In light of the apparent judicial consensus which has developed in support of the exclusive use of voter lists for the selection of jurors, only two United States district courts, Colorado and the District of Columbia, have seen fit to supplement the voter lists with another source of juror names. Both of these courts are now drawing names for their master jury wheels from the motor vehicle operators' license records within their jurisdictions, as well as from voter lists. The other 92 district and territorial courts, to the best of our knowledge, continue to use the voter lists exclusively for this purpose. Despite this consensus, however, challenges to the jury selection process on account of a lack of supplementation to the voter lists continue to be made and to consume substantial judicial time.

The Judicial Conference is therefore of the view that the enactment of the proposed legislation would assist the administration of justice by reducing the number of frivolous challenges made on this basis, and by providing greater certainty to the federal courts in the administration of their jury selection plans. At the present time many of the district courts, concerned by the growing number of challenges, are researching the efficacy and practicality of the various sources available to supplement voter lists. Motor vehicle operator records, automobile registration records, social security lists, welfare rolls, city directories, telephone directories and census records have, *inter alia*, been considered for this purpose.

It has proven difficult, however, to find a satisfactory supplemental list which incorporates with sufficient certainty the name, address, and age of the potential juror, is reasonably up-to-date, and provides an improvement over the voter lists in capturing some segment of the community which is under-represented in voter registration. As former Attorney General Ramsey Clark pointed out in his testimony on the legislation which became the Jury Selection and Service Act of 1968, the voter registration or actual voter lists are uniquely suited to the jury selection process, especially so because the process of registering and voting implies a certain orientation to the public interest and to public service:

"We looked at every type of list we could find. We looked at post office addresses, at Civil Service Commission lists, at social security lists, and we considered telephone books, and a city directory sort of list, and we couldn't find any list that would be across the country nearly as good as the voter list. We put a quite high priority on certainty as to where the individuals should be chosen from, and we found some relationship between the public interest that would cause a person to register to vote, and jury service." Hearings on Federal Jury Selection Before the Subcommittee on Improvements in Judicial Machinery of the Senate Committee on the Judiciary, 90th Congress, 1st Sess. 43 (1967).

Additional support for the primacy of voter lists as the source of federal juror selection is readily found in the legislative history of the Jury Selection and Service Act. The Judiciary Committees of the Senate and the House of Representatives stated in their reports on this legislation that voter lists "provide the widest community cross section of any list readily available." Senate Rep. No. 891, 90th Cong., 1st Sess. 16 (1967) and H.R. Rep. No. 1076, 90th Cong., 2d Sess. 4 (1968). These reports also manifest a Congressional view that the use of voter lists should be adequate to satisfy constitutional requirements and to comply with the cross sectional requirements of the statute:

"The voting list requirement, together with the provision for supplementation, is therefore the primary technique for implementing the cross sectional goal of this legislation. The bill uses the term 'fair cross section of the community' in order to permit minor deviations from a fully accurate cross section. The voting list need not perfectly mirror the percentage structure of the community. But any substantial percentage deviations must be corrected by the use of supplemental sources. Your committee would leave the definition of 'substantial' to the process of judicial decision." S. Rep., *supra*. at 17 and H.R. Rep., *supra*, at 5.

The Judicial Conference through its Committee on the Operation of the Jury System has attempted to follow the course of judicial decisions construing the Jury Selection and Service Act ever since its enactment in 1968. Since that time, the Conference is unaware of any court decisions holding that a master jury wheel drawn wholly from voter registration lists is on that ground inadequate to represent a fair cross section of the community in the selection process. Accordingly, the Conference believes that, with rare exceptions, the need for supplementation of the voter lists simply has not been realized in actual practice, based upon eight years of experience since the enactment of the Jury Act.

While the draft legislation which is submitted would establish a statutory presumption that the selection of jurors from names contained on voter lists meets the requirements of 28 U.S.C. § 1861, it would continue to permit district court jury selection plans to provide for other sources of names in addition to voter lists. Before prescribing such additional sources of names, however, the district court would have to expressly find that the state voter lists do not represent a fair cross section of the community.

The legislative history further indicates that the Congress very deliberately established voter lists as the source of federal jurors in full recognition that their use would narrow the universe of jury selection by eliminating from consideration persons who do not register to vote. The committee reports assert that this sort of discrimination among citizens is "not unfair," however, because "[n]o economic or social characteristics prevent one who wants to be considered for jury service from having his name placed in the pool from which jurors are selected." S. Rep. at 17 and H. R. Rep. at 5.

There is one additional compelling argument in support of this bill suggested by the legislative history. In his testimony before the Senate Subcommittee on Improvements in Judicial Machinery, Judge Irving R. Kaufman of the United States Court of Appeals for the Second Circuit, who then chaired the Conference Committee on the Operation of the Jury System, suggested that the provision now contained in section 1863(b)(2) for the supplementation of voter lists by other sources was essentially transitional in nature. Even at that time, Judge Kaufman stated, the voter lists failed to represent a fair cross section of their communities in only a "very few jurisdictions." He testified that his committee had been "advised by the Department of Justice that this situation is being corrected since the passage of the Voting Rights Act of 1965," but that "[w]here this condition still exists, our bill permits the use of other lists in addition to voter lists to obtain a representative cross-section." Hearings on Federal Jury Selection, *supra*, at 253.

Thus Judge Kaufman appeared to believe that the use of supplemental sources of juror names was primarily a stopgap measure, which would be desirable to have available until the full impact of the Voting Rights Act of 1965 had been felt and until its implementation had corrected the situation existing in a few isolated districts where the voter lists did not represent a fair cross section of the population. It is accordingly the view of the Judicial Conference that, since eleven years have now passed since the enactment of the Voting Rights Act, the primary need to resort to supplementation of voter lists for jury selection has expired, and the use of supplemental sources should be reserved for those extraordinary situations in which the district court expressly finds that the voter lists of the state do not encompass a sufficient constituency to satisfy the demands of the Jury Act.

III. JURY SERVICE BY RESTORED CONVICTS

This title would amend the Jury Selection and Service Act of 1968, as amended (28 U.S.C. §§ 1865(b)(5) and 1869(h)) to allow for a more flexible treatment of rehabilitated persons, previously convicted for crimes punishable by imprisonment for more than one year, whose qualifications are being considered for jury service in federal courts. This bill was introduced in the 93rd Congress as H. R. 17373 and in the 94th Congress as H. R. 6050.

The Jury Act presently provides in the qualification section at section 1865(b)(5), that the district courts:

". . . shall deem any person qualified to serve on grand and petit juries . . . unless he (5) has a charge pending against him for the commission of, or has been convicted in a state or Federal court of record of, a crime punishable by imprisonment for more than one year *and his civil rights have not been restored by pardon or amnesty.*" (Emphasis added.)

Since many state and federal statutes create by legislative action diverse procedures for rehabilitation and pose differing

solutions for the restoration of civil rights, the language "by pardon or amnesty" is proposed to be stricken from the qualification section of the Jury Selection and Service Act to accommodate that statute to the varied state and federal restoration procedures. Moreover, the present formula, "pardon or amnesty," is thought to be underinclusive. Under federal law, for example, there are at least two statutes which have the effect of expunging criminal records, the Youth Corrections Act (18 U.S.C. § 5021), and the Comprehensive Drug Abuse and Control Act of 1970 (21 U.S.C. § 844(b)). Moreover, the words "pardon or amnesty" may be confusing in this context. For instance, amnesty does not act to restore civil rights, since it precludes prosecution in the first instance.

In light of the proposed amendment of section 1865(b)(5), title III of the bill also amends the statutory provisions with respect to the information called for in the juror qualification form, as defined by section 1869(h).

Attached hereto is a special report on this matter submitted to the Judicial Conference Committee on the Operation of the Jury System by Honorable Harold R. Tyler, former U.S. District Judge for the Southern District of New York, which explains in detail the background of this aspect of the proposed legislation.

IV. FACILITATION OF AUTOMATED JURY SELECTION

As noted, title IV of the attached draft bill would "provide for amendment of the Jury Selection and Service Act of 1968, as amended, adding further definitions relating to jury selection by electronic data processing." This bill was originally forwarded to both houses of Congress by resolution of the Judicial Conference at its September 1973 meeting and was subsequently introduced in the 93rd Congress as H.R. 10896, and in the 94th Congress as H.R. 6051.

One purpose of this portion of the bill is to define the requirements of the public drawing called for in the Jury Act with respect to the manual and automated computer data processing of the clerical work of jury selection. The bill would add subsection "j" to section 1869 of title 28, the definitional section of the Act. The purpose of subsection "j" would be to provide that, where juror selection procedures are manual, the public drawing provided for in sections 1864 and 1866 would be held within the judicial district affected after reasonable public notice and that such public drawing would be conducted in proceedings open to the public at large and under the supervision of the clerk of court. Subsection "j" would also provide that the selection of juror names may be accomplished by automated processing under the supervision of the clerk and could take place *inside or outside of the judicial district affected*, subject to the same public notice and participation requirements pertaining to manual selection. Since the computer facilities of the General Services Administration are maintained at regional headquarters, it is necessary from a practical standpoint to perform there the computer functions relating to the automated selection of jurors in the various United States district courts within such regions. It would not be economically feasible to maintain such costly equipment at each court center.

Automated computer data processing in the selection of jurors is authorized by the Jury Act at section 1869(g), and approximately 55 districts are presently using fully or partially automated systems for the selection of jurors. Selection with the help of computerized methods offers time and cost-saving benefits, but, equally important, it helps to assure the removal from jury selection of any possibility of discriminatory human interference.

This title of the bill would also add a definition of the juror summons at new subsection "k" of section 1869 to allow the seal of the court and the clerk's signature to be affixed to the summons form by a broad range of techniques. Presently, juror summonses are commonly being issued in automated districts without the seal of the court and without a clerk's signature because there is no way to add these features manually to thousands of such documents without defeating the work-saving advantages of automation. On the other hand, some clerks spend hundreds of manhours signing and sealing such forms. The adoption of this bill will also benefit those district courts which manually process the summons forms, in that such forms could contain in preprinted form the seal and the signature of the clerk. Moreover, their preparation and handling will be facilitated by the techniques authorized by this proposed definition of the juror summons.

V. COVERAGE OF JURORS BY FEDERAL EMPLOYEES COMPENSATION ACT

In accordance with the resolution of the Judicial Conference of the United States adopted at its March 6, and 7, 1975 meeting, I am transmitting to the Congress for its consideration title V of this draft bill, which would provide Federal Employee Compensation Act coverage, not only for federal employees serving as federal jurors, but as well for all other persons performing jury duty in federal courts in fulfillment of one of their obligations of citizenship.

Although coverage for federal employees who are serving as federal jurors was provided in the Act of September 7, 1974, Public Law No. 93–416, 88 Stat. 1143, the extension of such benefits to private citizens who are injured while serving as federal jurors was not provided in that legislation. Nevertheless, Senate Report No. 93–1081 (to accompany H.R. 13871) evidenced agreement at that time with a similar resolution of the Judicial Conference adopted in March, 1974.

Serious problems can arise when federal jurors who do not happen to be employed by the United States Government are injured or disabled while in the performance of their jury service. On several occasions prior to and since the enactment of Pub. L. No. 93–416, the U.S. Department of Labor has rejected federal jurors' claims for injury compensation on the basis that jurors were not defined as "employees" of the federal government within the meaning of 5 U.S.C. § 8101(1). Since the enactment of Pub. L. No. 93–416, nothing has happened to indicate a change in this position relating to persons, not federally employed, who are serving as jurors in federal courts. The purpose of this portion of the bill is to provide remedial legislation to specify that compensation benefits shall apply to *all* persons serving as federal jurors.

Strong policy reasons exist for bringing all federal jurors within the coverage of the Federal Employees Compensation Act. Jurors provide a valuable service to the government. While in actual service as a petit or grand juror, the citizen-juror should rationally be accorded the benefit of protection in case of a "job-related" mishap. What begins as the fulfillment of a high duty of citizenship through public service to the government could be turned into an economic catastrophe for the juror in the event of an accident or injury while serving. Presently a person injured while serving as a juror cannot recover compensation unless he can bring his case under the Federal Tort Claims Act by proving negligence in the government agent, a difficult burden. Moreover, this inequity is compounded by the fact that a federal employee is now covered by these compensation acts. It would also contribute to the juror's peace of mind, especially in a protracted case or in a situation where he must be transported to make a site inspection, to know that this benefit is available. This aspect of the proposal might be especially reassuring to the head of a family or to the timorous juror sitting in a sensational criminal case. While jurors are very seldom injured, we do have a record of several such cases.

The enclosed draft bill would add a new section, section 8142a, to chapter 81 of title 5. Proposed section 8142a (a) and (b) define the protected juror to be one who is in actual attendance upon court and specify when payments can commence. Proposed section 8142a(c)(1) defines the rate of pay that a federal juror is *deemed* to be receiving for purposes of the compensation scheme provided for in chapter 81. This subsection also takes into account and specifies the compensation of the federal employee who is receiving his normal rate of pay while on court leave pursuant to 5 U.S.C. § 5537 and 6322 to be his actual rate of pay. Section 8142a(c)(2) limits and defines when the juror is deemed to be in the performance of duty, assuring that claims for compensation may not be granted except for duty-related mishaps. Federal jurors would not be made actual employees of the federal government. Nor should this amendment be construed to characterize jurors as employees for any other purpose than the compensation for injuries resulting from jury service. Section 8116(c) would make recovery under the Federal Employees' Compensation Act the exclusive remedy of the juror against the United States for such injuries.

It is the view of the Judicial Conference that the adoption of the various proposals contained in this draft bill would expedite the operation of the jury system and provide for a desirable certainty in its administration, as well as improving the conditions of service of the individual juror.

I will be pleased to provide any further information necessary in the consideration of this draft bill, and representatives of the Judiciary and of the Administrative Office will be available to testify before the committee to which the bill may be referred.

Sincerely,

ROWLAND F. KIRKS,
Director.

By Mr. DECONCINI (for himself and Mr. WALLOP):

S. 2075. A bill to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service; to the Committee on the Judiciary.

JURY FEE AND PROTECTION

Mr. DECONCINI. Mr. President, on behalf of myself and Senator WALLOP, I am today introducing a bill which would amend in its entirety the jury fee section (28 U.S.C. 1871) of the Jury Selection and Service Act of 1968, as amended. The bill would also add to title 28 provisions dealing with an employee's right to reinstatement after serving on jury duty and provides for a civil penalty against an employer who discharges or coerces an employee as a result of the employee's jury service or summons for such service.

A bill covering these same topics passed the Senate on September 30, 1975, as S. 539 (see Senate Report No. 94–400).

The proposal embodied in this bill to protect the employment rights of Federal jurors varies only slightly in form and emphasis from the version adopted by the Senate in S. 539. This bill, which I am certain will have the support of both the Judicial Conference of the United States and the Department of Justice, would permit the application of a civil penalty up to $10,000 against an employer found to be violating the statute by interfering with his employee's right under 28 U.S.C. 1861 to perform jury service. It would also give the district courts original jurisdiction, without regard to the amount in controversy, to require any private employer to comply with the provisions of section 1875 of this title, and to award damages for any loss of wages or other benefits suffered by reason of such employer's failure to comply.

In addition to the juror protection section, the bill provides needed increases in the attendance fee, subsistence allowance and travel allowance payable to Federal jurors. The bill I am introducing today increases the attendance fee for jurors in the U.S. district courts from $20 to $30, which is $5 more than S. 539 provided. These increases are required in light of the inflationary spiral since the last amendment of section 1871 in 1968, particularly the escalating cost of energy.

The Judicial Conference has long urged the changes in juror compensation which would be made by this bill, having first recommended substantially similar legislation at its session of March 1974. The bill also reorganizes the present statute on jury fees, corrects several problems in the present payment structure, clarifies several ambiguous matters and remedies certain inequities resulting under the present system.

I hope to bring this legislation to the floor of the Senate in the near future.

By Mr. MATHIAS:

S.J. Res. 80. A joint resolution to authorize and request the President to issue a proclamation designating November 8, 1977, as "National Law Student Recognition Day"; to the Committee on the Judiciary.

Mr. MATHIAS. Mr. President, today I introduce a resolution that authorizes the President to designate November 8, 1977 as "National Law Student Recognition Day."

The United States of America is now entering its third century as a nation ruled by law. The future leaders of America, if the past is any guide, will include many members of the legal profession. They are now being trained in law schools throughout the country. The Nation should take note of the dedication and the hard work required in the study of the law, and give moral support to the students' efforts. Such a showing of support will help instill in them a strong sense of professional responsibility and ethics, and encourage them to attain a high level of expertise and to put it to use in community service.

I am convinced that law students around the Nation deserve recognition both for their commitment to this honorable profession and in anticipation of their contributions toward a more perfect union. As representatives of the American public, we can show our appreciation to law students by supporting this resolution.

Mr. President, I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 80

Whereas the United States of America is entering its third century of existence as one Nation, supporting world peace through law, and committed to equal justice under law; and

Whereas we reaffirm the basic principles proclaimed in the Constitution of the United States, as amended, for the establishment of justice; for the protection of life, liberty and property under due process of law; and for the continued maintenance of equal protection of the laws; and

Whereas the future leaders of America, as in its illustrious past, will include many members of the legal profession at international, Federal, State and local levels; and

Whereas the training of these future leaders should not only be encouraged and enhanced in the law schools of the Nation, but should also be supported by the bench and bar so as to instill a strong sense of professional responsibility, high ethical standards, and a high level of qualification for private and public services; and

Whereas the law students of the Nation deserve recognition for their commitment to this honorable profession and its contributions toward a more perfect union and the pursuit of happiness: Now, therefore, be it

Resolved by the Senate and House of Representatives in the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating November 8, 1977 as "National Law Student Recognition Day" and calling upon the people of the United States and interested groups and organizations to observe that day with appropriate ceremonies and activities.

ADDITIONAL COSPONSORS

S. 727

At the request of Mr. GRIFFIN, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 727, a bill to amend the Federal Meat Inspection Act.

S. 1245

At the request of Mr. GRIFFIN, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1245, the Corrections Construction and Program Development Act of 1977.

S. 1587

At the request of Mr. STONE, the Senator from Minnesota (Mr. ANDERSON) and the Senator from Washington, (Mr. MAGNUSON) were added as cosponsors of S. 1587, a bill to amend the Internal Revenue Code of 1954 to exempt certain State and local government retirement systems from taxation, and for other purposes.

S. 1596

At the request of Mr. RANDOLPH, the Senator from New Mexico (Mr. DOMENICI) and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 1596, to establish a National Center for the Handicapped.

S. 1616

At the request of Mr. CLARK, the Senator from New Hampshire (Mr. McINTYRE) was added as a cosponsor of S. 1616, the National Agricultural, Range, and Forest Land Policy Act.

S. 1644

At the request of Mr. PACKWOOD, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of S. 1644, to give tax equity to parents without partners.

S. 1784

At the request of Mr. WILLIAMS, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of S. 1784, to amend the Age Discrimination in Employment Act.

S. 1899

At the request of Mr. JAVITS, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 1899, the Veterans Tuition Equalizer bill.

S. 1981

At the request of Mr. DOLE, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 1981, to provide for automatic adjustment for deduction to individual retirement accounts.

S. 1990

At the request of Mr. ROTH, the Senator from Michigan (Mr. RIEGLE) and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 1990, to establish a Department of International Trade and Investment.

S. 1996

At the request of Mr. STAFFORD, the Senator from Utah (Mr. GARN) and the Senator from Arizona (Mr. GOLDWATER) were added as cosponsors of S. 1996, to amend title 10 of the United States Code.

S. 2012

At the request of Mr. HASKELL, the Senator from Texas (Mr. BENTSEN), the Senator from Alaska (Mr. GRAVEL), the Senator from Wyoming (Mr. HANSEN), and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of S. 2012, to amend the Trade Expansion Act.

SENATE JOINT RESOLUTION 70

At the request of Mr. RANDOLPH, the Senator from Idaho (Mr. CHURCH) was added as a cosponsor of Senate Joint Resolution 70, National Architectural Barrier Awareness Week.

SENATE CONCURRENT RESOLUTION 37

At the request of Mr. BARTLETT, the Senator from Texas (Mr. TOWER), the Senator from Wyoming (Mr. HANSEN), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Concurrent Resolution 37, disapproving Federal motor vehicle safety standard transmitted to Congress on June 30, 1977.

AMENDMENT 579 TO S. 961

At the request of Mr. CRANSTON, the Senator from California (Mr. HAYAKA-

WA) was added as a cosponsor of amendment 579 to S. 961, to promote the healthy development of children who would benefit from adoption by facilitating their placement in adoptive homes, and for other purposes.

SENATE RESOLUTION 258—SUBMISSION OF A RESOLUTION RELATING TO CONFIRMATION RESPONSIBILITY OF THE SENATE

Mr. RIBICOFF. Mr. President, I submit Senate Resolution 258 and ask unanimous consent that it be referred to the Committee on Governmental Affairs; and if and when reported from that committee, it then be referred to the Committee on Rules for not exceeding 30 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I am pleased to submit, along with Senators PERCY and JAVITS, a resolution to create a new Senate office to assist the Senate in the exercise of its confirmation responsibility over nominees submitted by the President.

The resolution has three principal purposes. First, it will require that nominees to major Government positions be subject to regular, systematic investigations into their background and integrity prior to Senate action. Second, it will guarantee Senate access to investigative reports prepared on nominees by executive branch agencies, such as—but not limited to—the Federal Bureau of Investigation. Finally, the resolution will for the first time establish general standards on Senate confirmation.

The present weaknesses of the confirmation process have, in my opinion, been demonstrated by the events surrounding Senate approval of Mr. Lance as Director of the Office of Management and Budget. However, the case of Mr. Lance is but one example of a much larger problem. As part of our committee's study on regulatory reform, we considered the process by which top officials are nominated and confirmed. We found major problems both with the White House selection process and with Senate confirmation procedures. Indeed, it was in that report, published this past February, that the committee first recommended the legislation we introduce today. As we pointed out in that study, there is all too often an inclination by the Senate to promptly approve nominees submitted by the President, without full and thorough inquiry into the nominee's ability and suitability. In too many cases, confirmation hearings are pro forma proceedings. The committee's study concluded that the important constitutional responsibility of advice and consent has been too frequently exercised in a casual fashion.

Yet the power to appoint is shared coequally by the President and the Senate. The Constitution is plain on that important principle: The President "shall nominate, and by and with the advice and consent of the Senate, shall appoint" public officials. In my opinion the Constitution does not envision a passive role for the Senate, merely approving what is presented to it by the President. It is the combined wisdom of the President and the Senate which places a person in a position of public trust. Both are properly held accountable to the people for the subsequent performance and fitness of that official. I believe that the public has a right to expect as much care and deliberation from the Senate in the confirmation process as it does from the President in the selection process.

And it is for that reason that I introduce this resolution.

The present process of confirmation all too often involves very little process: There are no established standards to judge nominees; there is no regular, systematic inquiry by committees into the background and integrity of nominees; and the Senate is expected to act without having access to relevant investigative reports prepared on nominees by executive branch agencies. In the case of Mr. Lance, the committee was not given access to the FBI report on his nomination, nor did it have the opportunity to review reports prepared by the Comptroller of the Currency. In hindsight, that information would have been very relevant to our consideration. Indeed, the committee was expected to act on the Lance nomination only days after receiving the finanical disclosure statement of the nominee. In that case we relied on assurances presented to the committee by the Comptroller and others on the fitness of the nominee.

The resolution we introduce today will, in my opinion, remedy a good part of the problem. It will require that Senate action on a nomination be postponed for a reasonable and limited period of time pending the results of an independent inquiry on the nominee. That inquiry will be removed from the partisan arena, and will be conducted by officers of the Senate who are selected on a bipartisan basis. This new Office shall not, however, inquire into the nominee's positions and opinions, nor shall it take any position on whether the Senate should confirm a nomination. Those responsibilities will remain with the standing committees and the Senate. Instead, the new office will assist the committees and the Senate by collecting information on the nominee, and presenting it to the Senate for its consideration.

The inquiry will include review of investigative reports prepared on nominees by executive agencies, thereby assuring the Senate that its confirmation judgment will be based on all known and available facts. Safeguards are provided to guarantee that this review will occur in a responsible fashion, with due regard for rights of individual privacy. The Senate investigation will also include careful scrutiny and verification of financial information submitted by nominees.

Most important, this inquiry will be required, as a matter of course, for all nominees to major positions of public trust. It will insure equal and consistent treatment of those potential appointees. It will be a regular requirement of confirmation, and an assurance to the public that the Senate takes its confirmation responsibility seriously.

Finally, this resolution establishes standards whereby the Senate will judge nominees of the President to be suitable and qualified. In that consideration, the Senate shall inquire into the nominee's fitness for a particular office, the personal and professional integrity of the nominee, and the nature and needs of the office to which a nomination is made. It is proper and reasonable that the Senate establish such general criteria to judge nominees presented to it.

Mr. President, this is a matter of pressing concern that should not be the subject of extensive delay. It is my hope that hearings will be held on this resolution before Congress adjourns.

Mr. President, I ask unanimous consent that the resolution, and the summary of the resolution, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. RES. 258

Whereas the duty of advice and consent is an important constitutional responsibility of the Senate;

Whereas the exercise of that duty requires the Senate to inquire into the background, fitness and qualifications of nominees;

Whereas such inquiries are important to an informed and well-reasoned judgment, based on all known facts, by the Senate; and

Whereas systematic inquiry into the background and integrity of nominees to major government positions should be a regular and routine requirement of Senate confirmation: Now, therefore, be it

Resolved, That there is established an office of the Senate to be known as the Office on Nominations (hereinafter referred to as the "Office") to assist the Senate in its confirmation of nominees for Executive Branch departments and agencies, independent regulatory commissions, United States Courts and other offices.

TITLE I—SENATE OFFICE ON NOMINATIONS

SEC. 2. (a)(1) The Office shall be headed by a Director, who shall be appointed by the President pro tempore of the Senate upon the recommendation of the Majority Leader and Minority Leader of the Senate. Provided that if no appointment to this office is made within forty five (45) days of the date of enactment of this resolution, or within 45 days of the office becoming vacant or of the date of expiration of the term of the director, then the matter shall be referred to the Senate for its decision.

(2) The Director shall be appointed without regard to political affiliation and solely on the basis of fitness to perform the duties of that office. He shall not engage in any other business, vocation, or employment during his term of service except as allowed in Rule XLI of the United States Senate. The term of office of the first Director shall expire on January 1, 1979. Thereafter the term of office of the Director shall be two years, except that any individual appointed to fill a vacancy prior to the expiration of a term shall serve only for the unexpired portion of that term. An individual serving as Director at the expiration of a term may continue to serve until his successor is appointed and qualified. A Director may be reappointed, and may be removed from office by a majority vote of the Senate.

(3) The Director shall receive compensation at an annual rate equal to the highest rate which may be paid to an employee of a standing committee of the Senate under section 105(e)(3) of the Legislative Branch Appropriation Act, 1968, as amended and modified.

(b)(1) Subject to the approval of the President pro tempore of the Senate, the Director shall appoint and fix the compensation of such personnel and make such other expenditures as may be necessary to carry out the duties and functions of the Office. All personnel of the Office shall be appointed without regard to political affiliation and solely on the basis of their fitness to perform their duties. The Director may prescribe the duties and responsibilities of the personnel of the Office, and delegate to them authority to perform any of the duties, powers, and functions imposed on the Office or on the Director except that the duties imposed on the Director under section 4(b) herein shall not be delegated to any other person.

(2) In carrying out the duties and functions of the Office, the Director may procure the temporary (not to exceed one year) or intermittent services of experts or consultants or organizations thereof by contract as independent contractors, or in the case of individual experts or consultants, by employment at daily rates of compensation not in excess of the per diem equivalent of the highest rate of compensation which may be paid to an employee of a standing committee of the Senate under section 105(e)(3) of the Legislative Branch Appropriation Act, 1968, as amended and modified. Such contract shall not be subject to the provisions of section 3709 of the Revised Statutes (41 U.S.C. 5) or any other provision of law requiring advertising. Any such person who will be asked to review confidential information under section 4 herein shall be subject to the same provisions for security clearances as the regular staff of the Office, and shall comply with the confidential procedures of the Office.

(3) Except as otherwise provided herein, all records, papers, and other documents of the Office shall be confidential and shall not be disclosed to the public.

PROCEDURES

SEC. 3. (a)(1) The Secretary of the Senate shall notify the Director of the receipt of any nomination which requires advice and consent of the Senate, and which is subject to review by the Office. Such notice shall be given on the same day that such a nomination is referred to a committee of the Senate. The Office shall review individuals nominated, or renominated, to be—

(i) Officials listed in Executive Levels I, II, III, and IV of the Executive Schedule (5 USC 5312, 5313, 5314, and 5315);

(ii) Justices or Judges, whether to hold office during good behavior or for a term of years;

(iii) Other Judicial Officers, in accordance with a policy to be set by the Senate Committee on Judiciary within 60 days of the effective date of this resolution;

(iv) Ambassadors and Foreign Service Officers, in accordance with a policy to be set by the Senate Committee on Foreign Relations within 60 days of the effective date of this resolution;

(v) Military officers, in accordance with a policy to be set by the Senate Committee on Armed Services within 60 days of the effective date of this resolution; and

(vi) Any other Officer, which nomination is referred to the Office by a committee of the Senate with jurisdiction over the nomination.

(2) Upon notification by the Secretary of the Senate or by a Committee pursuant to section 3(a)(1)(vi), the Office thereupon shall conduct an inquiry on the nomination. That inquiry shall concern the nominee's background and integrity, but shall not involve any inquiry into the nominee's positions, opinions or beliefs on policy matters. The investigation shall include examination of any proposed blind trust agreement, any contract relating to severance from private employment, and any other document relevant to the nominee's qualifications for the office to which he has been nominated. The Office shall not have the power to issue subpoenas for documents or information. But, the Director may request the committee of the Senate with jurisdiction over the nomination to issue such subpoenas.

(b)(1) As soon as practicable, each nominee subject to this review will submit to the Office biographical and financial information on forms prepared by the Office. Such financial disclosure statement shall include information relating to the nominee's spouse (unless the nominee and his or her spouse are separated) and each member of his family who resides with him. The Director may question a nominee concerning the information provided by the nominee and shall take such steps, consistent with the provisions herein, as he considers necessary to verify the accuracy and completeness of the information. Biographical and financial disclosure statements filed by nominees shall be made available for public inspection during normal business hours. Such statements shall be maintained by the Office until one year after the nominee leaves the Office to which he is appointed, or, in the case of a nomination which is not confirmed, for one year after receipt. Thereafter such statements shall be destroyed.

(2) As soon as practicable, the Office shall review copies of any investigative reports pertaining to the nomination by any Federal, state or local agency which were submitted to the President or his designee as part of his consideration of the nomination. Such investigative information shall be kept confidential except for any notification to the appropriate committee as authorized under this section. The Director shall draft, in consultation with the Attorney General, appropriate procedures for the handling of sensitive information.

(3) As soon as practicable, the Office shall review a statement submitted by the President indicating the reasons for a particular selection and pointing out any relevant factors in the nominee's background or training that qualifies him for appointment. When a person is nominated to a collegial body, and it is the intention of the President to designate that individual as chairman of that body, the Office shall also obtain a statement submitted by the President indicating his intention to designate that individual as chairman. The Office shall forward these statements to the committee with jurisdiction over the nomination.

(c)(1) As soon as practicable, but not later than 15 days after receipt of all the information required to be reviewed by Section 3(b)(1)(2) and (3), the Director shall submit to the Committee, to which such nomination has been referred, a report of the results of his inquiry into the nominee's background and integrity. The report shall not contain any recommendation on the question of whether the Senate should advise and consent to the appointment of the nominee, but shall contain:

(i) The biographical and financial information submitted to the Office by the nominee;

(ii) Copies of any other relevant documents, except those received under section 3(b)(2);

(iii) Summary of the findings of the Office, including any indications of potential sources of conflict or disqualification uncovered by the Office's inquiry; and

(iv) Any other information considered relevant to questions concerning the nominee's background and integrity.

With the approval of the committee to which a nomination has been referred, the period within which such report must be submitted may be extended for not more than 15 additional days. However such committee may request further information from the Director at any time.

(2) All reports submitted to a committee under this subsection shall be confidential and shall not be disclosed to the public, except those portions pertaining to biographical and financial disclosure statements submitted by the nominee, unless the committee by recorded vote orders such reports (or portions thereof) to be disclosed and made available to the public.

(d) No Committee of the Senate to which a nomination subject to this review has been referred, shall take any action on such nomination (including holding hearings) until it has received the report required by this subsection on the nominee's background and integrity.

(e) The provisions of this section shall not be construed as a limitation on the prerogative of the individual committee to conduct, on their own initiative and under their own guidance, whatever investigations on the nominee they may deem to be advisable.

REVIEW OF INVESTIGATIVE REPORTS SUBMITTED BY THE PRESIDENT

SEC. 4(a). The Director shall review investigative reports submitted by the President pursuant to Section 3(b)(2). At the discretion of the Director, responsibility for that review may be delegated to Office staff: *Provided*, That the Director and any such staff must obtain any security clearance which may be required with respect to such reports.

(b) If it is determined that any information may be incriminating, such information shall be brought to the attention of the Director. The Director may require supporting evidence from the appropriate investigative agency if such information is unsubstantiated, and may make any other inquiry, consistent with the provisions herein which he deems to be advisable. If it is determined that serious questions as to the nominee's background or integrity are raised, the Director shall so inform the committee in his report on the nominee.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated to the Office for each fiscal year such sums as may be necessary to enable it to carry out its duties and functions. Until sums are first appropriated pursuant to the preceding sentence, but for a period not exceeding 12 months following the effective date of this Resolution, the expenses of the Office shall be paid from the contingent fund of the Senate, in accordance with the paragraph relating to the contingent fund of the Senate under the heading "UNDER LEGISLATIVE" in the Act of October 1, 1888 (28 Stat. 546; 2 U.S.C. 68), and upon vouchers signed by the Director, except that vouchers shall not be required for payment of salaries of employees paid at an annual rate.

TITLE II. STANDARDS FOR CONFIRMATION

SEC. 1. Rule 38 of the United States Senate is amended—

(1) by striking out "Executive Session—" from the heading;

(2) by striking out paragraph 1;

(3) by renumbering paragraphs 2, 3, 4, 5, and 6 as paragraphs 4, 5, 6, 7, and 8 respectively; and

(4) by adding at the beginning thereof the following new paragraphs:

"1. When nominations shall be made by the President of the United States to the Senate, they shall, unless otherwise ordered, be referred to appropriate committees; and in reviewing nominations the Senate shall inquire as to the nominee's positive qualifications for the position for which he is being considered.

"2. In determining whether to advise and consent to a nomination, the following general standards shall be applied by the Senate and its committees:

"(A) By reason of background, training, or experience, the nominee is affirmatively qualified for the office to which he or she has been nominated.

"(B) The personal and professional integrity of the nominee shall be taken into consideration, and whether the nominee should be disqualified due to conflicts of interest.

"(C) The nature and needs of the particular office to which the individual was nominated, the nominee's commitment to the enforcement of applicable statutes and regulations (in the case of an agency appointment) or to the administration of law be taken into consideration.

"(D) In the case of a collegial body, the existing composition of that body, and whether or not members of a single sector or group are too heavily represented, shall be taken into consideration.

"(E) The nominee meets the statutory qualifications to hold the office to which he or she has been nominated.

"3. The final question on every nomination shall be, 'Will the Senate advise and consent to the nomination?' which question shall not be put on the same day on which the nomination is received, nor on the day on which it may be reported by a committee, unless by unanimous consent."

SUMMARY

RESOLUTION ON CONFIRMATION REFORM

TITLE I. SENATE OFFICE ON NOMINATIONS

SECTION 1. This resolution creates a new Congressional organization, within the Senate, known as the Office on Nominations. (Hereafter: the "Office").

SEC. 2. Office Director and Staff—The Director will be appointed by the President pro tempore of the Senate, upon the recommendation of the Majority and Minority leaders of the Senate. The appointment will be made for a term of two years, and shall be made without regard to political affiliations and strictly on the basis of his fitness for office.

SEC. 3. Procedures—The Office shall inquire into the background and integrity of nominees to major positions requiring Senate confirmation in the executive and judicial branches, and the independent agencies. That includes cabinet members, certain subcabinet members, justices, judges, commissioners and other officials.

Upon notification by the Secretary of the Senate that a nomination has been received, the Office shall conduct an investigation on the nominee. The investigation shall concern the "background and integrity" of the nominee, but shall not involve any inquiry into the nominee's positions, opinions or beliefs on policy matters But the Office shall consider real or apparent conflicts of interests, and shall examine all documents relevant to that consideration.

The Office shall not have subpoena power, but the Director may request issuance of a subpoena for a particular purpose from the Standing Committee of the Senate with jurisdiction over the nominee.

All nominees subject to review by the Office shall submit detailed biographical and financial disclosure statements, which will be made available for public inspection. All other documents, papers, and investigative reports will remain strictly confidential and shall not be released to the public by the Office.

The Office shall review copies of any investigative reports, prepared on the nominee by any Federal agency and submitted to the President as part of his consideration of the nomination. This would include, but is not limited to, summaries of investigations conducted by the Federal Bureau of Investigation.

The Office shall also review a statement, submitted by the President, on each nomination subject to review by the Office indicating the nominee's qualifications and the reasons for his selection for that particular position.

The Office shall submit its report on the nominee to the Committee as soon as possible, but not later than fifteen days after the Office receives the above information from the nominee and the statement and reports from the President. The Office report, which shall not contain any recommendations on confirmation, shall include:

(i) Biographical and financial statements filed by the nominee, and copies of any other relevant documents;

(ii) Summary of the investigative findings;

(iii) Any other information considered relevant to questions of the nominee's background and integrity.

The contents of this report are to be held strictly confidential, and may be released to the public only by a recorded vote of the Committee with jurisdiction over the nomination.

The Senate committee with jurisdiction over the nomination shall not take any action on the nominee until it receives the report of the Office. It may however conduct its own checks and inquiries into the nominee.

SEC. 4. Review of Investigation Reports Submitted by the President to the Office.

The Director and staff of the Office shall review such investigative reports submitted by the President.

In his report to the Committee, the Director shall note any serious questions which arise from this or any other source regarding the nominee's background or integrity.

TITLE II. STANDARDS FOR CONFIRMATION

The following general standards will be applied by the Senate in its consideration of a nomination:

By reason of background, training or experience, the nominee is affirmatively qualified to hold the office to which he was nominated.

Consideration of the personal and professional integrity of the nominee, including inquiries into conflict of interest whether real or apparent.

The nature and needs of the particular position to which the person has been nominated.

In the case of nomination to a collegial body, the Senate shall also consider the existing composition of that body and whether or not members of a single sector or group are too heavily represented.

That the nominee meet the statutory qualifications to hold the position to which he was nominated.

Mr. PERCY. Mr. President, continuing allegations on the financial activities of Bert Lance raise serious questions about his position as the Director of the Office of Management and Budget. Yet this issue also raises far broader questions regarding the Senate confirmation process as a whole. The Senate's duty to advise and consent to Presidential appointments is a central feature of our constitutional system of checks and balances; this function has not been exercised effectively or consistently, however, with undue deference being accorded to Presidential preferences.

The fact that crucial information concerning Mr. Lance's past financial activities did not come to the attention of the Governmental Affairs Committee last January—information which would have regretfully caused me to vote against the confirmation—underscores the failings of the nominations process.

There are no existing Senate-wide guidelines for the review and investigation of Presidential nominees. In too many cases a "rubberstamp" endorsement follows perfunctory hearings. Only a few committees regularly evaluate nominees on the basis of detailed disclosure statements, responses to policy questions, investigative work done by the committee staff, and well prepared for public hearings—and even then temporary political considerations often overshadow longer range considerations on the nominee's positive qualifications.

In an effort to strengthen the confirmation process, Senators RIBICOFF, JAVITS, and I have introduced Senate Resolution 258 to create a Senate Office on Nominations and to amend the Senate rules to establish criteria governing the consideration of nominees. The Office on Nominations would conduct a complete inquiry on each major nominee, including a review of the investigative reports which are made available to the President. It is important to note that the resolution includes careful procedures to protect against the unauthorized disclosure of sensitive information concerning nominees, and that the office would in no way encroach upon the existing prerogatives of Senate committees. Rather it would insure that each committee would be provided with an independent, nonpartisan, thorough inquiry into the background and integrity of each Presidential appointment.

This resolution will be an important step in transforming the Senate's advise and consent function from a negative sanction invoked only in exceptional cases into a positive force to improve the quality of appointed Government officials.

AMENDMENTS SUBMITTED FOR PRINTING

VA MEDICAL SERVICES—H.R. 5027

AMENDMENT NO. 839

Ordered to be printed and to lie on the table.)

Mr. STONE. Mr. President, I am submitting an amendment to H.R. 5027, which has been reported by the Senate Committee on Veterans' Affairs. This amendment is identical to S. 1925 which I introduced with Senator CHILES on July 26, 1977, to name the Veterans' Administration Hospital in Tampa, Fla., the "James A. Haley Veterans' Hospital" in honor of former Congressman James Haley.

NOTICE OF HEARINGS

FREEDOM OF INFORMATION ACT

Mr. ABOUREZK. Mr. President, I wish to announce that the Subcommittee on Administrative Practice and Procedure of the Senate Judiciary Committee will hold hearings on the Freedom of Information Act. The hearings are sched-

uled for September 15 and 16 and October 6, 1977. The September 15 hearing will be in room S–126, the Capitol, the September 16 hearing will be in room 2228, Dirksen Senate Office Building, and the October 6 hearing will be in room 1202, Dirksen Senate Office Building, at 10 each day.

Any person wishing to appear and testify or to submit a statement should contact the subcommittee staff in room 162, Russell Senate Office Building, telephone 224–5617.

REVIEW OF THE REORGANIZATION OF THE OFFICE OF HUMAN DEVELOPMENT

Mr. RANDOLPH. Mr. President, as chairman of the Subcommittee on the Handicapped, I announce that our subcommittee has scheduled a hearing on a review of the Reorganization of the Office of Human Development in the Department of Health, Education and Welfare as it impacts on programs for the handicapped. The hearing will be held on Tuesday, September 20, 1977 in room 1114 Dirksen Senate Office Building starting at 9:30 a.m.

SELECT COMMITTEE ON SMALL BUSINESS

Mr. NELSON. Mr. President, I wish to announce that the Senate Select Committee on Small Business has scheduled a hearing on the Small Business Venture Capital Act of 1977 (S. 1815) and also on the Minority Enterprise Small Business Investment Companies, MESBIC, legislation.

The hearing will be held on Tuesday, September 27 in room 424 of the Russell Senate Office Building at 10 a.m., and will be chaired by Senator NUNN.

ENERGY NEEDS OF RURAL AMERICA

Mr. CLARK. Mr. President. I wish to announce that the Subcommittee on Agriculture, Nutrition, and Forestry will continue its hearings on the energy needs of rural America on Tuesday, September 13 at 10 a.m. in room 324 Russell.

At the earlier hearings held in July, the subcommittee requested that representatives of the U.S. Department of Agriculture return in 60 days to report on any progress or improved coordination both within the Department and among the agencies with respect to meeting rural energy needs. Deputy Secretary of Agriculture John White will testify on the efforts of USDA in these areas.

Anyone wishing to submit written testimony should contact Denise Love, hearing clerk, room 324 Russell, Washington, D.C. 20510 (Ext. 40014).

SUBCOMMITTEE ON LABOR

Mr. WILLIAMS. Mr. President, I wish to announce that the Labor Subcommittee of the Committee on Human Resources will hold hearings on S. 1883 and S. 1855, bills to amend the National Labor Relations Act. Nine days of hearings are scheduled on the following dates: Tuesday, September 20, through Friday, September 23, and Monday, September 26, through Friday, September 30, 1977. The hearings will begin at 9:30 a.m. and will be held in room 4232 of the Dirksen Senate Office Building.

JUDICIAL TENURE ACT

Mr. DECONCINI. Mr. President, I wish to announce that an open public hearing will be held by the Subcommittee on Improvements in Judicial Machinery of the Committee on the Judiciary on September 14, 1977, on S. 1423, the proposed Judicial Tenure Act.

The hearing will be held in room 2228, Dirksen Senate Office Building, commencing at 9 a.m.

Persons who wish to testify or submit a statement for inclusion in the record should communicate, as soon as possible, with the subcommittee office, 6306 Dirksen Senate Office Building, Washington, D.C. 20510; telephone 224–3618.

FEDERAL CRIMINAL DIVERSION ACT

Mr. DECONCINI. Mr. President, I wish to announce that the Subcommittee on Improvements in Judicial Machinery of the Committee on the Judiciary will hold another open public hearing on S. 1819, the proposed Federal Criminal Diversion Act of 1977.

The hearing will be held on September 19, 1977, commencing at 9 a.m. in room 2228, Dirksen Senate Office Building.

Persons who wish to testify or submit a statement for inclusion in the record should communicate as soon as possible with Tim McPike of the subcommittee staff, 6306 Dirksen Senate Office Building, Washington, D.C. 20510; telephone 224–3605.

FRANKED MAIL

Mr. GLENN. Mr. President, the Subcommittee on Energy, Nuclear Proliferation and Federal Services of the Committee on Government Affairs has scheduled a public hearing for 10 a.m., Wednesday, September 21, 1977, on the bill H.R. 7792, which would establish certain limitations on the use of the frank through amendments to title 39, United States Code. The subcommittee also will take testimony on the question of permitting Senators to mail franked mail to their constituents with a simplified form of address—that is, so-called postal patron or postal customer mail.

The hearings will be held in room 6226 of the Dirksen Building. Persons desiring to present testimony or statements for inclusion in the record should contact the subcommittee staff on 224–2627.

ADDITIONAL STATEMENTS

WHAT MAKES SENATORS RUN? CAN OPERATING COSTS BE REDUCED—WITH INCREASED EFFICIENCY?

Mr. HELMS. Mr. President, I am hearing increasing expressions of concern that the traditional constituent services provided by Congressmen and Senators have so proliferated in recent years that it is becoming increasingly difficult for Members of Congress to perform their primary function—legislating. A recent article in the Wall Street Journal, which I will ask to be printed at the conclusion of my comments, quoted one senior House Democrat as saying: "It's all well and good for these guys to give first-rate service to their constituents, but their work as legislators and as educators is third-rate, and that's not well and good."

Lest there be any misunderstanding, in no way do I demean the rendering of constitutent services. The people's problems are real, and often the service we render is absolutely essential. As the bureaucracy grows, and the bureaucrats become increasingly arrogant and unrealistic, a Senator or a Congressman may be a citizen's last recourse, and his only hope of cutting red tape and receiving a fair and satisfactory solution to his problem.

Yet, however legitimate these requests for assistance may be—and the vast majority of them are—time and resources are finite. Because it is impossible, not only politically but as a matter of compassion, to refuse assistance when legitimately requested, something has to give. And too often what "gives" is the attentiveness of a Member of Congress to various duties—attendance at committee meetings, intelligent and well-attended floor debate, the study of legislation and background materials, informed votes, and even attention to one's family.

This problem was predictable, given the enormous increase in the size of the Federal Government in recent years. As I survey the mail I receive, it is interesting to note how many letters are written concerning Governmen+ agencies and programs that did not even exist 10 or 15 years ago, such as EPA, OSHA, or the FEA.

The economists have a term—"decreasing returns to scale"—which they apply to explain the downfall of many once prosperous businesses. The theory is that a business increases in efficiency through volume—up to a certain point. After that point, however, there are "decreasing returns" or lessened efficiency, because the size of the business makes adequate supervision and control increasingly difficult. For instance, we have all experienced certain private retail outlets, restaurants or amusement centers, that start out well enough and are popular; their popularity naturally leads to expansion. As the expansion continues, bred on the initial success, a point is reached where quality begins to deteriorate. The original owners of the enterprise lose control; employees of poorer quality are hired; individual attention is compromised. Finally, the quality deteriorates to such an extent that the business begins to fail. In common parlance, we say it has "over-expanded." At that point, either radical surgery is performed or the business goes bankrupt. And, in any case, it will never be quite the same.

The principle of "decreasing returns to scale" is likewise applicable to our present government. In increasing numbers, Senators and Congressmen are beginning to acknowledge that they have lost the ability to keep track of what is going on. They complain that they have been reduced to making token

gestures, "spot checks," and general oversight. It is common knowledge that, all too often many Senators and Congressmen do not really know what they are voting on when they come into the Chamber.

When I served as the administrative assistant to the late U.S. Senator Willis Smith in the early 1950's, we had a staff of seven. Period. The seven of us could answer all the mail, cover all the legislation, take care of all the constituent problems. Now, as a Senator myself, I have found it necessary to employ four times that many. Despite their hard work and long hours congressional staff members seem to be on a never-ending merry-go-round of trying to get caught up with all the work.

The obvious answer to these difficulties is to cut back on the size of Government, a move that would be much welcomed by the citizens. However, given the political realties of the makeup of the present Congress, and the power of special interest groups, this reform is not likely in the immediate future. Therefore, we must live with the situation as it now is, and attempt to increase efficiency wherever and whenever possible.

In this regard, I believe that there is much to be said for the pooling of constituent problems among members of the same congressional delegation. It is well known that many constituents often write two or more letters to their Senators and Congressmen about the same problem. Obviously, this leads to unnecessary duplications, both to the congressional offices and to the Government agency attempting to respond. The consolidation of staff concerned with many constituent problems would allow the incoming mail to be screened so as to avoid these duplications. A consolidation of services would also permit greater specialization among staff members. Additionally, the bureaucracy perhaps would be inclined to be more responsive when it is known that the entire delegation is making a request, as it is likely that at least one member of the delegation serves on the committee overseeing the particular agency involved.

There would be, I suppose, a certain personal political penalty to pay for such a plan. But what our constituents want is not politics as usual, but service, and they are entitled to receive it. It is they, after all, who pay our salaries, a fact we should never forget.

This experiment has already been implemented in several Senate offices, and I understand that the results have been most gratifying. For instance, I understand that my two distinguished colleagues from Oklahoma, Senators BELLMON and BARTLETT, have combined all constituent services, from the lost social security check to large Federal grants to communities. The entire New Mexico delegation, both Senate and House, have agreed to combine their efforts on all Federal projects for their State.

In the coming months, I plan to explore the possibilities of similar arrangements for the North Carolina delegation, and will be discussing this idea with my able colleague, Senator MORGAN, and each of the 11 North Carolina Members in the House. I believe the implementation of such a plan might not only provide better service for our constituents, but allow all of us to spend more time on legislation. I know Senator MORGAN has talked many times in this Chamber about how difficult it is to simply communicate with fellow Senators. I imagine all Senators understand his frustration.

Mr. President, I ask unanimous consent that the August 18, 1977, article appearing in the Wall Street Journal entitled "Errand Boys" by Alan L. Otten be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ERRAND BOYS

(By Alan L. Otten)

WASHINGTON.—The newer Congressmen don't care too much about shaping major government policies and programs. They seem far more interested in simply running errands for their constituents.

That, at least, is the conclusion of a good many veteran lawmakers, lobbyists and others who've watched the horde of Democrats elected to the House of Representatives in 1974 and 1976. Most of these observers, moreover, are frankly distressed by the trend.

"It's all well and good for these guys to give first-rate service to their constituents," says one senior House Democrat. "But their work as legislators and as educators is third-rate, and that's not well and good."

Congress has, of course, made it easier and easier over the years for its members to keep in touch with the folks back home and to handle a heavy load of "casework" for them. There are larger staffs, bigger mail and phone budgets, computers and other sophisticated communications equipment. Members now can marshal impressive resources to help old folks or veterans with their benefit problems, businessmen or farmers snarled in government red tape, young couples wanting advice on how to remodel a house or can vegetables.

"Members have always used service to cement themselves in office," a House leader declares, "but most have used that as a way to buy freedom to take the lead in policy areas that interest them. These newer guys see service as an end in itself. They ignore policy unless it directly affects their district."

Members of the last two congressional classes tend to admit the complaint. "We have guys who spend all their time on the phone, calling constituents at random and asking if there's anything they can do to be of help," one freshman relates, marvelling. Another Congressman, elected in 1974, recalls that he and his newly elected colleagues "at first talked about nothing but issues—what we could do about health care or tax reform or foreign policy. Now, we never do."

To some degree, this service orientation isn't all that surprising. Most newer Democrats come from Republican or marginal districts; from election night on, they were told that constituent service was their reelection security blanket. "They have to blur party or ideological lines," a Democratic strategist observes. "A high profile on issues isn't good for them."

There are also those who contend that in this day of public alienation from government, the ombudsman role—acting as buffer between the frustrated citizen and the frustrating bureaucrat—may actually be a Congressman's most important job.

Nonetheless, senior Democrats and Republicans insist that ombudsmanship can't be the entire job. Moreover, they say, not only are most of the new boys disinclined to become deeply involved in broad issues, but when they do have to vote on policy, they tend to take the safe side—to vote the majority sentiment of their districts, whether that's their own conviction or not.

"The principal purpose of politics can't be simply survival," a colleague criticizes. "The guy who is lookng at the weather vane every minute isn't doing his job properly." Another old-timer demands, "If you're not willing to march up the hill once in a while, why are you here?"

Just why should the newer Congressmen be taking this tack? There are a dozen different explanations.

Several politicians point out that civil rights, Vietnam and other burning issues of the '60s and early '70s are gone, and no new "cause" has come along to force the newcomers to get committed on major problems. Others cite the general public hostility to government and bureaucracy. "The political fear level in Congress is very high," one liberal lobbyist says. "People are anti-government, and the safest thing politicians can do is to duck issues altogether."

Finally, most new members love the job, and want to keep it. They like the prestige; the pay is good; the work's not that hard for a vigorous young person. "Let's face it," a sophomore Democrat says. "A lot of us are on a real ego trip. The direct mail, the mobile office back home, all the drudgery of casework—that's our ticket to keep on taking that trip."

Political scientist Morris P. Fiorina ties several of these explanations together. In a slender Yale University Press paperback entitled "Congress, Keystone of the Washington Establishment," he argues that the number of "safe" congressional districts is steadily increasing not because of sweetheart reappointment deals or underlying economic and socal changes but because citizens have switched the basis on which they vote.

More and more men and women, he believes, are de-emphasizing policy as the basis for voting and instead are supporting the candidate who gives good constituent service. Accordingly, the Congressman who wants to be reelected inevitably stresses service.

Congressmen, Mr. Fiorina asserts can serve their constituents by passing laws, procuring pork or doing casework. Laws can be risky, pleasing many voters but angering others. Pork—dams, courthouses and other federal projects—are usually popular, but even a new dam or highway may have some critics back home.

Casework and other constituent errands, though, are pure gold—all plus, no minuses, and with word-of-mouth advertising by happy beneficiaries multiplying the political gain. "For a reelection-oriented Congressman, the choice is obvious," he says.

If Mr. Fiorina is right, chances are that this devotion to casework and downplaying of policy will continue. Most lawmakers, new and old, are inclined to agree.

"Once you start down that road," observes a thoughtful GOP Congressman, "once you establish that kind of pattern here, you don't change very easily."

THE GENOCIDE CONVENTION: TIME TO STAND UP

Mr. PROXMIRE. Mr. President, I would like to call to my colleagues' attention an article on the Genocide Convention which appears in the September issue of the Free Trade Union News, published by the AFL–CIO.

Written by Betty Kaye Taylor, the executive secretary of the Ad Hoc Committee on the Human Rights and Genocide

Treaties, this article puts in clear perspective the current political situation surrounding this important human rights treaty.

Ms. Taylor is a keen political observer and has been in the forefront of the effort to secure ratification of this convention, working closely with Senator JAVITS and myself on behalf of 54 national organizations which support our efforts here.

She has written an extremely important article. It correctly assesses the political realities that have thwarted our efforts to obtain ratification and makes a very important point in favor of ratification this month: to strengthen the President's hand at the upcoming Belgrade Conference on Human Rights.

I urge my colleagues to review her points carefully and join with me in securing ratification before this session ends.

Mr. President, I ask unanimous consent that Ms. Taylor's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STILL IN THE SENATE'S DEEP FREEZE—THE GENOCIDE CONVENTION

(By Betty Kaye Taylor)

"I see a hopeful world," President Jimmy Carter told the United Nations General Assembly on March 17, "a world dominated by increasing demands for basic freedoms, for fundamental human rights, for higher standards of human existence. We are eager," he said, "to take part in the shaping of this world."

To demonstrate his commitment, he told the applauding delegates, he would "work closely" with Congress in seeking ratification of the UN Genocide Convention. The Genocide Convention, adopted by the UN in 1948, makes it a crime under international law to destroy any national, ethnic, racial, or religious group. It has been ratified by 83 members of the UN. The United States is the only major power that has failed to do so.

The President, it must be said, has tried to end this incongruity. In a letter to the Senate, where the Genocide Convention has been bottled up since it was submitted by President Truman in 1949, he urged ratification as a signal to the world of "our determination to advance and protect human rights." That was on May 23. The President, no doubt, was not only thinking of his UN commitment but looking forward to the Belgrade meetings in early October when the signators to the Helsinki Accords will review the progress, or lack of it, on human rights since Helsinki. The White House staff tried energetically to get the Senate to ratify the Convention during this past session. It failed. Whether it will have better luck when the Senate reconvenes early in September is difficult to say. But if the Senate fails to produce a ratification vote before Belgrade, it is clear that the credibility of our delegates on human rights issues will be seriously impaired.

It isn't that the Senate lacks the votes to condemn genocide; the votes are there. But a relatively small number of Senators, sensitive to the pressures of the Liberty Lobby and the John Birch Society, contend that, in ratifying the Genocide Convention, the United States will be undermining its rights as a sovereign nation. They have made it clear that efforts to get ratification will encounter a filibuster. In the last session, Majority Leader Robert Byrd, an astute "head counter," could not find the 60 votes required for cloture. To have gone ahead without that assurance would have risked making a shambles of the Senate schedule. This Senator Byrd was not prepared to do.

No one questions his sincerity, but the pattern has become all too familiar. In 1971, when Mike Mansfield was the Senate's Majority Leader, he refused to call the Genocide Convention up for debate because "a propitious time . . . has not arisen," he said. He wanted to be assured that it had "sufficient supporters." "There is not a single proposal that has been before the Senate as long" as this one, Senator William Proxmire reminded his colleagues.

Why couldn't the votes be found for cloture then or in 1977? Genocide in this country is a non-controversial issue. Except perhaps for a few deranged persons, no one in the United States actually favors genocide. But the ultra-rightist groups, with their habitual paranoia, profess to see in the Genocide Convention a plot to undermine human rights. Some even argue that it is anti-Christian. This view was expressed by E. Stanley Rittenhouse, legislative aide for the Liberty Lobby in Washington, at hearings before the Senate Foreign Relations Committee in May. "The ugly head of anti-Christianity is rising more and more in the last few years," he said with a blithe disregard for tense. "This treaty (the Genocide Convention) would continue that trend."

RELIGIOUS SUPPORT

Ratification, it should be noted, is supported by the United Church of Christ, the American Baptist Convention, the Methodist Church General Board of Christian Social Concerns, the National Catholic Conference for Interracial Justice, the National Conference of Christians and Jews, and a variety of other religious organizations no less sensitive to the fortunes of Christianity than the Liberty Lobby.

But the Liberty Lobby and the entire constellation of ultra-rightist groups have managed to produce a flood of letters and phone calls to wavering Senators each time the Genocide Convention has come up for ratification. This last time, as the Ad Hoc Committee on the Human Rights and Genocide Treaties informed the White House, the effort to defeat ratification began shortly after President Carter's UN address. The Ad Hoc Committee, which has been lobbying for ratification since 1964, unfortunately failed to mount a similar effort. This explains why Senator Byrd could not find his 60 votes for cloture.

The entire history of the Genocide Convention has been a tortured one. The idea for it originated with a distinguished attorney named Raphael Lemkin. Lemkin came from Poland. He and a brother were the only survivors of a large family; the others had been murdered during the Holocaust. Oddly enough, the United States was among the first to take up the idea. It was under U.S. leadership that the UN adopted the Genocide Convention. President Carter, when he urged ratification, was following the course travelled by every President since Truman. Even Richard Nixon said that it was needed to "demonstrate unequivocally our country's desire to participate in the building of international order based on law and justice." His own respect for law, as it turned out, was not unblemished, but that is beside the point.

The only respectable opposition to ratification came from the American Bar Association. But in February 1976, the ABA's House of Delegates reversed itself. It voted in favor of ratification. This left the opposition almost exclusively to the "ultras." Their influence in the Senate, judging by the last session, was sufficient.

QUINNESS BOOK

At the Senate Foreign Relations Committee hearings in May, Bruno V. Biker, chairman of the American Bar Association's Committee on International Law, said that the Genocide Convention "is eligible for the 'Guinness Book of World Records' as being the oldest treaty pending before the United States Senate."

The ABA, of course, is partly responsible for that record. Until it reversed itself last year, its opposition was frequently cited as justification by Senators who opposed ratification. The most zealous efforts by Senators Jacob Javits, William Proxmire, Frank Church, and a number of others were unavailing.

Nor were efforts by the Ad Hoc Committee sufficient. The committee represents 54 national organizations, including 10 national church groups and as many trade unions, but it was unable to muster enough "grass roots" support to sway the Senate.

Some people suggest that the furor over the Genocide Convention is largely wasted, and that, in real terms, the Convention has no significance. It has been ratified by Uganda and by the Soviet Union, they point out, and this has not prevented either General Idi Amin or the Soviet Politburo from pursuing genocidal policies.

But, as conservative columnist William Buckley Jr. noted on June 21, in endorsing ratification, "the crime of genocide is one of the most distinctively hideous crimes of the century: practiced against the Jews, against any number of African tribes, against Asiatics, against Cambodians—and, in less than a systematic way, against the Irish. The failure of the Senate to declare itself on the subject is arresting . . . "

In 1971, Justice Arthur J. Goldberg told the Senate Foreign Relations Committee that, when he was serving as our Ambassador to the United Nations, he was frequently asked to explain the Senate's failure to ratify. "Frankly," he said, "I never found a convincing answer. I doubt that anyone can."

This May, he again appeared before the Senate Foreign Relations Committee as chairman of the Ad Hoc Committee. Ratification, he told the committee, would at least "symbolize" our concern for human rights throughout the world. "We cannot minimize the value of symbols in our lives," he said. "Our flag is a symbol to which we are devoted, and it seems to me, speaking very frankly, that the time is overdue for our country to symbolize its strong feeling about the genocide by the Nazis in World War II . . . Our record during World War II, during the Holocaust, was not all that it should have been. Our immigration policies were too restrictive. We did not open our doors as we should have to those who were fleeing from barbaric persecution because of their race or religion.

TIME TO STAND UP

"It's time," he concluded, "for the Senate to stand up and be counted."

As I suggested earlier, September will be a crucial month in the Senate for the Genocide Convention. If it is not ratified, our delegates will enter the Belgrade meetings with a badly tarnished image. But experience tells us that will be the case unless we organize a "grass roots" campaign sufficient to negate the influence of the Liberty Lobby and the John Birch Society. It's time perhaps for all of us to stand up and be counted.

NANCY HANKS

Mr. DOLE. Mr. President, on behalf of many of my colleagues and myself, I would like to congratulate Nancy Hanks, who will be resigning October 2 as chairman of the National Endowment for the Arts, on a job well done.

Ms. Hanks, through hard work and impressive talents, has built a strong foundation on which American arts can grow.

Thanks to her, NEA's role in the nurturing of this Nation's cultural activities has become vast and far reaching. The endowment not only gives support to the already well-established cultural organizations but encourages ventures into yet unexplored art frontiers. NEA has also touched the artistic soul of small and rural communities, cultivating a sense of value in our American folk culture.

Mr. President, I ask unanimous consent that two excellent editorials which appeared in the Washington Star, September 3, 1977, and the Washington Post, September 5, 1977, be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD as follows:

[From the Washington Post, Sept. 5, 1977]

NANCY HANKS: A HARD ACT TO FOLLOW

It will not be easy to find another Nancy Hanks to run the National Endowment for the Arts—and that's probably as it should be, for the challenge now confronting the endowment is quite different from the one that Miss Hanks has handled with such admirable skill and energy. During her eight years on the job, Miss Hanks brought the NEA from relative obscurity to a position of great influence over a wide range of cultural activity in this country. Music, dance, drama, handcrafts, graphic art, the cinema, museums—all these have been nourished by a rising flow of federal grants awarded and administered by NEA under Miss Hanks' guiding hand. The endowment's budget has soared from little more than $12 million in 1969 to almost $114 million in 1977. The increase in the number of grants has been equally dramatic: from 711 in 1969 to more than 5,000 this year. An impressive network of state arts agencies has been developed, providing funds to thousands of local performing-arts and fine-arts groups and individuals.

As the quantity of NEA beneficiaries has increased, so has the quality—and the variety. NEA has reached beyond the better established, familiar and conventional cultural institutions to bring federal assistance to new, experimental activities and organizations, and to community-oriented projects. All this has largely been Nancy Hanks' doing, and she made it look easy, as she threaded her way through the cultural minefields in Congress and the bureaucracies with precision and sophistication. By her skill and hard work she has made the NEA a big and flourishing fixture on the American cultural landscape, and all those who are involved in or merely care for the development of the arts in this country are heavily in her debt.

But just because NEA's growth has been so considerable, and its accomplishments under Miss Hanks so impressive, her departure probably will serve, more or less, to mark the end of an era of expansion—an era that saw an explosion of federally assisted artistic activity across the country. What now lies ahead, we would suspect, is likely to be something of a breathing spell, devoted largely to the consolidation of the gains that have been made and the refinement of the endowment's programs and purposes. The obvious reason is that the amount of federal money available for subsidizing the arts is not going to expand at anything like the dizzying rate of the past eight years. And it shouldn't be expected to. Without being too arbitrary about it, it seems to us that there ought to be some cut-off point beyond which it is imprudent for the federal government to move in this field—some point at which the incentive to private patronage and support is diminished by too-easy access to the Treasury. There may well be a point, too, when excessive NEA expansion could stir damaging congressional resentment.

The demand for NEA funds, however, is not likely to slow down, with the result that Miss Hanks's successor may find the choices even harder to make and the priorities more difficult to fix than has been the case during the big expansion years. This probably puts a premium on finding new ways to encourage private support of state and local arts programs. The new chairman may also want to explore the possibility of making more readily available to local sponsors and managers of activities some of the technical and managerial expertise acquired by the endowment over the years.

The names of several candidates for the NEA chair have been floated about, and one senses that the campaigning, while restrained on the surface, is intense. Politics is no stranger to the talented, temperamental, strong-minded and passionate people that make up what is innocently referred to variously as the art world or the cultural community. So, for that reason alone, we would suspect that the administration's choice will not be an easy one. We trust that it will be taken with some considerable care—for the good of the new chairman, as well as the cause of federal support for the arts. The performance of Nancy Hanks at NEA is not going to be an easy act for anyone to follow.

[From the Washington Star, Sept. 3, 1977]

THE ONCE AND FUTURE NANCY

Nancy Hanks' coming departure from the National Endowment for the Arts is a measure of her success there. The Endowment's growth in the eight years she has run it—from a $9 million operation to one with $90 million at its disposal and prestige to match—has made her job too much of a prize for a Democratic President to leave in the hands of a holdover.

Indeed, the top spot at the Arts Endowment has been called the best job in Washington. As one politico said, it would take RFK stadium to hold the deserving Democrats who are after it.

It was several kinds of coup when, in 1969, President Nixon persuaded Nancy Hanks to leave the Rockefeller Brothers Fund and succeed Roger Stevens at NEA. The temper of the times was congenial to public support of the arts. Nancy Hanks was endowed with the energy and strategic sense to build on congressional receptivity.

In fact, in giving her the Arts post, President Nixon was handing a virtuoso her Stradivarius. In dealing with Congress, she turned out to be a genius-level persuader. The statement "Nancy got to him," was enough to explain many a change of heart in favor of more money for the arts.

Part of it was charm. Part of it was thoroughness—she visited everybody who might influence the decisions that mattered, and she was always able to point out what was in it for them politically to go her way. Part of it was simply recognizing resources ready to be tapped.

It was widely assumed that federal funding for the arts would run into trouble from snap-purse economizers among the Republicans. But, as the remains of more than one frontier opera house can testify, the tradition of prosperous American business people putting money into the arts goes back a long way. And, with both college and foreign travel taken for granted by the preponderance of a generation, there was a larger and more sophisticated audience than ever to make it seem like a good investment. Republicans turned out to be as accessible as Democrats.

Another side of Nancy Hanks' effectiveness has come out of what she didn't try to do. She never aspired to be a tastemaker. The subtle questions of esthetic direction she left to her assistant, Michael Straight, and to the peer review panels that pass on individual grants. Her role as she saw it was to get the money for whatever a consensus of leaders in the various art fields thought most worth doing.

The peer review panel is an idea adapted in this country from a British model. Grants are made after a frequently rotated group of recognized authorities pools its reactions to suggested art projects. As Andre Fortier, Canada's version of our Arts Endowment Chairperson, says of their use in his country, it's a "collective subjectivity," and probably as close as anyone can come to an informed yet impartial approach to judgment.

There are still plenty of sticky questions about what the Endowment can and should do. Doesn't the present system mean an endless perpetuating of establishment art at the expense of innovators? Can we have the excellence everybody endorses without favoring the highbrow elitists and neglecting the folk arts that speak to the commonality? Should so much money go to groups while lone artists continue to starve in their garrets? Has the politics of Endorsement financing meant channeling support to inferior artists just because of where they are and who represents them in Congress? Isn't the Endowment getting too big and starting to sink under bureaucracy's load of guidelines and official pieties? Already a certain mush of "enhancement" and talk of art as "an integral part of learning experience" can be found in its policy statements.

These are the issues that will test the new head of NEA. They suggest the need for a different sort of person than Nancy Hanks. A better administrator possibly; it would seem that even her habit of working 18 hours a day could not make up for her inability to delegate. With the Endowment as large as it has become, the next chairperson can't possibly oversee as much as she tried to unless there is willingness to let go some of the reins.

More importantly, Nancy Hanks' successor will need a touch of Andre Malraux—the role as it has developed calls for a person with cultural as well as political vision to bring to the federal presence in art. For all the genuineness of President Carter's enthusiasm for music and painting it is an enthusiasm focused on the classics. Leadership with a sure instinct for values that can accommodate the avant garde is unlikely to come out of the White House.

But to suggest that the next head of the Arts Endowment should not be another Nancy Hanks is not to downgrade the achievement of the one we've had. Quite the opposite. It's a tribute to her. It is only because she has done her work so well that the Endowment is well enough established as an American institution to be ready to move on to another phase.

MUST PEOPLE RETIRE AT 65?

Mr. CHURCH. Mr. President, House and Senate committees have already conducted hearings on proposals affecting mandatory retirement in private industry and Government.

As things now stand, the prospects are excellent that one or both Houses of Congress will vote on this legislation during the first session.

Quite clearly, issues affecting involuntary retirement are complex, far reaching, and vitally important for Americans.

Recently, the Committee on Aging, of which I am chairman, called upon Dr. Marc Rosenblum, an economic consultant, to prepare a working paper on "The Next Steps in Combating Age Discrimination in Employment: With Special Reference to Mandatory Retirement Policy."

Dr. Rosenblum analyzes objectively and concisely the major arguments for and against compulsory retirement. In addition, his working paper provides an in-depth examination of recent court decisions involving mandatory retirement and other related issues.

Another important contribution in this continuing dialog is a recent U.S. News & World Report interview with two articulate leaders.

Arthur C. Prine, Jr., a vice president for relations services for R. R. Donnelley and Sons in Chicago, maintains that mandatory retirement is "deeply ingrained in our economic system" and is necessary.

Harriet Miller, executive director for the National Retired Teachers Association-American Association of Retired Persons, challenges this notion. She supports flexible retirement policies, contending that people want to be judged on ability and not on age.

Mr. President, I commend this interview to my colleagues, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

MUST PEOPLE RETIRE AT 65?

YES—"IT'S DEEPLY INGRAINED IN OUR ECONOMIC SYSTEM"

(Interview With Arthur C. Prine, Jr., Vice President for Relations Services, R. R. Donnelley & Sons, Chicago)

Q. Mr Prine, why should there be a mandatory-retirement age for workers in industry and government?

A. The concept of retirement at 65 is something of more than 40 years' standing. By now, it's deeply ingrained in our economic system. Government, employers and unions have built up a tremendous body of law, policy and practice keyed to retirement at 65. The concept reaches into Social Security, into the design of thousands of retirement plans, into funding concepts of individual plans. I simply don't think it makes sense suddenly to tear up this fundamental basis on which all these laws and benefits and policies are based.

Q. Why shouldn't people have the legal right to stay on the job as long as they do it well?

A. As soon as you say "as long as they do it well," you raise a very big question. Today, with mandatory retirement we don't have to discriminate among workers, telling one employe that he can continue to work while telling his co-worker that he must go. Everybody retires at the same age with dignity, with pride and with the sense that his many years of service are truly appreciated.

As soon as Government imposes a system of individual judgments—many of which are necessarily subjective—we will face terrible problems. It is very easy to tell one person why he can continue. But it becomes very difficult to go to others and tell them that they have reached that point where their performance is deteriorating or that maybe even their health and safety are endangered.

The employe who wants to continue working is not in a frame of mind to accept that judgment. By definition, this is a long-service employe who has made many contributions, who is well thought of. All of a sudden, employers are placed in a position where that employe, at a time when he is extremely sensitive, is going to have his dignity and his pride undermined. This would be a terrible thing to do to people.

Q. Is mandatory retirement necessary to make jobs available to younger workers?

A. If legislation is passed to eliminate mandatory retirement, a slowdown in turnover within the work force with increased unemployment would follow automatically. And we know that the major impact of unemployment unfortunately falls on younger and minority workers. A number of companies would have to review and in many cases reduce their affirmative-action programs.

I should also point out that the potential for controversy and extended litigation is virtually endless. Each case where the employe is unwilling to accept the employer's judgment would be subject to Government review. I think we would need growing numbers of Government investigators assigned to review thousands of individual complaints, and we would have a further clogging of court dockets.

Q. Would this necessarily happen if the retirement age were simply raised from 65 to 68 or 70?

A. Yes—although the size of the problem varies by company and by industry. In some industries where jobs are physically very demanding, I believe many people see a need for earlier retirement.

By the way, one basic reason the AFL–CIO is opposed to having this proposed legislation apply to any of its contracts is because, as I understand it, they feel the need to tailor retirement policies and concepts to individual industry and company needs—and I think they're right. There is also a wide diversity of retirement practices in nonunionized companies, tailored to the particular needs of the company.

Q. Do you believe that ending mandatory retirement would hamper collective bargaining?

A. I think that would be inevitable, since many companies and unions have worked out approaches that are keyed to the particular needs of a specific industry or company. As soon as Government tries to impose a uniform rule across all industry, it is going to play havoc with those agreements.

Q. If there were no mandatory retirement how many people would prefer to stay on the job beyond age 65?

A. I just don't know. Today, most people tend to accept mandatory retirement, so that, we really don't get much expression as to how many would like to continue.

Q. Should an alternative be considered, such as allowing an employe to retire gradually, with his hours reduced over a period of years?

A. I really don't think that's a very practical solution, either in a plant or in an office.

Q. Doesn't mandatory retirement deprive an employer of an older worker's valuable experience?

A. No question about it, and there are a number of cases in which I'm sure that employers would like to see certain employes continue.

But the problem is the reverse side of the coin: It's what you do to the others that you have to ask to go.

"EVERYONE IS TREATED EQUALLY"

Q. What about some provision for waiving mandatory retirement within a company in special cases?

A. Again, I think the much better system is one where everybody is subject to the same rule. Once we try to pick and choose we're in trouble. One of the benefits of mandatory retirement is that everyone is treated equally. When you have a mandatory-retirement age, people plan for it, and they know they're going to retire at that age or earlier.

Q. Why do you think some people want to continue to work past age 65?

A. Statistics clearly indicate that more and more people want to retire earlier rather than later.

I think the two primary reasons why some people would like to continue working beyond 65 are these: First, they are concerned about inadequate funding of Social Security benefits and, second they are concerned that inflation is eroding the value of what they have created over a lifetime of work. I don't think the Government is properly responding to these problems by moving people toward later retirement.

NO—PEOPLE "WANT TO BE JUDGED ON ABILITY AND NOT ON AGE"

(Interview With Harriet Miller, Executive Director, National Retired Teachers Association and American Association of Retired Persons)

Q. Miss Miller, should workers be required to retire at 65?

A. We oppose a mandatory-retirement age. We believe that age is an inappropriate and unreasonable basis for determining whether an individual can or can't do a job. That decision ought to be made solely on the basis of a person's ability to perform the work, not on the number of birthdays.

Q. Are you against mandatory retirement at any age?

A. Yes, we oppose age discrimination in employment at any age. However, we recognize that not all changes can be expected at once.

For example, we have not opposed the legislation currently under consideration in the House of Representatives which would extend to age 70 the protections of the Age Discrimination in Employment Act to people employed in the private sector. We see that as a step forward. But the arbitrary limit perpetuates age discrimination, and so we will continue to work to have that limit removed.

Q. Would you like to see President Carter come out in favor of lifting that age barrier?

A. Yes—he has already done so. He has often referred to his mother's experience as an argument against mandatory retirement. He has pointed out that his mother's work in India for the Peace Corps took place at an age when she could not have worked for many employers in the U.S.—because she was 68.

Q. What kinds of complaints do you hear from older people about being forced out of jobs because of age?

A. Our members tell us that they aren't asking for any special privilege. They want to be able to compete in the marketplace for a job on the basis of ability. If they cannot perform the work, they are willing to accept retirement. But they want to be judged on ability and not on age.

We heard, for example, from a woman who is a shoe clerk. She lied about her age many years ago. She is now 75, and her employer is retiring her because he thinks she's 65. She is very much annoyed because she believes she can do the work as well as ever. And she realizes that she would have been fired 10 years ago if the truth were known, but clearly her performance for the past 10 years has satisfied her employer.

We receive letters from people in all kinds of occupations who want to continue to be productive and who still feel young and able at 65. Many are devastated at being forced

out of a job. Ours is a society based on the work ethic, and the job is the primary means by which people define their identity. Society values work. When people are tossed out because of the number of birthdays they've had, it can be a bitter and humiliating experience.

Q. How do you answer the argument that a mandatory-retirement age is needed to open up jobs for young people?

A. I'd ask whether it's appropriate to put one group of people out of work at the expense of another. I am not aware of any studies which show any significant relationship between job opportunities for the young and mandatory retirement.

If our economy can't create enough jobs for everyone, maybe we ought to have a lottery to decide who gets the jobs that are available. That would be as fair as throwing people out of work at age 65. Why pick on older people to try to solve the nation's employment problem?

"IMPORTANT POINT: FREEDOM OF CHOICE"—

Q. As a practical matter, don't many people elect to retire at 65 or even earlier?

A. Indeed so, and let me say that we're in favor of voluntary retirement—but we think it should be a matter of choice.

The great majority of people—provided they have enough income—may choose to retire in their 60s. One survey has indicated that only about 7 per cent of all those currently retired are both willing and able to work. Another study suggests that perhaps 1 in 3 individuals facing mandatory retirement wants to keep on working. While 1 in 3 sounds like a lot of people, we are really talking about less than one half of 1 per cent of the total work force, remembering that relatively few workers reach mandatory-retirement age in any year and many of those voluntarily choose to retire.

The important point is freedom of choice.

Q. What is your attitude toward gradual retirement—that is, employes putting in reduced hours over a period of a few years before they stop working?

A. There's much to be said for phased-in retirement. I'd go along with that idea provided it is a matter of choice and is not used by employers to force people out or as a means of discriminating against older workers. I wouldn't want to see an employe at, say, age 60 forced out of a good job and into a lesser one under the guise of phased-in retirement.

Q. Some businessmen say lack of a mandatory-retirement age would complicate collective bargaining with unions—

A. We don't believe that any labor agreement should discriminate against older people. The law prohibits job discrimination on the basis of sex and race, and the same should be true with respect to age.

Q. Is the real issue for many elderly people one of keeping busy at something after they have retired voluntarily?

A. There is no simple answer. Some retirees are very happy; others are not. One poll showed that 74 per cent of retired people missed the money they'd been earning; 62 per cent missed the work itself, and about 50 per cent felt a loss of self-esteem.

Often the older person without an adequate retirement income wants to work. But even for those who can live comfortably, some find retirement traumatic both physically and emotionally. For some, merely keeping busy is not the same as feeling useful.

Q. Is the public ahead of Congress on the retirement issue?

A. All indications point that way. A Harris Poll conducted in 1974 indicated that 86 per cent of the public believes mandatory retirement should be abolished. Certainly some State legislatures, local jurisdictions and a number of private employers have shown that they are ahead of the Congress.

AIRLINE ECONOMIC INFLUENCE

Mr. GOLDWATER. Mr. President, shortly we will be discussing the deregulation bill that has been prepared by the Aviation Subcommittee of the Committee on Commerce, Science and Transportation, and from this body it must go to the House for further discussion. I think I have sat through most of the hearings before the Aviation Subcommittee and the full committee, and I have been amazed to find that very, very little is known or understood by members of our staff Members of this Congress as to the importance of airlines to the economy of our country. Mr. William T. Seawell, chairman and chief executive officer of Pan American World Airways, delivered an address before the Commonwealth Club of San Francisco in which for the first time, I believe, a detailed study was made of the relationship of airlines to our economic system; consequently, to our economic situation in the world. There will be many things placed in the CONGRESSIONAL RECORD relative to the airlines during the coming months, but this is one that I think all Members should read, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

AIRLINE ECONOMIC INFLUENCE

(William T. Seawell, chairman and chief of Pan American World Airways, recently detailed the economic influence of U.S. airline purchases on the national economy in a speech before the Commonwealth Club of San Francisco. Because this is the first time such a detailed analysis of this subject has been presented publicly we believe it deserves a wider audience—R. B. H.):

Over the years, the airlines of the United States have brought into being huge manufacturing programs that have created jobs for millions of Americans. Through their purchases of made-in-America airplanes, foreign flag airlines have also contributed to American jobs. But the airlines of the United States are the customers the manufacturers must have in order to undertake their manufacturing and export programs.

Virtually no literature was to be found on the airlines' contribution to the economy through their vast programs of buying airplanes. So I asked Aviation Advisory Service of New York City to review the economic consequences of a single airplane program, the Boeing 747.

Since the study is the first of its kind, it may fairly be regarded as a breakthrough study. Among the points it makes are these. The Pan Am order for 747s, the order that launched the wide-body programs, was the largest order for one type of aircraft in the history of commercial aviation—$590 million.

The engine used in the 747 is 30 percent more efficient with respect to fuel than were the original jet engines on the 707. The 747 engines also operate at lower noise levels.

Various applications of the 747 have made it a national asset apart from its role as a civil airplane—the 747 serves, for example, as the airborne presidential command post and also serves as the carrier aircraft for the space shuttle orbiter.

The 747 is roughly three times as productive as the most efficient 707.

The consumer price index rose 52 percent between 1950 and 1969. The direct operating costs of the 747 are about one-third of the aircraft in service in 1950 and about one-half the comparable costs of the first 707.

The sales volume of wide-bodies—747s, DC-10s, L-1011s—has amounted to $15.3 billion to date, with more sales expected. Of that sum, about $9 billion represents payroll. The export value of the 747 alone was $4.65 billion as of February of this year.

To you as airline passengers, as men who control large air shipments, and as members of the American leadership community, it is significant that the improvement in service and economics brought about by the wide-body jets occurred because, and only because, Pan American World Airways had the financial strength to launch the 747 program. Boeing alone could not finance the program, and certainly would not have launched it on speculation. Pan Am was not only the first customer. Pan Am's credit made the program possible.

We as Americans can be proud, by and large, with what our air transport industry has accomplished. However, we cannot be satisfied with its condition today. . . .

What can be done to assure for the future the sort of national benefits that our airline industry has conferred in the past? I shall address myself principally to international air transportation, which is Pan Am's main business.

The field of international air transportation is very different from the domestic field. There is, of course, a lot of foreign competition—some 52 airlines fly the North Atlantic. Many foreign flag airlines are government owned, and virtually all are government financed or otherwise aided. Also, many governments, not just ours, exercise control over routes, fares, capacity and conditions of doing business.

In terms of today's national requirements, what should be the principal national objective with respect to the U.S. flag system? I submit that the objective should be a flag system strong enough to get new and improved aeronautical technology off the shelf and into service in order to provide American jobs, to improve the quality and the economics of air transportation and to bring about the further growth of international tourism.

Once we accept that as a national objective, we can then, rather than discussing whether the U.S. flag system should be the handmaiden of this or that economic theory, proceed to devise specific ways of making the system serve the objective.

The specific ways would include some address of competitive imbalance, increased efficiency, compensatory fares and a reform in government organization.

Competitive imbalance, where it exists, is generally created by governmental actions that impose costs or restrict the opportunity to do business. U.S. government records are replete with examples of foreign discrimination against the U.S. flag. Congress passed the International Fair Competitive Practices Act of 1974 to bring about some redress of competitive imbalance.

The first report of the Civil Aeronautics Board showed that very little has been done. The government should pursue a specific, systematic program to do more.

A second step is to achieve greater efficiency by wasting fewer seats and less fuel. It is necessary, in Pan Am's view, to offer some excess capacity in order to accommodate business, government or personal travelers who require that seats are available at the last minute. But it is not necessary to offer an empty seat for every seat that is filled. The U.S. flag airlines should work out a system of capacity regulation. We can carry more passengers per pound of fuel, and per dollar invested, than we now carry, and we should do so.

A third step is to permit international fare and rate levels high enough to cover the cost

of doing business and to provide earnings to finance the purchase of new and improved technology. In brief, it should be U.S. policy to achieve fares that are compensatory—an important requirement in a world that has a lot of subsidized airlines.

A fourth step is to organize the U.S. government so that some one person or office reporting to the President of the United States has the authority, the responsibility—and, most important of all—the accountability for developing and administering U.S. international air transport policy. Nobody now performs that function for the President, although, because it is an aspect of foreign relations, international air transportation is the province of the President. In many countries, international air transportation is handled by a powerful agency of cabinet rank reporting to the head of government. In the United States, nobody performs that function for the President. Our present method—if it can be called a method—of having nobody in charge does not work well, and must be changed. Maybe what is needed is the aeronautical equivalent of the special trade representative.

Those four specific steps are important. But even more important is to have the clear purpose that as a nation we want our flag airline system to continue to produce the benefits we have come to expect of it and to do so on a selfsustaining basis. Given that resolve, the flag system will continue to contribute to healthy economic growth, as well as to the environment and the conservation of fuel.

REGIONAL INTEREST AND THE UNION

Mr. McINTYRE. Mr. President, the Sunday, September 4, 1977, edition of one of the South's most respected newspapers, the Memphis Commercial Appeal, carried a lead editorial entitled "Roll Out the Barrel" which I believe each of us should take a few minutes to read and reflect upon. This fine editorial makes a most important point in examining national policies and goals and provides a clear insight into regional interests as opposed to "pork-barrel politics." As the editor of the Commercial Appeal so aptly points out regionalism and regional interests have a proper role in all political processes but regional interests must not be allowed to overshadow national efforts to solve major domestic problems.

Regional conditions change and problems shift among various parts of this country. The Southern region still has its share of problems, the editorial points out:

But today the South is finding its place in the Sun. It's gaining people and industry because it can provide labor and raw materials, including energy, in greater quantities and at relatively lower cost than can the older manufacturing centers in the Northeast and Midwest.

The editorial continues by taking an enlighted position that as the South continues to grow and prosper it should expect that fewer Federal dollars will be recycled southward. The article concludes that rational regional politics cannot only help the individual region but the Nation as a whole. Regionalism based on "pork-barrel politics," however, creates regional divisiveness which injures our entire system.

As a Senator from a Northeastern State I am particularly concerned that regional interests can become primary and dominate national needs. An example of this concern is the present difficulty with the Senate-House Conference on the Housing and Community Development Act of 1977. The conference has now discussed distribution of community development block grant funds for 2 months. At issue is the Senate position that older city's needs should be addressed by impacting the age of housing factor in the distribution formula. The editor of the Commercial Appeal made a fine point in discussing domestic programs when he stated:

These programs attempt to define our most pressing problems and combat them, primarily by redistributing tax money to the places that need it most for specific projects. And the reason is that Americans cannot expect national prosperity if they allow one region to be depressed while others flourish at its expense.

Mr. President, I ask unanimous consent that the Commercial Appeal editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ROLL OUT THE BARREL

Those southern governors who complain that changed federal formulas now send millions of Sunbelt dollars to subsidize programs elsewhere are confusing the purpose of national policy with pork-barrel politics. And in doing so, they've lost sight of the more important issue of whether these programs are helping solve our major domestic problems.

The reason behind programs such as revenue sharing and grants-in-aid isn't to return to every state or region the same tax dollars its residents paid in to the federal Treasury. If this were the case, there would be no reason for domestic programs other than to make work for Washington's bureaucracy.

Rather, these programs attempt to define our most pressing problems and combat them, primarily by redistributing tax money to the places that need it most for specific projects. And the reason is that Americans cannot expect national prosperity if they allow one region to be depressed while others flourish at its expense.

Traditionally, the South has been the region that needed a federal hand. But today the South is finding its place in the sun. It's gaining people and industry because it can provide labor and raw materials, including energy, in greater quantities and at relatively lower cost than can the older manufacturing centers in the Northeast and Midwest.

And while poverty remains a problem in much of the South, the Sunbelt shouldn't be surprised when fewer federal dollars are recycled southward. It's part of the increasing responsibility for any region that grows in population and wealth.

This does not mean that the Southern governors and others interested in regional development should allow federal programs and their effectiveness to go unchallenged, for there are as many disparities in these programs' performances as there are programs. When it comes to successes, the Tennessee Valley Authority—the prototype of regional-development projects—still heads the list. It showed what federal tax dollars can do for an area where private enterprise alone can see no profit.

Revenue sharing and grants programs, including community development, also have met with success. But there have been other projects that missed the target, including the Law Enforcement Assistance Administration. Too often its funds were spent too heavily in rural areas that didn't have the hard-core crime the nation was attempting to fight through the LEAA project.

The raw numbers on how much was spent where mean little in a country in which the cost of living is only one of the statistics that varies from place to place. What counts is how effective those federal dollars for specific projects are in addressing the problems of a city, state or region.

Regionalism still has its place as surely as the South still has problems that need to be solved. Its place is in helping to identify, define and solve those problems which could benefit from federal aid for specified projects.

Regional politics that is intelligent and informed can help that region as well as the nation to prosper. But pork-barrel politics that feeds on regional divisiveness can only hurt.

SENATOR WILLIAMS COMMENDED FOR CONTRIBUTION TO AGING

Mr. CHURCH. Mr. President, during the weeks of committee and floor debate on Senate reorganization earlier this year, Senator HARRISON WILLIAMS staunchly supported continuation of the Special Committee on Aging.

His position on that issue was especially significant because—as probable chairman of the Senate Committee on Human Resources and as former chairman of the Committee on Aging—he was in an excellent position to evaluate whether the people of this Nation would be better served by the special committee or by a new subcommittee to be established within the Human Resources Committee.

The Senator from New Jersey on more than one occasion made the case compellingly for a factfinding committee with the continuing mandate to look into the many issues related to aging—issues which do not fit neatly within the jurisdiction of any one committee, even one so far reaching as the Committee on Human Resources.

I was pleased indeed to have Senator WILLIAMS as a key ally in my efforts to continue the work of the Committee on Aging.

His contribution has also been recognized by the Somerset (N.J.) County Advisory Council to the Office on Aging in a resolution passed a few weeks ago. I ask unanimous consent to have that resolution printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, the senior population of this country has provided a lifetime of service to their communities and to our society as a whole; and

Whereas, our society has grown and developed in such a way that there is increasing difficulty for our seniors to find the reward of a good life in later years because of continuing inflation, decreasing mobility and increasing dependency on others; and

Whereas, it is the responsibility of this society, and especially those officials elected to represent the will of the people, to initiate changes to elevate the status of seniors equal to their past contributions; and

Whereas, the United States Senate had established a Special Committee on Aging to

study and recommend responses to these needs, and which in its lifetime this Special Committee has compiled a long list of significant accomplishments, but recently with the intention of reducing member's multiple committee responsibilities, a Senate reorganization plan proposed the elimination of the Special Committee on Aging; and

Whereas, Senator Harrison A. Williams, Jr., led the fight on the Senate floor to negate this motion and to carry on the life and role of the Special Committee on Aging and was successful in persuading the Senate to vote overwhelmingly to continue the Special Committee with its unique responsibilities; now therefore BE IT RESOLVED, that this New Jersey State Title III Advisory Committee offers its highest commendation to Senator Williams and thanks him for his dedication, determination and continuing concern for the welfare of New Jersey's senior population.

CHINA, THE ABROGATION OF TREATIES; AND THE CONSTITUTION

Mr. GOLDWATER. Mr. President, during the recess of Congress, Secretary of State Cyrus Vance made a 4-day visit to mainland China where he talked with the new rulers of that Communist society. It is unknown in public exactly what was settled or committed at those talks, but I wish to discuss today a subject which should not have been raised by Secretary Vance or anyone among his group, if it was explored at all.

The subject I have in mind is the termination of treaties, particularly the mutual defense treaty, between the United States and the Republic of China, without the approval of either the Senate or Congress. Negotiators for the U.S. Government had no authority to accept or consider this policy because the Constitution clearly requires a role for the Senate or Congress in the termination of any treaty.

Now, I am not saying that it was raised at the recent talks with Red China, but I do know that just before Secretary Vance's departure he was urged in a widely reported speech by one of our colleagues to allow the formal defense treaty with Taiwan to lapse with recognition of Peking. I hope that Secretary Vance rejected the proposal and that it never came up.

It requires close scrutiny, however, because the proposal is the latest turn in the thinking of those who are bent upon granting formal diplomatic recognition to the Chinese Communists on their own terms.

Now, the initial step of recognizing Red China is bad enough in and of itself. I have often stated the numerous reasons why I believe recognition would be harmful to the United States, with no compensating gain.

To top off this already harmful proposal with the added disgrace of treating the defense agreement as having lapsed, without even giving the 1 year's advance notice required by its terms, would represent the most callous and immoral attitude toward a friend that the U.S. Government has ever been asked to adopt.

Call it what you will, but to consider the defense treaty, and necessarily the other treaties and agreements presently in existence between the United States and the Republic of China, as automatically lapsing after recognition of Red China is to abrogate those treaties.

Since the Constitution puts the power to abrogate, or terminate, a treaty in the hands of the President and Senate together, or the Congress, the advocates of this shameful proposal are asking the President to commit an unconstitutional act.

CONSTITUTIONAL TEXT

It is true that the Constitution does not spell out in precise words how a treaty shall be terminated, but the clear import of the constitutional text, supported by the overwhelming weight of historical practice, makes it certain that a treaty cannot be nullified by action of the President alone, without the approval of the Senate or Congress. Nor can a President acting alone give valid notice on behalf of the United States of our intention to withdraw from a treaty.

Section 2 of article II of the Constitution specifies that the President "shall have power, by and with the advice and consent of the Senate, to make treaties provided two-thirds of the Senators present concur."

Thus, the role of the Senate in making treaties is beyond any doubt.

The Constitution further declares, in article VI, that "all treaties—shall be the supreme law of the land."

Since treaties are therefore legislative in nature, being made with the approval of the Senate, and having the same status as any other law, it is logical that the same authorities who make treaties, or at least one of equal competence, would be necessary to undo treaties. Just as the President alone cannot repeal a law, so he cannot "repeal" a treaty.

In other words, a treaty, being a law, can only be abrogated either by the treatymaking, or lawmaking, power.

This is indeed the way treaties generally have been terminated in actual practice. The precedents are not uniform, but far more often than not the Senate, or the whole Congress, has both exercised and asserted its power to approve the nullification of treaties, and Presidents usually have sought legislative approval before denouncing any treaty on behalf of the United States.

MADISON ON TREATIES

This is certainly the view of James Madison. On January 2, 1791, less than 4 years after the Constitutional Convention, he wrote a detailed exposition on treaties to Edmund Pendleton, explaining:

> That the Contracting powers can annul the Treaty [of Peace with Great Britain] can not, I presume, be questioned, the same authority, precisely, being exercised in annulling as in making a treaty.

Madison added to this statement his belief:

> That a breach on one side . . . discharges the other, is as little questionable; but with this reservation, that the other side is at liberty to take advantage or not of the breach as dissolving the Treaty.

Then, Madison reached the point of judging what authority has the power to annul a treaty in this particular situation, expanding on his earlier general comment that the treaty making authorities are to exercise the power:

> In case it should be advisable to take advantage of the adverse breach, a question may perhaps be started, whether the power vested by the Constitution with respect to Treaties in the President and Senate makes them the competent judges, or whether, as the Treaty is a law, the whole Legislature are to judge of its annulment, or whether, in case the President and Senate be competent in ordinary Treaties, the Legislative authority be requisite to annul a Treaty of peace, as being equivalent to a Declaration of War, to which that authority alone, by our Constitution, is competent. (See volume 1, Madison's Work's, at pages 524–25.)

Mr. President, it should be noted that, in all this analysis of the treaty abrogation power, Madison did not once consider the possibility that the President alone could terminate a treaty, even where the other side had committed a breach of it. This is a pretty good indication of what the Founding Fathers thought about the subject.

UNILATERAL PRESIDENTIAL ABROGATION OF TREATIES WITH A FRIENDLY STATE IS UNPRECEDENTED

As Madison assumed, throughout most of our history there never has been a question of the President possessing an independent power to denounce treaties. The debate has not been between the President and Congress. It has been over competing claims of the Senate vis-a-vis the House of Representatives.

To date, I am unaware of any instance when a President acting alone has ever terminated a treaty with a friendly power that has not been violated by the other party, or placed in conflict with a subsequent law, or become impossible of performance due to circumstances not of our own making.

In truth, what the proponents of accepting Red China's conditions are asking the President to do is unprecedented.

THE FIRST TREATIES ANNULLED WERE DENOUNCED BY CONGRESS, NOT BY THE PRESIDENT

In fact, if they would read their history, these advisers would learn that the first treaties ever to be declared null and void by the United States were canceled by Congress alone. These were the French-American treaties of 1778. Congress, acting through a public law, deemed these treaties to be no longer binding on this country because they had "been repeatedly violated on the part of the French Government."

This followed attacks by French warships on unarmed American merchant vessels and the infamous X, Y, Z affair in which the French sought to extract bribes from the American peace negotiators.

The abrogating act of July 7, 1798, was approved by President Adams and to that extent there was Presidential consent. However, the statute did not call upon the President to give notice of abrogation and Congress apparently assumed no further act was necessary on his part.

This early precedent represents an admission by the President of a legislative role in the abrogation of a treaty, since he signed the law. It also is a concession by the Senate that, in at least some cir-

cumstances, the power to void treaties belongs to Congress as a corporate body, and not exclusively to the President and the Senate together.

MONROE'S LETTER TO DUTCH MINISTER

A possible precedent for the termination of treaties by Presidential notice may have occurred in 1815, although the record seems to be to the contrary. This incident began with a message that year by the Dutch Minister to then Secretary of State James Monroe. The note proposed a new commercial treaty, based on the old one of 1782. Monroe wrote back mentioning that the treaties having been annulled "by causes proceeding from the state of Europe," President Madison had agreed to make the ancient treaty the basis of the new one. By "the state of Europe," Monroe was referring to the Napoleonic wars.

The question then arose whether Monroe's letter had unilaterally denounced the treaty. In 1818, Secretary of State John Quincy Adams insisted it did not. He argued the treaty was still obligatory on the Dutch. The Dutch Government was just as firm in denying the continuing force of the treaty, and we did not press the matter.

Whatever status the treaty had at the time, this is no example of an assertion of Presidential power to annul treaties. Secretary of State Monroe had apparently considered the letter to him as intimating on the Dutch side that the treaty was no longer in force. He knew Holland had been joined to France and ceased to form an independent state during the Napoleonic wars. Therefore, he may have considered intervening events already to have terminated the treaty.

The pertinent official papers relevant to this episode appear in volume 2 (1873) of Foreign Relations of the United States, starting at page 722.

AT TIMES THE PRESIDENTIAL DUTY TO FAITHFULLY EXECUTE LAWS MAY REQUIRE HIS INTERPRETATION OF WHETHER TREATY HAS BEEN VOIDED BY BREACH OF OTHER PARTY

If the above interpretation of the Monroe letter is correct, and remember Secretary Adams denied that the United States had terminated the treaty, it stands at most as an attempt by the executive to interpret a treaty pursuant to his constitutional duty under section 3 of article II to take care that the laws are faithfully executed.

Occasionally, it has seemed necessary to a President to declare a treaty void by reason of the breach of other parties. Where his interpretation receives the knowing acquiescence of the Senate and Congress, history appears to allow an exception from the general rule that the President lacks authority to denounce a treaty in the absence of legislative action.

That Madison, then President, accepted the truth of the general rule is shown in his statement on treaties described above.

FIRST USE OF PRESIDENTIAL NOTICE AT DIRECTION OF CONGRESS

The first clear-cut example known to me of the termination of a treaty by Presidential notice did not occur until 1846, some 57 years after the Constitution became operative. This action took place with the authority of Congress and only after the President had sought such legislative sanction.

As part of a bill to organize a territorial government in Oregon, the House of Representatives had passed a provision in 1845 requiring President Polk to notify the British Government of the annulment of the Convention with Great Britain relative to the joint occupation of the Oregon Territory. Following this action, President Polk recommended to Congress that he be given authority by law for giving such notice. There was considerable debate over the issue in 1846, with the majority position being that the abrogation of a treaty "is clearly a legislative duty, that cannot be performed constitutionally by any other power than the joint power of both Houses of Congress. . . ." The joint resolution concerned was enacted in April of 1846.

The legal principle which guided Congress in this instance was based on the constitutional declaration that a treaty is among the supreme law of the land. The power to terminate a treaty was equated with the power to terminate a law. Obviously, the President could not by fiat repeal a law, and so he lacked the power, on his own authority, to annul a treaty.

FIRST ABROGATION OF TREATY BY SENATE RESOLUTION

Mr. President, the first two instances discussed above in which there is no doubt that treaties were abrogated drew on the authority of an act of Congress and a joint resolution. The third such instance involved simply a resolution of the Senate unanimously adopted in 1855.

This resolution took note of a treaty with Denmark as subjecting U.S. commerce to burdensome and oppressive duties. It authorized President Pierce to give Denmark the notice required in the treaty for its termination, and it was in response to the previously expressed wish of the President to do so.

In his annual message to Congress, President Pierce informed the legislature that "in pursuance of the authority conferred" by the Senate resolution he had given the required notice. Again, a President had acted to annul a treaty only after receiving prior legislative approval.

SENATE FOREIGN RELATIONS COMMITTEE DEFENDS ROLE OF SENATE IN TREATY TERMINATION

Publicity of the method used in abrogating the treaty with Denmark aroused a protest in Congress. Doubt was even raised in the Senate itself. The controversy was not over whether or not the Senate had invaded a Presidential prerogative, but rather whether the treaty should have been annulled by the full Congress.

In response to this debate, the Foreign Relations Committee issued a report on April 7, 1856, strongly claiming for the Senate, acting together with the President, competence to terminate a treaty "without the aid or intervention of legislation" by both Houses of Congress.

The Senate Committee unequivocally stated that—

> Where the right to terminate a treaty at discretion is reserved in the treaty itself, such discretion resides in the President and Senate.

The Committee reasoned as follows:

> The whole power to bind the Government by treaty is vested in the President and Senate, two-thirds of the Senators present concurring. The treaty in question was created by the will of the treaty-making power, and it contained a reservation by which that will should be revoked or its exercise cease on a stipulated notice. It is thus the will of the treaty-making power which is the subject of revocation, and it follows that the revocation is incident to the will.

The committee did concede that in certain cases it would be wise to have the concurrence of the House of Representatives in order to make the decision to annul a treaty more impressive upon the other government. Thus, the committee took the position:

> Although it be true, as an exercise of Constitutional power, that the advice of the Senate alone is sufficient to enable the President to give the notice, it does not follow that the joint assent of the Senate and House of Representatives involves a denial of the separate power of the Senate.

In May of 1958, the Senate Foreign Relations Committee reaffirmed its position by changing a proposed joint resolution, authorizing the President to give the government of Hanover the notice required for the termination of a treaty, by striking out the word "joint" in the title, "so that the resolution should be acted upon as a Senate resolution."

CONGRESS REACTS STRONGLY TO PRESIDENT LINCOLN'S ATTEMPT TO ACT WITHOUT LEGISLATIVE APPROVAL

The first time I have discovered a President openly attempting to terminate a treaty without any prior legislative approval was in late 1864, when President Lincoln gave notice regarding the Rush-Baggot Convention with Great Britain regulating the naval force upon the Great Lakes. But this can hardly serve as a precedent for unilateral Presidential action because Congress promptly responded by passing a joint resolution based on the ground that Lincoln's conduct was invalid until ratified and confirmed by the Congress. The joint resolution, approved on February 9, 1865, soon after Lincoln's notice, expressly stated that the notice was "adopted and ratified as if the same had been authorized by Congress."

The Senate debate on the issue on January 18, 1865, was dominated by Senators who argued that the act of the President to terminate the treaty was wholly invalid until it was adopted by the Congress. As Senator Garrett Davis of Kentucky said:

> It is indispensably incumbent and necessary, in order to secure the termination of this treaty, that it shall be terminated, not by the action of the President, but by the action of Congress.

Senator Charles Sumner of Massachusetts agreed that—

> The intervention of Congress is necessary to the termination of this treaty. . . .

He explained that the joint resolution under consideration embodied the con-

clusion that since a treaty is a part of the law of the land, it is "to be repealed or set aside only as other law is repealed or set aside: That is by act of Congress."

JUSTICE STORY ON TREATY TERMINATION

Senator Sumner mustered in support of the Senate's position two impressive judicial authorities. He first quoted from one of the most highly regarded scholars ever to sit on the Supreme Court, Mr. Justice Story. In section 1838 of his Commentaries on the Constitution, Story writes:

It is, therefore, indispensable that they (treaties) should have the obligation and force of a law, that they may be executed by the judicial power and be obeyed like other laws. This will not prevent them from being canceled or abrogated by the nation upon grave and suitable occasions; for it will not be disputed that *they are subject to the legislative power, and may be repealed, like other laws, at its pleasure.*

JUSTICE IREDELL ON TREATY TERMINATION

The second authority called upon by Senator Sumner was Supreme Court Justice Iredell. In delivering his opinion with the case of *Ware* against *Hylton*, 3 U.S. (3 Dallas) 199,256 (1796), Justice Iredell twice emphasized that it is Congress alone who is entrusted with the authority of vacating a treaty.

Justice Iredell wrote:

It is a part of the law of nations that if a treaty be violated by one party, it is at the option of the other party, if innocent, to declare, in consequence of the breach, that the treaty is void. If Congress, therefore, (*who, I conceive, alone has such authority under our Government*), shall make such a declaration, in any case like the present, I shall deem it my duty to regard the treaty as void, and then to bear any share in executing it as a Judge.

Although his pronouncement is dicta to the Court's decision, it is significant as an 18th century understanding of the annulment power by one of the original members of the first Supreme Court.

ADDITIONAL LAWS ABROGATING TREATIES

The next time notice was given to terminate a treaty, it again followed prior authority granted by Congress. In the joint resolution of January 8, 1865, Congress charged President Lincoln with the duty of communicating notice of the termination of the Reciprocity Treaty of 1854 between the United States and Great Britain. The move to abrogate this treaty had started in May of 1864.

The traditional practice was adhered to again in June of 1874, when Congress enacted a law authorizing President Grant to give notice of termination of the treaty of Commerce and Navigation of 1857 with Belgium.

PRESIDENT GRANT CALLS ON CONGRESS FOR RATIFICATION OF HIS PROPOSED ACTION

Two years later, the same President sent an ambiguous message to Congress that at one and the same time appeared to acknowledge the need for a legislative role in the termination of treaties and to assert a power to decline enforcement of a treaty he thought had been abrogated by the other party.

His message of June 10, 1876, regarding the extradition article of the treaty of 1842 with Great Britain, said:

It is for the wisdom of Congress to determine whether the article of the treaty relating to extradition is to be any longer regarded obligatory on the Government of the United States or as forming part of the supreme law of the land.

He added, however:

Should the attitude of the British Government remain unchanged, I shall not, without an expression of the wish of Congress that I should do so, take any action either in making or granting requisitions for the surrender of fugitive criminals under the treaty of 1842.

At most, this is a precedent for Presidential authority to consider a breach of a treaty as having suspended it, by making enforcement impossible, subject to the correction of the President's judgment by Congress.

PRESIDENT HAYES VETOES LAW, BUT RECOGNIZES TREATY TERMINATION POWER OF CONGRESS

In 1879, President Hayes recognized the power of Congress in terminating treaties, although in the process of vetoing an act of Congress. The legislature had passed a statute seeking to require the President to abrogate two articles of the Burlingame Treaty of 1868 with China. President Hayes vetoed the legislation on the ground that it modified an existing treaty by striking out only provisions of it. This power, he said, is "not lodged by the Constitution in Congress, but in the President, by and with the consent of the Senate."

At the same time, President Hayes conceded that:

The authority of Congress to terminate a treaty with a foreign power by expressing the will of the nation no longer to adhere to it is . . . free from controversy under our Constitution.

Thus, he made no separate claim of power for the Presidency to annul a treaty without some form of legislative approval, but rather upheld the joint role of the President and the Senate together to make or modify treaties.

In 1883, Congress passed another joint resolution reaffirming the legislative role in the termination of treaties. This law, the act of February 26, 1883, flatly directed President Arthur to give notice of the termination of several articles of an 1871 Treaty with Great Britain.

PRESIDENTIAL INTERPRETATION OF TREATY AS INCONSISTENT WITH PREVAILING ACT OF CONGRESS

Mr. President, the first instance I can find where a President gave notice to terminate all or part of a treaty with a foreign government absent any prior congressional authorization, or at least prompt ratification, is the notice given to Switzerland in 1899 of the intention of the United States to terminate certain articles of the 1850 Commercial Convention with that government. This incident occurred 110 years after the Constitution went into operation, clearly repudiating the idea that there is any long-continued and well-settled practice supporting an independent power in the President to abrogate treaties.

Actually, not even the 1899 situation offers support for the power, since the President's action apparently was necessary to carry out the national policy established by Congress in the Tariff Act of 1897. This is no more than an example of the President fulfilling his constitutional duty to faithful execute the laws.

As a legal commenator noted in 1967:

Since the President cannot enforce two equally valid laws which are in conflict, he is compelled to select that which most reflects the current will of Congress. (See volume 34 University of Chicago Law Review at page 592.)

PRESIDENT TAFT SEEKS RATIFICATION OF SENATE

The next precedent I can find is the effort by President Taft to head off passage by Congress of what he considered to be an "inflammatory" resolution calling for abrogation of the Commercial Treaty of 1832 between the United States and Russia. Disputes had arisen with Russia chiefly over the treatment of Americans of Jewish faith, and on December 13, 1911, the House of Representatives passed a strongly worded joint resolution demanding termination of the treaty. In advance of the anticipated favorable action of the Senate, President Taft unilaterally gave notice to Russia on December 15 of intention to terminate the treaty.

On December 18, President Taft sent a message to the Senate, informing it of his action:

As a part of the treaty-making power of this Government, with a view to its ratification and approval.

Accordingly, he recognized the need for the Senate and the President to act together in order to end an existing treaty.

President Taft knew it was virtually certain that Congress would direct him to terminate the treaty, and he fully expected to receive ratification to validate the notice he had given. He had no claim that the notice would have any validity without legislative approval.

Both Houses of Congress passed a joint resolution, which the President signed on December 21, just 3 days after his message to the Senate. The House vote was 301 to 1, and the Senate vote was unanimous, proving that the President's advance notice to Russia was a concession to recognized congressional power, rather than a sign of independent authority of the President.

PRESIDENT WILSON CHALLENGES CONGRESSIONAL POWER TO MODIFY TREATIES, BUT CONCEDES NECESSARY ROLE OF CONGRESS IN TREATY TERMINATION

Mr. President, the next known termination of treaties was called for by Congress in the Seamen's Act of March 5, 1915. In section 16 of the act, Congress specifically directed President Wilson to give notice of the termination of all articles in treaties and conventions of the United States "in conflict with this act." The notices were given as provded for. The authority of Congress to impose this duty on the President was upheld by the Supreme Court in a case discussed below.

In the Merchant Marine Act of 1920, President Wilson was again directed by Congress to give notice to other governments of the termination of certain treaties which imposed any restrictions on the right of the United States to set different customs duties on imports, de-

pending upon whether the carrier vessels were domestic or foreign.

President Wilson rebuffed this direct effort to abrogate treaties by announcing that he was making a distinction between the power of Congress to enact a law, such as one imposing duties on imports, which is plainly inconsistent with treaties, and the power to merely legislate a policy calling for the violation of treaties. This law was treated as an effort not to terminate a treaty, but to modify it. Congress could terminate treaties, but could not modify them.

A memorandum prepared by Secretary of State Hughes for President Harding in October of 1921 also conceded the power of Congress to terminate entire treaties if it so provided in clear and unambiguous language. In the Merchant Marine Act, Secretary Hughes reasoned, Congress had called for only a partial termination, but in practice the law would have the effect of a total termination. If Congress actually intended to abrogate entire treaties, he wrote, it must say so in plain language.

Therefore, the positions taken by President Wilson and Harding were in effect a refusal to interpret a law as conveying an intention by Congress to violate numerous treaties outright. There was no Presidential denial of the power of Congress to direct the abrogation of treaties when "its intention is unequivocally expressed," nor was there a hint of any claim of power for the President to terminate a treaty without the shared responsibility of the Congress.

Evidence of the recognition by President Wilson of the essential role of the legislature in the treaty annullment process is found in the fact that he asked the advice and consent of the Senate to withdraw in 1920 from the International Sanitary Convention of 1903. Only after the Senate had resolved to "advise and consent to the denunciation of the said Convention" in May of 1921, by which time Harding had become President, did the U.S. Government give notice of its intention to withdraw.

MODERN TWENTIETH CENTURY PRACTICE PROVIDES NO SUPPORT FOR UNTRAMMELED PRESIDENTIAL ABROGATION OF TREATIES WITH FRIENDLY STATE

This brings us up to more recent 20th century practice which at first impression may appear to be a break with the almost universal prior usage of the termination of treaties, and giving notice of intent to terminate, only when following legislative approval or ratification. Starting in 1927, there are at least seven instances in which Presidents have given notice of the termination of treaties without receiving accompanying congressional approval or seeking ratification.

Upon close examination, however, one discovers that the record does not support an untrammeled power of the President to annul any treaty he wishes. In fact, in two instances the notice of termination was withdrawn, and the United States did not actually denounce the treaties. In addition, two treaties were inconsistent with more recent legislation of Congress and one was inconsistent with the obligations of the United States under a later treaty. The remaining two were annulled or suspended because it became impossible to effectively carry them out.

The following treaties are involved: In 1927, President Coolidge gave notice that the 1925 Convention for Prevention of Smuggling with Mexico was terminated. At the time, U.S. relations with Mexico were the subject of emotional debate in Congress regarding alleged religious persecution and the confiscation of American-owned private and oil lands in Mexico. In the disruptive situation of the period, it appears to have been impossible to implement the Convention.

PRESIDENT FRANKLIN ROOSEVELT AND THE TERMINATION OF TREATIES

In 1933, President Franklin Roosevelt gave notice of termination of an extradition treaty with Greece. The notice was withdrawn, however, and the treaty was not abrogated. The incident was triggered because Greece had refused to extradite an individual accused of fraud. Thus, the President could have based his action on the fact the treaty had already been voided by a breach of the other party.

Also in 1933, President Roosevelt terminated the 1927 Tariff Convention as having a restrictive effect on the National Industrial Recovery Act of 1933. Then, in 1936, he terminated the 1871 Treaty of Commerce with Italy because its provisions would limit the President's ability to carry out the Trade Agreements Act of June 1934. In both cases, the treaties were inconsistent with prevailing legislation.

In 1939, President Roosevelt notified Japan of the intention of the United States to terminate the Commercial Treaty of 1911. The Department of State advised President Roosevelt broadly that—

> The power to denounce a treaty inheres in the President of the United States in his capacity as Chief Executive of a sovereign state.

The authority to denounce was clearly based, however, upon acts of war by Japan toward allied nations.

In fact, it was persuasively argued in the Senate that the President was compelled to denounce the 1911 treaty with Japan because of our obligations under a treaty, the so-called nine power agreement, committing the United States to respect the territorial integrity of China. After the invasion of China by Japan, we would have been in violation of that obligation by continuing to comply with the 1911 Japanese treaty. Therefore, the facts of the case do not uphold an expansive view of Presidential power, but to the contrary conform to traditional practice requiring the President to base his action on some form of legislative action, in this instance a subsequent treaty invalidating the earlier one.

The next precedent occurred in August of 1941, when the International Load Line Convention was temporarily suspended by President Roosevelt. Here, he acted in reliance on the opinion of Acting Attorney General Biddle that fundamental changes in the circumstances created the impossibility of performance. Accordingly, for the duration of the war emergency, President Roosevelt suspended the convention because of the aggression then being waged by Germany, Italy, Japan, and the Soviet Union.

It is interesting that the opinion of the Acting Attorney General declared:

> It is not proposed that the United States denounce the convention . . . , nor that it be otherwise abrogated. Consequently, action by the Senate or by the Congress is not required.

From this, it is obvious the incident cannot be considered as support for independent Presidential action. To the contrary, it appears to be an admission by the Acting Attorney General that some legislative approval is normally required for the abrogation of a treaty.

CONGRESS DENOUNCES TRADE CONCESSIONS TO COMMUNIST COUNTRIES

A recent assertion of the abrogation power by Congress occurred in 1951. In that year, Congress enacted a Trade Agreements Extension Act containing a provision instructing President Truman to terminate trade concessions to Communist countries. Most of them were executive agreements, but two, those with Poland and Hungary, were treaties. The required notices, as prescribed in sections 5 and 11 of the act, were promptly given by President Truman in accordance with the terms of the respective trade agreements.

WARSAW CONVENTION

The final incident occurred in November of 1965, when the United States announced its withdrawal from the Warsaw Convention, relating to recovery of damages by international air passengers who suffer death or personal injury. One day before the effective date of the withdrawal, the United States withdrew its notice.

At least two legal commentators responded with articles concluding that the purported authority of the President to terminate the Convention was unconstitutional. One of these legal papers appeared in volume 32 of the Journal of Air Law and Commerce in 1966, and the other was published in volume 34 of the University of Chicago Law Review in 1967.

In any event, the notice was withdrawn and the termination did not actually take place.

GENERAL RULE ESTABLISHED BY PRACTICE DEMANDS ROLE FOR LEGISLATURE IN ABROGATION OF TREATIES AND IN GIVING NOTICE OF INTENTION TO TERMINATE TREATIES

In summary, historical usage overwhelmingly upholds the position asserted by Prof. Edward Corwin, one of the century's foremost authorities on the Constitution. Corwin wrote:

> (A)ll in all, it appears that legislative precedent, which moreover is generally supported by the attitude of the Executive, sanctions the proposition that the power of terminating the international compacts to which the United States is party belongs, as a prerogative of sovereignty, to Congress alone.

This quotation appears, curiously enough, in Corwin's book entitled, "The President's Control of Foreign Relations."

The only clarification I would add to the late Professor Corwin's statement is

that the abrogation of a treaty also can be made by the exercise of the treaty-making power itself, meaning the President together with two-thirds of the Senate.

Also, it may be conceded for purposes of the situation I am discussing today, which is our treaty relations with the Republic of China, that history indicates the President may, in certain circumstances, determine whether or not: First, a treaty has been superceded by a later law or treaty which is inconsistent with the earlier treaty; second, a treaty has already been abrogated because of its serious violation by another party; or third, a treaty cannot be carried out because the conditions essential to its continued effectiveness no longer exist and the change is not the result of our own action.

HISTORICAL EXCEPTIONS TO GENERAL RULE DO NOT APPLY TO TREATIES WITH ROC

Now, Mr. President, how anyone could claim from this record that the President has the power to terminate treaties whenever he wants, independent of the Senate or of both Houses of Congress, is beyond me. Not even the President's duty "to take care that the laws of the United States are faithfully executed" would provide him with any plausible authority to annul the treaties with the Republic of China, a friendly government who has not breached any treaty with us.

The proposal made by the advocates of improved relations with Communist China urges the President to consider the treaties with the Republic of China as no longer having any effect, upon derecognition. Thus, the termination of the treaties would follow, or at least be dependent upon, derecognition. In this contingency, the reason for the annulment, or whatever it is called, would be an action of the U.S. Government.

The President himself would have created the changed conditions in which he then is being asked to interpret the treaties as having lapsed, without any failure of compliance on the part of the Republic of China.

The President could certainly not determine that the treaties had been breached by the Republic of China, nor could he find that they are inconsistent with any more recent laws enacted by Congress.

INTERNATIONAL LAW BARS RAISING CHANGE OF CIRCUMSTANCES AS GROUND FOR TERMINATING TREATY WHERE CHANGE RESULTS FROM ACTION OF PARTY INVOKING IT

Nor could the President decide that the treaties are impossible of performance, since international law specifically provides in Article 61 of the 1969 Vienna Convention on the Law of Treaties:

> Impossibility of performance may not be invoked by a party as a ground for terminating, withdrawing from or suspending the operation of a treaty if the impossibility is the result of a breach by that party either of an obligation under the treaty or of any other international obligation owed to any other party to the treaty.

Article 62 of the same Convention also provides that—

> A fundamental change of circumstances may not be invoked as a ground for terminating or withdrawing from a treaty . . . if the fundamental change is the result of a breach by the party invoking it . . .

ABROGATION OF TREATIES WITH ROC WOULD DISHONOR U.S.

Thus, it would not only be dishonorable to the United States, but a clear violation of international law, for us to take an action, or failure to act, as you will, which would amount to nothing less than the breach or violation of our treaties with the Republic of China.

In the words of the Department of State press release regarding President Wilson's decision not to annul several commercial treaties:

> Such a course would be wholly irreconcilable with the historical respect which the United States has shown for its international engagements, and would falsify every profession of all belief in the binding force and the reciprocal obligation of treaties in general.

Mr. President, if honor still means anything in this country, as it obviously once did, then I believe the suggestion that we discard the treaties with the Government on Taiwan should itself be discarded to the waste heap.

COURT DECISIONS FAIL TO PROVIDE ANY SUPPORT FOR INDEPENDENT PRESIDENTIAL ACTION IN TERMINATION OF TREATIES

Now, Mr. President, I have emphasized the clear logic of the language of the Constitution itself and the lessons to be drawn from historical usage. I have not drawn upon decisions of the Supreme Court because there simply are not any court holdings squarely resolving a conflict between the President and the Senate or Congress over the treaty abrogation power.

There are a handfull of cases regarding treaties that I will briefly discuss, however, so as to remove the possibility they may be misconstrued.

The first is *Charlton* against *Kelly*, 229 U.S. 447 (1913), which some commentators interpret as endorsing the power of the President to interpret whether or not a treaty is void when the essential obligation have been violated by the other party. Actually, the language of the Court opinion usually quoted for this proposition refers to the "political branch" of Government and "the United States," both of which are collective terms not exclusively meaning the President.

Whatever the holding of the court means, it cannot possibly give any support to the theory that the President on his own initiative and without legislative approval, can abrogate a treaty which has not been violated by the other party. In fact, Charlton involved an extradition treaty with Italy which neither the Executive, nor Congress sought to terminate. Since the treaty was not abrogated in this case, it cannot stand as a decisive ruling on the subject, even in the single situation where a breach occurs.

Second, in *Van der Weyde* v. *Ocean Transport Co.*, 297 U.S. 114 (1936), the Supreme Court did decide that since the Congress had requested and directed the President to give notice of the termination of treaty provisions in conflict with the Seamen's Act of 1915, "it was incumbent upon the President" to reach a conclusion as to the inconsistency between the provisions of a treaty with Norway and the provisions of the law.

The Court expressly avoided any question "as to the authority of the executive in the absence of congressional action, or of action by the treatymaking power, to denounce a treaty. . . ." The case does appear to recognize the power of Congress to require the President to interpret whether a treaty is inconsistent with a statute.

The final case is *Clark* v. *Allen*, 331 U.S. 503 (1947), where the Supreme Court decided whether the outbreak of war necessarily suspends or abrogates treaty provisions. On its facts, the case appeared to involve a construction of national policy expressed in an act of Congress, the Trading with the Enemy Act.

Although it is dicta, the pertinent part of the opinion for our purposes today comes from the favorable use by the Court of a quote by then New York State Court Judge Cardozo:

> The President and Senate may denounce the treaty, and thus terminate its life. Congress may enact an inconsistent rule, which will control the action of the courts.

By favorably quoting this interpretation of the treaty abrogation power, the Supreme Court seems to be approving the proposition that either the Senate or Congress must participate in the annulment of a treaty.

INTERNATIONAL LAW ALLOWS TREATIES WITH NONRECOGNIZED STATES

This leaves only the question of whether or not the possible derecognition of the Republic of China, which I trust will never happen, would leave no option to the President other than the assumption that prior treaties with the Republic have lapsed. To put the question another way, can the United States have treaties with authorities or states it does not recognize?

Although we have never before withdrawn recognition from any friendly country, and it is an unusual question to consider, we can take note of situations in which the United States has in the past failed to have diplomatic relations with a particular power, but still has had dealings with it which amounted to recognizing a government as—at least temporarily—exercising de facto control over a particular territory. Mainland China itself is a case in point.

Past international experience of our own and other governments bears out the validity of this practice. For example, the Netherlands at one and the same time recognized the official Government of Spain while entering into formal treaty relations with the government of the Franco regime in 1938. In the 1950's Exypt concluded several treaties with East Germany and Communist China without recognizing those countries.

The United States not only has a liaison office in Communist China, but it has dealt with the Communist regime to negotiate the armistice in Korea and during the Geneva Conference on the reunification of Korea. In 1962, the United States concluded an international

agreement on Laos to which Red China was an official party.

Other precedents involving the United States include the Postal Conventions of 1924 and 1929 to which both we and the Soviet Union became parties, even though the United States did not then recognize the U.S.S.R. Then there is a well-known political treaty, the Briand-Kellogg pact of 1929 for the renunciation of war. Again, the United States, which did not recognize the Soviet Union, agreed to invite her to become a party. Interestingly, the United States subsequently sent Russia a diplomatic note reminding it of its obligations under the Pact, again prior to having diplomatic relations with her.

Then, too, there is the Nuclear Test Ban Treaty. One reason this treaty adopts the feature of appointing three depositories for new members is to enable both Communist China and the Republic of China, and East Germany, to become parties along with nations that do not recognize them. Once again, the United States, which does not recognize Communist China, extended an invitation to it to come into the agreement.

Thus it is that international law clearly permits dealing simultaneously with the legally recognized government of a country and with the separate authorities who are in control of a portion of that state. From this, it does not necessarily follow that, should the President take the improper step of recognizing mainland China and derecognizing the Republic of China, all prior treaties would lose their effect.

In these circumstances, the question of whether or not treaties and other international agreements would continue in effect is one that would be left up to mutual agreement between the United States and the de facto government of Taiwan.

This possibility was examined by Stanford University law professor Victor Li in a recent study sponsored by the Carnegie Endowment for International Peace. Professor Li concluded that there are no legal impediments to considering Red China as the de jure government of China, while the Taiwan authorities would be regarded as being in de facto administrative control of the territory and population of Taiwan.

If Taiwan were regarded as the de facto recognized government of an entity having international personality, Professor Li writes that international law allows for the possibility "that treaties applying to territory actually controlled by Taiwan would remain in force even after withdrawal of de jure recognition."

Professor Li concludes his paper by specifically declaring:

> International law does not require that treaties affecting only the territories controlled by the Taiwan authorities must lapse. On the contrary, there is strong support for protecting on-going relations, especially those involving commercial affairs and private rights.

In his authoritative book on the subject published in 1968, entitled "Nonrecognition and Treaty Relations," Dr. Bernard R. Bot agrees that derecognition of a government does not automatically suspend or terminate all treaties previously entered into by that government.

Quite the contrary, he argues:

> A nonrecognized state can be a party to international agreements provided that its de-facto authorities carry on, even if only as agents, the external relations and can avail themselves of the resources of the territory and control the population if necessary, for the purpose of observing treaty obligations assumed.

Moreover, in chapter III of his book, Dr. Bot reaches the conclusion "that nonrecognition of states and governments does not necessarily impede the latter's capacity to conclude bilateral treaties." He adds, in chapter IV, that—

> It becomes increasingly clear that the criterion for participation in multilateral treaties is no longer the recognition status, but the issue of political desirability.

Elsewhere in that chapter, he adds that "the view that nonrecognition is in itself not a legal impediment to participation in multilateral treaties on an equal basis, is rather widespread."

Thus, it is clear that upon the possible derecognition of the Republic of China, there would be no rule or tradition of international law calling upon the President to consider treaties with the authorities on Taiwan as having lapsed. Rather this would be strictly a political decision motivated by political reasons, not by legal theory or grounds.

THE POWER TO RECOGNIZE GOVERNMENTS DOES NOT INCLUDE THE POWER TO TERMINATE TREATIES

In view of the foregoing discussion, it is obvious that the termination of treaties would be a distinctly separate matter from the recognition or derecognition of governments. The one does not automatically follow from the other, but is a separate political decision to make.

It would be mere legal gimmickry for anyone to contend that recognition carries with it the power to abrogate treaties. It might as well be claimed that recognition brings with it the power to make treaties independently of the Senate.

To repeat, although the President is generally seen as possessing the power to recognize new states and governments, or to decline recognition, based primarily upon his express power to "receive Ambassadors and other public Ministers," this in no way entrusts the President with power to terminate treaties. The two powers are entirely separate.

THE CONCEPT OF CONSIDERING DERECOGNITION AS TERMINATING TREATIES WOULD AFFECT NUMEROUS AGREEMENTS PROTECTING PRIVATE RIGHTS OF INDIVIDUALS AND CORPORATIONS

Mr. President, at this point in my remarks, I should note that it is not only the mutual defense treaty that is involved in the proposal that would allow our treaties with the Republic of China to lapse. The Department of State publication "treaties in force" lists at least 59 treaties and other agreements now in effect between the United States and the Republic of China. If the approach should be adopted that is sought by and on behalf of the Red Chinese, every one of these agreements would fall, not just the formal treaties.

It should be observed that this group of international agreements concerns such major subjects as shoe and textile quotas, aviation landing rights, tariffs on imports and exports, guarantees of American investments of private capital in Taiwan, safeguard of nuclear materials, and protection of rights of American citizens located in Taiwan.

It would be foolhardy to take the position that each and every one of these agreements are terminated after the United States might recognize Red China. As I have indicated, many of the agreements establish rights for private individuals and businesses. Considering these agreements as having lapsed would have serious political and economic consequences and would be likely to incite a rash of litigation by private parties whose interests are adversely affected by such a policy.

THE SANCTION OF IMPEACHMENT IS A CHECK ON ABUSES OF PRESIDENTIAL POWER

In conclusion, no President acting alone can abrogate, or give notice of the intention to abrogate, existing treaties with the government on Taiwan unless he obtains the advice and consent of the Senate or the approval of Congress.

Now, I regret to raise this point, but it must be clearly understood by all, that the check of impeachment is one of the safeguards provided by the Founding Fathers against political offenses, such as an irresponsible abuse by a President of a constitutional discretion.

In fact, a study made by the Library of Congress in 1974 on the abrogation of treaties concludes by observing that in the situation where a conflict arises between the President and the Senate or Congress over the question of abrogation of a treaty, and the President acts contrary to the wishes of the Senate or Congress the President "might be impeached."

This answers the too clever reasoning of the legal adviser of the Department of State which surfaced in a 1936 memorandum to President Roosevelt. His argument contends that the failure of the Congress or the Senate to approve the action of the President in giving notice of intention to terminate a treaty would be of no avail because once the notice is given, the foreign government concerned may decline to accept a withdrawal of such a notice. What the argument fails to note is that even if the foreign government is entitled and wants to rely on such a notice without inquiring into the constitutional authority of the President, this does not change the domestic constitutional situation of the President in relation to the Senate or Congress. The President is still answerable to the Constitution and accountable to the Congress and people.

Any President who would violate the Constitution on such a major matter as breaking faith with the Nation's treaty obligations runs the risk of impeachment.

This is not a threat. It is a simple statement of fact which those who are

unwisely urging this course of action upon the President should understand. They apparently do not know the consequence of what they are asking the President to do.

"HANDICAPPED IOWAN OF THE YEAR" VISITS WASHINGTON

Mr. CULVER. Mr. President, through the generosity of his friends, a very special person is visiting Washington this week. Last April, Bill Sackter was presented with the Handicapped Iowan of the Year Award for his work in overcoming his mental handicap. Bill's story is truly a remarkable one.

Born on Friday, April 13, 1913, Bill's diagnosis as a slow learner with behavior problems led to institutionalization at the Faribault, Minnesota State School for the Feeble Minded and Epileptic at the age of 7. It was not until November of 1964 that Bill returned to the mainstream of society through community placement programs. When Bill was 61, Barry Morrow of the University of Iowa School of Social Work found a home and a job for his friend in Iowa City.

The story of Bill Sackter is a dramatic and heartening example of how the handicapped can play a full role in all our communities and how citizen concern and action can accomplish much in relieving the isolation which far too many of the handicapped suffer.

It is a pleasure to welcome Bill Sackter to Washington this week, and I ask unanimous consent that the following article entitled "Bill's Triumph" from the Des Moines Sunday Register of April 24, 1977, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Des Moines Register, Apr. 24, 1977]

BILL'S TRIUMPH

Every night for three months I saw his face peering out at me from a small window in the back of the building. It was beginning to get cold so I would sit waiting in the car with the windows up while my wife changed from her waitress uniform. It was a big, old country club and rather exclusive. I would watch the doormen run for the cars until the very last Cadillac had left the lot. Then, if my wife was a little late in coming down, I was left alone with that round, bald and toothless but smiling face in the small window. Every now and then he would wave and I would wave back. At first we were both hesitant and used small, nervous waves, but as the nights went by and the ritual developed, we waved harder and more enthusiastically.

His name was Bill, I learned, and my wife said the reason he was at the window was because the stove was right beneath it. He came in to work just before everybody else was leaving, and all night he cleaned stoves. She said he was probably the happiest, most friendly person she had ever met, which surprised me because I had sort of thought of him, in spite of all that waving, as a rather sad and lonely fellow. She also said he was retarded. It was a big, old country club. And an awfully small window.

It was not until the 1972 Staff Christmas Dinner and Dance Party that I finally got inside. Workers and their spouses were invited, drinks and all, compliments of the members. She pointed him out amidst the crowd, and there in a noisy, smoke-filled dining room, he sat alone at a table with a glass of water. I was excited to see him and not at all surprised to find that his body, round and smiling, exactly matched the face in the window that I had come to know and like. What did strike me as odd was the outrageous wig that cover his bald head. Something about me must have tickled him too, for when I finally managed to slip through the bodies and sit down at his table, the first thing we did was laugh. Then we ordered some drinks, compliments of the members, shook hands and laughed some more. And something bonded.

We tried to tell each other things about ourselves, but I had a hard time understanding him. He spoke clearly, that wasn't the problem, but about such random topics that I could barely keep pace. It was as if he had some epic tale he wanted to weave for me, but could remember none of the particulars. He kept calling me Perry, which is not my name, and that bothered me. I was beginning to feel a little uneasy when something he said excited me. In addition to some other part-time jobs and interests, I was in a rock band then, and music was something I could talk about. He said he played the harmonica, and later that night he did.

The dance was held in a huge, opulent ballroom replete with crystal chandeliers and parquet floors. Door prizes were drawn, my wife won a cooler, and then the band started. It was a good "swing band," and everybody danced politely, sitting down to talk and drink between breaks. In a short time things loosened up, and it finally got so hot and stuffy that Bill removed his wig, wadded it into his pocket, and wiped his brow. It must have been a naked feeling because he kept reaching up to pat his head. Everybody, the room itself it seemed, was drunk by then, and somebody passing by, a gardener I think it was, kidded Bill about his Beatle wig. I thought Bill was asleep, but he turned to me and in an almost whisper said, "You can't have hair and brains both." And with that he stood up and marched straight for the bandstand.

"Ladies and Gentlemen," he announced into the microphone, almost swallowing it, "She's Too Fat for Me!" His harmonica flashed and the room exploded. Everybody was up dancing and clapping. Amidst shouts and cheers for "More, More!" he encored with "Beer Barrel Polka," and even though it sounded just like "She's Too Fat for Me," the crowd loved it. It *was* a stupid wig, but it was also the 1972 Staff Christmas Dinner and Dance Party and a chill ran up my spine with his closing benediction, "God Bless You, Everybody."

William Sackter was born on the north side of Minneapolis on Friday, April 13, 1913. His father, Sam, a knitter by trade, and his mother, Mary, were Russian-born Jews. Having emigrated to the Mill City in 1899, they opened a corner grocery store, rented the apartment above it, and raised Bill and his two older sisters, Sarah and Alice. Six years later, at the age of 35, Sam died from a heart attack, leaving Mary and the three children with a store that lost money and a $15-a-week Mother's pension. The children were all in school by that time, but life was tough and Mary had a hard time coping. The store failed and Bill began to get into trouble at school. "His conduct," according to reports, ". . . was apparently good at home, but at school intolerable on account of filthy habits—bowels—which have so far been beyond ordinary control."

IN, OUT OF SCHOOL

Because of his behavior problem and other learning difficulties, Bill was "excused" from school again and again, only to have his mother send him back each time. According to a Children's Bureau document dated November 1, 1920:

"The matter was taken up with the Principal . . . and although the mother had been informed . . . that the child would not be admitted . . . (she) could see no reason why the child should not be accepted. He (the principal) wrote that he knew two very good reasons why the child should not be admitted, his subnormality and his bad habits. The latter means that William has a bad habit of not informing the teacher when he wished to go to the toilet. For awhile he seemed to be trained into doing better, but every now and then the thing would happen."

And so, ". . . it seems that it would be best for the child that he be where he might receive proper training. She insists, of course, that her child is not feeble minded, but feels that she ought to take the advice of the teacher, and friends, that he be placed in some school, since he is now excluded from Public Schools."

On November 6, 1920, at the age of seven, Bill left home for the Faribault State School for the Feeble Minded and Epileptic, never to see his family again.

The forty-four years Bill spent committed to exile at Faribault must have passed like a blur, a time-warp, for when I asked him what his recollections were of the place, he told me, "You know, buddy, I was there for so long I didn't even know I was there. Forty-four. That's a lot of years. Just imagine." The records, too, are sparse, but we do know that Bill ran errands, washed cars, did "odd jobs," went to both Jewish and Christian religious services, was ". . . friendly, considerate, willing to help, even-tempered," and ironically, ". . . well-groomed . . . (and) neat and clean in appearance." And somewhere along the line he learned to ". . . play the harmonica unusually well."

The institution documents also show what Bill *didn't* do. He didn't hear from his immediate family after 1921. Rumors have it his mother instructed the girls to leave Bill's memory behind, that being the best and most peaceful thing to do. Although he is said to have been happy and well-adjusted at the institution, Bill didn't exactly thrive, at least intellectually. Documents show that there was no attempt to measure his I.Q. until he was at least twenty years old, and after that the tests gave these results: 47, 55, 58, 34, 32.

Diagnosis: Mental Deficiency, Imbecile; cause undiagnosed."

This is a matter in which I could spend many hours of idle speculation, but as Bill would say, "Let's just forget about it, buddy. I'm just as good as downtown."

NEVER LEFT

Records indicate that Bill never left the facility, never had a day of vacation, even though in 1939 requests were made to have him placed back in the community. Somehow he kept getting shuffled back to the bottom of the paper pile.

In the early 1960s things became different at Faribault, and within a few short years the institution was headed down a path of irrevocable change. "Community Placement," perhaps created by the "new humanism" or possibly by simple economic necessity, became the hottest new program experiment within the field of protective services, and overnight made a ghost town of Faribault. Bill had a good conduct record, so in spite of a few medical problems, and although every case report written about him from the time he was six years old had recommended that he would require constant supervision and care for the rest of his life, for once Bill was in the wrong place at the right time, and in November of 1964 he took that freedom train to Minneapolis.

His placement was on the South Side, a boarding home with four or five other retarded adult males. For six years he hunted various odd jobs, yard work, snow shoveling, car washes and cleaning up at an auto body

shop. For a time he tried working in a "sheltered workshop" with other handicapped persons, but that didn't last long. He preferred to be on his own.

HEALTH PROBLEMS

At age 56 his health started to fail. He had had two operations for hernia problems in the past, but old pains were resurfacing. The ulcer in his leg was getting worse, and he developed secondary skin problems. His teeth were rotting away. In 1970, the county welfare agency placed Bill in another location with a new job and living quarters, hoping it might help relieve what had become chronic conditions. His bed and chair were in an upstairs room in the old servants quarters, and at night he came down to clean the stoves in the big, old country club.

Bill was 61, my wife had our first baby, and I had a new job offer, so in the fall of 1974 we moved to a farm at Kalona, and I started work at the University of Iowa's School of Social Work. Six months later, with a suitcase full of red tape, Bill arrived in Iowa City. The school where I worked employed him, and a kind, elderly woman named Mae took him in as a boarder. It's a comfortable place with two rooms and a private bath. His windows look out into Mae's greenhouse, and his rooms themselves are filled with plants and pictures of friends. "I found a good home," he once remarked to me, "and I've been home ever since."

Today you can usually find Bill in his coffee shop at the School of Social Work. He takes an early bus and gets there before anyone else to make sure the pots are hot. He's proud of his coffee. He also sands and refinishes old furniture, and nearly every room in the school has some beautiful piece that Bill has reclaimed from the salvage storehouse. He doesn't use his wig as often anymore, for he now sports a big, bushy, salt and pepper beard. He's proud of his beard. The little children who attend the child care center located in the same building ritually stop up at the coffee shop each day with their parents to see him and say "good morning." And although they call him "Bill," each one secretly knows that he's really Santa Claus.

We finally found and contacted Bill's sister, Sarah. She was widowed, living in Florida, and gravely ill. We called and Bill spoke to her for the first time in fifty-five years, and when he hung up he cried. Later he received a letter too personal to recite here, but it helped explain what had happened and gave them both some peace. Bill was saving his money for a plane ticket to visit her, when one day he called and a strange voice told him her heart had failed and she was dead. "She's resting now," was all Bill said.

This is the epic tale that neither Bill nor I can truly tell. Although the events may seem sad, Bill harbors no resentment and neither should we. When he was hospitalized recently for further leg treatments, his bus sent him a "get well" card! Buses won't do that for everybody. This has been the story of Everybody's Bill.

Recently, in probate court, a petition was introduced asking that legal guardianship over Bill be discharged, and an order was issued restoring him to "full capacity." In his wallet, Bill carries those papers with him everywhere, and shows them off with great pride. He also carries a worn two-dollar bill, a good luck piece issued on his last birthday. Thomas Jefferson, it seems, was also born on Friday, April 13. Not an unlucky day, all things considered.

One day, while we were riding around together in my car, I asked Bill what he would want to do if we should happen to move out of Iowa. He usually has a ready-made response for most of my questions concerning his future welfare, but this time he thought long and hard before answering. "I want to stay here," he said. "It's my home and I'm on my own now."

Later, when I dropped him off at his place, we agreed for the thousandth time that, yes, he could call me again at noon the next day—just to see how I was doing.

Thinking more about it, I guess we wouldn't take him with us anyway. He belongs and is needed where he is—playing that harmonica, sanding down tables and chairs, greeting the pre-schoolers as they start each new day, and, over a cup of coffee, teaching social work students the very essence of their profession.

Everybody, after all, needs a lucky two-dollar Bill.

BARRY MORROW
(Bill's friend).

ARE WE DEVOTED TO AND DO WE LOVE OUR COUNTRY?

Mr. GOLDWATER. Mr. President, we question, from time to time, the patriotism of our young people and their sense among our youth who are most patriotic of national pride. Probably some of those among our youth who are most patriotic are those who wear the uniform of our armed services. This past month, at MacDill Air Force Base, Fla., a young staff sergeant gave a brief speech to the graduating class of the Noncommissioned Officers Leadership School. I think his words make all of us proud of our young Noncommissioned Officer Corps and a bit more secure in our Nation's security.

S. Sgt. Jeffrey A. Mumford of the 14th Missile Warning Squadron at MacDill Air Force Base, Fla., and the honor graduate of class 77–6 of the NCO Leadership School had a significant message for his classmates and other assembled guests, and I ask unanimous consent that Sergeant Mumford's words be printed in the RECORD so that all Americans might share them.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SERGEANT MUMFORD

Distinguished Guests, Fellow Members of the Graduating Class, Ladies and Gentlemen.

Webster defines patriotism as a love for, or devotion to country.

Patriotism has effected our nation in the past, is affecting our nation now, and holds the key to our Nation's future.

Without a strong sense of patriotism in our past, we would not exist as a free and united nation today. In the late 1770's when our country was fighting for its freedom, our mightiest weapon was patriotism. Many times Continental Armies, ill equipped and fewer in number defeated British Forces. Why! Because they had patriotism. They were devoted to and loved their newly formed country. They were ready to defend and promote its interest—freedom.

Later in our history, a strong sense of patriotism kept our country united. President Lincoln, a man who despised war and killing, led our nation into what many people of today believe was our worst war. President Lincoln however, put aside his personal feelings on war and killing and allowed his sense of patriotism to rule his actions. Because of his sense of patriotism, his love and devotion to country, we enjoy a free and United States of America today.

And what about today? I look around and I see a lack of patriotism in America. I see various groups and organizations, harassing our government officials, burning our nation's flag during protests, selling defense information to our enemies—the list of offenses against our nation is practically endless. A lot of you might be thinking, that's true, but it's just a small minority within our country doing these things. You're correct, it is only a small minority, but that small minority with its lack of patriotism is like a disease, an incurable, yes incurable but not necessarily fatal disease, for like the individual with diabetes who takes his insulin and lives a full life, our nation can also live a full life, to do so we must have our insulin.

Our insulin, our cure, is a renewed sense of patriotism. At this time we don't have a war, like our founding fathers and President Lincoln had, to instill in us that needed extra sense of patriotism. We have something greater. We have a nation that, for the first time in many years, is at peace. If the future is to hold additional peace for our nation, each day we must all examine our hearts and minds and ask ourselves . . .

Are we devoted to and do we love our country?

AN APPRECIATION OF HERBERT HOOVER

Mr. CURTIS. Mr. President, every year since 1954, August 10, the date of Herbert Clark Hoover's birth, has been marked with appropriate and impressive ceremonies at Mr. Hoover's birthplace in West Branch, Iowa.

Last month, the principal address at this annual tribute to America's 31st President was delivered by our former colleague, Roman L. Hruska.

The theme of Senator Hruska's address was to find meaning for today in the 90 years of Herbert Hoover's life—as a humanitarian and as a statesman.

I commend to my colleagues the thoughtful and incisive comments of Roman Hruska, himself one of the most respected men ever to have served in the Senate, and I ask unanimous consent that they be printed in the RECORD.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

HERBERT CLARK HOOVER

It is a very brave man—or more likely a foolhardy one—who would undertake to speak in this setting about the 31st President of the United States.

There are unquestionably in this audience men and women far more familiar than I with the life and times of Herbert Clark Hoover. Therefore, I seek your indulgence for one who comes to you with no special qualifications to stand at this podium beyond an unbounded admiration and respect for the man whose memory we honor.

You have flattered me with your generous invitation to share with you my own perceptions on this, the 103rd anniversary of Herbert Hoover's birth in this village, a birth which virtually every Hoover biographer has remarked with the blacksmith Jesse Hoover's proud assertion that "We have another Grant at our house."

It is not my purpose this morning to "justify" Herbert Hoover's presidency. History has already restored this great humanitarian to the lofty position of respect and admiration he deserves. Indeed, Eugene Lyons, in his magnificent biography, fixes the year in which the tide of public sentiment began to turn as 1947—30 years ago.

Nor is it my intention to be overly partisan in these remarks since that would ill serve the memory of Herbert Hoover. He himself refused to engage in blind partisanship.

Many politicians assert that was to his disadvantage. As Hoover himself put it in his Inaugural Address: "The animosities of elections should have no place in our government, for government must concern itself alone with the common weal."

He enjoyed the respect and the admiration of many men and women not of his political faith. Harry S Truman once told Admiral Lewis Strauss, "As for Mr. Hoover—you may not know it but I hold him in very high regard. I think he is a great American and will someday be so recognized even by the people who have defamed him."

That day came sooner than anyone who witnessed the vicious attacks of the early 1930's could have imagined.

My purpose this morning is to pay tribute to Herbert Hoover and to explore the life of this extraordinary man to see what meaning we can find for today.

Hoover's ideals and principles were basic and timeless. They are enshrined in the gleaming library in this village of his birth. Can we do better than to examine them for their application in 1977?

Upon accepting the invitation to appear on the program of this day, I reviewed some of the tributes which were paid to Mr. Hoover in the Senate of the United States in several of its sessions specially set aside for such occasions, during my tenure in that body.

One of the most moving of these was on this day—August 10—in 1960, when Mr. Hoover was 86 years old.

My closest friend in the Senate, the late Everett McKinley Dirksen, said:

"He met the severe changes of his generation and probably they were greater than those of any time in two generations. But it was thereafter that he rose to even greater heights, because of the work he did in the relief field, and also in the field of helping to reorganize the government over which he once presided."

Lyndon Baines Johnson, then the Majority Leader of the Senate, said this about Hoover:

"He is a great man who has a great heart and a great mind, who has served all of America so unselfishly through so many years and stands ready at any time, even now, to go wherever he believes he can be of service to this country. I take pride in calling him my friend. I have had the benefit of his counsel. I have profited from it, as has our country."

There were many others of us who rose in the Senate to acknowledge our gratitude for the great service of this uncommon man.

One member of the Senate who knew Mr. Hoover especially well is Arkansas's John McClellan who was one of only three or four men who served on both Hoover Commissions. Now 81 years old, he has served in the Senate since 1943 and is junior only to James O. Eastland, the President Pro Tem.

John McClellan bears a heavy burden as chairman of the Appropriations Committee and as a senior member of the Judiciary Committee. It was my privilege to serve alongside him on both those committees. He is ill now and his doctors have ordered that he rest for two months. I ask that you join with me today in private prayer for his speedy recovery.

It is now 13 years since I came to this very place for the final services for Herbert Clark Hoover. I well recall that sad November day and the reverential hush that held the 40,000 mourners as the flag-draped coffin was borne to the open grave under pleasant Indian Summer skies.

The Reverend David Elton Trueblood's words of eulogy on that day are worth recalling now:

"This man endured," he said. "He did not speak too much, but he wrote unceasingly with care and precision that the record should be left correct . . . Now, at least, these facts have crystallized in the public mind, letting us say farewell with universal gratitude for all he did for his country and for the world."

I had a word that day with Herbert Hoover, Jr. to whom a military aide had handed the triangular folded flag.

My mind went back to a summer in 1932 when, as a young man, I attended the Republican National Convention in Chicago which nominated Herbert Clark Hoover for a second term. I was a temporary—and slightly unofficial—alternate delegate to that convention.

In 1928, my state had given the Hoover-Curtis ticket a margin of nearly 2 to 1 over Al Smith in the biggest vote ever cast by Nebraskans in a presidential election.

What can we draw upon from Mr. Hoover's 90 years of his full, rich, experience, attainments and wisdom for our use and benefit today?

May I suggest this approach. that we recall the deep, extensive sense of history which he had. He was appreciative of its essence. He was deeply committed to personal effort and action on his part to carry on and to fulfill as he best could in the traditions of that history.

He also had the conviction that each citizen's knowledge of history dictated dedication to personal action to the best of the capabilities of each one of us, to the same goal of the strengthening and improving our government.

This was clearly demonstrated in a speech at Valley Forge, on February 22, 1958, when he accepted Freedom Foundation's highest award.

With his quiet eloquence, he spoke of the hardships of Washington and his troops during that dreadful winter in Pennsylvania.

"We, too, are writing a new chapter in American history," he said. "If we weaken, as Washington did not, we shall be writing the introduction to the decline of the American character and the fall of American institutions. If we are firm and farsighted, as were Washington and his men, we shall progress. If, by the grace of God, we stand steadfast in our great traditions through this time of stress, we shall insure that we and our sons and daughters shall see these fruits increased many fold."

The words were Hoover's but the remarkable thing is that he had delivered the identical speech at the same place 27 years earlier on Memorial Day, 1931. He believed with the tenacity of his Quaker faith what he had said in 1931 was equally meaningful in 1958. And it still applies on this day in August, 1977.

Last year America celebrated the 200th anniversary of its Declaration to engage in a vast, meaningful experiment in self-government.

Twenty decades is a long time by any measure. It is a long time for continuous functioning of a nation under one written Constitution and form of government.

It is not a long time, of course, in the history of people and government since the advent of higher civilization on this earth.

The Declaration of 200 years ago is still an experiment. In the light of hundreds and even thousands of years of governments coming and going, there is no assurance nor any certainty of indefinite survival under the present form of governing our nation's affairs.

Can it come about that this nation, possessed of so much strength, so many resources, and such a proud successful tradition, can be confronted or even contemplate failure in its mission of attaining its declared goals?

If so, how will it come about? And why?

Carl Sandburg—author, citizen and philosopher of universal note, made this observation in one of his later books:

"... For we know that when a nation goes down and never comes back, when a society or civilization perishes, one condition may always be found. They forgot where they came from. They lost sight of what brought them along ..."

He went on in his thinking in this wise: The hard beginnings were forgotten, as there were the struggles further along. The people became satisfied with themselves. There had been enough unity and common understanding to overcome rot and dissolution; and enough to overcome their obstacles.

But the mockers came. Deniers were heard. Vision and hope faded.

The custom of greeting became: "Oh, what's the use?"

Later men whose forefathers would go anywhere, holding nothing impossible in the genius of man, joined the mockers and the deniers.

They forgot where they came from. They lost sight of what had brought them along.

If there should ever come such a time—or even the threat thereof—both of which God Forbid!—that indeed would be a time to repair to the history, the life, and the teachings of the man whose career we commemorate today.

He was ever mindful of whence he had come.

He ever had in mind what had brought him and his people along.

We know these things to be true, not only because he taught them, but also because of the many actions in which he engaged to perpetuate such thinking.

For we know that he clearly perceived the role of governmental jurisdiction, yet always clearly and firmly reserving on the other hand the undeniable and indispensable role of the non-governmental province in our nation's pattern of existence and progress.

Both Lincoln and Hoover believed in a limited role for the federal government. Every schoolboy knows Lincoln's assertion that government should do only what the people cannot do for themselves or do so well. Hoover put it this way: "Mastery of government cannot be extended over the daily life of a people without making it the master of their souls and thoughts."

The federal budget transmitted by the President in January of this year proposed about 440 billions of dollars in outlays.

About 38 percent of it was scheduled for payment directly to individuals as a part of the so-called Domestic Assistance Program. The Federal Catalog lists 1,044 programs identified with this over-all program.

Should we be seriously asking ourselves whether such mountainous billions by over 1,000 federal agencies and offices are the type and degree of intrusion into the daily lives of Americans so as to make the government master of their souls and thoughts?

The gross federal debt in Fiscal Year 1978 is estimated at 785 billions of dollars. At much too early a date it will reach a trillion dollars—an amount impossible to perceive clearly.

Two hundred years ago, when the Constitution was being debated, a substantial number of the Founding Fathers expressed opposition. They did not believe it would work for very long. Their opposing arguments went something like this: As soon as the people of the new nation would learn that they could vote themselves benefits without having to pay for them, the Republic's downward path of disintegration, dissolution and downfall would start.

Have we reached such a time and circumstance? Let us ponder this subject in the light of longer historical outlook.

Our system of self-government is still an experiment. Progress, improvement, or even survival, are by no means assured for an indefinite future.

It can be made to work and to survive; it

can be conditioned to the service of humankind for generations into the future;—provided there is an application and practice of sound political and economic principles provided we resolve to seek attainment of the ideals which served so well in the formation of the Republic. This would mean principles and ideals such as those articulated so clearly and applied so faithfully by Mr. Hoover.

If the annual observances of the August 10 anniversary of Mr. Hoover's birth will serve to widely inform and rekindle a reawakening and reaffirmation of his basic principles and ideals, then indeed they befit their objectives well.

Those who arrange for such observances are to be commended. Americans everywhere should be grateful to them.

Sophocles, the ancient Greek philosopher, said over 200 years ago: "One must wait till evening to see how splendid the day has been."

The birth of Herbert Hoover 103 years ago brought about one of the Republic's most outstanding "splendid" days.

May we ever cherish and honor it.

MANDATORY RETIREMENT AND ITS EFFECTS

Mr. WILLIAMS. Mr. President, the New York Times recently published an insightful article which vividly illustrates the urgent need for reform of our Nation's retirement age policies. The article is a personal account of the experiences of a college professor who was mandatorily retired solely on account of having achieved a specified arbitrary age—suffering, in her own words, "the cruelest kind of rejection."

The author's story is not unlike those of hundreds of thousands of older Americans who are wrongfully dispossessed from their jobs each year by present mandatory retirement policies. These persons are the unfortunate victims of ill-founded myths and misconceptions about the abilities and desires of the elderly which underlie the rampant age discrimination which pervades our society.

Mandatory retirement consigns vital, capable older workers to lives of private stagnation and decline. In depriving the aged of their dignity and independence, mandatory retirement not only precipitates countless personal tragedies, but robs the Nation of the active contribution and human potential of its most highly skilled and experienced citizens.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 8, 1977]

How Old Is Old?

(By Anonymous)

I have recently been retired. I use the passive voice deliberately. This retirement was no act of mine; it was forced upon me by a computer that simply threw up a name to be discarded. It was no act of an administrator who rationally considered the worker and her work. The worker, with an excellent record of attendance, responsibility and reliability, whose vigor and willingness were in no way diminished had to be dismissed. The years of experience were less than nothing.

For some time I had been uneasy, aware that however fit I might be, students, growing up in a society in which the emphasis is on youth, would think of me as diseased. After all old age is a disease in America. The aged person becomes a leper, to be put away in an institution or, if lucky, and affluent, in an expensive colony, separated from the rest of mankind.

I found myself beginning to feel apologetic for my continuing tenure. I felt that I should do as everyone said, go away and make room for a younger person, someone with little or no experience, whose chief asset would be youth, and therefore with more right to the position.

Accordingly, when that dire notice arrived, my reaction was to disappear quietly, to let no one know that I had been struck down with that dread "disease." I was no longer an active, intelligent human being, but a supernumerary to be put out of the way. I wanted no testimonials to my condition. I was ashamed.

Walking about my own neighborhood in the light of day, I would not reveal the truth to inquiries about my idleness. I was on leave, I was writing a book, I was on sabbatical. I could not confess that I was now a relic. I edged away from organizations for the retired, shunning my own kind. I refused to take advantage of the privileges for "senior citizens," continuing to pay full fares, full charges.

But some things are unavoidable, and the whole apparatus of Social Security hit me: papers to be filled out, official ukases to be interpreted, the mimeographed word to be construed, the muddy language of the computer to be painfully transmitted to the understanding, figures to be added up again and again.

Just now, when this great change in my life is taking place, and I need a structured routine, the structure is cut down under my slipping feet. I get up in the morning, just as early, or even earlier, for now I cannot sleep, then go through the household chores, and have nothing further to do.

There is not the stimulation of a shared experience with colleagues, the preoccupation with the work. There is only the lonely house and the lonelier walk. Entertainment soon palls; the freedom of one's own time, the time that stretches endlessly, is not used. But there is also the prickling awareness that that very time is limited, that it must be used at once, or it will be gone. And then one thinks, "What the hell, let it go, it doesn't matter."

Everything seems to be coming to an end anyhow. With the cut in income there is also a cut in benefits, to which I am no longer entitled. So I begin to worry about money: Should I spend it all now—there's so little future left; or should I watch every penny, I may get sick and need private nurses; there will be no one to take care of me when I'm destitute. Should I move, can I afford it, is it worth the effort?

Then there is the question of relationships with former colleagues. I have the time, but they're working, taking on new loads; they're occupied. I must proceed carefully so as not to intrude into their precious time, careful not to injure the fragile bond, careful not to become an annoyance.

Some of these colleagues have expressed envy of my freedom. I used to bewail the fact that I had not enough free time; there were so many things I wanted to do. Now I have all that time, but not the will to do anything. I used to bake bread on those Sundays when I had five sets of papers to mark. I managed to find the time and the energy. Fatigue? It was well-earned fatigue. I had a right to pamper myself. Now I have no right, I have not earned it, I cannot go on that long trip.

The doctor tells me I am "in very good shape." My mind is teeming with ideas, but no one wants them. I don't want to fill in the time before I die. I want to use the time. I need to work, not make-work, not a hobby, not volunteer work. I need a job. I want my old job back. I was good at it.

To be considered unfit for the very job for which I was trained, in which I have many years of experience, is the cruelest kind of rejection.

Then I am truly unfit, no good at anything. There is no longer any incentive to work; there is only the overwhelming fear of further rejection. Nothing else matters, nothing else affords any kind of compensation.

NOTE.—The writer, who requested anonymity, was assistant professor of English in the City University system.

POLL SHOWS CLOSE MARGIN ON PANAMA CANAL TREATY

Mr. CHAFEE. Mr. President, the Panama Canal treaties have generated the most intense interest around the country and while polls are useful tools for analysis, the complexity of the issues before us demands more careful study on our own. However, in view of the largely one-sided margin that is shown in the mail that most of us have been receiving on the Panama Canal issue, I would like to call to the attention of my colleagues the recent Gallup poll on how Americans feel about the Panama Canal treaties on a nationwide basis.

The level of support indicated by this survey might be surprising to those who have suggested that Americans are opposed to the treaties by as much as a 3-to-1 margin.

While the issues involved in these treaties may not yet be readily familiar to many Americans, I am hopeful that in in the course of our debates the American public will maintain an open mind.

Mr. President, I ask unanimous consent that this most recent Gallup poll be printed in the RECORD.

There being no objection, the Gallup poll was ordered to be printed in the RECORD, as follows:

In National Public Opinion Referendum U.S. Public Closely Divided on Panama Treaty: 39 Percent Approve; 46 Percent Disapprove

(By George Gallup)

PRINCETON, N.J.—President Jimmy Carter's decision to go to the American people to win support for the Panama treaty comes at a time when the public is closely divided on this controversial issue.

In the first nationwide survey—in effect, a national referendum—39 per cent of those who have heard or read about the treaty express approval, while 46 per cent disapprove of the proposed new treaty between the U.S. and Panama, which calls for the U.S. to turn over ownership of the canal to Panama at the end of this century but to retain protective rights and responsibilities. Fifteen per cent of the aware group are undecided.

Sharp differences are found on the basis of population groups. Persons with a college background, for example, lean 49 to 40 per cent in approval of the treaty, Republicans disapprove by a 2-to-1 margin, while Democratic voters and independents are about evenly divided.

WHAT VOTERS ARE SAYING

Among those who approve of the new treaty is a 59-year-old stock speculator in Miami, Fla.

"It is important to have more cooperation with Latin America. People in Latin America feel the canal is just another example of American colonialism," he said.

Another who approves is a 54-year-old college professor in Knoxville, Tenn.

"By the year 2000, the canal will have little strategic or economic value to us. The supertankers of tomorrow won't be able to use it. There is more emotion than logic connected with it (the treaty) and we have done very well in making this treaty," he said.

A 60-year-old retiree in Washington, D.C., opposes the treaty.

"I disapprove of the treaty for two main reasons: First, we have billions of dollars invested in it and it has been our property for three-quarters of a century: second, Panama is a dictatorship with no freedom for its citizens—how could they control the canal better than we?"

This question was asked first in the survey:

"Have you heard or read about the proposed new treaty between the U.S. and the Republic of Panama regarding the Panama Canal?"

The results show three in four nationwide saying they have heard or read about the treaty. About 9 in 10 among the college-educated group express awareness. Awareness levels are lower among women than men, and younger persons than older, as seen below:

Have heard or read about

	Percent
National	76
Men	83
Women	69
18 to 29 years	65
30 to 49 years	76
50 and over	82
College	89
High school	71
Grade school	56
Republicans	84
Democrats	73
Independents	74

All persons in the survey were next asked this question: "The proposed new treaty between the U.S. and Panama calls for the U.S. to turn over ownership of the canal to Panama at the end of this century. However, the U.S. will maintain control over the land and installations necessary to operate and defend the canal. Do you approve or disapprove of this proposed new treaty?"

Here are the findings based on those who have heard or read about the treaty:

Approve or disapprove Panama Canal Treaty?

[In percent]

	Approve	Disapprove	No opinion
Nationwide	39	46	15
College	49	40	11
High school	32	52	16
Grade school	28	46	26
18 to 29 years	44	44	12
30 to 49 years	45	43	12
50 and over	30	51	19
East	43	42	15
Midwest	37	50	13
South	35	47	18
West	38	49	13

PANAMA CANAL TREATY

Mr. MUSKIE. Mr. President, because of the broad interest of my constituents and, indeed, all Americans, in the provisions of the new Panama Canal Treaties, I believe the full text of those treaties should be available to as many people as possible.

Accordingly, I ask unanimous consent that a copy of that text be printed in the RECORD.

There being no objection, the treaty was ordered to be printed in the RECORD, as follows:

PANAMA CANAL TREATY

The United States of America and the Republic of Panama.

Acting in the spirit of the Joint Declaration of April 3, 1964, by the Representatives of the Governments of the United States of America and the Republic of Panama, and of the Joint Statement of Principles of February 7, 1974, initialed by the Secretary of State of the United States of America and the Foreign Minister of the Republic of Panama, and

Acknowledging the Republic of Panama's sovereignty over its territory,

Have decided to terminate the prior Treaties pertaining to the Panama Canal and to conclude a new Treaty to serve as the basis for a new relationship between them and, accordingly, have agreed upon the following:

ARTICLE I

Abrogation of prior treaties and establishment of a new relationship

1. Upon its entry into force, this Treaty terminates and supersedes:

(a) The Isthmian Canal Convention between the United States of America and the Republic of Panama, signed at Washington, November 18, 1903;

(b) The Treaty of Friendship and Cooperation signed at Washington, March 2, 1936, and the Treaty of Mutual Understanding and Cooperation and the related Memorandum of Understandings Reached, signed at Panama, January 25, 1955, between the United States of America and the Republic of Panama;

(c) All other treaties, conventions, agreements and exchanges of notes between the United States of America and the Republic of Panama, concerning the Panama Canal which were in force prior to the entry into force of this Treaty; and

(d) Provisions concerning the Panama Canal which appear in other treaties, conventions, agreements and exchanges of notes between the United States of America and the Republic of Panama which were in force prior to the entry into force of this Treaty.

2. In accordance with the terms of this Treaty and related agreements, the Republic of Panama, as territorial sovereign, grants to the United States of America, for the duration of this Treaty, the rights necessary to regulate the transit of ships through the Panama Canal, and to manage, operate, maintain, improve, protect and defend the Canal. The Republic of Panama guarantees to the United States of America the peaceful use of the land and water areas which it has been granted the rights to use for such purposes pursuant to this Treaty and related agreements.

3. The Republic of Panama shall participate increasingly in the management and protection and defense of the Canal, as provided in this Treaty.

4. In view of the special relationship established by this Treaty, the United States of America and the Republic of Panama shall cooperate to assure the uninterrupted and efficient operation of the Panama Canal.

ARTICLE II

Ratification, entry into force, and termination

1. This Treaty shall be subject to ratification in accordance with the constitutional procedures of the two Parties. The instruments of ratification of this Treaty shall be exchanged at Panama at the same time as the instruments of ratification of the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, signed this date, are exchanged. This Treaty shall enter into force, simultaneously with the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, six calendar months from the date of the exchange of the instruments of ratification.

2. This Treaty shall terminate at noon, Panama time, December 31, 1999.

ARTICLE III

Canal operation and management

1. The Republic of Panama, as territorial sovereign, grants to the United States of America the rights to manage, operate, and maintain the Panama Canal, its complementary works, installations and equipment and to provide for the orderly transit of vessels through the Panama Canal. The United States of America accepts the grant of such rights and undertakes to exercise them in accordance with this Treaty and related agreements.

2. In carrying out the foregoing responsibilities, the United States of America may:

(a) Use for the aforementioned purposes, without cost except as provided in this Treaty, the various installations and areas (including the Panama Canal) and waters, described in the Agreement in Implementation of this Article, signed this date, as well as such other areas and installations as are made available to the United States of America under this Treaty and related agreements, and take the measures necessary to ensure sanitation of such areas;

(b) Make such improvements and alterations to the aforesaid installations and areas as it deems appropriate, consistent with the terms of this Treaty;

(c) Make and enforce all rules pertaining to the passage of vessels through the Canal and other rules with respect to navigation and maritime matters, in accordance with this Treaty and related agreements. The Republic of Panama will lend its cooperation, when necessary, in the enforcement of such rules;

(d) Establish, modify, collect and retain tolls for the use of the Panama Canal, and other charges, and establish and modify methods of their assessment;

(e) Regulate relations with employees of the United States Government;

(f) Provide supporting services to facilitate the performance of its responsibilities under this Article;

(g) Issue and enforce regulations for the effective exercise of the rights and responsibilities of the United States of America under this Treaty and related agreements. The Republic of Panama will lend its cooperation, when necessary, in the enforcement of such rules; and

(h) Exercise any other right granted under this Treaty, or otherwise agreed upon between the two Parties.

3. Pursuant to the foregoing grant of rights, the United States of America shall, in accordance with the terms of this Treaty and the provisions of United States law, carry out its responsibilities by means of a United States Government agency called the Panama Canal Commission, which shall be constituted by and in conformity with the laws of the United States of America.

(a) The Panama Canal Commission shall be supervised by a Board composed of nine members, five of whom shall be nationals of the United States of America, and four of whom shall be Panamanian nationals proposed by the Republic of Panama for appointment to such positions by the United States of America in a timely manner.

(b) Should the Republic of Panama request the United States of America to remove a Panamanian national from membership on the Board, the United States of America shall agree to such a request. In that event, the Republic of Panama shall propose another Panamanian national for

appointment by the United States of America to such position in a timely manner. In case of removal of a Panamanian member of the Board at the initiative of the United States of America, both Parties will consult in advance in order to reach agreement concerning such removal, and the Republic of Panama shall propose another Panamanian national for appointment by the United States of America in his stead.

(c) The United States of America shall employ a national of the United States of America as Administrator of the Panama Canal Commission, and a Panamanian national as Deputy Administrator, through December 31, 1989. Beginning January 1, 1990, a Panamanian national shall be employed as the Administrator and a national of the United States of America shall occupy the position of Deputy Administrator. Such Panamanian nationals shall be proposed to the United States of America by the Republic of Panama for appointment to such positions by the United States of America.

(d) Should the United States of America remove the Panamanian national from his position as Deputy Administrator, or Administrator, the Republic of Panama shall propose another Panamanian national for appointment to such position by the United States of America.

4. An illustrative description of the activities the Panama Canal Commission will perform in carrying out the responsibilities and rights of the United States of America under this Article is set forth at the Annex. Also set forth in the Annex are procedures for the discontinuance or transfer of those activities performed prior to the entry into force of this Treaty by the Panama Canal Company or the Canal Zone Government which are not to be carried out by the Panama Canal Commission.

5. The Panama Canal Commission shall reimburse the Republic of Panama for the costs incurred by the Republic of Panama in providing the following public services in the Canal operating areas and in housing areas set forth in the Agreement in Implementation of Article III of this Treaty and occupied by both United States and Panamanian citizen employees of the Panama Canal Commission: police, fire protection, street maintenance, street lighting, street cleaning, traffic management and garbage collection. The Panama Canal Commission shall pay the Republic of Panama the sum of ten million United States dollars ($10,000,000) per annum for the foregoing services. It is agreed that every three years from the date that this Treaty enters into force, the costs involved in furnishing said services shall be reexamined to determine whether adjustment of the annual payment should be made because of inflation and other relevant factors affecting the cost of such services.

6. The Republic of Panama shall be responsible for providing, in all areas comprising the former Canal Zone, services of a general jurisdictional nature such as customs and immigration, postal services, courts and licensing, in accordance with this Treaty and related agreements.

7. The United States of America and the Republic of Panama shall establish a Panama Canal Consultative Committee, composed of an equal number of high-level representatives of the United States of America and the Republic of Panama, and which may appoint such subcommittees as it may deem appropriate. This Committee shall advise the United States of America and the Republic of Panama on matters of policy affecting the Canal's operation. In view of both Parties' special interest in the continuity and efficiency of the Canal operation in the future, the Committee shall advise on matters such as general tolls policy, employment and training policies to increase the participation of Panamanian nationals in the operation of the Canal, and international policies on matters concerning the Canal. The Committee's recommendations shall be transmitted to the two Governments, which shall give such recommendations full consideration in the formulation of such policy decisions.

8. In addition to the participation of Panamanian nationals at high management levels of the Panama Canal Commission, as provided for in paragraph 3 of this Article, there shall be growing participation of Panamanian nationals at all other levels and areas of employment in the aforesaid Commission, with the objective of preparing, in an orderly and efficient fashion, for the assumption by the Republic of Panama of full responsibility for the management, operation and maintenance of the Canal upon the termination of this Treaty.

9. The use of the areas, waters and installations with respect to which the United States of America is granted rights pursuant to this Article, and the rights and legal status of United States Government agencies and employees operating in the Republic of Panama pursuant to this Article, shall be governed by the Agreement in Implementation of this Article, signed this date.

10. Upon entry into force of this Treaty, the United States Government agencies known as the Panama Canal Company and the Canal Zone Government shall cease to operate within the territory of the Republic of Panama that formerly constituted the Canal Zone.

ARTICLE IV

Protection and defense

1. The United States of America and the Republic of Panama commit themselves to protect and defend the Panama Canal. Each Party shall act, in accordance with its constitutional processes, to meet the danger resulting from an armed attack or other actions which threaten the security of the Panama Canal or of ships transiting it.

2. For the duration of this Treaty, the United States of America shall have primary responsibility to protect and defend the Canal. The rights of the United States of America to station, train, and move military forces within the Republic of Panama are described in the Agreement in Implementation of this Article, signed this date. The use of areas and installations and the legal status of the armed forces of the United States of America in the Republic of Panama shall be governed by the aforesaid Agreement.

3. In order to facilitate the participation and cooperation of the armed forces of both Parties in the protection and defense of the Canal, the United States of America and the Republic of Panama shall establish a Combined Board comprised of an equal number of senior military representatives of each Party. These representatives shall be charged by their respective governments with consulting and cooperating on all matters pertaining to the protection and defense of the Canal, and with planning for actions to be taken in concert for that purpose. Such combined protection and defense arrangements shall not inhibit the identity or lines of authority of the armed forces of the United States of America or the Republic of Panama. The Combined Board shall provide for coordination and cooperation concerning such matters as:

(a) The preparation of contingency plans for the protection and defense of the Canal based upon the cooperative efforts of the armed forces of both Parties;

(b) The planning and conduct of combined military exercises; and

(c) The conduct of United States and Panamanian military operations with respect to the protection and defense of the Canal.

4. The Combined Board shall, at five-year intervals throughout the duration of this Treaty, review the resources being made available by the two Parties for the protection and defense of the Canal. Also, the Combined Board shall make appropriate recommendations to the two Governments respecting projected requirements, the efficient utilization of available resources of the two Parties, and other matters of mutual interest with respect to the protection and defense of the Canal.

5. To the extent possible consistent with its primary responsibility for the protection and defense of the Panama Canal, the United States of America will endeavor to maintain its armed forces in the Republic of Panama in normal times at a level not in excess of that of the armed forces of the United States of America in the territory of the former Canal Zone immediately prior to the entry into force of this Treaty.

ARTICLE V

Principle of non-intervention

Employees of the Panama Canal Commission, their dependents and designated contractors of the Panama Canal Commission, who are nationals of the United States of America, shall respect the laws of the Republic of Panama and shall abstain from any activity incompatible with the spirit of this Treaty. Accordingly, they shall abstain from any political activity in the Republic of Panama as well as from any intervention in the internal affairs of the Republic of Panama. The United States of America shall take all measures within its authority to ensure that the provisions of this Article are fulfilled.

ARTICLE VI

Protection of the environment

1. The United States of America and the Republic of Panama commit themselves to implement this Treaty in a manner consistent with the protection of the natural environment of the Republic of Panama. To this end, they shall consult and cooperate with each other in all appropriate ways to ensure that they shall give due regard to the protection and conservation of the environment.

2. A Joint Commission on the Environment shall be established with equal representation from the United States of America and the Republic of Panama, which shall periodically review the implementation of this Treaty and shall recommend as appropriate to the two Governments ways to avoid or, should this not be possible, to mitigate the adverse environmental impacts which might result from their respective actions pursuant to the Treaty.

3. The United States of America and the Republic of Panama shall furnish the Joint Commission on the Environment complete information on any action taken in accordance with this Treaty which, in the judgment of both, might have a significant effect on the environment. Such information shall be made available to the Commission as far in advance of the contemplated action as possible to facilitate the study by the Commission of any potential environmental problems and to allow for consideration of the recommendation of the Commission before the contemplated action is carried out.

ARTICLE VII

Flags

1. The entire territory of the Republic of Panama, including the areas the use of which the Republic of Panama makes available to the United States of America pursuant to this Treaty and related agreements, shall be under the flag of the Republic of Panama, and consequently such flag always shall occupy the position of honor.

2. The flag of the United States of America may be displayed, together with the flag of the Republic of Panama, at the headquarters of the Panal Canal Commission, at the site of the Combined Board, and as provided in the Agreement in Implementation of Article IV of this Treaty.

The flag of the United States of America also may be displayed at other places and on some occasions as agreed by both Parties.

ARTICLE VIII

Privileges and immunities

1. The installations owned or used by the agencies or instrumentalities of the United States of America operating in the Republic of Panama pursuant to this Treaty and related agreements, and their official archives and documents, shall be inviolable. The two Parties shall agree on procedures to be followed in the conduct of any criminal investigation at such locations by the Republic of Panama.

2. Agencies and instrumentalities of the Government of the United States of America operating in the Republic of Panama pursuant to this Treaty and related agreements shall be immune from the jurisdiction of the Republic of Panama.

3. In addition to such other privileges and immunities as are afforded to employees of the United States Government and their dependents pursuant to this Treaty, the United States of America may designate up to twenty officials of the Panama Canal Commission who, along with their dependents, shall enjoy the privileges and immunities accorded to diplomatic agents and their dependents under international law and practice. The United States of America shall furnish to the Republic of Panama a list of the names of said officials and their dependents, identifying the positions they occupy in the Government of the United States of America, and shall keep such list current at all times.

ARTICLE IX

Applicable laws and law enforcement

1. In accordance with the provisions of this Treaty and related agreements, the law of the Republic of Panama shall apply in the areas made available for the use of the United States of America pursuant to this Treaty. The law of the Republic of Panama shall be applied to matters or events which occurred in the former Canal Zone prior to the entry into force of this Treaty only to the extent specifically provided in prior treaties and agreements.

2. Natural or juridical persons who, on the date of entry into force of this Treaty, are engaged in business or non-profit activities at locations in the former Canal Zone may continue such business or activities at those locations under the same terms and conditions prevailing prior to the entry into force of this Treaty for a thirty-month transition period from its entry into force. The Republic of Panama shall maintain the same operating conditions as those applicable to the aforementioned enterprises prior to the entry into force of this Treaty in order that they may receive licenses to do business in the Republic of Panama subject to their compliance with the requirements of its law. Thereafter, such persons shall receive the same treatment under the law of the Republic of Panama as similar enterprises already established in the rest of the territory of the Republic of Panama without discrimination.

3. The rights of ownership, as recognized by the United States of America, enjoyed by natural or juridical private persons in buildings and other improvements to real property located in the former Canal Zone shall be recognized by the Republic of Panama in conformity with its laws.

4. With respect to buildings and other improvements to real property located in the Canal operating areas, housing areas or other areas subject to the licensing procedure established in Article IV of the Agreement in Implementation of Article III of this Treaty, the owners shall be authorized to continue using the land upon which their property is located in accordance with the procedures established in that Article.

5. With respect to buildings and other improvements to real property located in areas of the former Canal Zone to which the aforesaid licensing procedure is not applicable, or may cease to be applicable during the lifetime or upon termination of this Treaty, the owners may continue to use the land upon which their property is located, subject to the payment of a reasonable charge to the Republic of Panama. Should the Republic of Panama decide to sell such land, the owners of the buildings or other improvements located thereon shall be offered a first option to purchase such land at a reasonable cost. In the case of nonprofit enterprises, such as churches and fraternal organizations, the cost of purchase will be nominal in accordance with the prevailing practice in the rest of the territory of the Republic of Panama.

6. If any of the aforementioned persons are required by the Republic of Panama to discontinue their activities or vacate their property for public purposes, they shall be compensated at fair market value by the Republic of Panama.

7. The provisions of paragraphs 2–6 above shall apply to natural or juridical persons who have been engaged in business or nonprofit activities at locations in the former Canal Zone for at least six months prior to the date of signature of this Treaty.

8. The Republic of Panama shall not issue, adopt or enforce any law, decree, regulation, or international agreement or take any other action which purports to regulate or would otherwise interfere with the exercise on the part of the United States of America of any right granted under this Treaty or related agreements.

9. Vessels transiting the Canal, and cargo, passengers and crews carried on such vessels shall be exempt from any taxes, fees, or other charges by the Republic of Panama. However, in the event such vessels call at a Panamanian port, they may be assessed charges incident thereto, such as charges for services provided to the vessel. The Republic of Panama may also require the passengers and crew disembarking from such vessels to pay such taxes, fees and charges as are established under Panamanian law for persons entering its territory. Such taxes, fees and charges shall be assessed on a nondiscriminatory basis.

10. The United States of America and the Republic of Panama will cooperate in taking such steps as may from time to time be necessary to guarantee the security of the Panama Canal Commission, its property, its employees and their dependents, and their property, the Forces of the United States of America and the members thereof, the civilian component of the United States Forces, the dependents of members of the Forces and the civilian component, and their property, and the contractors of the Panama Canal Commission and of the United States Forces, their dependents, and their property. The Republic of Panama will seek from its Legislative Branch such legislation as may be needed to carry out the foregoing purposes and to punish any offenders.

11. The Parties shall conclude an agreement whereby nationals of either State, who are sentenced by the courts of the other State, and who are not domiciled therein, may elect to serve their sentences in their State of nationality.

ARTICLE X

Employment with the Panama Canal Commission

1. In exercising its rights and fulfilling its responsibilities as the employer, the United States of America shall establish employment and labor regulations which shall contain the terms, conditions and prerequisites for all categories of employees of the Panama Canal Commission. These regulations shall be provided to the Republic of Panama prior to their entry into force.

2. (a) The regulations shall establish a system of preference when hiring employees, for Panamanian applicants possessing the skills and qualifications required for employment by the Panama Canal Commission. The United States of America shall endeavor to ensure that the number of Panamanian nationals employed by the Panama Canal Commission in relation to the total number of its employees will conform to the proportion established for foreign enterprises under the law of the Republic of Panama.

(b) The terms and conditions of employment to be established will in general be no less favorable to persons already employed by the Panama Canal Company or Canal Zone Government prior to the entry into force of this Treaty, than those in effect immediately prior to that date.

3. (a) The United States of America shall establish an employment policy for the Panama Canal Commission that shall generally limit the recruitment of personnel outside the Republic of Panama to persons possessing requisite skills and qualifications which are not available in the Republic of Panama.

(b) The United States of America will establish training programs for Panamanian employees and apprentices in order to increase the number of Panamanian nationals qualified to assume positions with the Panama Canal Commission, as positions become available.

(c) Within five years from the entry into force of this Treaty, the number of United States nationals employed by the Panama Canal Commission who were previously employed by the Panama Canal Company shall be at least twenty percent less than the total number of United States nationals working for the Panama Canal Company immediately prior to the entry into force of this Treaty.

(d) The United States of America shall periodically inform the Republic of Panama, through the Coordinating Committee, established pursuant to the Agreement in Implementation of Article III of this Treaty, of available positions within the Panama Canal Commission. The Republic of Panama shall similarly provide the United States of America any information it may have as to the availability of Panamanian nationals claiming to have skills and qualifications that might be required by the Panama Canal Commission, in order that the United States of America may take this information into account.

4. The United States of America will establish qualification standards for skills, training and experience required by the Panama Canal Commission. In establishing such standards, to the extent they include a requirement for a professional license, the United States of America, without prejudice to its right to require additional professional skills and qualifications, shall recognize the professional licenses issued by the Republic of Panama.

5. The United States of America shall establish a policy for the periodic rotation, at a maximum of every five years, of United States citizen employees and other non-Panamanian employees, hired after the entry into force of this Treaty. It is recognized that certain exceptions to the said policy of rotation may be made for sound administrative reasons, such as in the case of employees holding positions requiring certain non-transferable or non-recruitable skills.

6. With regard to wages and fringe benefits, there shall be no discrimination on the basis of nationality, sex, or race. Payments by the Panama Canal Commission of additional remuneration, or the provision of other benefits, such as home leave benefits, to United States nationals employed prior to entry into force of this Treaty, or to persons of any nationality, including Panamanian nationals who are thereafter recruited

outside of the Republic of Panama and who change their place of residence, shall not be considered to be discrimination for the purpose of this paragraph.

7. Persons employed by the Panama Canal Company or Canal Zone Government prior to the entry into force of this Treaty, who are displaced from their employment as a result of the discontinuance by the United States of America of certain activities pursuant to this Treaty, will be placed by the United States of America, to the maximum extent feasible, in other appropriate jobs with the Government of the United States in accordance with United States Civil Service regulations. For such persons who are not United States nationals, placement efforts will be confined to United States Government activities located within the Republic of Panama. Likewise, persons previously employed in activities for which the Republic of Panama assumes responsibility as a result of this Treaty will be continued in their employment to the maximum extent feasible by the Republic of Panama. The Republic of Panama shall to the maximum extent feasible, ensure that the terms and conditions of employment applicable to personnel employed in the activities for which it assumes responsibility are no less favorable than those in effect immediately prior to the entry into force of this Treaty. Non-United States nationals employed by the Panama Canal Company or Canal Zone Government prior to the entry into force of this Treaty who are involuntarily separated from their positions because of the discontinuance of an activity by reason of this Treaty, who are not entitled to an immediate annuity under the United States Civil Service Retirement System, and for whom continued employment in the Republic of Panama by the Government of the United States of America is not practicable, will be provided special job placement assistance by the Republic of Panama for employment in positions for which they may be qualified by experience and training.

8. The Parties agree to establish a system whereby the Panama Canal Commission may, if deemed mutually convenient or desirable by the two Parties, assign certain employees of the Panama Canal Commission, for a limited period of time, to assist in the operation of activities transferred to the responsibility of the Republic of Panama as a result of this Treaty or related agreements. The salaries and other costs of employment of any such persons assigned to provide such assistance shall be reimbursed to the United States of America by the Republic of Panama.

9. (a) The right of employees to negotiate collective contracts with the Panama Canal Commission is recognized. Labor relations with employees of the Panama Canal Commission shall be conducted in accordance with forms of collective bargaining established by the United States of America after consultation with employee unions.

(b) Employee unions shall have the right to affiliate with international labor organizations.

10. The United States of America will provide an appropriate early optional retirement program for all persons employed by the Panama Canal Company or Canal Zone Government immediately prior to the entry into force of this Treaty. In this regard, taking into account the unique circumstances created by the provisions of this Treaty, including its duration, and their effect upon such employees, the United States of America shall, with respect to them:

(a) determine that conditions exist which invoke applicable United States law permitting early retirement annuities and apply such law for a substantial period of the duration of the Treaty;

(b) seek special legislation to provide more liberal entitlement to, and calculation of, retirement annuities than is currently provided for by law.

ARTICLE XI

Provisions for the transition period

1. The Republic of Panama shall reassume plenary jurisdiction over the former Canal Zone upon entry into force of this Treaty and in accordance with its terms. In order to provide for an orderly transition to the full application of the jurisdictional arrangements established by this Treaty and related agreements, the provisions of this Article shall become applicable upon the date this Treaty enters into force, and shall remain in effect for thirty calendar months. The authority granted in this Article to the United States of America for this transition period shall supplement, and is not intended to limit, the full application and effect of the rights and authority granted to the United States of America elsewhere in this Treaty and in related agreements.

2. During this transition period, the criminal and civil laws of the United States of America shall apply concurrently with those of the Republic of Panama in certain of the areas and installations made available for the use of the United States of America pursuant to this Treaty, in accordance with the following provisions:

(a) The Republic of Panama permits the authorities of the United States of America to have the primary right to exercise criminal jurisdiction over United States citizen employees of the Panama Canal Commission and their dependents, and members of the United States Forces and civilian component and their dependents, in the following cases:

(i) for any offense committed during the transition period within such areas and installations, and

(ii) for any offense committed prior to that period in the former Canal Zone.

The Republic of Panama shall have the primary right to exercise jurisdiction over all other offenses committed by such persons, except as otherwise provided in this Treaty and related agreements or as may be otherwise agreed.

(b) Either Party may waive its primary right to exercise jurisdiction in a specific case or category of cases.

3. The United States of America shall retain the right to exercise jurisdiction in criminal cases relating to offenses committed prior to the entry into force of this Treaty in violation of the laws applicable in the former Canal Zone.

4. For the transition period, the United States of America shall retain police authority and maintain a police force in the aforementioned areas and installations. In such areas, the police authorities of the United States of America may take into custody any person not subject to their primary jurisdiction if such person is believed to have committed or to be committing an offense against applicable laws or regulations, and shall promptly transfer custody to the police authorities of the Republic of Panama. The United States of America and the Republic of Panama shall establish joint police patrols in agreed areas. Any arrests conducted by a joint patrol shall be the responsibility of the patrol member or members representing the Party having primary jurisdiction over the person or persons arrested.

5. The courts of the United States of America and related personnel, functioning in the former Canal Zone immediately prior to the entry into force of this Treaty, may continue to function during the transition period for the judicial enforcement of the jurisdiction to be exercised by the United States of America in accordance with this Article.

6. In civil cases, the civilian courts of the United States of America in the Republic of Panama shall have no jurisdiction over new cases of a private civil nature, but shall retain full jurisdiction during the transition period to dispose of any civil cases, including admiralty cases, already instituted and pending before the courts prior to the entry into force of this Treaty.

7. The laws, regulations, and administrative authority of the United States of America applicable in the former Canal Zone immediately prior to the entry into force of this Treaty shall, to the extent not inconsistent with this Treaty and related agreements, continue in force for the purpose of the exercise by the United States of America of law enforcement and judicial jurisdiction only during the transition period. The United States of America may amend, repeal or otherwise change such laws, regulations and administrative authority. The two Parties shall consult concerning procedural and substantive matters relative to the implementation of this Article, including the disposition of cases pending at the end of the transition period and, in this respect, may enter into appropriate agreements by an exchange of notes or other instrument.

8. During this transition period, the United States of America may continue to incarcerate individuals in the areas and installations made available for the use of the United States of America by the Republic of Panama pursuant to this Treaty and related agreements, or to transfer them to penal facilities in the United States of America to serve their sentences.

ARTICLE XII

A sea-level canal or a third lane of locks

1. The United States of America and the Republic of Panama recognize that a sea-level canal may be important for international navigation in the future. Consequently, during the duration of this Treaty, both Parties commit themselves to study jointly the feasibility of a sea-level canal in the Republic of Panama, and in the event they determine that such a waterway is necessary, they shall negotiate terms, agreeable to both Parties, for its construction.

2. The United States of America and the Republic of Panama agree on the following:

(a) No new interoceanic canal shall be constructed in the territory of the Republic of Panama during the duration of this Treaty, except in accordance with the provisions of this Treaty, or as the two Parties may otherwise agree; and

(b) During the duration of this Treaty, the United States of America shall not negotiate with third States for the right to construct an interoceanic canal on any other route in the Western Hemisphere, except as the two Parties may otherwise agree.

3. The Republic of Panama grants to the United States of America the right to add a third lane of locks to the existing Panama Canal. This right may be exercised at any time during the duration of this Treaty, provided that the United States of America has delivered to the Republic of Panama copies of the plans for such construction.

4. In the event the United States of America exercises the right granted in paragraph 3 above, it may use for that purpose, in addition to the areas otherwise made available to the United States of America pursuant to this Treaty, such other areas as the two Parties may agree upon. The terms and conditions applicable to Canal operating areas made available by the Republic of Panama for the use of the United States of America pursuant to Article III of this Treaty shall apply in a similar manner to such additional areas.

5. In the construction of the aforesaid works, the United States of America shall not use nuclear excavation techniques without the previous consent of the Republic of Panama.

ARTICLE XIII

Property transfer and economic participation by the Republic of Panama

1. Upon termination of this Treaty, the Republic of Panama shall assume total responsibility for the management, operation, and maintenance of the Panama Canal, which shall be turned over in operating condition and free of liens and debts, except as the two Parties may otherwise agree.

2. The United States of America transfers, without charge, to the Republic of Panama all right, title and interest the United States of America may have with respect to all real property, including non-removable improvements thereon, as set forth below:

(a) Upon the entry into force of this Treaty, the Panama Railroad and such property that was located in the former Canal Zone but that is not within the land and water areas the use of which is made available to the United States of America pursuant to this Treaty. However, it is agreed that the transfer on such date shall not include buildings and other facilities, except housing, the use of which is retained by the United States of America pursuant to this Treaty and related agreements, outside such areas;

(b) Such property located in an area or a portion thereof at such time as the use by the United States of America of such area or portion thereof ceases pursuant to agreement between the two Parties.

(c) Housing units made available for occupancy by members of the Armed Forces of the Republic of Panama in accordance with paragraph 5(b) of Annex B to the Agreement in Implementation of Article IV of this Treaty at such time as such units are made available to the Republic of Panama.

(d) Upon termination of this Treaty, all real property, and non-removable improvements that were used by the United States of America for the purposes of this Treaty and related agreements, and equipment related to the management, operation and maintenance of the Canal remaining in the Republic of Panama.

3. The Republic of Panama agrees to hold the United States of America harmless with respect to any claims which may be made by third parties relating to rights, title and interest in such property.

4. The Republic of Panama shall receive, in addition, from the Panama Canal Commission a just and equitable return on the national resources which it has dedicated to the efficient management, operation, maintenance, protection and defense of the Panama Canal, in accordance with the following:

(a) An annual amount to be paid out of Canal operating revenues computed at a rate of thirty hundredths of a United States dollar ($0.30) per Panama Canal net ton, or its equivalency, for each vessel transiting the Canal, after the entry into force of this Treaty, for which tolls are charged. The rate of thirty hundredths of a United States dollar ($0.30) per Panama Canal net ton, or its equivalency, will be adjusted to reflect changes in the United States wholesale price index for total manufactured goods during biennial periods. The first adjustment shall take place five years after entry into force of this Treaty, taking into account the changes that occurred in such price index during the preceding two years. Thereafter successive adjustments shall take place at the end of each biennial period. If the United States of America should decide that another indexing method is preferable, such method shall be proposed to the Republic of Panama and applied if mutually agreed.

(b) A fixed annuity of ten million United States dollars ($10,000,000) to be paid out of Canal operating revenues. This amount shall constitute a fixed expense of the Panama Canal Commission.

(c) An annual amount of up to ten million United States dollars ($10,000,000) per year, to be paid out of Canal operating revenues to the extent that such revenues exceed expenditures of the Panama Canal Commission including amounts paid pursuant to this Treaty. In the event Canal operating revenues in any year do not produce a surplus sufficient to cover this payment, the unpaid balance shall be paid from operating surpluses in future years in a manner to be mutually agreed.

ARTICLE XIV

Settlement of disputes

In the event that any question should arise between the Parties concerning the interpretation of this Treaty or related agreements, they shall make every effort to resolve the matter through consultation in the appropriate committees established pursuant to this Treaty and related agreements, or, if appropriate, through diplomatic channels. In the event the Parties are unable to resolve a particular matter through such means, they may, in appropriate cases, agree to submit the matter to conciliation, mediation, arbitration, or such other procedure for the peaceful settlement of the dispute as they may mutually deem appropriate.

ANNEX

Procedures for the cessation or transfer of activities carried out by the Panama Canal Company and the Canal Zone Government and illustrative list of the functions that may be performed by the Panama Canal Commission

1. The laws of the Republic of Panama shall regulate the exercise of private economic activities within the areas made available by the Republic of Panama for the use of the United States of America pursuant to this Treaty. Natural or juridical persons who, at least six months prior to the date of signature of this Treaty, were legally established and engaged in the exercise of economic activities in the former Canal Zone, may continue such activities in accordance with the provisions of paragraphs 2–7 of Article IX of this Treaty.

2. The Panama Canal Commission shall not perform governmental or commercial functions as stipulated in paragraph 4 of this Annex, provided, however, that this shall not be deemed to limit in any way the right of the United States of America to perform those functions that may be necessary for the efficient management, operation and maintenance of the Canal.

3. It is understood that the Panama Canal Commission, in the exercise of the rights of the United States of America with respect to the management, operation and maintenance of the Canal, may perform functions such as are set forth below by way of illustration:

a. Management of the Canal enterprise.

b. Aids to navigation in Canal Waters and in proximity thereto.

c. Control of vessel movement.

d. Operation and maintenance of the locks.

e. Tug service for the transit of vessels and dredging for the piers and docks of the Panama Canal Commission.

f. Control of the water levels in Gatun, Alajuela (Madden) and Miraflores Lakes.

g. Non-commercial transportation services in Canal waters.

h. Meteorological and hydrographic services.

i. Admeasurement.

j. Non-commercial motor transport and maintenance.

k. Industrial security through the use of watchmen.

l. Procurement and warehousing.

m. Telecommunications.

n. Protection of the environment by preventing and controlling the spillage of oil and substances harmful to human or animal life and of the ecological equilibrium in areas used in operation of the Canal and the anchorages.

o. Non-commercial vessel repair.

p. Air conditioning services in Canal installations.

q. Industrial sanitation and health services.

r. Engineering design, construction and maintenance of Panama Canal Commission installations.

s. Dredging of the Canal channel, terminal ports and adjacent waters.

t. Control of the banks and stabilizing of the slopes of the Canal.

u. Non-commercial handling of cargo on the piers and docks of the Panama Canal Commission.

v. Maintenance of public areas of the Panama Canal Commission, such as parks and gardens.

w. Generation of electric power.

x. Purification and supply of water.

y. Marine salvage in Canal waters.

z. Such other functions as may be necessary or appropriate to carry out, in conformity with this Treaty and related agreements, the rights and responsibilities of the United States of America with respect to the management, operation and maintenance of the Panama Canal.

4. The following activities and operations carried out by the Panama Canal Company and the Canal Zone Government shall not be carried out by the Panama Canal Commission, effective upon the dates indicated herein:

(a) Upon the date of entry into force of this Treaty:

(i) Wholesale and retail sales, including those through commissaries, food stores, department stores, optical shops and pastry shops;

(ii) The production of food and drink, including milk products and bakery products;

(iii) The operation of public restaurants and cafeterias and the sale of articles through vending machines;

(iv) The operation of movie theaters, bowling alleys, pool rooms and other recreational and amusement facilities for the use of which a charge is payable;

(v) The operation of laundry and dry cleaning plants other than those operated for official use;

(vi) The repair and service of privately owned automobiles or the sale of petroleum or lubricants, including the operation of gasoline stations, repair garages and tire repair and recapping facilities, and the repair and service of other privately owned property, including appliances, electronic devices, boats, motors, and furniture;

(vii) The operation of cold storage and freezer plants other than those operated for official use;

(viii) The operation of freight houses other than those operated for official use;

(ix) Commercial services to and supply of privately owned and operated vessels, including the construction of vessels, the sale of petroleum and lubricants and the provision of water, tug services not related to the Canal or other United States Government operations, and repair of such vessels, except in situations where repairs may be necessary to remove disabled vessels from the Canal;

(x) Printing services other than for official use;

(xi) Maritime transportation for the use of the general public;

(xii) Health and medical services provided to individuals, including hospitals, leprosariums, veterinary, mortuary and cemetery services;

(xiii) Educational services not for professional training, including schools and libraries;

(xiv) Postal services;

(xv) Immigration, customs and quarantine controls, except those measures necessary to ensure the sanitation of the Canal;

(xvi) Commercial pier and dock services, such as the handling of cargo and passengers; and

(xvii) Any other commercial activity of a

similar nature, not related to the management, operation or maintenance of the Canal.

(b) Within thirty calendar months from the date of entry into force of this Treaty, governmental services such as:

(i) Police;

(ii) Courts; and

(iii) Prison system.

5. (a) With respect to those activities or functions described in paragraph 4 above, or otherwise agreed upon by the two Parties, which are to be assumed by the Government of the Republic of Panama or by private persons subject to its authority, the two Parties shall consult prior to the discontinuance of such activities or functions by the Panama Canal Commission to develop appropriate arrangements for the orderly transfer and continued efficient operation or conduct thereof.

(b) In the event that appropriate arrangements cannot be arrived at to ensure the continued performance of a particular activity or function described in paragraph 4 above which is necessary to the efficient management, operation or maintenance of the Canal, the Panama Canal Commission may, to the extent consistent with the other provisions of this Treaty and related agreements, continue to perform such activity or function until such arrangements can be made.

AGREED MINUTE TO THE PANAMA CANAL TREATY

1. With reference to paragraph 1(c) of Article I (Abrogation of Prior Treaties and Establishment of a New Relationship), it is understood that the treaties, conventions, agreements and exchanges of notes, or portions thereof, abrogated and superseded thereby include:

(a) The Agreement delimiting the Canal Zone referred to in Article II of the Interoceanic Canal Convention of November 18, 1903 signed at Panama on June 15, 1904.

(b) The Boundary Convention signed at Panama on September 2, 1914.

(c) The Convention regarding the Colon Corridor and certain other corridors through the Canal Zone signed at Panama on May 24, 1950.

(d) The Trans-Isthmian Highway Convention signed at Washington on March 2, 1936, the Agreement supplementing that Convention entered into through an exchange of notes signed at Washington on August 31 and September 6, 1940, and the arrangement between the United States of America and Panama respecting the Trans-Isthmian Joint Highway Board, entered into through an exchange of notes at Panama on October 19 and 23, 1939.

(e) The Highway Convention between the United States and Panama signed at Panama on September 14, 1950.

(f) The Convention regulating the transit of alcoholic liquors through the Canal Zone signed at Panama on March 14, 1932.

(g) The Protocol of an Agreement restricting use of Panama and Canal Zone waters by belligerents signed at Washington on October 10, 1914.

(h) The Agreement providing for the reciprocal recognition of motor vehicle license plates in Panama and the Canal Zone entered into through an exchange of notes at Panama on December 7 and December 12, 1950, and the Agreement establishing procedures for the reciprocal recognition of motor vehicle operator's licenses in the Canal Zone and Panama entered into through an exchange of notes at Panama on October 31, 1960.

(i) The General Relations Agreement entered into through an exchange of notes at Washington on May 18, 1942.

(j) Any other treaty, convention, agreement or exchange of notes between the United States and the Republic of Panama, or portions thereof, concerning the Panama Canal which was entered into prior to the entry into force of the Panama Canal Treaty.

2. It is further understood that the following treaties, conventions, agreements and exchanges of notes between the two Parties are not affected by paragraph 1 of Article I of the Panama Canal Treaty:

(a) The Agreement confirming the cooperative agreement between the Panamanian Ministry of Agriculture and Livestock and the United States Department of Agriculture for the prevention of foot-and-mouth disease and rinderpest in Panama, entered into by an exchange of notes signed at Panama on June 21 and October 5, 1972, and amended May 28 and June 12, 1974.

(b) The Loan Agreement to assist Panama in executing public marketing programs in basic grains and perishables, with annex, signed at Panama on September 10, 1975.

(c) The Agreement concerning the regulation of commercial aviation in the Republic of Panama, entered into by an exchange of notes signed at Panama on April 22, 1929.

(d) The Air Transport Agreement signed at Panama on March 31, 1949, and amended May 29 and June 3, 1952, June 5, 1967, December 23, 1974, and March 6, 1975.

(e) The Agreement relating to the establishment of headquarters in Panama for a civil aviation technical assistance group for the Latin American area, entered into by an exchange of notes signed at Panama on August 8, 1952.

(f) The Agreement relating to the furnishing by the Federal Aviation Agency of certain services and materials for air navigation aids, entered into by an exchange of notes signed at Panama on December 5, 1967 and February 22, 1968.

(g) The Declaration permitting consuls to take note in person, or by authorized representatives, of declarations of values of exports made by shippers before customs officers, entered into by an exchange of notes signed at Washington on April 17, 1913.

(h) The Agreement relating to customs priviledges for consular officers, entered into by an exchange of notes signed at Panama on January 7 and 31, 1935.

(i) The Agreement relating to the sale of military equipment, materials, and services to Panama, entered into by an exchange of notes signed at Panama on May 20, 1959.

(j) The Agreement relating to the furnishing of defense articles and services to Panama for the purpose of contributing to its internal security, entered into by an exchange of notes signed at Panama on March 26 and May 23, 1962.

(k) The Agreement relating to the deposit by Panama of ten percent of the value of grant military assistance and excess defense articles furnished by the United States, entered into by an exchange of notes signed at Panama on April 4 and May 9, 1972.

(l) The Agreement concerning payment to the United States of net proceeds from the sale of defense articles furnished under the military assistance program, entered into by an exchange of notes signed at Panama on May 20 and December 6, 1974.

(m) The General Agreement for Technical and Economic Cooperation, signed at Panama on December 11, 1961.

(n) The Loan Agreement relating to the Panama City water supply system, with annex, signed at Panama on May 6, 1969, and amended September 30, 1971.

(o) The Loan Agreement for rural municipal development in Panama, signed at Panama on November 28, 1975.

(p) The Loan Agreement relating to a project for the modernization, restructuring and reorientation of Panama's educational programs, signed at Panama on November 19, 1975.

(q) The Treaty providing for the extradition of criminals, signed at Panama on May 25, 1904.

(r) The Agreement relating to legal tender and fractional silver coinage by Panama, entered into by an exchange of notes signed at Washington and New York on June 20, 1904, and amended March 26 and April 2, 1930, May 28 and June 6, 1931, March 2, 1936, June 17, 1946, May 9 and 24, 1950, September 11 and October 22, 1953, August 23 and October 25, 1961, and September 26 and October 23, 1962.

(s) The Agreement for enlargement and use by Canal Zone of sewerage facilities in Colon Free Zone Area, entered into by an exchange of notes signed at Panama on March 8 and 25, 1954.

(t) The Agreement relating to the construction of the inter-American highway, entered into by an exchange of notes signed at Panama on May 15 and June 7, 1943.

(u) The Agreement for cooperation in the construction of the Panama segment of the Darien Gap highway, signed at Washington on May 6, 1971.

(v) The Agreement relating to investment guaranties under sec. 413(b)(4) of the Mutual Security Act of 1954, as amended, entered into by an exchange of notes signed at Washington on January 23, 1961.

(w) The Informal Arrangement relating to cooperation between the American Embassy, or Consulate, and Panamanian authorities when American merchant seamen or tourists are brought before a magistrate's court, entered into by an exchange of notes signed at Panama on September 18 and October 15, 1947.

(x) The Agreement relating to the mutual recognition of ship measurement certificates, entered into by an exchange of notes signed at Washington on August 17, 1937.

(y) The Agreement relating to the detail of a military officer to serve as adviser to the Minister of Foreign Affairs of Panama, signed at Washington on July 7, 1942, and extended and amended February 17, March 23, September 22 and November 6, 1959, March 26 and July 6, 1962, and September 20 and October 8, 1962.

(z) The Agreement relating to the exchange of official publications, entered into by an exchange of notes signed at Panama on November 27, 1941 and March 7, 1942.

(aa) The Convention for the Prevention of Smuggling of Intoxicating Liquors, signed at Washington on June 6, 1924.

(bb) The Arrangement providing for relief from double income tax on shipping profits, entered into by an exchange of notes signed at Washington on January 15, February 8, and March 28, 1941.

(cc) The Agreement for withholding of Panamanian income tax from compensation paid to Panamanians employed within Canal Zone by the canal, railroad, or auxiliary works, entered into by an exchange of notes signed at Panama on August 12 and 30, 1963.

(dd) The Agreement relating to the withholding of contributions for educational insurance from salaries paid to certain Canal Zone employees, entered into by an exchange of notes signed at Panama on September 8 and October 13, 1972.

(ee) The Agreement for radio communications between amateur stations on behalf of third parties, entered into by an exchange of notes signed at Panama on July 19 and August 1, 1956.

(ff) The Agreement relating to the granting of reciprocal authorizations to permit licensed amateur radio operators of either country to operate their stations in the other country, entered into by an exchange of notes signed at Panama on November 16, 1966.

(gg) The Convention facilitating the work of traveling salesmen, signed at Washington on February 8, 1919.

(hh) The Reciprocal Agreement for gratis nonimmigrant visas, entered into by an exchange of notes signed at Panama on March 27 and May 22 and 25, 1956.

(ii) The Agreement modifying the Agreement of March 27 and May 22 and 25, 1956 for gratis nonimmigrant visas, entered into by

an exchange of notes signed at Panama on June 14 and 17, 1971.

(jj) Any other treaty, convention, agreement or exchange of notes, or portions thereof, which does not concern the Panama Canal and which is in force immediately prior to the entry into force of the Panama Canal Treaty.

3. With reference to paragraph 2 of Article X (Employment with the Panama Canal Commission), concerning the endeavor to ensure that the number of Panamanian nationals employed in relation to the total number of employees will conform to the proportion established under Panamanian law for foreign business enterprises, it is recognized that progress in this regard may require an extended period in consonance with the concept of a growing and orderly Panamanian participation, through training programs and otherwise, and that progress may be affected from time to time by such actions as the transfer or discontinuance of functions and activities.

4. With reference to paragraph 10(a) of Article X, it is understood that the currently applicable United States law is that contained in Section 8336 of Title 5, United States Code.

5. With reference to paragraph 2 of Article XI (Transitional Provisions), the areas and installations in which the jurisdictional arrangements therein described shall apply during the transition period are as follows:

(a) The Canal operating areas and housing areas described in Annex A to the Agreement in Implementation of Article III of the Panama Canal Treaty.

(b) The Defense Sites and Areas of Military Coordination described in the Agreement in Implementation of Article IV of the Panama Canal Treaty.

(c) The Ports of Balboa and Cristobal described in Annex B of the Agreement in Implementation of Article III of the Panama Canal Treaty.

6. With reference to paragraph 4 of Article XI, the areas in which the police authorities of the Republic of Panama may conduct joint police patrols with the police authorities of the United States of America during the transition period are as follows:

(a) Those portions of the Canal operating areas open to the general public, the housing areas and the Ports of Balboa and Cristobal.

(b) Those areas of military coordination in which joint police patrols are established pursuant to the provisions of the Agreement Treaty, signed this date. The two police authorities shall develop appropriate administrative arrangements for the scheduling and conduct of such joint police patrols.

Done at Washington, this 7th day of September, 1977, in duplicate, in the English and Spanish languages, both texts being equally authentic.

TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

The United States of America and the Republic of Panama have agreed upon the following:

ARTICLE I

The Republic of Panama declares that the Canal, as an international transit waterway, shall be permanently neutral in accordance with the regime established in this Treaty. The same regime of neutrality shall apply to any other international waterway that may be built either partially or wholly in the territory of the Republic of Panama.

ARTICLE II

The Republic of Panama declares the neutrality of the Canal in order that both in time of peace and in time of war it shall remain secure and open to peaceful transit by the vessels of all nations on terms of entire equality, so that there will be no discrimination against any nation, or its citizens or subjects, concerning the conditions or charges of transit, or for any other reason, and so that the Canal, and therefore the Isthmus of Panama, shall not be the target of reprisals in any armed conflict between other nations of the world. The foregoing shall be subject to the following requirements:

(a) Payment of tolls and other charges for transit and ancillary services, provided they have been fixed in conformity with the provisions of Article III (c);

(b) Compliance with applicable rules and regulations, provided such rules and regulations are applied in conformity with the provisions of Article III;

(c) The requirement that transiting vessels commit no acts of hostility while in the Canal; and

(d) Such other conditions and restrictions as are established by this Treaty.

ARTICLE III

1. For purposes of the security, efficiency and proper maintenance of the Canal the following rules shall apply:

(a) The Canal shall be operated efficiently in accordance with conditions of transit through the Canal, and rules and regulations that shall be just, equitable and reasonable, and limited to those necessary for safe navigation and efficient, sanitary operation of the Canal;

(b) Ancillary services necessary for transit through the Canal shall be provided;

(c) Tolls and other charges for transit and ancillary services shall be just, reasonable, equitable and consistent with the principles of international law;

(d) As a pre-condition of transit, vessels may be required to establish clearly the financial responsibility and guarantees for payment of reasonable and adequate indemnification, consistent with international practice and standards, for damages resulting from acts or omissions of such vessels when passing through the Canal. In the case of vessels owned or operated by a State or for which it has acknowledged responsibility, a certification by that State that it shall observe its obligations under international law to pay for damages resulting from the act or omission of such vessels when passing through the Canal shall be deemed sufficient to establish such financial responsibility;

(e) Vessels of war and auxiliary vessels of all nations shall at all times be entitled to transit the Canal, irrespective of their internal operation, means of propulsion, origin, destination or armament, without being subjected, as a condition of transit, to inspection, search or surveillance. However, such vessels may be required to certify that they have complied with all applicable health, sanitation and quarantine regulations. In addition, such vessels shall be entitled to refuse to disclose their internal operation, origin, armament, cargo or destination. However, auxiliary vessels may be required to present written assurances, certified by an official at a high level of the government of the State requesting the exemption, that they are owned or operated by that government and in this case are being used only on government noncommercial service.

2. For the purposes of this Treaty, the terms "Canal," "vessel of war," "auxiliary vessel," "internal operation," "armament" and "inspection" shall have the meanings assigned them in Annex A to this Treaty.

ARTICLE IV

The United States of America and the Republic of Panama agree to maintain the regime of neutrality established in this Treaty, which shall be maintained in order that the Canal shall remain permanently neutral, notwithstanding the termination of any other treaties entered into by the two Contracting Parties.

ARTICLE V

After the termination of the Panama Canal Treaty, only the Republic of Panama shall operate the Canal and maintain military forces, defense sites and military installations within its national territory.

ARTICLE VI

1. In recognition of the important contributions of the United States of America and of the Republic of Panama to the construction, operation, and maintenance, and protection and defense of the Canal, vessels of war and auxiliary vessels of those nations shall, notwithstanding any other provisions of this Treaty, be entitled to transit the Canal irrespective of their internal operation, means of propulsion, origin, destination, armament or cargo carried. Such vessels of war and auxiliary vessels will be entitled to transit the Canal expeditiously.

2. The United States of America, so long as it has responsibility for the operation of the Canal, may continue to provide the Republic of Colombia toll-free transit through the Canal for its troops, vessels and materials of war. Thereafter, the Republic of Panama may provide the Republic of Colombia and the Republic of Costa Rica with the right of toll-free transit.

ARTICLE VII

1. The United States of America and the Republic of Panama shall jointly sponsor a resolution in the Organization of American States opening to accession by all States of the world the Protocol to this Treaty whereby all the signatories will adhere to the objectives of this Treaty, agreeing to respect the regime of neutrality set forth herein.

2. The Organization of American States shall act as the depositary for this Treaty and related instruments.

ARTICLE VIII

This Treaty shall be subject to ratification in accordance with the constitutional procedures of the two Parties. The instruments of ratification of this Treaty shall be exchanged at Panama at the same time as the instruments of ratification of the Panama Canal Treaty, signed this date, are exchanged. This Treaty shall enter into force, simultaneously with the Panama Canal Treaty, six calendar months from the date of the exchange of the instruments of ratification.

Done at Washington, this 7th day of September, 1977, in duplicate, in the English and Spanish languages, both texts being equally authentic.

ANNEX A

1. "Canal" includes the existing Panama Canal, the entrances thereto and the territorial seas of the Republic of Panama adjacent thereto, as defined on the map annexed hereto (Annex B), and any other interoceanic waterway in which the United States of America is a participant or in which the United States of America has participated in connection with the construction or financing, that may be operated wholly or partially within the territory of the Republic of Panama, the entrances thereto and the territorial seas adjacent thereto.

2. "Vessel of war" means a ship belonging to the naval forces of a State, and bearing the external marks distinguishing warships of its nationality, under the command of an officer duly commissioned by the government and whose name appears in the Navy List, and manned by a crew which is under regular naval discipline.

3. "Auxiliary vessel" means any ship, not a vessel of war, that is owned or operated by a State and used, for the time being, exclusively on government non-commercial service.

4. "Internal operation" encompasses all machinery and propulsion systems, as well as the management and control of the vessel, including its crew. It does not include the measures necessary to transit vessels under

the control of pilots while such vesesls are in the Canal.

5. "Armament" means arms, ammunitions, implements of war and other equipment of a vessel which possesses characteristics appropriate for use for warlike purposes.

6. "Inspection" includes on-board examination of vessel structure, cargo, armament and internal operation. It does not include those measures strictly necessary for admeasurement, nor those measures strictly necessary to assure safe, sanitary transit and navigation, including examination of deck and visual navigation equipment, nor in the case of live cargoes, such as cattle or other livestock, that may carry communicable diseases, those measures necessary to assure that health and sanitation requirements are satisfied.

PROTOCOL TO THE TREATY CONCERNING THE PERMANENT NEUTRALITY AND OPERATION OF THE PANAMA CANAL

Whereas the maintenance of the neutrality of the Panama Canal is important not only to the commerce and security of the United States of America and the Republic of Panama, but to the peace and security of the Western Hemisphere and to the interests of world commerce as well;

Whereas the regime of neutrality which the United States of America and the Republic of Panama have agreed to maintain will ensure permanent access to the Canal by vessels of all nations on the basis of entire equality;

Whereas the said regime of effective neutrality shall constitute the best protection for the Canal and shall ensure the absence of any hostile act against it;

The Contracting Parties to this Protocol have agreed upon the following:

ARTICLE I

The Contracting Parties hereby acknowledge the regime of permanent neutrality for the Canal established in the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal and associate themselves with its objectives.

ARTICLE II

The Contracting Parties agree to observe and respect the regime of permanent neutrality of the Canal in time of war as in time of peace, and to ensure that vessels of their registry strictly observe the applicable rules.

ARTICLE III

This Protocol shall be open to accession by all states of the world, and shall enter into force for each State at the time of deposit of its instrument of accession with the Secretary General of the Organization of American States.

"BAD PRESS" PLAGUES CARGO PREFERENCE

Mr. GRIFFIN. Mr. President, when Robert S. Strauss, the Special Representative for Trade Negotiations, recommended to President Carter that the administration support so-called cargo preference legislation, he predicted that the decision would result in only "a day or two 'bad story' situation."

By "bad story," of course, Mr. Strauss meant "bad press."

But the flood of adverse editorial comment on cargo preference during the past month indicates that Mr. Strauss was just as wrong in predicting a brief "bad" reaction as he was in recommending support for this ill-advised legislation in the first place.

Reaction to cargo preference—the proposal to guarantee that a fixed minimum percentage of oceanborne imported oil be carried in U.S.-flag vessels—has been almost uniformly negative.

For example, on August 2, the Washington Post, in an editorial entitled "The Maritime Lobby's Triumph," summed up the shortcomings of cargo preference this way:

. . . it is 200-proof protectionism. It would violate American treaties with other nations. It would be inflationary. It would add still another layer of (maritime) subsidy, this time paid directly by consumers in the form of higher oil prices. As national policy, it's got absolutely nothing going for it but the lobbying muscle and the extensive campaign contributions of the people who wanted it.

On August 4, the Wall Street Journal editorialized:

Cargo preference is a euphemism for a shipbuilder and maritime union hijacking of American consumers. It will add another $7 billion or so to fuel bills over the next five years. East Coast consumers, who depend heavily on imported oil, will be among the hardest hit.

And, on August 6, a New York Times editorial entitled "The Great Ship Robbery," while noting that one of the stated arguments for cargo preference was to provide additional employment in the maritime industry, pointed out:

In the end, cargo preference may not even increase jobs for American workers. So blatant a protectionist measure could trigger retaliation from other countries, retaliation that would cut employment in American export industries.

These editorial comments represent but a small sample of the press reaction in recent weeks to this Carter administration proposal. Only last week, on September 1, a Washington Post editorial lambasted the cargo preference bill for a second time, and numerous articles have appeared in newspapers across the Nation pointing out the lack of justification for the measure.

Nor has the criticism come only from home; foreign opposition has been voiced vigorously as well.

The Governments of Belgium, Denmark, Finland, the Federal Republic of Germany, Greece, Italy, Japan, the Netherlands, Norway, Sweden, and the United Kingdom all have strongly protested to the State Department. These nations argue that enactment of cargo preference legislation would violate treaties with them and with approximately 20 other nations.

I think it is unfortunate that some observers have tried to portray debate on the cargo preference issue here in Congress as a partisan matter, with the Republican minority seeking to embarrass the Democratic majority and the Carter administration. While I can speak only for myself, of course, I believe this is not the case.

I am confident that after a careful examination of the issue my colleagues in Congress—on both sides of the aisle—will come to the same conclusion as the Washington Post: that on the merits, as national policy, cargo preference has "got absolutely nothing going for it."

Indeed, it is not just columnists and commentators who find fault with the concept of cargo preference. Many of President Carter's closest advisers think it is unwise—both economically and diplomatically.

Thus far, only one Carter spokesman has put forth any defense of cargo preference before the Congress. He is a third-level official, the Assistant Secretary of Commerce for Maritime Affairs, Robert J. Blackwell.

Mr. Blackwell argued the cargo preference legislation would guarantee—not create—jobs for between 2,500 and 3,600 seafarers. According to Mr. Blackwell, these jobs, plus new U.S.-flag vessels that will be built to carry the preferenced oil imports, are necessary to insure adequate U.S.-controlled shipping in the event of a national emergency. All of this can be accomplished, Mr. Blackwell estimates, at a relatively modest cost of $110 million a year.

Simple arithmetic shows, of course, that even at this highly questionable $110-million-a-year cost estimate. American consumers will pay between $44,500 and $50,000 for each of these job guarantees.

Mr. Blackwell would also like the Congress to believe that cargo preference is somehow essential to our national security. But the Defense and State Departments do not support cargo preference on national security grounds. Their concern is about access to, not carriage of, oil.

Moreover, Treasury Secretary Blumenthal has forecast increased costs, through higher oil prices, of up to $884 million a year if the cargo preference legislation were to pass. The General Accounting Office has placed the cost of the administration's cargo preference proposal at double to four times Mr. Blackwell's estimate.

Finally, the President's own Council of Economic Advisers estimates that the net impact on the economy as a whole would be a decrease in total employment and in the gross national product.

Even Mr. Blackwell seems to have offered arguments contradictory to his official position. Writing in the May 23, 1977 issue of Brandon's Shipper and Forwarder—several weeks before the administration came out for cargo preference and a month before he testified that such legislation was necessary to guarantee maritime jobs—Mr. Blackwell confidently stated:

Today U.S.-flag tankers provide one of the brightest pictures in the maritime industry. Two major programs—movement of Alaskan oil to the lower 48 states and participation in the carriage of foreign crude oil for the billion-barrel Strategic Reserve—promise to improve their employment enormously over the next few years.

Mr. Blackwell was referring to the fact that, under the Jones Act, 100 percent of the Alaskan crude oil shipments will be carried in U.S.-flag tankers and that, as Government-sponsored cargo, at least 50 percent of the oil purchased abroad for our strategic oil reserve must be carried in U.S.-flag tankers.

Significantly, in that same Brandon's article, Mr. Blackwell described the then-pending cargo preference legislation, which would have guaranteed U.S.-flag vessels carriage of up to 30 percent of our oil imports, as a "potential, but less positive," source of tanker employment.

As the press and others continue to probe the pros and cons of cargo preference, it becomes more apparent each day that very substantial questions exist as to the need for and wisdom of this legislation.

I hope my colleagues, on both sides of the aisle, will join with me to insist on a full airing of this issue by the appropriate committees of Congress.

Mr. President, I ask unanimous consent that the editorials to which I have referred and a number of other articles be printed in the RECORD.

There being no objection, the editorials and articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 2, 1977]

THE MARITIME LOBBY'S TRIUMPH

The maritime lobby, with its money bags, has scored a great political triumph. The costs will be borne over coming years by everyone who buys oil products. It's another defeat for the enlightened trade policy that President Carter keeps proclaiming but never quite manages to put into practice.

The maritime interests—ship builders, ship operators and unions together—already enjoy more different kinds of subsidy than any other American industry. Despite this torrent of aid, they have worked their freight rates up so high that nobody uses American-flag shipping unless the law requires it. The maritime lobby has now obtained President Carter's misguided support for its perennial bill to force part of this country's oil imports into those American-flag tankers. The proportion of imports affected will be small at first but it will rise steadily.

It's called a cargo preference bill, and it is 200-proof protectionism. It would violate American treaties with other nations. It would be inflationary. It would add still another layer of subsidy, this time paid directly by consumers in the form of higher oil prices. As national policy, it's got absolutely nothing going for it but the lobbying muscle and the extensive campaign contributions of the people who wanted it. But that turned out to be enough to get the President's support.

Mr. Carter's whole trade policy is rapidly deteriorating. He keeps talking in terms of the most high-minded commitments to open trade and international competition but, unfortunately, the actual record points the other way. There have been three major cases so far, and three times the administration has caved in to the protectionists.

In the case of the color television sets from Japan, Mr. Carter resorted to an Orderly Marketing Agreement. That term is a euphemism for an agreement by the exporting country to limit shipments. In the shoe case, the administration imposed another couple of Orderly Marketing Agreements on Korea and Taiwan. They will save some jobs in American shoe factories, they will also cost some jobs in American retail stores as well as increased prices to American consumers. But at least an Orderly Marketing Agreement is limited in duration and is a legal procedure under the general trade rules that this country has bound itself to. The cargo preference bill is neither.

It's a strange performance for an administration that foresaw trade troubles and staffed itself with people to meet them constructively. Those people, led by Treasury Secretary Michael Blumenthal and Under Secretary of State Richard Cooper, have been walloped in each successive test. The President has been mainly following the advice of Robert S. Strauss, currently his special trade representative and formerly chairman of the Democratic Party. Like most party managers, Mr. Strauss thinks in terms of constituencies and grievances: a factory here, a union there. He apparently does not work in terms of broader concerns, like consumer interests in general, or American productivtiy, or the future of the highly competitive American industries whose overseas markets are now threatened by foreign retaliation.

If Mr. Carter will not resist protectionist pressure, he cannot expect the fragile governments of Western Europe to do better. He may get heat from aggrieved unions—but unlike, for example, the president of France, he does not face an election next year that might bring the Communists to power. In May, at the London summit conference, Mr. Carter joined in a pledge to support firmly the principle of open trade and a growing world economy. The people who heard him must wonder what he had in mind when they now read the cargo preference bill that he has promised to support.

[From the Wall Street Journal, Aug. 4, 1977]

THE MARITIME PAYOFF

Back during the 1976 primary campaigns, Jesse Calhoon of the Marine Engineers Beneficial Association put together some $200,000 in maritime industry contributions for Jimmy Carter. Mr. Calhoon doesn't work for nothing. The payoff for his efforts is making its way through Congress, with the support of the President.

The payoff, of course, is the cargo preference bill, reported out of the House Merchant Marine Committee this week by a comfortable 31-to-5 margin. Cargo preference is a euphemism for a shipbuilder and maritime union hijacking of American consumers. It will add another $7 billion or so to fuel bills over the next five years.

East Coast consumers, who depend heavily on imported oil, will be among the hardest hit. Constituents of Merchant Marine Committee Chairman John Murphy, (D., N.Y.) can expect to pay an added $50 a year just for this bit of special interest legislation.

The way money is transferred from Mr. Murphy's constituents to well-paid merchant seamen and rich ship owners and shipbuilders is simple. The cargo preference bill requires initially that 4.5% of all oil imported into the U.S. be carried in U.S.-flag vessels. The percentage will move up to 9.5% over the next five years.

It costs about 2.3 times as much to operate a U.S. flag tanker as a foreign flag tanker currently. With the added demand legislated by the act, that cost gap is sure to widen.

U.S. flag tanker owners already are reaping a bonanza through government policies even before the cargo preference bill becomes law. Under the Jones Act, U.S. coastal shipping must move in U.S. flag vessels. Alaskan oil and the government's crude oil stockpiling program both have expanded coastal shipping, sharply increasing demand for U.S. flag tankers. The rate for chartering a U.S. flag tanker has about doubled over the last year. If you add a provision that 4.5% of imported oil must move in U.S. bottoms as well, it's hard to guess how high these tanker rates might go. Currently, they are four to five times foreign tanker rates.

The government subsidizes the operation of U.S. flag vessels to the tune of some $400 million a year, which means that most of the salaries of Mr. Calhoon's 6,000 MEBA members are paid for with tax money. The average U.S. flag seaman earns some $24,300 per year and MEBA members do considerably better than the average. While the cargo preference bill does not call for additional subsidies, they will hardly be necessary considering the charter rates the operators will command.

As the ship owners, consider this: The Federation of American Controlled Shipping estimates that the crude carrier Stuyvesant, just completed in the Brooklyn Seatrain shipyard and chartered to Sohio, will gross $30 million in three years on a $9 million equity investment. The government paid a $27 million subsidy on the $63 million ship and also insured a mortgage for the sums borrowed to build it. Not a bad deal.

An added point is raised by Lawrence C. Ford, president of Chevron Shipping Co. of San Francisco. Since Mr. Carter's energy legislation calls for wellhead taxes on domestic oil to bring its price up to the level of imported oil, any added importing costs will affect domestic fuel costs as well. So the $7 billion in direct shipping costs is only the beginning of the total cost to American consumers. Windfalls are bad if oil producers get them, good if they go to the maritime industry, so we would gather.

The maritime lobbies put up arguments that their raids on American pocketbooks serve the public interest, but they are not very convincing. National security is one such argument, but national security can hardly be said to depend on what flag a ship flies. It seems very unlikely that the U.S. will go to war with Liberia or Greece or that American oil companies would give up ships that fly Liberian or Greek flags, even in the event of war.

As to jobs created or preserved, the estimate for cargo preference is 3,500. That figures out, according to Mr. Ford, to a cost of about $440,000 per job. It might be a little cheaper to simply pay 3,500 people to do nothing.

Mr. Ford's opinion of the cargo preference act is summed up simply: "It's the worst I've ever seen." We can hardly improve on his appraisal.

[From the New York Times, Aug. 6, 1977]

THE GREAT SHIP ROBBERY

Shipping lobbyists helped elect Jimmy Carter, raising over $150,000 for his campaign. Now they have asked for and received a little help from their friend. The White House has chosen to support "cargo preference" legislation, a new way for ship owners and the maritime unions to get rich at public expense.

The bill would require at least 9.5 percent of imported oil to be transported on American-built tankers with American crews. It would violate United States trade treaty obligations. And it would cost consumers between $200 and $800 million dollars per year in higher oil prices. Why, then—other than as a payoff to political allies—would Mr. Carter stand behind the bill? About the only good thing to say about the President's position is that the lobbyists wanted more.

The American shipping industry already benefits mightily from Congressional largesse. Regular contributions to Congressional campaigns—the maritime unions alone anted up $900,000 in 1976—pay handsome dividends. This year's Federal budget allots $236 million to ship construction subsidies and another $388 million to ship operating subsidies. Still, even with such subsidies, high costs make it difficult for American ships with American crews to compete. Over 96 percent of imported oil is now transported on foreign tankers.

President Ford resisted demands of the industry for direct protection against foreign competition; he vetoed cargo preference legislation in 1974. Candidate Carter, however, committed his future Administration to cargo preference in private correspondence with the power behind the union-owner shipping lobby, the president of the Marine Engineers Beneficial Association, Jesse Calhoon. Earlier this year the shippers attempted to collect on the promise. Representative John Murphy of New York, chairman of the House Merchant Marine and Fisheries Committee and the maritime unions' best buddy in Congress, introduced a cargo preference bill calling for shipment of at least 30 percent of imported oil on American tankers. The President's economic advisors, strongly opposed to protection,

searched in vain for an alternative means of pacifying Mr. Calhoon and finally settled for a 9.5 percent preference.

Is there any rationale for cargo preference—other than satisfying the lobbyists? The Maritime Committee to Turn the Tide, sponsored by shipbuilders and aided by the President's media consultant Gerald Rafshoon, lists three arguments: "Foreign oil tankers threaten our environment, weaken our national defense, and take away U.S. jobs" reads a Rafshoon ad.

None of these arguments is very persuasive. Foreign vessels in American waters are subject to Federal inspection and can be denied access to American ports if they don't meet safety standards. The Defense and State departments are unconcerned about a shortage of United States flag ships; they cannot imagine a crisis in which the United States could not get Panamanian and Liberian tankers to bring it all the oil available for import.

The President's bill would indeed create a few thousand jobs—though at a steep price. According to the Treasury, each new job would cost consumers as much as $110,000. Unemployed sailors and ship construction laborers may deserve a break but it is difficult to justify such a generous dole. In the end, cargo preference may not even increase jobs for American workers. So blatant a protectionist measure could trigger retaliation from other countries, retaliation that would cut employment in American export industries.

The cargo preference legislation will be hard to stop. Over the objections of the ranking minority member, Pete McCloskey, Chairman Murphy pushed the bill through the Marine and Fisheries Committee without extensive hearings. The only real hope is that young House members, not yet inured to the sleazy politics of the compaign purse, will force Congress to give this tainted proposal thorough airing.

The President's deal with the shipping lobby is reminiscent of Richard Nixon's arrangement with the dairy farm co-ops. In 1971, $400,000 in political contributions bought Mr. Nixon's support for increased milk prices, in 1976, $150,000 bought Mr. Carter's support for increased oil prices. If the economic consequences of cargo preference legislation and the motives of those who support it were more widely known, public pressure might give the President the courage to defy Mr. Calhoon and his friends

---

[From the Washington Post, Sept. 1, 1977]

HOW TO BUY A BILL

The maritime lobby, with the help of its many friends in the White House and Congress, has invented a different kind of revenue sharing. The system has a certain scientific interest, since it's beginning to look like the political equivalent of the perpetual-motion machine. The maritime lobby—the unions, the ship operators and the shipyards—invests wisely in certain elections. The politicians express their gratitude by extending and augmenting the enormous subsidies that go to the U.S. merchant marine. That further enriches the maritime industry, enabling it to pour still larger contributions into political campaigns the next time around. It's a delightful system for everybody except, of course, the taxpayers and consumers who supply the endless subsidies that keep the wheel turning.

To see the system busily at work, look at the cargo-preference bill. It would require a rising proportion of American oil imports to travel in ships built and registered in the United States—at freight rates several times as high as any other shipping costs. The lobby wanted that bill in the last Congress, but could not get it past President Ford. Last year, the maritime interests invested $100,000 in President Carter's primary campaign. That foresight paid off, and they now enjoy the President's endorsement.

Congressional enthusiasm for the idea is unlimited. In June the chairman of the House Merchant Marine Committee, Rep. John M. Murphy (D-N.Y.), held a fund-raising party at the Mayflower Hotel. This maritime lobby turned up in force and, as Common Cause reported, donated $9,950 to Mr. Murphy's future. It was an odd time to hold a fund-raising party, since there is no election this year. But it came in the midst of the hearings that Mr. Murphy was holding on the cargo-preference bill.

When the bill came to a vote a month ago, the committee reported it by a heartwarming majority of 31 to 5. Common Cause, which follows the maritime lobby with the fascination of a pathologist tracking the plague baccillus, observed that the maritime unions alone spent $83,263 for campaign contributions last year to 26 members of the committee. All but two of them voted for the cargo-preference bill.

All combined, the lobby spent something over $1.1 million last year on contributions to Mr. Carter and selected congressional candidates. That might sound like a lot, but it's a modest sum compared with the returns that will flow in when the bill is passed. The Government Accounting Office says that it will cost consumers at least $240 million a year in unnecessary freight charges—a figure, incidentally, more than twice as high as the dubious estimate to which the Administration testified. Costs could go much higher, the Secretary of the Treasury warned Mr. Carter in a private memo that has leaked—and he added that the bill is inflationary, would create unemployment, would invite retaliation and would violate American treaties with more than 30 countries.

That Treasury memo is right on all counts. But public policy won't have much to do with this bill's steady progress toward passage. The maritime lobby takes the straightforward view that it bought the bill at the going price, and it is entitled to prompt delivery.

[From Brandon's Shipper & Forwarder, May 23, 1977]

STANDING OF THE FLEET

(By Robert J. Blackwell)

President Carter's proclamation of May 23 as National Maritime Day calls attention to an important event in American history—the first transatlantic voyage (in 1819) by a ship powered by steam. Perhaps more significantly, it serves to underscore America's eternal romance with the sea, our seafaring heritage and traditions, and our dependence since Colonial times upon oceanborne shipping for a large measure of our commercial success and survival as a nation.

The Government role which that dependence requires remains our mandate today at the Maritime Administration (MarAd). We operate on the premise that the commercial and defense functions are irrevocably joined.

The American shipping and shipbuilding industries always have risen to the challenge in times of national emergency. However, too frequently in times of peace both industries have been allowed to decline as a result of public indifference and inadequate government policies. Measuring up to our dual maritime task has become increasingly difficult since World War II, which ended with the United States in possession of the greatest merchant fleet of all time.

In 1950 the U.S.-flag fleet transported 42 percent of our total import and export cargo tonnage. During the next two decades, however, the quality and quantity of our merchant fleet declined, and, concurrently, those of emerging foreign flags, including the Eastern bloc nations, began carrying more and more of our foreign trade. By 1960 only 11 percent of our total was transported in American-flag vessels and in 1969 we bottomed out at 4.5 percent participation.

Merchant ship deliveries from private U.S. shipyards also fluctuate with the times—down to 7 deep-draft vessels in 1955 and 1956, up to 22 deliveries in 1969, and back to 13 in 1970.

With the handwriting on the bulkhead, the Congress passed the Merchant Marine Act of 1970, the most important legislation in the maritime field since 1936. Among its major improvements were the extension of cost-differential subsidy to tankers and other bulk carriers and an expanded research and development program, now averaging about $20 million a year.

The initiatives taken under the Act have greatly revitalized the U.S. merchant fleet and shipbuilding industry and have brought forth a new generation of U.S.-flag vessels. Our intermodal fleet of containerships, barge-carrying, and Roll-On/Roll-Off vanships is the largest and most modern in the world. They are big and fast, and offer very rapid turnaround times, compared to conventional break-bulk cargo vessels. Operational competitiveness and shipyard productivity have vastly improved.

Subsidy contracts under the Act have been let for construction of 69 new vessels aggregating in excess of 6 million deadweight tons (dwt.) and valued at $3.3 billion.

In the past 10 months, MarAd has awarded contracts for 11 new ships, including the first heavy-lift and integrated tug-barge vessels, and the first exclusively break-bulk general cargo ships to be let under the 1970 Act. Orders for at least 12 more vessels are expected to be awarded by the end of 1978.

Merchant ship deliveries from U.S. yards now average about 25 annually.

On April 1, the U.S. merchant shipbuilding orderbook stood at 68 deepdraft vessels, one of the highest levels in our peacetime history.

Nevertheless, more new construction will be needed to sustain our current private shipbuilding activity into the 1980s and, at the same time, provide the ship construction mobilization base required for national defense.

Among our other concerns are the lingering national and global effects of the 1973–74 oil embargo.

The embargo resulted in quadrupled crude oil prices, a glut in the world tanker market, and economic and shipbuilding recessions, which set back our own ship construction program but was far more severe abroad. There has been no recovery in the tanker freight market or the world shipbuilding industry and, largely as a result of high oil prices, the U.S. foreign trade balance continues to suffer. In 1976 the value of U.S. oil imports rose to $35 billion, compared to $8 billion in 1973.

As we observe World Trade Week, it is apparent that we must exert a far greater American export effort if we are to overcome the growing deficit in our balance of payments.

Of great concern to the maritime industry is the fact that we depended on foreign-flag tankers to carry 97 percent of our total oil tonnage and 98 percent of our dry-bulk cargoes in our 1976 foreign trade. Programs which promise to ease both situations are underway, and the picture is somewhat better in other areas.

Preliminary figures on U.S. ocean-borne foreign trade last year indicate that records were set in total tonnage and dollar value ($159.5 billion).

Our liner cargoes for the year represented the largest volume carried by U.S. general cargo vessels in 20 years, and resulted in a U.S.-flag share of nearly 31 percent.

Our continuing comeback in this vital segment of merchant shipping can be attributed, in large part, to the National

Maritime Council's (NMC's) stabilizing influence in labor-management relations and wide acceptance of its Ship American advertising and promotion campaign.

We are extremely gratified by the unity of purpose that prevails in the industry, and fully support the NMC's efforts to generate increased shipper patronage of American-flag services.

In keeping with the mandate of the 1970 Act, MarAd has diversified into many new areas over the past few years.

At home, we have established a Great Lakes Region with headquarters in Cleveland and new marketing offices in Chicago and Detroit to promote both foreign and domestic shipping and shipbuilding on our Fourth Sea Coast. We have initiated programs to rebuild a viable U.S. drybulk fleet. And we are sponsoring a number of studies and projects to develop American ports and improve domestic shipping.

In international maritime affairs, we have taken active roles in efforts to achieve multinational accords on tanker safety and pollution control, and, in conjunction with the State Department, on a number of occasions we have interceded with foreign governments which instituted unilateral policies adverse to our carriers.

While the United States has historically opposed bilateralism because on its free market approach to world trade, the growing manifestation of developing nations and state-trading countries to enter into cargo-sharing agreements requires us to adjust to the realities of such situations when they adversely affect the competitive position of U.S.-flag carriers.

The bilateral agreement executed by the United States and the Soviet Union back in October 1972, and extended to 1981 by an accord reached in 1975, has provided very significant benefits to the American merchant marine—particularly in providing employment for a sizable portion of the tanker fleet which otherwise would have been laid up during the past 4 years.

NOT incidentally, today U.S.-flag tankers provide one of the brightest pictures in the maritime industry. Two major programs—movement of Alaskan oil to the lower 48 States and participation in the carriage of foreign crude oil for the billion-barrel Strategic Petroleum Reserve—promise to improve their employment enormously over the next few years. Our estimate is that U.S. tanker fleet capacity will be more than sufficient for both programs.

Another potential, but less positive, source of tanker employment depends on the fate of the oil cargo preference legislation pending in Congress. That is one of the major imponderables on the maritime scene as we observe National Maritime Day—1977. Whatever its outcome and whatever new uncertainties or problems may arise, in my view the American shipping and shipbuilding industries are making progress and can look forward to a good year and a better tomorrow.

[From the Christian Science Monitor, Aug. 23, 1977]

U.S. GOING PROTECTIONIST ON TANKERS?

(By John Dillin)

President Carter and Congress, prodded by maritime interests, are steering the United States toward a revolutionary change in trade policy.

Under the innocuous label of "cargo preference," the administration is steaming full speed toward some of the most strongly protectionist legislation in history.

Implications for U.S. consumers include somewhat higher prices for gasoline made from imported oil. Some White House advisers also warn the move could set a precedent leading to higher prices for other imported goods.

Focus of the current drive is H.R. 1037, a bill introduced by Rep. John M. Murphy (D) of New York, chairman of the House Committee on Merchant Marine and Fisheries. The Murphy bill, given good chances of passage, has the President's support. It eventually would require that 9½ percent of all the oil being imported into the United States be carried in American tankers.

Such a requirement for civilian cargoes would be a first for this country.

Top White House economists have fought the bill. They told the President it would lead to higher prices, add to unemployment, and reduce the nation's total output of goods and services.

One high-level source, however, says the President's options were limited. He was locked in by old campaign promises to maritime interests, and could find no way out.

"Carter was in a tough campaign in '76. He made certain promises. This is what elections are all about," said one government source.

The Murphy bill is nothing new. Congress passed similar legislation three years ago, only to have it pocket-vetoed by former President Ford. But this time, there appears to be little resistance to the measure in either the House, the Senate, or the Oval Office.

The protectionist drive reflects, in part, a growing concern in some quarters about the American merchant fleet.

Following World War II, the United States had the biggest and best merchant fleet in the world. But the years since have seen a precipitous decline, with the U.S. slipping to 10th place behind Liberia, Japan, Britain, Norway, Greece, Panama, the Soviet Union, France, and Italy.

Today, the U.S. tanker fleet has fallen to 231 ships. Many of these ships are aging and inefficient. Their total carrying capacity is 9 million deadweight tons, or just a fraction of the capacity of the fleets of several other nations.

U.S. tankers carry only 3½ percent of America's oil imports at a time when the nation has become more dependent than ever on petroleum from the Middle East.

The Carter-backed bill would require that 4½ percent of America's imported oil be carried by U.S.-flag tankers next year. That would increase to 9½ percent by 1982 or 1983.

Over the long-term, supporters of the bill argue, this mandated requirement would lead to a larger U.S. fleet, which would be an important adjunct to America's national security capabilities.

Ironically, the Department of Defense has argued against the bill. The difficulties in wartime would be access to oil—not the getting of enough tankers, Defense officials have said.

The Murphy bill already has stirred critical comment in Europe, whose ships share heavily in the U.S. oil trade. Eleven nations, led by Norway, have protested any move toward protectionism in shipping in a series of notes to the State Department.

Now, under the Carter-backed bill, subsidies would be granted in the form of higher prices to the consumer to support American shipping. Although estimates vary, one middle-ground report indicates it would cost U.S. consumers about $200 million a year in higher prices by 1985.

Would that be the end?

"Hardly," says one government official. "It's just a foot in the door."

Several White House advisers agree. Stuart Eizenstat, domestic adviser to the President, told Mr. Carter in a memo: "Many members of our administration . . . feel that even a modest cargo preference bill entails a dangerous precedent that may later be extended by Congress, or imitated by other nations."

The President overrode that advice.

[From the Christian Science Monitor, Aug. 24, 1977]

THE HIGH COST OF NEW OIL TANKERS

(By John Dillin)

WASHINGTON—Around the world today, hundreds of oil tankers stand idle, tugging at their anchors, silent testimony to the massive glut of overbuilding that has sunk the prices of ships to rock bottom.

Despite this excess capacity—estimated at 100 million tons—President Carter proposes to subsidize indirectly, at consumers' expense, the construction of even more tankers by U.S. shipbuilders.

The stated reason is national security: officials of the federal Maritime Administration argue that America needs more U.S.-built ships to meet both civilian and military needs in case of war.

Critics are pouncing on the President and his suporters in the Maritime Administration for proposing a policy that eventually will cost American consumers hundreds of millions of dollars at the gasoline pump. Further, defense officials have said U.S. companies already control enough ships to meet the cour try's needs in time of war.

PRICE COMPARISONS

Cost of the Carter policy can be illustrated with a few prices. The Maritime Administration estimates that a new, 60,000-ton capacity tanker built in American yards costs $45 million to $50 million.

The same ship, slightly used, can be picked upon the world market today for about $4.3 million—or less than one-tenth the cost.

A very large tanker of 265,000-ton capacity would cost $120 million to produce in U.S. shipyards. The same tanker can be purchased almost new for $17 million or less on the world market.

If America really needs more ships, why not just buy them at bargain prices; critics ask.

At the heart of this controversy is H.R. 1037, the so-called cargo preference bill. This measure, dear to shipping interests and supported by the President, would require that 9½ percent of all U.S. oil imports be carried in American-built tankers by 1982 or 1983. U.S. tankers now carry 3½ percent, and this is expected to drop to ½ percent next year.

Under the bill, shippers could not meet the 9½ percent quota by buying foreign-built ships and putting them under the American flag with American crews. The ships must all be built in American yards.

Ironically, the Defense Department doesn't like the plan. It has consistently resisted cargo-preference bills.

Prior to Mr. Carter's decision in July to support cargo preference, the plan was opposed on economic, security, or foreign policy grounds by a galaxy of federal powers that included the Defense Department, Department of State, National Security Council, Department of Transportation, Council of Economic Advisers, Special Assistant to the President for Energy, Department of Treasury, Federal Energy Administration, and Office of Management and Budget.

ONLY ONE WITNESS

This widespread resistance within the government may explain why the White House permitted only one government witness to testify in public hearings before Congress after the President made his decision favoring cargo preference. That witness was Robert J. Blackwell, Assistant Secretary of Commerce for Maritime Affairs.

The debate in Congress centers on the national defense issue, the crux of which involves two questions.

1. How many U.S.-flag ships are needed for national security in time of war?

2. What shipbuilding capacity must be maintained for national security purposes even at extra cost to taxpayers?

America currently has 9 million tons of U.S.-flag tankers. A report from the logistics directorate of the joint chiefs of staff indi-

cated that in case of war, the United States needs 3.3 million tons of tanker capacity for direct support of military forces. Another 10 million tons would be needed by the civilian sector.

While it might appear from those figures that U.S. shipping is inadequate, defense officials also note that U.S. companies, mostly big oil firms, own a large number of ships sailing under the flags of other nations. At present U.S.-owned foreign-flag ships number 789, of which 523 are tankers. The latter total 52.8 million tons, four times America's needs for war. Defense officials always have assumed much of this tanker capacity would be available for American needs in times of crisis.

RELIABILITY FACTOR

Speaking for the President, however, Mr. Blackwell says: U.S.-flag tankers manned by U.S. citizens are likely to be more reliable for these essential services than foreign-flag tankers manned by foreign nationals who may not necessarily be sympathetic to this nation's objectives."

Supporters of H.R. 1037 also point to shippers' experience in the 1973 Middle East war when President William R. Tolbert of Liberia issued an order that no vessel with a Liberian registry shall be permitted to carry any cargo of arms, armaments, or implements of war to countries in the Middle East involved in the conflict. . . ." About half of America's foreign-flag fleet is under Liberian registry.

After that conflict, however, Dr. John J. Bennett, Acting Assistant Secretary of Defense for Installations and Logistics, told Congress in 1975:

In assessing defense ocean shipping needs for peace and war my conclusion is that the tanker situation, while not without its problems, is not critical to national defense."

This summer, when Republican members demanded to hear public testimony from Pentagon experts on "cargo preference," the White House refused to let the military brass appear.

On the other major question, the need to maintain shipbuilding capacity, a study has been conducted by the Defense Department and the Maritime Administration. So far, the results of that study, which is still being processed, aren't available to Congress.

[From the Christian Science Monitor, Aug. 25, 1977]

WHO PAYS HOW MUCH—ESTIMATES VARY BUT THEY ALL AGREE THE CONSUMER WILL PAY

(By John Dillin)

Washington.—Reach down into your pockets, American motorists. This time you'll be contributing to the U.S. merchant fleet.

Higher prices for gasoline, heating oil, and a host of other petroleum products are expected to result from a "cargo preference" bill now speeding through Congress with the blessings of the White House.

The cargo bill, once vetoed by former President Ford, would be a boon to American shipbuilders and crewmen. Despite the higher costs of such shipping, the bill would require that a certain percentage of imported oil be carried in U.S.-flag ships.

For the average American family, struggling with nearly a decade of serious inflation, long-term implications of the cargo bill are hard to judge.

Supporters say it will mean just a couple pennies extra for a tankful of gas—a small price to pay for jobs and a strong merchant navy, they say.

But some government officials worry that the current bill, HR 1037, might be just the opening wedge of a long-term camapign to ship just about everything—at higher cost—in American ships.

Critics observe that everyone concedes cargo preference will lead to higher prices. And higher prices translate into inflation and unemployment, according to high-level government economists.

Furthermore, critics claim that the impact on prices will be several times higher than has been admitted by the Carter administration.

50 CENTS A PERSON

The U.S. Maritime Administration, which has been manning the helm for the White House on this issue, says that by 1985 the new law will cost U.S. consumers "only" $110 million a year in higher prices, or about 50 cents a person.

"We feel this is an acceptable price to pay to strengthen our merchant marine, enhance our national defense capability . . . and assure jobs for seafarers," says Robert J. Blackwell, Assistant Secretary of Commerce for Maritime Affairs.

But the American Petroleum Institute (API), representing opponents of cargo preference, estimates the bill could cost consumers as much as $1.6 billion a year.

"We estimate that the total incremental cost through 1982 to the consumer is over $5 billion, approximately ten times more than that estimated by Mr. Blackwell," says Frank N. Ikard, president of API. "Through 1985 the total cumulative cost will increase to $9.6 billion."

The General Accounting Office of Congress puts the annual price tag at about 2½ times the Blackwell estimate, but well below the API figure. GAO adds this caveat:

"Our figures do not include certain additional costs which might occur."

President Carter, after reviewing a report that included both his options and his campaign promises to maritime interests, personnally decided to move the United States toward a protectionist system in shipping.

COMPETITION CUT OUT

In a free market there is no way that highly paid American seamen, sailing in expensive American-built ships, can compete with huge, modern fleets from maritime nations like Britain and Norway, or taxhaven countries like Liberia. The petroleum business is a battle of pennies—and fractions of pennies. But the total differences in costs can be measured in thousands of dollars.

A sampling taken last year by the Maritime Administration found that a 90,000-ton capacity American tanker costs $11,300 a day to run. That included $3,577 a day for the wages of 26 U.S. crewmen at an average pay of $137 per day each.

A Liberian tanker of the same size cost $9,600 a day to operate. Its crewmen got an average pay of $26 a day. A similar Norwegian ship cost $10,800, with an average pay of $79 a day.

Such differences have a dramatic effect on the price of shipping oil. And those differences will soon grow dramatically.

By 1985 it is expected to cost $11.66 to import a ton of crude oil from the Persian Gulf to the United States on older American ships. The same ton of oil could be moved on a foreign flag ship for $8.74, according to a government study. But using newer American ships with high construction costs, the price of moving the same ton of oil will rise to $19.97.

That differential—more than double foreign costs—will be made up in higher prices at the corner gasoline pump under the Carter plan.

Those supporting cargo preference say the advantages far outweigh the higher prices.

Gerald Rafshoon, who handled campaign publicity for President Carter's election campaign, has been hired by shipping interests to push cargo preference. In the study released by Mr. Rafshoon's office, these economic benefits are cited:

1. Creation of 2,500 shipboard jobs and 2,100 shipyard jobs.

2. Creation of 15,000 additional jobs in maritime-related and supply industries.

3. Aid to areas of chronic unemployment. (Seven of ten major shipyards that would benefit are in areas of high joblessness.)

4. Help for minority workers. Thirty-one percent of shipyard workers and 17½ percent of shipboard crews belong to minority groups.

Further, the higher gasoline prices forecast by the General Accounting Office come to only two-tenths of a cent per gallon—"a small price to pay for jobs, national security, and better environmental protection," the Rafshoon study concludes.

THE BLUMENTHAL MEMO

The most damaging evidence against cargo preference was inadvertently supplied by the White House. In a confidential memo that fell into the hands of the press, Treasury Secretary Michael Blumenthal told the President.

"CEA [Council of Economic Advisers] estimates that the net impact [of cargo preference] on the economy as a whole would be a decrease in total employment and GNP [gross national product].

"[The bill] would be contrary to the London summit pledge to reject protectionism, would reverse U.S. policy favoring free competition, could trigger emulation by others, and would violate U.S. treaties with more than 30 countries."

Capitol Hill sources say the cargo-preference issue could reach the House floor in September.

If all goes well, say supporters, legislation should be on President Carter's desk by December. If he signs it—as expected—the nation's shipbuilding industry and maritime unions couldn't ask for a better Christmas present.

[From the New York Times, Aug. 26, 1977]

G.A.O. SAYS SHIP-PREFERENCE BILL WOULD ADD 240 MILLION TO OIL COST

(By Judith Miller)

WASHINGTON, Aug. 25.—The General Accounting Office has estimated that cargo-preference legislation supported by the Carter Administration would raise the nation's fuel bill by at least $240 million a year, more than double an estimate made by the Commerce Department in testimony last month.

In a letter to Representative John M. Murphy, chairman of the Merchant Marine and Fisheries Committee, Comptroller General Elmer B. Staats said the House version of the bill, which would require that 9.5 percent of imported oil be transported in United States-flag ships, could raise the nation's fuel bill by even more than the G.A.O.'s estimate of $240 million a year if additional costs were considered.

The G.A.O. estimate will undoubtedly reignite the controversy over the Administration's support of the cargo-preference measure, which leading Republicans have called "a blatant political payoff" to the maritime unions.

The G.A.O. letter to Mr. Murphy is dated July 29, 1977, four days before Mr. Murphy's committee voted at a politically charged hearing to reject a Republican bid to subpoena Carter Administration witnesses to testify about the cargo preference measure.

Mr. Murphy could not be reached for comment, but Ernest Corrado, the committee's chief counsel, said he believed the committee had received the G.A.O. estimate before the hearing.

When asked why Mr. Murphy had failed to mention the large discrepancy in the cost estimates presented by the Administration and the G.A.O., Mr. Corrado replied, "I suppose that he felt it was not a great deal of money."

The cargo preference bill has been a politically sensitive issue since late July, when Representative Pete McCloskey, Republican

of California, released internal White House briefing papers that discussed the bill.

According to the White House documents, virtually all of the President's top economic advisers opposed the protectionist measure, arguing that its effect would be to decrease employment and gross national product, reverse American policy favoring free competition, and violate United States treaties with more than 30 countries.

Robert J. Blackwell, Assistant Secretary for Maritime Affairs, consistently testified that the Administration's decision to support the measure was required by "the national defense and national security of the United States."

The White House documents, however, indicate that the State and Defense Departments did not believe the measure would strengthen national defense. Moreover, memos from Stuart Eizenstat, Mr. Carter's chief adviser on domestic policy, and Robert S. Strauss, special trade representative, indicate that support for the measure, though conceptually "flawed," was politically necessary in light of President Carter's campaign promises to maritime interests.

Last October, Mr. Carter, who reportedly received more than $100,000 toward his Presidential campaign effort from maritime interests, pledged support for a national cargo policy to assure American ships access to a "fair share of all types of cargo" in the nation's foreign waterborne commerce.

Despite repeated efforts in both House and Senate committees considering the legislation, Republicans have been unable to muster the necessary votes to extend hearings on the bill.

In July, Mr. McCloskey attempted unsuccessfully to subpoena Administration witnesses other than Mr. Blackwell, whom he charged with having a "clear conflict of interest." Mr. Blackwell has admitted that he has been negotiating for new employment with a group of nine merchant marine companies that strongly support cargo preference at a salary in excess of $100,000.

He has insisted, however, that after the industry contact, he pledged to refrain from having "any legal or personal involvement with any of the companies in matters before the Maritime Administration." The Administration refused in July to send witnesses other than Mr. Blackwell to Capitol Hill to testify.

The cargo-preference issue has been further politicized by a recent disclosure that Mr. Murphy solicited $9,950 from maritime interests in June while his committee was holding hearings on cargo preference. According to Common Cause, the public affairs lobbying group, Mr. Murphy received $16,200 from maritime interests during the 1976 campaign.

Mr. Murphy has said that the maritime interest contributions "had nothing to do with" his support of the bill and has accused Common Cause of being "used by the major oil companies and foreign-flag shipping interests" which oppose the bill.

MEASURE APPROVED BY HOUSE UNIT

The measure was approved by the House committee on Aug. 2 by a vote of 31 to 5. The committee expects to file its report on the measure tomorrow. Meanwhile, the Senate version of the bill is still in committee; a vote is expected early in September.

The G.A.O. letter is accompanied by a 25-page interim report on cost estimates of the cargo-preference measure. The report's estimates were based on an earlier version of the bill that would have required 30 percent of imported oil to be carried on American tankers.

The current bills in the House and Senate call for 9.5 percent of oil imports to be carried on United States ships by 1982. At present, less than 4 percent of imports are transported on American-flag ships.

"To translate our estimates into figures applicable to the recently proposed 9.5 percent cargo preference," Mr. Staats wrote, "we reduced them by the ratio of 9.5 to 30 percent—a factor of 32 hundredths." This adjustment produced the $240 million cost estimate, though Mr. Staats notes that "our figures do not include certain additional costs which might occur."

COST OF POTENTIAL RETALIATION

The reference to "additional costs" not included in the G.A.O. analysis refers to factors such as the cost of potential retaliation by other ocuntries, importation of more than the 10 million barrels of oil predicted by 1985 and the increased cost of oil if the price of domestic fuel is permitted to rise to the imported oil price.

"Any of these effects could—in the extreme—double the costs to consumers," Mr. Staats concluded.

Neither Mr. McCloskey nor Senator Robert P. Griffin, Republican of Michigan, who have led the fight against cargo preference in their respective committees, could be reached for comment on the G.A.O. estimate. An aide to Senator Griffin, however, said that Mr. Griffin asked the Federal Trade Commission in August to conduct an independent evaluation of cargo preference cost to American consumers. The F.T.C. is expected to report to the Senator on Sept. 6.

GREAT NEED FOR WORKING WATER STRESSED BY IRRIGATION BACKER

Mr. BURDICK. Mr. President, the following is an article by Clarence Jensen which was printed in the August 27, 1977, issue of the Minot Daily News.

Mr. Jensen has for many years been a leading advocate of water conservation and irrigation. As a nurseryman and farmer, his views are backed by practical experience with the vagueries of the weather and its effect on farm production. He also knows first-hand how cruel drought can be in the semiarid region of the Great Plains.

Mr. President, I find this article relevant to our ongoing efforts to conserve our water resources and put them to work for the benefit of all our people. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GREAT NEED FOR WORKING WATER STRESSED BY IRRIGATION BACKER

(By Clarence L. Jensen)

A recent news report stated that Robert Bergland, secretary of agriculture, speaking to a group of farm youth, made the statement that unless real generous amounts of snow falls in the Sierra Nevada mountains of California this coming winter, disaster would occur to California's agriculture. It would also be a disaster to the entire nation, he said.

How right he was. California is our greatest agricultural state. Its production in agricultural wealth is tremendous.

What Mr. Bergland could have added is that without the gigantic water development program the Californians have completed over the years, the Sierra snowfall would be of little benefit, and the state's agricultural wealth would be comparatively small.

The millions of acres of irrigation in the Golden State are responsible for its billions of dollars in agricultural production. The building of dams on its rivers, along with the many aqueducts and canals to bring this life-giving water to the thirsty farmlands, has made that state into an agricultural empire without comparison. Californians have learned to put that Sierra snowfall, and other sources of water, to work.

The good citizens of North Dakota have a dream for something similar in our state through a program of water development, the largest of which is to be the utilization of some of the waters of one of America's great rivers—the Missouri. The 250,000-acre program, authorized by Congress, is the first step in what is hoped will eventually result in our North Dakota irrigating several million acres from our rivers, our groundwater and other sources. What California has done can be duplicated to a certain extent in many areas of the Great Plains including North Dakota. We cannot grow oranges in our state, but experts tell us that we can increase our production of what we do grow threefold under irrigation. We plan to put the mighty Missouri to work in our state.

Eventually this will be done. The good people of North Dakota will not sit idly by, watching these dry years come so frequently without demanding completion of our water resources program to the limit.

Drouth or drought, no matter how you spell it, it's an ugly word.

Early in the century my father taught me to look in the west for rain, because, he said, "that is where the rainclouds come from." Now, over 75 years later, I am still, too often, looking in the west for that rain; rain that sometimes does come, all too often, it doesn't.

As one drives across this state and sees crops gasping for that life-giving water that fails to arrive, as was the case in so many areas this summer, the need for water to supplement the meager rainfall becomes so very evident.

When a series of calamity years come, as they did in the 30's, the need for water conservation becomes very clear. Young people today, and some of those who have moved here from other States, have little conception of how ugly Mother Nature can be in this semi-arid region of the Great Plains. One has to live through such a period to fully appreciate the wrath she can hand out. But those of us who lived in that period have not forgotten. We remember rainfall of less than 8 inches for the 12 months of one year of the '30's, coupled with devastating dust storms, and with temperatures of over 100 for days, culminating in an 118 degree reading at one place in the State. This brought disaster to the land of the Dakotahs.

And those who are concerned with the welfare of our wildlife today would bemoan a condition in which nearly all of our lakes and ponds had either dwindled to only a fraction of their former size, or had gone completely dry, as was the case in the thirties. Not a very desirable environment for wildlife.

Over the more than 70 years since the turn of the century, North Dakota's crops have been subjected to the ravages of many enemies. Some of these have been controlled, thanks, in many instances, to the work of the experiment stations. Black stem rust has caused almost complete failure in some years. Now the rust resistant varieties of wheat have this under control. Smut, so common in earlier years, and flax wilt, are no longer the destroyers they once were.

But the threat of drought is with us still. It is one enemy that has not been conquered.

There is no substitute for water. "Working water" is our most precious resource!

The entire western one-half of the nation is constantly threatened with a lack of rainfall. California early in its history realized that its agricultural economy was very much dependent upon the wise use of the water resources of that State, and she did something about it.

Other States are following. Irrigation is spreading throughout the West. Farmers in the humid eastern States, too, are adding sprinkler systems to supplement the rainfall and with great benefit to them.

Wouldn't it be interesting if some intelligent individual would compute the number of parched acres of this part of North Dakota that could have been supplied with 4–5 inches of moisture this year if the flood waters that came down the Mouse River through Minot to wreak destruction throughout the valley, could have been impounded to be used at a time of need? Some day—perhaps many years in the future, but surely sometime—our citizens will work for just such a program.

No one claims that irrigation will enable the entire State to obtain supplementary water. It will perhaps not deliver a complete knockout blow to the drought throughout the entire State. But it will deliver some mighty good left-and-right handed jabs. And, as it has in other States, it will have a very beneficial effect upon our entire economy.

CURRENT U.S. POPULATION

Mr. PACKWOOD. Mr. President, I wish to report that, according to U.S. Census Bureau approximations, the total population of the United States as of September 1, 1977, is 217,616,813. In spite of widely publicized reductions in our fertility levels, this represents an increase of 1,755,646 since September 1 of last year. It also represents an increase of 180,934 since August 1, 1977, that is, in just the last month.

Over the year, therefore, we have added more than enough people to fill the combined cities of Oakland, Calif., Akron, Ohio, Corpus Christi, Tex., and Indianapolis, Ind. And in just 1 short month, our population has grown enough to more than fill the city of Knoxville, Tenn.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD the notification I have just received. A portion of the notification, which is classified information, has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room S–116 in the Capitol.

There being no objection, the notification was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
September 7, 1977.

In reply refer to: 1–8701/77 ct.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover, Transmittal No. 77–83, concerning the Department of the Air Force's proposed Letter of Offer to Egypt for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $28.7 million and support costs of $37.8 million for a total estimated cost of $66.5 million.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director, Defense Security Assistance Agency and Deputy Assistant Secretary (ISA), Security Assistance.

TRANSMITTAL NO. 77–83

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Egypt.

(ii) Total Estimated Value:

	Million
Major Defense Equipment*	$28.7
Other	37.8
Total	66.5

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (1TAR).

(iii) Description of Articles or Services Offered: [Deleted] Teledyne-Ryan Model 124R "Firebee" remotely piloted vehicles (RPVs), control van, launch and recovery equipment, spare parts, spare engines, ground support equipment, technical assistance and training.

(iv) Military Department: Air Force.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: September 7, 1977.

(Classified by the Department of State subject to general declassification schedule of Executive Order 11652. Automatically downgraded at two year intervals. Declassified on December 31, 1983.)

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask unanimous consent to have printed in the RECORD the two notifications I have just received.

There being no objection, the notifications were ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
September 7, 1977.

In reply refer to: I–9788/77.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Wasington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 77–80, concerning the Department of the Air Force's proposed Letter of Offer to Egypt for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $139.5 million and support costs of $44.9 million for a total estimated cost of $184.4 million. Shortly after this letter is delieverd to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director, Defense Security Assistance Agency and Deputy Assistant Secretary (ISA), Security Assistance.

TRANSMITTAL NO. 77–80

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Egypt.

(ii) Total Estiamted Value:

	Million
Major Defense Equipment*	$139.5
Other	44.9
Total	$184.4

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Fourteen (14) C–130 aircraft, spare parts and support equipment.

(iv) Military Department: Air Force.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: September 7, 1977.

WASHINGTON, *D.C., September 7, 1977.*

In reply refer to: I–6698/76ct.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: References:

(a) Defense Security Assistance Agency's letter, I–6698 of 7 July 1977.

(b) Defense Security Assistance Agency's letter, I–6698 of 2 August 1977.

Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 77–46A. Reference a forwarded the original Transmittal No. 77–46 and reference b withdrew that transmittal. This transmittal concerns the Department of the Air Force's Letter of Offer to Iran for major defense equipment as defined in the International Traffic in Arms Regulations (ITAR) estimated to cost $718.7 million and support costs of $510.2 million for a total estimated cost of $1,228.9 million.

Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

H. M. FISH,
Lieutenant General, USAF, Director, Defense Security Assistance Agency, and Deputy Assistant Secretary (ISA), Security Assistance.

TRANSMITTAL NO. 77–46A

(iii) Description of Articles or Services Offered: Seven (7) E-3 aircraft, Airborne Warning and Control System (AWACS), support equipment, spare parts, spare engines, contractor maintenance support, site survey, training equipment and training.

(iv) Military Department: Air Force.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: September 7, 1977.

THE TRANS-CANADIAN SYSTEM COULD COMPOUND A FOLLY

Mr. HELMS. Mr. President, unfortunately, the Senate will eventually be obliged to take under consideration the ratification of the Panama Canal Treaty. I hope that it will not be ratified. I have been very open in my opposition of the treaty and have expressed this opposition from the floor on several occasions.

I do not know what your feelings may be or how you intend to vote on this important issue. However, there is a second and in someways similar matter concerning this Nation's relation with a foreign power which will also be considered by this body in the very near future. I am speaking of the selection of a system to deliver natural gas from Alaska. We have two proposals for consideration—a Trans-Canadian system or an all American system. Should we adopt a delivery system requiring agreements with Canada for an overland pipeline through that Nation, we cannot overlook the comparisons with the original Panama Canal agreement and particularly the safeguards accruing to this Nation at the time the agreement was adopted.

First, as to the Panama Canal, the United States exercised sovereign rights over the entire right-of-way. If we adopt a Canadian overland route we will enjoy no rights—sovereign or otherwise over any of the right-of-way.

Second, an American company built, owned, and operated the entire canal facility. The proposed Canadian overland route would be built, owned and operated exclusively by companies which are foreign controlled.

Third, all tariffs and taxes relative to the Panama Canal were under exclusive U.S. control. Canada, on the other hand, would exercise full control over taxes and tariffs within its national boundaries. Because of the relationship between the Canadian central government and provincial authority, it is not clear how these taxes and tariffs would be levied or controlled. There is, in fact, considerable argument in favor of the right of the province to levy taxes regardless of the wording of any national agreement.

Fourth, the tariffs and all bills paid for the use of the canal by international shipping companies were paid by these international shipping companies. The U.S. consumer will pay all costs for the construction, operation, and maintenance of an overland pipeline through Canada.

Mr. President, I question the advisability of this Nation giving serious consideration to embarking on a new $10 billion project across Canada which at the outset has none of the safeguards we found so necessary in the construction, operation, and maintenance of the Panama Canal. The decision we make will affect our natural gas delivery for at least 40 years. It does not make sense to place our dependence for this vital energy fuel in the hands of a foreign power when we have an alternative. I recommend that we approve the all American alternative thereby assuring that our natural gas will remain under our control.

MARITIME CARGO PREFERENCE

Mr. LUGAR. Mr. President, the cargo preference issue and the Carter administration's dealings with the maritime industry have recently been the focal point of considerable public interest and controversy. Yet, the public is still forced to base its opinion on sketchy information. Efforts by Representative PAUL N. MCCLOSKEY and Senator ROBERT GRIFFIN to open up congressional hearings on the subject have been rebuffed by the Democratic leadership.

If the maritime industry maintains a political grip on the administration, the public has a right to know the details. If our President has made campaign promises to the maritime interests, the particulars must be revealed. And if cargo preference is indeed in the national interest, then hearings should be opened up so that the skeptical may decide for themselves.

If cargo preference does not amount to a political payoff of protectionism for the U.S. merchant marine, what is there to hide? If President Carter is not motivated by self-serving political interests, why has his administration refused to provide additional witnesses on cargo preference legislation? Why does Jody Powell, the President's press secretary, say, "We don't make it a practice of sending up—to Capitol Hill—witnesses to oppose our proposals"?

Apparently, the administration realizes that its cargo preference scheme cannot be justified on its own merits and prefers to suppress full and open debate.

I, for one, have many questions to ask. And I am anxious to get as much information as possible about the matter.

Fortunately, the Ripon Society—a group dedicated to fostering fair Government policies—has made public a series of White House memorandums that clarify the administration's self-interest in the cargo preference issue.

To make this material available to my colleagues, I ask unanimous consent that the August 15, 1977 issue of the Ripon Forum be printed in the RECORD.

There being no objection, the issue was ordered to be printed in the RECORD, as follows:

THE CARGOGATE PAPERS

Cargo preference legislation is a "blatant political payoff," according to Senate Minority Leader Howard Baker, Jr., House Minority Leader John Rhodes, and GOP National Chairman Bill Brock. The White House disagrees and says such criticism is politically motivated.

Who's playing politics? Most newspaper reports only summarize the documents involved. The Forum has departed from its usual aversion to reading other people's mail to publish the following correspondence. Cargogate is the new Carter Administration mystery game. Why did the butler . . . er, the President . . . do it? You be the judge.

Memorandum for the President
From Stu Eizenstat and Bill Johnston.
Subject Cargo preference.

BACKGROUND

At your instruction we have consulted extensively with industry and Congressional leaders trying to develop a mutually satisfactory strategy for rebuilding the American merchant marine. Unfortunately, our efforts to find generally acceptable compromise to cargo preference have not been successful.

The maritime industry, and its many Congressional supporters, supported some of our alternative proposals. But every group we talked to felt that our proposals were not acceptable substitutes for cargo preference. They were willing to accept sharp cutbacks in percentages and timetables if we would agree to some form of cargo preference. But they rejected all other compromises citing their understanding of your campaign promise. Within the last week both Senator Long personally, and Congressman Murphy by letter, have emphatically restated this to me.

On the other side many members of our Administration, including Charlie Schultze, Mike Blumenthal and Dick Cooper, feel that no version of cargo preference is acceptable. They feel that the principles involved—our commitments to free trade and to the fight against inflation—cannot be breached. They argue that the economic costs of cargo preference outweigh its benefits. Moreover, they feel that even a modest cargo preference bill entails a dangerous precedent that may later be extended by Congress or imitated by other nations.

OPTIONS

The attached decision memos from Secretaries Blumenthal and Kreps lay out two views of the alternatives. The EPG paper concludes that the options are:

(1) Cargo preference with the reserved share cut to 25 percent and with foreign built ships eligible for 2/5 of this share.

(2) A larger operating subsidy program for which all kinds of ships would be eligible, and for which the eligibility rules would be significantly relaxed.

(3) Extension of the Jones Act to the Virgin Islands for oil.

Option 2 was developed by CEA, EPG, Treasury and OMB staffs after an EPG discussion in which many EPG members expressed dissatisfaction with both cargo preference and other options.

Secretary Kreps feels that Option 2 should be rejected because it is unlikely to benefit the U.S. merchant marine and is certain to be offensive to most of the industry. She doubts that Option 3 is viable either, because it involves relatively few ships and is almost certain to be enacted with or without our support. She believes that the real choices are

(1) Cargo preference as in 1 above.

(2) A package of alternatives that would include:

(a) The Jones Act extension as in Option 3.

(b) Repeal of the U.S. income tax deferrals available to foreign subsidiaries of U.S. shipping companies. (Treasury opposes this)

(c) A legislative initiative to expand our dry bulk fleet. (already drafted)

(d) A commitment to seek additional bilateral shipping agreements on a case by case basis.

ANALYSIS

We agree with Secretary Kreps that from a political standpoint, Option 2 in the Blumenthal memo does not merit serious consideration. The proposed subsidy is a potentially expensive on-budget item with uncertain benefits. And because the proposal would tend to benefit the large oil companies, the maritime community would view it as an insult rather than as a substitute. As Secretary Kreps observes, a simple rejection of cargo preference is politically preferable to Option 2.

In our view the options boil down to accepting or rejecting cargo preference. If you reject it, a package of alternatives should be offered, even though these will not be considered acceptable by cargo preference proponents.

Accordingly we would modify the two Kreps options as follows:

(1) Cargo preference with severely reduced percentages: We feel that the percentage of oil imports reserved for our ships should be cut to 8–12 percent, with half of this available to foreign built ships reregistered under the American flag. This proposal would substantially increase the current proportion of oil moving on American ships and create some sea going and shipyard jobs, at a minimal cost to the public (estimated at $75–100 million). Both Congressman Murphy and Senator Long have indicated that a proposal along these lines would be satisfactory. It would, of course, still set the precedents considered to be undesirable [Here, a handwritten note by the President says, "Less than 10% as Strauss indicates.]

Ambassador Strauss has worked closely with us in developing this alternative. At this instance we have met with a representative of the unions who has indicated that such a severely reduced percentage would be acceptable because it would, at least, recognize the concept of cargo preference. [This paragraph is marked by hand for emphasis—presumably by the President.]

Thus, we could accurately state that we have fulfilled our campaign commitment (see attached campaign statements) but at a reasonable cost.

As under the current version of H.R. 1037, our proposal for vastly reduced cargo preference percentages would not add to maritime subsidy costs, since preference ships would not be eligible for any subsidies.

(2) A set of alternative including a-d in the Kreps Option 2 above and:

(e) Increased income taxes on both American and foreign owned foreign flag fleets. This would involve changing the definition of income sources so that half of the earnings from shipment into and out of the U.S. would be treated as U.S. earnings, (currently most of this income is treated as "earned on the high seas"). It would also involve ending the exemption from taxation that income earned by foreign flag shipping companies now enjoys. Recommendations along these lines have already been proposed by a Task Force of the House Ways and Means Committee.

RECOMMENDATION

While we feel that cargo preference is a flawed concept, it appears to be the only immediately available alternative that can significantly strengthen the maritime industry. In light of your commitment to the industry, and the likelihood that rejection of cargo preference will be seen as a broken promise, we support the limited cargo preference option outlined above.

Memorandum for the President.
From Ambassador Robert S. Strauss.
Subject: Cargo Preference Legislation.

Stu Eizenstat and I have met at length with Senator [Russell] Long on this issue. I have taken indirect soundings of the leadership of the unions, and talked with others on the Hill. [Assistant Secretary of Commerce Robert J.] Blackwell of the Maritime Administration believes our labor soundings are accurate.

Politically, something in the way of a Cargo Preference is going to be very hard to resist. Other options don't serve or satisfy the political need, and might even be counterproductive. The unions certainly feel that the Administration is committed to a Cargo Preference Policy.

The Maritime unions claim that a Cargo Preference Act is essential to the future of the U.S. Merchant Fleet and the security of the United States. Other remedies such as those proposed in the several option papers which have been circulated, in their view, do not suit this purpose and are seen either as entirely insufficient or a policy action contrary to their interests. They believe that the Cargo Preference policy will protect seafaring jobs for U.S. sailors and provide substantial on-shore employment in shipyards around America. (They point to the substantial numbers of minority employment in today's shipyards as evidence that the jobs created on-shore would go where the need is greatest.)

What we have determined is that establishing the concept of Cargo Preference is more important than the percentage. When Eizenstat and I met with Russell Long, we finally convinced him of this and left him in the political posture of "anything you fellows can satisfy Jesse Calhoun with, I will take and support." I believe we can successfully sell less than ten percent preferences stretched out over five or six years and try to get the Hill and the Union committed to this if you desire to go the Cargo Preference route. In short, what we have accomplished is determining that the concept is far more important than the percentage.

This memorandum is not an attempt to justify Cargo Preferences over other options. It is intended to provide you with a least possible option at an initial, relatively modest cost. There are other memoranda presently before you relating to inflationary and trade aspects. I would be glad to discuss these options with you personally if you desire. It is my personal opinion that we have a day or two "bad story" situation following any available option.

Memorandum for the President.
From W. Michael Blumenthal, Chairman, Economic Policy Group.
Subject Oil Cargo Preference.

In March the EPG unanimously recommended that you oppose cargo preference legislation, and suggested we might explore alternative ways of assisting the maritime industry. You then directed Commerce and White House staff to consult further on the Hill and with industry groups.

These consultations indicate that while the maritime interests would support a modified version of the cargo preference bill (H.R. 1037), they consider alternative forms of assistance inadequate and would strongly oppose them as a substitute for cargo preference.

During the campaign you made several statements about the need for a viable U.S. maritime industry, which maritime interests understand as commitments to support cargo preference. It appears that your campaign commitment was to increase the number of seagoing jobs and not to assist the shipbuilding industry.

The House Subcommittee on Merchant Marine is pressing the Administration for a decision. There is also an intensive lobbying effort underway on behalf of cargo preference by a coalition of shipbuilders, ship operators and marine supportive industries.

The EPG has reviewed this issue again and presents three alternative proposals.

1. Support a modified form of cargo preference, with a reduced preference percentage, a stretched out implementation timetable, and provision for limited foreign-built tanker participation. (Commerce and Labor support.)

Pro

This is acceptable to maritime interests. Impact on national security cuts both ways: Commerce believe U.S.-flag ships would be more reliable in emergencies; State and DOD do not see that as a benefit since foreign ports might be closed to U.S.-flag ships. It would create 2100 to 4600 new seagoing jobs, a possible 13,500 transitional shipyard jobs after 1980, plus some near-term shipyard business for reconstruction of foreign-built tankers. The U.S. balance of payments could improve by $95–150 million. Might improve tanker safety and pollution avoidance. Age limit would prevent use of obsolescent tankers in preference trade.

Con

Annual cost through higher oil prices is estimated at $233–$844 million depending on level of oil imports in 1986 and final form of the wellhead tax. If the wellhead tax exempts cargo preference oil, the annual cost per job created ranges from $23,000 to $111,000. CEA estimates the net impact on the economy as a whole would be a decrease in total employment and GNP. Would be contrary to London Summit pledge to reject protectionism, would reverse U.S. policy favoring free competition, could trigger emulation by others, and would violate U.S. treaties with more than 30 countries.

2. Expanded use of operating subsidies. (Supported by State, CEA, NSC, DOD, DOT, and the Special Assistant to the President for Energy; OMB supports without a cap on the subsidy. Treasury and FEA support option 2 or 3.)

Pro

By relaxing restrictions on eligibility for operating subsidies, and increasing operation subsidies from the current level of $400 million per year to $500 million per year, 5,000 additional seagoing jobs could be created at an annual cost per job of $20,000. Would not increase the cost of oil and, therefore, would not have the inflationary impact of cargo preference. Would not have the adverse foreign policy repercussions of cargo preference.

Con

It is strongly opposed by maritime interests as an alternative to cargo preference. They argue that independent operators will not be attracted and that the major oil companies with their company unions will be the primary beneficiaries. Shipbuilders oppose since no new shipconstruction would be generated. Further consultation and staffing are needed if you choose this approach since it would mean basic changes in long standing subsidy programs, including a budgetary ceiling for the first time. A recent OMB attempt to cap existing subsidies was strongly opposed.

3. Extend the Jones Act, which requires U.S. ships for domestic commerce, to the Virgin Islands for oil. (Treasury and FEA support option 2 or 3. State supports option 3 in conjunction with option 2 if needed.)

Pro

Could create 2,000 seagoing jobs with the cost likely to be absorbed by the refiner thereby avoiding the inflationary impact of cargo preference. After years of resisting, Amerada Hess, the only refinery in the Virgin Islands, is no longer opposing extension of the Jones Act since the oil import fee system will make it cheaper to use U.S.-flag ships.

Con

Maritime interests oppose this as a substitute for cargo preference because they believe the Congress will extend the Jones Act to their benefit in any event. There is also concern that it could serve as a precedent to complete extension of the Jones Act to the

Virgin Islands which could impact negatively on tourism, the islands' major industry.

THE MAJORITY LEADER'S PERFORMANCE

Mr. KENNEDY. Mr. President, the highlight of the August 20th issue of the National Journal is an interesting and perceptive article by Richard E. Cohen concerning the distinguished majority leader of the Senate. Entitled "Byrd of West Virginia—A New Job. A New Image," the article gives the distinguished Senator from West Virginia well-deserved high marks on his performance as majority leader and offers a detailed analysis of his competence and skill in leading the Senate. The article makes for interesting and informative reading and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BYRD OF WEST VIRGINIA—A NEW JOB, A NEW IMAGE

(By Richard E. Cohen)

As Senate Majority Leader, Robert C. Byrd does more than make the trains run on time. He also decides what tracks the trains should run on and the cargo they should carry.

No one who watched the West Virginia Democrat at work during his six years as Majority Whip had any doubt that he would operate the Senate efficiently when he replaced Mike Mansfield of Montana, who retired last January. But there were doubters, particularly among the roughly 20 Senate Democrats who supported Hubert H. Humphrey, D-Minn., for the post, who questioned whether Byrd had the capacity and desire to be more than a technician, whether he could "lead" the Senate.

Seven months do not make the full record, but the early returns are favorable. On and off Capitol Hill, the view is that Byrd has done surprisingly well. He has managed the Senate skillfully, contributed his own ideas on legislation, and so far has struck an appropriate balance between his role as the Senate's emissary to the White House and President Carter's link with the Senate. "I'm very impressed with Sen. Byrd's leadership," said Dick Clark, D-Iowa, manager of the aborted Humphrey campaign for Majority Leader. "He's fair, honest and above all, extremely hard-working. He has a healthy respect for the Senate as an institution."

"He is very forceful and an architect of the legislative process. He does this by a basic understanding of that process and an ability to work with all factions," said Ted Stevens of Alaska, the Assistant Minority Leader.

Fred Wertheimer, vice president of Common Cause, said that despite past battles his organization has had with Byrd, particularly on Senate institutional reform issues, "I think his performance as leader has been first-rate. He's done a great job."

Charles E. Walker, a prominent business lobbyist and deputy secretary of the Treasury during the Nixon Administration, said that while Byrd's big test lies with Senate consideration of the energy package, "I give him high marks from the perspective of the business community."

OVERSHADOWED

Byrd so far has been overshadowed as a congressional leader by House Speaker Thomas P. O'Neill Jr., D-Mass. This results from several factors. For one, public attention has been focused on the House because of its handling of Carter's energy package and O'Neill's role in pushing it through. (*See Vol. 9, No. 31, p. 1196.*) O'Neill's style and his mastery of personal relations (both with his colleagues and the press) have generated favorable profiles. In contrast, Byrd's reputation as a dour insider has changed little since he became Majority Leader. He is still regarded—perhaps unfairly—as a man whose principal goal is to curry favor with the other 99 Members of the Senate, who revels in the technical details of legislative procedure and who prefers to meet the press on Saturday mornings.

It may be, however, that Byrd's style and advice will be as important to Carter as O'Neill's has been, that his mastery of Senate procedures and institutional idiosyncracies may produce results the way O'Neill's more public orchestration of the House has.

Byrd recognizes that comparisons with O'Neill are inevitable, but is comfortable with his own style. "As Popeye used to say, 'I yam what I yam and that's all I yam," he said.

But he is quick to note that the House and Senate operate in different worlds and that what may work for O'Neill would backfire for Robert Byrd. The Senate operates by unanimous consent, under the constant threat of a filibuster. It is filled with men who consider themselves worthy successors or replacements for Jimmy Carter. It is a more difficult body to direct, let alone control. And without the two-to-one majority enjoyed by O'Neill, Byrd must use different tactics to move legislation.

He, of course, is not the sole Democratic leader. Alan Cranston of California, who succeeded Byrd as Whip, has a reputation as a solid vote-counter and an effective advocate of liberal causes. Byrd said he values Cranston's judgments and believes the new Whip is a dedicated member of the leadership. Other Senators, committee chairmen like Russel B. Long of Louisiana (himself a former Whip) and subcommittee chairmen like EDWARD M. KENNEDY of Massachusetts (who succeeded Long as Whip and lost the post in 1971 to Byrd) are forces to be reckoned with on various issues.

But Byrd is by far the dominant figure, and in the absence of an effective counterweight on either the left or right, has been able to put his stamp on the Senate this year, from its compromises on the neutron bomb and Korean troop withdrawals to its decision to postpone debate on such controversial measures as the consumer protection agency, political reforms and several labor bills and to its swift action on a new ethics code.

His sense of what is attainable, his compelling drive to see the Senate churn out legislation acceptable to more than a bare majority and his ability to find compromises at crucial moments may prove to be the keys to success, both for himself and for Carter's legislative program.

BYRD'S BACKGROUND

It has not always been this way for Robert Byrd. His oft-told biography wends its way through a poor West Virginia upbringing, brief membership—long since repudiated—as a young man in the Ku Klux Klan, studying for a law degree at The American University while a Member of the Senate and prominence as a prober of welfare problems in the District of Columbia during his early Senate service.

In comparison with others in the Democratic Class of 1958—Edmund S. Muskie of Maine, Howard W. Cannon of Nevada, Harrison A. Williams Jr., of New Jersey and the late Philip A. Hart of Michigan—Byrd did not stake out a position of leadership on particular committees or issues. Instead he quietly learned the ways of the Senate under the tutelage of such masters as John C. Stennis, D-Miss., and the late Richard B. Russell, D-Ga., and did his homework back in West Virginia. His official biography notes that his record includes capturing the largest percentage of votes ever obtained by a statewide candidate in that state and being the only one ever to win all 55 counties.

It was not until his upset victory over Kennedy in the 1971 contest for Majority Whip that Byrd began to receive national attention.

As Whip, he was given increasing authority by Mansfield to run the daily operations of the Senate, which principally involve the scheduling of bills and efforts to reach time limitations on debate. (For a report on Mansfield's leadership, see Vol. 8, No. 51–52, p. 1802.)

If there was one factor above all others that marked his service as Whip, it was that he drove himself from early morning to late evening to meet the personal needs of individual Senators and keep the legislative treadmill rolling. Partly because of Mansfield's relative disinterest in the mechanics of scheduling, Byrd was able to take a previously unimportant post—one without any power in statute or Senate rules—and parlay it into a position of power.

As he said in an interview with National Journal, many important bills would not have been enacted in recent years were it not for his work as a "technician." As examples of bills on which he helped advocates overcome procedural obstacles, he cited the 1975 Voting Rights Act, creation of the Senate Select Committee on Intelligence and, in the face of heated filibusters, passage of bills toughening antitrust procedures and permitting the award of attorneys fees to private parties in civil rights cases. (For a report on his role on the antitrust bill, see Vol. 8, No. 39, p. 1353.)

To some extent, Byrd's role as Majority Leader has not changed all that much from his position as Majority Whip. He exercises his authority to see that the Senate completes action on scheduled bills, even where there is fierce opposition. His grasp of complex Senate rules gives him an advantage in dealing with most Senators.

What has changed is that the mantle of being Majority Leader enables him to be more assertive in shaping the Senate schedule and in resolving controversial bills.

"Byrd is an artful mechanic at work," said an aide to a Democratic Senator who at times has battled with Byrd. "He brings together all the people working on an issue into a room, gets those of differing views to agree to bring up an issue and then sets the framework for consideration. He usually doesn't give a damn about the bill but wants to make sure all people with an interest are represented."

A common perception of Byrd in the Senate is that he is a facilitator—a term used more with admiration for its skill than in derogation of its importance.

"Nine-tenths of Byrd's role is facilitation, keeping the Senate moving," said Dick Clark. "He has to keep things moving or we'll get nothing done." Clark added that this process leaves room for affecting the substance of legislation. Assistant Minority Leader Ted Stevens said that in discussing the schedule for bills, Byrd and other members of the leadership do not discuss their own views. "Our job is to make sure the will of the Senate is expressed, that the rights of all Senators are protected and the timing is consistent with the Senate's over-all workload." But Byrd says he has had an impact on the substance of various bills and that being Majority Leader contributes to his ability to do so in the Senate.

Partly because of his concern with an image that often emphasizes form over substance, Byrd is quick to reject the label of facilitator or technician. "The Majority Leader is not a facilitator. He is the Majority Leader," Byrd said. "He facilitates, he constructs, he programs, he schedules, he takes an active part in the development of legislation, he steps in at crucial moments on the floor, offers amendments, speaks on behalf of

legislation and helps to shape the outcome of the legislation."

INSTITUTIONAL MAN

At times, Byrd acts to assure that the Senate will take action on a particular bill. The best example is his repeated declaration that essential legislation for 1977 should be passed by the August recess so that "the decks will be clear" for the Senate to spend the rest of the session on energy legislation. (For a report on the energy bill, see this issue, p. 1303.)

It has often been the case that he has expedited the resolution of controversial bills by offering a compromise between the competing sides and successfully pushing for its adoption.

Essentially, however, Byrd's primary concern is with leading and representing the Senate as an institution rather than with drafting the details of particular bills.

Max L. Friedersdorf, staff director of the Senate Republican Policy Committee and previously assistant to former President Ford for legislative affairs, compared the respective roles of O'Neill and Byrd: "The Speaker knows that the key in the House is to use the force of his personality to lean on people to get blocs into shape and ride roughshod when he has to. In the Senate, you don't whip them around. Each Senator represents his own fiefdom and won't be bullied. The leader's function is to find a consensus rather than make it as in the House."

In effect, Byrd's role has been to identify the point of consensus among his colleagues and to advance that position. Where there is no readily discernible consensus, he generally puts the matter aside.

One example is the fiscal 1978 foreign aid appropriations bill (HR 7797), approved Aug. 5. It is a perennially controversial bill and one that in recent years frequently has been enacted well after the beginning of the fiscal year. Byrd opposes many aspects of the foreign aid program and voted against final passage of the bill this year. But before doing so, he spent several hours bringing together the Senators most interested in the bill. "I saw that there were some very difficult problems to resolve," he said. In particular, James B. Allen, D-Ala., and Harry F. Byrd Jr., Ind-D-Va., had numerous amendments to restrict the foreign aid program.

Byrd said he felt it was important to finish the bill before the August recess because of his plan to concentrate the Senate's attention on energy legislation for the rest of 1977. "Well, I went to Danny (Daniel K. Inouye, D-Hawaii, chairman of the Senate Appropriations Subcommittee on Foreign Operations) . . . and to Schweiker (Richard S. Schweiker, R-Pa., ranking minority member on the subcommittee). And I went to Jim Allen, Harry Byrd, I went to Howard Baker (R-Tenn., the Senate Minority Leader) and I suggested that we have a meeting. . . . I said, 'Now, gentlemen, we need to decide if we can finish this. I need to know so I can let our colleagues know there won't be a Saturday session.'"

Facing the unhappy prospect of delaying the vacation of other Senators and their aides, the group sat for several hours and worked out their differences, Byrd said.

Byrd took a more active role in the substance of a controversial issue during debate in June and July on the neutron bomb, a weapon designed to cause widespread injury to people but little property damage. Funding for research and development was a part of the public works appropriation bill (HR 7553), even though Carter has not decided whether to deploy the bomb. Opponents led by Kennedy and Mark O. Hatfield, R-Ore., fought to kill the project or, as an alternative, to allow either chamber to veto its production following submission of an impact statement by the President. Their amendments were narrowly defeated, making it desirable for supporters to make some gesture to the neutron bomb opponents in order to expedite consideration of the bill.

With Baker's support, Byrd offered an amendment that would require votes by both chambers to block production of the bomb. In explaining his amendment on July 13, Byrd, a supporter of the neutron bomb, said, "I am convinced that there is enough sentiment in this body supporting an institutional role for Congress to keep this matter before the Senate for a while if this amendment is not adopted." He added, however, that he wanted to make clear that it should not be interpreted as "a crippling amendment." The proposal was approved, 74–19.

It is routine practice for Byrd to work closely with Baker to resolve disputes on scheduling or specific provisions of bills. Almost without exception, GOP Senators and top aides commend Byrd for respecting the rights and interests of the minority.

One idea pressed by Baker, to which Byrd has subscribed, is that the Senate should not be in session all year. Baker believes it is better for the public and Members of Congress if they spend less time in Washington and more time with their constituents. Byrd agreed at the beginning of the year to shoot for adjournment in early October. Although the energy debate may push back that deadline a few weeks, Byrd is committed to an early adjournment.

But that decision has had a ripple effect on other controversial legislation and has produced criticism of Byrd's leadership. Byrd has been reluctant to schedule bills that face the threat of a filibuster because it usually takes at least two weeks to consider such a contested bill. Critics charge that Byrd is allowing a small group of Senators to prevent consideration of important legislation.

"If there's any criticism I have, it is in his (Byrd's) determination not to bring up certain bills because of timing," said Howard M. Metzenbaum, D-Ohio. "I would have hoped we could have considered the consumer protection agency bill and national health insurance. But I recognize that anyone in a leadership role would not act 100 percent as I wish."

Republican Charles H. Percy of Illinois, who has worked closely with Byrd on some issues, also questioned "Byrd's willingness to put off anything because of the threat of a filibuster."

Andrew A. Feinstein, a lobbyist for Ralph Nader's Congress Watch, admitted that while his fear that Byrd was politically too conservative has not proved correct, he too is bothered by the fact that Byrd "stays away from controversial bills, many of which he supports. He may be, at times, too cautious."

Nader's group has been most concerned with Byrd's decision not to take up the consumer agency bill until the House passes it. (See Vol. 9, No. 26, p. 996.) But other bills have been shelved at least temporarily because of a filibuster threat, including voter registration, Hatch Act repeal, Legal Services Corporation amendments and several labor bills. Byrd did schedule debate on the bill to extend public financing to Senate elections, knowing that it would be filibustered. When the Democrats were unsuccessful in three attempts to shut off debate, the public financing sections were stripped out of the bill. (See this issue, p. 1314.)

Byrd's defense of his scheduling decisions is that he is not afraid to take up controversial bills at certain times but wants a reasonably good likelihood that the bill will be approved. Ironically, a bill (SRes 5) backed by Byrd and Allen to tighten Senate filibuster procedures following a cloture vote was considered by the Senate in May but scuttled when Byrd and other Democrats determined that Republican-backed weakening amendments gutted the bill.

Byrd's stamp as the institutional man is most evident when it comes to issues that directly involve the Senate. For example, he supported Adlai E. Stevenson, D–Ill., in his effort to abolish some Senate committees and rationalize the jurisdictions of others. (For a report on the Stevenson reorganization plan, see Vol. 9, No. 3, p. 106.)

Byrd also fought successfully for a stronger ethics code for Senators, including a cap of $8,625 on outside earnings excluding personal investments. Byrd made the ethics debate in March a test of his strength. According to a Senate aide, the debate was important because "he wanted to prove right away he was a strong leader." The code, which was prepared by the temporary Special Committee on Official Conduct, chaired by Gaylord Nelson, D–Wis., paralleled in many respects the code developed earlier by a comparable House panel. Byrd kept a close watch on the committee's progress and set a March 1 deadline to make sure there would be adequate momentum.

When the new code reached the Senate floor, it became the subject of harsh attack from several Senators, led by Muskie, who angrily asserted that the income limitation would have a serious impact on his personal finances. However, Byrd pressured many Democratic Senators—reminding them that earlier he had supported the pay raise as a quid pro quo for the tougher code. Muskie's amendment to remove the $8,625 limit was defeated, 35–62.

POLICY TILT

While such categorizations are often suspect, it appears that since being elected head of the Senate Democrats, Robert Byrd has moved his politics slightly more to the center of Democratic opinion.

Byrd acknowledged—in a limited way—a possible shift. "For me to be representative of my colleagues, keep an open mind, be fair, be reasonable, to deal evenhandedly—that is one of my responsibilities."

Cranston puts a slightly different cast on the assessment. "I think Byrd is stronger now among the liberals than he was earlier, partly because he is supporting their concerns, though he is not changing his views."

James Allen, one of the Senate's leading conservatives, sees it still differently. He said that as Whip, Byrd had to "prove himself to the liberals as willing to ram through liberal legislation." Now, said Allen, Byrd is "conciliatory" to all sides.

Whatever the validity of these assessments, it is the case that Byrd has switched his position to the liberal side on at least one major issue.

He joined the ranks this year of those who support public financing of congressional campaigns. He explained that shift by saying it was something Carter supported and, compared with other political reform proposals, stood the best chance of Senate passage.

On the consumer protection agency, another favorite liberal project, Byrd voted against the bill in 1975, the last time it was considered by the Senate, although he did vote to break the filibuster. An aide said there has been no indication that he has changed his mind.

However, Frances Zwening of Congress Watch said her organization "assumes he will support the bill" this year because Byrd has said several times that he will support the items on Carter's list of priority legislation, which includes the consumer agency bill.

Esther Peterson, special assistant to the President for consumer affairs, said she has had several "constructive" conversations with Byrd and that she thinks he is "open" on the bill. "He senses the difference between being Majority Leader and Senator from West Virginia. I think he will be very helpful in getting the bill through the Senate once it clears the House," she said.

Byrd also has played an important role on two major defense issues. He sent Carter a strongly-worded letter urging opposition to continued funding of the B–1 bomber. Carter's decision on the supersonic bomber probably had little to do with congressional pressures, but it is significant that Byrd joined the growing ranks of Senate skeptics when it comes to new defense projects. In the past, he has supported many of these projects, including the antiballistic missile in 1969.

More recently, he supported the Senate Foreign Relations Committee's efforts to delay Carter's sale of seven Airborne Warning and Control System (AWACS) airplanes to Iran. As required by a 1976 arms sale law, Carter had notified Congress of his proposed sale and Congress had until Aug. 5 to block the sale. Members of the committee had been urging Carter not to force the issue because he was likely to lose. He finally backed off July 28 after repeated entreaties from Byrd, Humphrey, and an unexpected vote against him in the House International Relations Committee. A Senate aide said Byrd was offended that Carter took so long to postpone the sale.

Whatever Byrd's personal views on the merits of the two defense issues, his outspoken public statements were accepted warmly among a majority of Senate Democrats. "He has shown a timeliness as well as good judgment in speaking for the Senate's position on the B–1 and AWACS," Metzenbaum said.

CARTER RELATIONSHIP

Neither Carter nor Byrd appears comfortable at being a wheeler-dealer or engaging in the idle political chatter and ribaldry that enlivens Washington. Each is the son of the rural South who worked his way up the political ladder to a position of great power not because of alliances with a political machine or interest group but because of personal persistence, hard work and an instinct for the public mood.

But if neither of them owes anything to anyone else, least of all each other, their fates, in fact, are inextricably tied. Carter needs Byrd to steer through the Senate his plan for reforming government programs and processes. Byrd does not need Carter to help him attain a specific policy goal so much as to prove his ability to make the legislative process respond to national needs.

So far, their relationship can best be defined as distant but proper. When Byrd says, "I'm the President's friend, I'm not the President's man," he seems to be saying he is a "friend" less in a personal sense than in the sense that he can assist the President meet his goals.

Periodically, Byrd has criticized Carter's actions. When Carter called for the termination of 30 water projects across the nation, Byrd warned that the announcement jeopardized Carter's proposed income tax rebate pending in the Senate. A few days later, Carter scrapped the rebate plan. Byrd said that this criticism and others have not been directed at the President so much as at "the methodology of achieving goals."

Some early tension between the two reportedly has dissipated as Carter has moderated his criticism of Congress and begun to work more closely with its leaders. But, as a Senate Republican aide noted, "Byrd feels he knows more about the Senate than does Carter and he won't be pushed around." Another aide commented that Byrd, in responding to the views of his Senate peers, is "not afraid to draw lines with the White House," particularly when the Administration does not cooperate or consult with Congress.

Ted Stevens said Byrd has done "an excellent job of conveying to the executive branch the feeling of this part of the legislative branch." But the relationship has not been entirely one-way. Byrd's assistance in steering through the Senate a host of Carter proposals has been invaluable. From the Korean troop pullout and the neutron bomb to the Department of Energy and clean air legislation, Byrd has expedited consideration and resolution of important Administration goals.

Fred Wertheimer of Common Cause said Byrd has been as "essential" to the White House as has O'Neill to the House. "The absence of their strong leadership would have seriously hurt Carter's program," he said. Asked whether he agreed, Byrd said, "Yes."

As Carter's top legislative goals for energy, welfare reform and tax policy make progress through Congress and eventually hit the unpredictable wind-tunnel that can be the Senate floor, the President probably will rely on Byrd more and more.

If that happens, Byrd may finally convince the public that the workhorses of the Senate outperform its show horses.

SOME 20,000 MILES ON AMTRAK

Mr. PELL. Mr. President, one of the more exemplary jobs of oversight being conducted by a Member of the U.S. Senate is that of the distinguished junior Senator from New Hampshire, Senator DURKIN. As an active and concerned member of the Senate Commerce, Science and Transportation Committee, he has traveled unannounced on over 20,000 miles of Amtrak routes in an effort to understand better the problems our Nation's rail system faces. As a strong advocate of improved rail passenger service myself, and as a frequent train traveler I commend Senator DURKIN for his initiative and interest in evaluating accurately the needs of rail passengers and the entire rail system.

I ask unanimous consent that an article appearing in the Boston Globe recently reporting on Senator DURKIN'S commendable job be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

20,000 MILES CRISSCROSSING U.S. ON AMTRAK

(By Stephen Wermiel)

In Alfred Hitchcock's thriller "North by Northwest," Cary Grant runs into Eva Marie Saint on a train. In "My Little Chickadee," W. C. Fields meets Mae West on a train. Sean Connery's portrayal of James Bond includes a battle with hit man Robert Shaw on a train in "From Russia with Love." And more recently, the clickety-clack intrigue of trains has been romanticized in Agatha Christie's "Murder on the Orient Express" and the frolics of Gene Wilder and Richard Pryor in "Silver Streak."

My journey was to include neither adventure nor romance. Nor was it based upon chance encounter. It was my mission to join up with U.S. Senator John A. Durkin, a Democrat from New Hampshire.

With trepidation I advanced on South Station, Boston, managing much to my surprise to avoid being assaulted by the myriad drunks, muggers or pickpockets one imagines lurk in train stations.

Meekly, I purchased my ticket—fortunately I had a reservation number because my name was spelled wrong—and headed for the waiting room. Having spent my childhood in New York City, the term "train" has always brought back—with a shiver—memories of that city's subway system in rush hour when the struggle is to survive more than to reach a particular location.

But the very name of the train brought a tingle of excitement, and so I found Durkin and his 9-year-old son, John, and we boarded the Lake Shore Limited bound for Chicago.

For the better part of a year, the 41-year-old Durkin has been riding the rails. Not, mind you, as a frivolous seeker of adventure and new sights. Durkin, a member of the Senate Commerce Committee, which handles rail matters, has traveled more than 20,000 miles incognito, taking notes, observing performance of schedules and personnel, and taking stock of the nation's railroads to prepare a report for the Senate and to conduct public hearings in the months and years ahead.

"Overall," says Durkin, "the jury is still out on Amtrak. They have some good days and bad days, but the jury is still out . . . Not on whether we need rail service back in this country but on whether Amtrak is meeting that need."

In the category of bad days, Durkin has had more than his share. There was, for example, the trip last December on the James Whitcomb Riley, the train which leaves Washington and heads for Chicago via Virginia and West Virginia.

"First," said Durkin, "the train collided with a truck in the community of Converse, Indiana. It was a green pick-up and it just slid right into the train at a railroad crossing." At another town in Indiana the passenger train was delayed while a freight train passed first. Traffic at the crossing was backed up for blocks, Durkin said, noting that priority for freight trains is not consistent with Federal law but is a frequent problem, just the same.

"We were due in Chicago at 2:40 p.m. and I was booked on the Southwest Limited to Los Angeles at 5 p.m. Plenty of time," Durkin said.

"Instead, I got off and had to walk to the end of the track and over three or four tracks with my bags and all, and I just made it by the skin of my teeth. The Southwest Limited pulled out just as I got on the train," he said.

Amtrak is the National Railroad Passenger Corporation created by Congress in 1970. It opened its doors in May, 1971, and now operates passenger service subsidized by the Federal government over 26,000 miles of track, serving 495 stations.

According to the company's records, Durkin's experience is not unusual. In March, Amtrak was on time only 65 percent of the time, partly due to the unusually bitter winter. In March, 1976, the on-time performance was still only 75.3 percent.

"At the airlines, if they're late they give you a drink or help you make connections," said Durkin. "Amtrak, if they're late they scowl at you."

The train to Chicago pulled out three minutes late from South Station. Only five minutes into a 25-hour trip, I was already claustrophobic in my roomette with the pull-out everything—seat, bed, sink, toilet.

The steward in the car, Raymond Kindred, was a pleasant fellow who, although he scarcely looked 30, spoke as if he had been present at the maiden run of the Orient Express in 1883.

"You're going to share the sleeping car with a gang of Navy recruits, and if they are any trouble you just let me know," he said. I moaned. "I've seen them really tear the place up," he said.

Durkin is loath to recount his experiences because he doesn't want to sound overly critical. He is a believer in rail transportation, an amateur train buff.

"I'm not adding my voice to those who want to scuttle Amtrak," he said. "I want it to succeed. I hope it succeeds.

"It started with my uncle Dave Daley, my mother's brother," explained Durkin, who was born in Brookfield, Mass. "He was a union official and worked on the old Boston-to-Albany run at Springfield.

"He would always come visit us by train, and we'd go down to the Brookfield train station to meet him. When I was a kid, trains were pretty glamorous."

During his two Senate campaigns (the 1974 election ended in a draw and when the US Senate could not resolve the dispute, a new election was held in September 1975), Durkin said he would not stay behind a desk in Washington, that he would be different. "When you're reviewing a multibillion rail authorization bill, it's hard to really know what's happening," said Durkin. "Rather than starting in the Library of Congress reading memos, I started on the rails, and I'll work my way up to hearings," he said.

He informed Commerce Committe chairman Warren Magnuson (D-Wash.) of his plans and will be reimbursed for his travel and expenses which have come largely on weekends or during recesses in Congress. He has paid out of his own pocket for members of his family to travel.

Most of his travels have been limited to Amtrak except for two trips—1154 miles on the Southern Railway from Washington to New Orleans and 2880 miles on Canada's CP Rail from Montreal to Vancouver. He has traveled under assumed names, never identifying himself as a US Senator. "You really can get a lot done on a train, reading and writing," said Durkin, "and one of the beauties is that the phone never rings."

Durkin was minding his own business on the North Coast Hiawatha which travels the 2228 miles from Seattle to Chicago when he was approached by an Amtrak civilian employee. "Are you Mr. Durkin?" the man asked. The train was passing through Montana.

"I said I was," Durkin said. "He said vice president so-and-so of Amtrak would like you to have dinner tonight in the dining car on us. I said 'No, thank you,' and paid for my own dinner," said Durkin, who has also established his independence in the Senate. "I think a girl in the dining car recognized me." Durkin recalls, "because she had worked in the Senate dining room and was now working for Amtrak."

The Lake Shore Limited sped along through Massachusetts, rocking gently in the cradle of tracks. It passed Brookfield, the station now closed and in a state of disrepair.

This 1038-mile route started up Oct. 31, 1975. When it leaves Pittsfield and passes into New York state there is a 12-mile stretch of track out of service before it reaches Albany. The Pittsfield-Albany leg of the journey (which should take much less than an hour) was to take two-and-one-half hours on this day in May. Absurd.

Before it reaches Albany, the train lurches forward, backs up, switches tracks, and then pulls into Rensselaer just across the Hudson River because Albany no longer has its own railroad station.

Finally, with the help of Rep. Silvio Conte (R-Mass.), the transportation appropriations bill for the next fiscal year (1978) includes $4.1 million to repair the 12 miles of track.

"Everybody's got an Amtrak horror story," according to Durkin. "Everybody's been on a train that didn't make it."

That also holds true for Durkin. There was the electrical storm outside Providence which knocked out all the signals on the tracks, forcing the train to stop. "You sit there thinking, 'I hope the guy in back of us knows we're stopped,' " said Durkin.

There was the afternoon of Dec. 3, 1976—the regal-sounding Statesman from Boston to Washington, leaving South Station at 11:45 a.m.

"We got to Philadelphia and the conductor came on and said, 'Sorry, we're not going any farther tonight, folks,' " said Durkin.

"There was a derailment up ahead, so they herded us into the station. It was," Durkin said, "like the Titanic as they brought buses up to the station and all the crew rushed past us to fill up the first bus.

"We were really treated like cattle. The bus stopped in Baltimore and we got to Washington at 3 a.m."

As Durkin left the bus, the driver smiled and remarked. "You know, it's a helluva lot faster if you ride with us all the way."

On another excursion along the northeast corridor between Boston and Washington, the most highly-traveled of Amtrak's routes, the train hit a railroad tie and was forced to stop for a while.

The major problems, according to Durkin's experience, are threefold. There is, first, the malfunctioning of Amtrak equipment which is being replaced steadily with more modern cars although even the new cars leave much to be desired.

Second, the railroad beds themselves are old, deteriorating and badly in need of repair. Along the northeast corridor, roadbeds include curves which cannot be negotiated at high speeds. In most cases, with the exception of the northeast corridor, Amtrak does not own the roadbeds. It travels over track owned by freight carriers.

Third, "There is no esprit de corps among employees," said Durkin. "Often they would be happier if you missed the train."

There was one near miss in El Paso, Tex., riding the Sunset Limited from New Orleans to Los Angeles.

"I got off the train to call home," said Durkin. "The phone was in the station. You have to gamble because when they are running late, they try to make up time.

"Thank God, the line was busy, because I hung up and started to walk back. Usually, you can see a whole line of red-jacketed porters standing at the doors to their respective cars.

"But as I walked back, there was only one porter and he was just picking up the stairs as the train started to move out. If the phone hadn't been busy, I would've spent the night in El Paso. I just made it," said Durkin.

We have arrived in Albany, slightly early. But we must wait for the train from New York City which carries with it the dining car.

It is now 9:30 p.m. and we have been on the train since mid-afternoon, unable to get a meal until now.

This trip is costing $112 one way, $60 without the sleeping car. For $91 I tell myself I could fly coach to Chicago and have a meal in flight.

Placing the ultimate trust in the steward, we are told we can simply board the dining car when it pulls in and find our own rooms later, in transit, once the two trains have merged.

Dinner, a 10-ounce steak, is quite good despite the constant reminders of the fact that I am on a train: water from the pitcher on the table sloshing into my wine glass as the train rocks to and fro; coffee cups filled only half way so as not to tempt fate.

Much to my surprise, the sleeping car containing my roomette is, as the steward had predicted, now at the end of the elongated train, my belongings intact.

It has not been all mishaps for Durkin. "It really is a very pleasant way to travel," said Durkin. "I can't think of a better appeal than the tourist market. You really can see the country."

Many of the sights are memorable. The glorious sunset in El Paso, for example. "There were very few clouds," he said, "and they were situated over the mountains, acting almost like a mirror. I have never seen such colors."

Coming into Los Angeles on the Sunset Limited, the train loops around for a few miles and actually faces east for a while, Durkin recalled. "The sun was rising in front of us, and it seemed for a while as though the sun were actually rising in the west," he said.

On the Broadway Limited from Washington to Chicago, there is the horseshoe curve at Altoona, Pa. In New Orleans, there is the wonder of the four-mile-long Huey Long Bridge.

One train goes soaring across the Great Salt Lake on a bridge in Utah while another winds among the volcanic caves west of Albuquerque. Still another climbs through the Cascades in Oregon and highlights the rock formations crossing the bay into San Francisco.

"Going through Texas, you begin to understand the importance of water," said Durkin. "Where there's water, there are people and prosperity and things are growing. It's that simple."

The most magnificent ride of all, however, is on CP in the Canadian Rockies, according to Durkin. The train edges along cliffs and a glance down reveals tunnels and passages the train will come to or has been through hundreds of feet below.

On many of the trains in the western United States as well as in Canada, there are dome cars with a second level topped by a glass or plastic bubble

They are not all alike. On the Canadian trains, said Durkin, the cars are washed often so the view of the mountains is that much clearer. The Amtrak cars are rarely washed and often feature plastic windows that are scratched and distort the scenery, he said.

A technician passing through my car remarks, "My time slips say Conrail, my paycheck says Amtrak." Conrail is another government corporation created to manage bankrupt freight lines. It owns much of the deteriorating track on which Amtrak runs.

Crossing upstate New York, I settle into my roomette, all but needing a slide rule to figure out how to lower the bed and still have room to stand in the compartment which has not a spare inch of space. Since the bed covers the toilet, I pray for a strong bladder during the night and nod off to sleep.

It is a remarkably good sleep, although I awake each time the train stops during the night—Syracuse, Rochester, Buffalo and Erie, Pa.

There is another stop after Erie. I am told later by the steward that a freight train crossed ahead of us. "By law," the steward said, "passenger trains go first, but the freight people don't want us. Dead sheep and cows and turnips are much less trouble. They don't need air conditioning and blankets."

"This fellow is very friendly," commented Durkin of the steward. "Often they are barely civil.

"They could, with very little expenditure of money, make the train more pleasant and more safe for senior citizens and children.

"Why not have a television car? If you can have a smoking car, or on the Broadway Limited there is a piano bar, then why not have a game room for kids, too?

"The attitude is 'We're here and if you want to jump aboard, fine, but don't expect much.' That has to change.

"On the CP and Southern, there was a difference in the jobs. Porters talked to you, were friendly. They were happy to see you. They didn't seem to be saying 'Oh, Jesus, not another one.' "

Another problem, said Durkin, "is they run out of supplies. They rarely run out of coffee, but they run out of beer and sandwiches in the club car, and it's happened on enough trains that you've got to wonder about the procurement problems in the system."

There is not much cleaning during the

trip, either, Durkin complained. Trash piles up in the club car, and "I've been on one Metroliner (Boston to Washington) that smelled like a urinal."

If the personnel are not always friendly, Durkin said, the passengers are usually a treat. "There's always some guy who takes up station in the dome car and can tell you everything—the name of every mountain, every train, every river, every spike in the road.

"In the dining car, you are usually seated with other people. They try to keep three or four at a table. They are always train buffs," Durkin said.

Scheduling is not always done for the convenience of travelers.

For example, a passenger can catch the Southwest Limited from Los Angeles to Chicago. It is scheduled to arrive at 2:35 p.m. If the passenger is traversing the country, he may want to grab another train east, to Boston or New York. He cannot. Those trains leave at 2:25, ten minutes earlier.

I have extracted myself from my roomette with the ease of a person using a shoehorn. Walking forward to the dining car for breakfast, the coach cars smell like people have been sleeping in them all night.

In the club car, the bartender is too busy to refill the coffee urn. Breakfast is again a pleasant experience.

The train is chugging along in its path, submerged between two mounds of earth like an animal furrowing a canal. The city of Cleveland pops up over one mound like a mirage, and after a brief stop, is gone just as quickly.

The Lake Shore Limited is now running one hour and 25 minutes late, but the steward is describing a corridor of straight track 133 miles known as the Elkhart (Indiana) airline. "An airline," steward Raymond Kindred explains, "is railroad parlance for straight track. Several years back, in fact, a Florida train company called the Seaboard Airline went public and investors thought they were buying into airplanes.

"We can make up an hour with a good engineer, hitting speeds of 85 to 90 miles per hour," Kindred said.

Toledo is the first stop since last night that is long enough for passengers to disembark for five minutes. The Navy recruits race for the magazine and tobacco stand, returning to report it had shut its doors as they arrived. Next stop, Chicago.

"On every train I've been on," Durkin said, "there's been one major equipment breakdown, either lights or heat or water or the engine."

On the Broadway Limited, there was no hot water in the car, said Durkin. Once the heat came on it, blasted you out of the car to the club car, he said.

"It seems when the heat goes on in the winter, it stays on until the spring, regardless of what the atmosphere is," he said.

On the James Whitcomb Riley, he had to switch cars because there was no heat at all. On the Coast Starlight between Seattle and San Francisco, "the dining car was 125 degrees first, immediately upon leaving the station. Then it continued just malfunctioning," he said. It was not caught before the train left and it did not work for the remainder of the trip.

The Zephyr from San Francisco to Denver was more than an hour late because the engine broke down outside of Cheyenne, Wyo.

"Take a coach and turn off the air conditioner in the hot sun," said Durkin, "and you turn it into a cattle car. You only need to do that once and you turn off an entire generation of travelers."

On the Southwest Limited, there was no water and the toilet would not flush. "Sometimes," Durkin said, "it just seems like the great aggravator is at work."

The only uneventful trip for Durkin was the Silver Meteor from Washington to Florida. He got off in Winter Haven and got the next train back, 1792 miles round trip. He is also fond of the Night Owl which leaves Boston at 10:30 p.m. and arrives in Washington at 8:30 the next morning. "You can," said Durkin, "read for a while, get a good night's sleep, and arrive in time for your first appointment."

The Lake Shore Limited sped along past Elkhart, stopping at South Bend, Ind. The University of Notre Dame was not visible.

"The train is pretty full," remarked Kindred, the steward. "It is not making much money, but it is not losing much either. Families are using it more and more. We had to turn 200 people away at Christmas."

The winter, he said, was devastating with delays of six hours because of snow. The largest of many Buffalo storms delayed the Boston-bound train 24 hours.

In March, the Lake Shore Limited was on time 56.5 percent of the time. For March 1976, it was 58.1 percent.

The Lake Shore Limited carried 18,636 passengers in March, down 4 percent from March 1976 (Amtrak carries 18 million in a year).

Rolling along at a swift clip, the daydream world of the Lake Shore Limited is shattered abruptly by the miles and miles of steel mills at Gary, Ind.

Chicago looms on the horizon.

"We were an hour and 25 minutes behind and we're here right on time," Kindred beamed with pride, his prediction of the Elkhart airline having held true. "How's that for good work?"

On this sunny, pleasant day in May, I left the Lake Shore Limited behind, still not a committed train buff, and headed for O'Hare Airport.

Durkin, determined to make the railroads in this country work for people, looked around Chicago's Union Station for another train to take.

TIME-LIMITATION AGREEMENT—S. 274

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as Calendar Order No. 371 is called up and made the pending business before the Senate, there is a time limitation on the bill of 1 hour, the time to be equally divided between Mr. STENNIS and Mr. THURMOND; that there be a time limitation on any amendment of 30 minutes; that there be a time limitation on any debatable motion or appeal, amendment in the second degree, or point of order, if such is submitted to the Senate, of 20 minutes; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSFER OF S. 1626 TO UNANIMOUS CONSENT CALENDAR

Mr. CRANSTON. Mr. President, I ask that the clerk transfer calendar No. 366, S. 1626, to the Unanimous Consent Calendar.

The PRESIDING OFFICER. It will be so transferred.

EXTENSION OF TIME FOR FILING CONFERENCE REPORT ON S. 275

Mr. CRANSTON. Mr. President, I ask unanimous consent for authority for the Committee on Agriculture, Nutrition, and Forestry to have until midnight tonight to file the conference report on S. 275, the Agricultural Act of 1977.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate go into executive session to consider four nominations in the Department of Justice which are on the executive calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the following nominations in the Department of Justice:

Robert E. Raiche, of New Hampshire, to be U.S. marshal for the district of New Hampshire; Hugh Salter, of North Carolina, to be U.S. marshal for the eastern district of North Carolina; Juan G. Blas, of Guam, to be U.S. marshal for the District of Guam; and Donald D. Forsht, of Florida, to be U.S. marshal for the southern district of Florida.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider the votes by which the nominations were confirmed en bloc.

The PRESIDING OFFICER. Without objection, the motion is in order.

Mr. ROBERT C. BYRD. I so move.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislation business.

There being no objection, the Senate resumed the consideration of legislative business.

TIME-LIMITATION AGREEMENT—CONFERENCE REPORT ON H.R. 7933

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on the DOD conference report on H.R. 7933 and any material in relation thereto, there be a 1-hour time limitation, to be equally divided between Mr. STENNIS and Mr. YOUNG, with the understanding that this agreement may be vitiated by Mr. YOUNG.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until tomorrow morning at 9 o'clock.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR STENNIS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized tomorrow morning, the distinguished Senator from Mississippi (Mr. STENNIS) be recognized to call up the DOD conference report on H.R. 7933.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF SENATE CONCURRENT RESOLUTION 43 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the DOD conference report tomorrow, the Senate resume consideration of the second concurrent resolution on the budget, Senate Concurrent Resolution 43.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF CONFERENCE REPORT ON S. 275 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of the second concurrent resolution on the budget—and this consent is not required, because Mr. TALMADGE may call up his conference report on the farm bill, S. 275, it being privileged, if he wishes—I ask unanimous consent that he be recognized at that point to call up such conference report, if he wishes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION TOMORROW OF S. 2057

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition tomorrow of either the second concurrent resolution on the budget or the farm bill conference report, whichever the case may be, as the circumstances then prevail, once the disposition is consummated, the Senate then proceed to the consideration of the energy conservation bill, S. 2057, with the understanding that action on the budget waiver must precede action on that bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY TO RECEIVE BUDGET WAIVER RESOLUTIONS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that various budget waivers which are expected to reach the floor at any time may be received if the Senate recesses prior to their arrival, and that they may be reported as having been received today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO CONVENE AT 10 A.M. MONDAY NEXT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes on Monday it convene at the hour of 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the provision in the order which was previously entered with respect to the budget waiver on the energy conservation measure and the effect of which would be to waive the 3-day rule in respect of the report on the budget waiver resolution be subject to the approval and therefore the vitiation of and by respectively Mr. BELLMON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. We have no objection to the same provision applying to H.R. 5027 subject to Senator BELLMON's concurrence.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the 3-day rule be waived in connection with the budget waiver on Calendar Order No. 358, H.R. 5027, an act to amend title 38 of the United States Code to clarify the requirement that medical services be provided by the Veterans' Administration in certain cases, subject to the approval of Mr. BELLMON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I thank the majority leader.

Mr. ROBERT C. BYRD. I thank the distinguished assistant Republican leader.

ORDER FOR RECOGNITION OF SENATOR BARTLETT ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday next, after the two leaders have been recognized under the standing order, the Senator from Oklahoma (Mr. BARTLETT) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9 A.M.

Mr. CRANSTON. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate now stand in recess until 9 o'clock tomorrow morning.

The motion was agreed to; and at 9:06 p.m. the Senate recessed until tomorrow, Friday, September 9, 1977, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate, September 8, 1977:

DEPARTMENT OF STATE

Arthur J. Goldberg, of the District of Columbia, to be Ambassador at Large and U.S. Representative to the Conference on Security and Cooperation in Europe (CSCE) and Chairman of the U.S. Delegation to the CSCE.

Esteban Edward Torres, of Virginia, for the rank of Ambassador during the tenure of his assignment as the U.S. Permanent Representative to the United Nations Educational, Scientific, and Cultural Organization at Paris, France.

ACTION AGENCY

Carolyn R. Payton, of the District of Columbia, to be an Associate Director of the ACTION Agency, vice John Dellenback, resigned.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

Bertram R. Cottine, of the District of Columbia, to be a member of the Occupational Safety and Health Review Commission for a term expiring April 27, 1983, vice Robert D. Moran, term expired.

MISSISSIPPI RIVER COMMISSION

Brig. Gen. William Edgar Read, [redacted] U.S. Army, to be a member of the Mississippi River Commission, under the provisions of section 2 of an act of Congress,

approved 28 June 1879 (21 Stat. 37) (33 U.S.C. 642).

CONFIRMATIONS

Executive nominations received by the Senate September 8, 1977:

DEPARTMENT OF JUSTICE

Robert E. Raiche, of New Hampshire, to be U.S. marshal for the district of New Hampshire for the term of 4 years.

Hugh Salter, of North Carolina, to be U.S. marshal for the eastern district of North Carolina for the term of 4 years.

Juan G. Blas, of Guam, to be U.S. marshal for the district of Guam for the term of 4 years.

Donald D. Forsht, of Florida, to be U.S. marshal for the southern district of Florida for the term of 4 years.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

WITHDRAWAL

Executive nomination withdrawn from the Senate, September 8, 1977:

Peter E. Corning, of New York, to be U.S. attorney for the northern district of New York for the term of 4 years, vice James M. Sullivan, Jr., resigned, which was sent to the Senate on June 29, 1977.

EXTENSIONS OF REMARKS

PRAISES ARTICLE BY REPRESENTATIVE CLARENCE LONG

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 7, 1977

Mr. SIMON. Mr. Speaker, our colleague, Representative CLARENCE LONG of Maryland, had an article in the spring issue of the magazine International Security under the title, "Nuclear Proliferation: Can Congress Act in Time?"

It merits the attention of all of us, and I am taking the liberty of having it reprinted in the RECORD:

NUCLEAR PROLIFERATION: CAN CONGRESS ACT IN TIME?

(By CLARENCE D. LONG)

The threat of nuclear proliferation can scarcely be overstated. As many as forty countries, typically underdeveloped and unstable, may have nuclear weapons capabilities by 1990.[1] More likely than an all-out nuclear war beginning between superpowers is a nuclear exchange between small countries, and a nuclear war anywhere has to be assumed to risk escalation to superpower involvement whether by deliberate intervention, or by miscalculation, bluff, or panic. Even between two small nations, a nuclear war could result in unprecedented death and destruction, with the United States being called upon to supply billions of dollars for humanitarian relief, and with environmental damage that would scarcely respect borders.

Paranoia caused by nuclear weapons proliferation would complicate defense planning.[2] The United States could be compelled to prepare against a variety of threats from numerous challenges, building us a vastly increased nuclear arsenal with no clear strategic purpose. How could the United States signal in advance its determination to retaliate with unacceptable damage against a nuclear attack if there were no way of identifying the attacker against whom we would then retaliate? Such an attack could be delivered by terrorists or in bombs exploded in ships of false national registry anchored in our harbors. Indeed, the objective could be to provoke us into nuclear war with the wrong nation.

Damage to our own civil liberties could hardly be avoided. National fright typically leads to a huge and pervasive police apparatus. Who can say that our democratic traditions would survive, considering how they have caved in under less pressure in the past?

This article will show that keeping countries from nuclear power technology, with its accompanying potential for producing nuclear weapons, could save money for the United States and preserve for the poor nations opportunities to improve standards of living and of education—opportunities otherwise lost because developing nations, even aided by the United States, cannot afford both high-capital nuclear technology and better lives for their people.

Can the spread of nuclear weapons and technology be stopped—and stopped in time?

Underlying an answer to this question are three premises: (1) As far as technical knowledge is concerned, the genie is out of the bottle. (2) The countries with the ability to suppy technicians, reactor hardware, and nuclear fuel have so many conflicting and even devious interests, that any anti-proliferation agreement must be at the mercy of the lowest common proliferator, with long delays and more loopholes than anti-proliferation clauses. (3) The consequences of nuclear weapon proliferation are so fraught with peril that efforts to contain it should go full speed ahead even though the superpowers can be blamed for asking others to refrain from producing "kilotonnage" when they cannot keep themselves from piling up "megatonnage." In any case, so urgent are the problems of both small country weapon proliferation and superpower expansion of existing nuclear arsenals that the efforts to cut back either one must proceed without waiting for a successful solution of the other.

In view of the difficulties of getting cooperation between nuclear and nonnuclear weapon states, are there steps to check proliferation that the United States can take unilaterally? Do unilateral steps preclude cooperative agreements later on? What are the obstacles, political and economic, domestic and international? What is the role of Congress in United States efforts? How willing is Congress to do anything really effective? And in time?

There are four classes of action that the United States can take to discourage nuclear proliferation. First, the United States can stop promoting and subsidizing nuclear power exports, keeping in mind that a nuclear power plant is the major step to nuclear weaponry. The engineers and physicists needed for nuclear explosives would be present in a power program. So also would be the plutonium, since the standard size 1,000 megawatt power reactor of current design would produce annually spent fuel containing 200 kilograms of plutonium—or enough for forty small nuclear explosive. All that is required to separate the plutonium from the radioactive wastes is a reprocessing plant which, for a modest weapons program, would require as few as eight engineers with standard training and would cost as little as $25 million (a small fraction of a power reactor's cost).[3]

Second, the United States can move on many fronts to encourage the use of nonnuclear energy, thus providing better energy answers, economic and environmental. Nations insisting on going nuclear for military reasons could no longer wear the cloak of an energy solution.

Third, the United States can redirect its foreign aid away from nations which insist on developing nuclear explosives. Inasmuch as there can never be more than a tiny fraction of the foreign aid needed to go around, this redirection would be no more than good economics—allocating limited resources to those nations in which the aid will do the most good for the least cost. No attempt to steer foreign aid away from less developed countries (LDCs) that use it to finance nuclear technology can ignore the fact that much American foreign aid goes out through multilateral development banks to such notorous proliferators as India. These institutions should be persuaded by the United States to deny loans to nations that are using the money directly or indirectly for nuclear proliferation. If American influence fails, we can reduce our contributions.[4]

Finally, at the same time the United States can press other nuclear suppliers to agree to stop proliferation. Our bids for cooperation would, if anything, be strengthened by the above-suggested demonstrations of good faith and good example.

UNITED STATES SUBSIDY OF NUCLEAR PROLIFERATION

Most states that have achieved a nuclear weapons capability, other than the Soviet Union and the People's Republic of China, have benefited from promotion and direct and indirect subsidy by the United States Government.[5] The United States has promoted nuclear energy exports principally through the Export-Import Bank.

Since 1959, the Export-Import Bank has provided loans and guarantees for almost $4.8 billion dollars of exports of nuclear equipment and fuel through sixty-eight loans totaling $3.2 billion and thirty-four financial guarantees of $1.6 billion in commercial bank lending.

Commercial banks, with Export-Import Bank guarantees, have provided a substantial portion of the funding—generally 40 to 45 percent, and typically are first to receive any repayment. In an industry-by-industry calculation for Fiscal Year 1975, the Congressional Budget Office concluded that the Export-Import Bank loans for nuclear exports, when compared with sixteen other industries, had the longest average terms and received the second highest proportion of subsidy.[6]

The Export-Import Bank has financed fifty of the sixty nuclear reactor exports by the United States; of the ten reactors exported without Export-Import Bank financing, only three exports of small reactors for Europe in the 1960s were not accompanied by some financial subsidy.[7] Subsidy has been critical to almost all American nuclear reactor exports.

The United States had provided many other forms of financial aid to foreign nuclear programs over the last twenty years. This assistance, totalling at least $311.8 million as Table 2 shows, has been provided through the Atoms for Peace and other programs administered by the Atomic Energy Commission; through the Agency for International Development (AID); and through the International Atomic Energy Agency (IAEA).

By 1958, the Atomic Energy Commission had agreements governing American nuclear trade and cooperation in force or almost ratified with forty-three countries.[8] Under these agreements, the United States exported research reactors with nuclear fuel and training to Argentina, Brazil, Taiwan, Iran, Korea,

Footnotes at end of article.

Pakistan, Israel, and Spain—all now thought to be interested in having nuclear weapons.[9]

The cooperative research programs between the United States and the European Atomic Energy Community (EURATOM) and between the United States and Canada involved assistance to Euratom and to the Canadian development of the CANDU heavy water reactor, but the expected benefits differed with each program. The goal of the United States-EURATOM Program, which included two of the four deferred-payment nuclear fuel contracts (twenty-year loans at 4 percent interest including a ten-year grace period on principal repayments) was to persuade the Europeans to adopt American light-water reactor technology, so that American nuclear suppliers would benefit from exports; instead, it helped create the international competition which now threatens United States nuclear export markets. The goal of the United States-Canadian Program was to upgrade the quality of United States research in heavy water reactors by taking advantage of Canadian expertise.[10] Instead, the Canadian reactors also began to compete with United States exports.[11]

Most of the AID assistance to other nuclear programs has gone to India for the Tarapur nuclear power plant (92 percent of total AID nuclear assistance to India), but twenty-six countries have benefited from AID-financed nuclear training, reactor parts, nuclear material, and heavy water. The recipients have also included those reportedly near nuclear weapons: Israel, Korea, Pakistan, Spain, Taiwan, Iran, and Brazil.[12]

TABLE 1.—EXPORT-IMPORT BANK OF THE UNITED STATES: AUTHORIZATIONS FOR NUCLEAR POWERPLANTS AND TRAINING CENTER SUMMARY BY COUNTRY FROM INCEPTION THROUGH DEC. 31, 1976

[Dollar amounts in thousands]

Country	Export value			Number of plants	Eximbank direct loans [1]			Loans	Eximbank financial guarantees			Number of guarantees
	Equipment	Fuel	Total		Equipment	Fuel	Total		Equipment	Fuel	Total	
Net authorizations:												
Argentina		$18,853	$18,853	1		$13,466	$13,466	1				
Brazil	$164,162	27,572	191,734	1	$137,753	17,527	155,280	1	$4,996	$3,644	$8,640	1

TABLE 2.—OTHER U.S. AID TO NUCLEAR PROGRAMS, 1953–77

Program	Purpose	Funding/number of countries
AEC Atoms for Peace (1953–62)	Grants for research reactors	$9 million (26).
	Grants for research equipment	$2.7 million (19).
United States–Euratom, joint research program (1959–69)	To encourage Europe to adopt U.S. reactor technology	$28 million (6).
AEC deferred-payment fuel contracts (1962–65)	Part of United States-Euratom joint research program	$88.8 million (3).
United States-Canada joint research program	Share research on heavy water reactor technology	$6 million (1).
A.I.D. (1962–74)	Capital, technical, and program assistance	$83.3 million (27) (of this amount, $72 million went to India for the Tarapur reactors).
U.S. contributions to the IAEA (1958–77)	Promotion of peaceful uses of nuclear energy	$93.1 million (estimate of U.S. contributions for nonsafeguards activities—80 percent of total U.S. contributions).
Various activities (1953–present)	International nuclear training, educational programs, conferences and exhibits.	No funding data available.
Total additional U.S. contributions to other countries' nuclear programs.		$310.9 million.

Sources: "U.S. Financial Assistance in the Development of Foreign Nuclear Energy Programs," General Accounting Office, May 28, 1975; Bureau of International Organizations, Department of State; Division of International Affairs, Energy Research and Development Administration.

United States support for the IAEA has helped substantially to spread nuclear technology, in spite of the supposed safeguards. Although the IAEA was conceived by President Eisenhower as a repository of all the world's nuclear weapon material in order to reduce pressure for proliferation,[13] most of its budget and activities since 1958 have gone to promote nuclear activities; its safeguard function is understaffed and underfunded.[14]

Furthermore, the United States has trained almost 13,500 foreign nationals since 1945 in nuclear physics and related fields. As part of our contribution toward creating the world's newest nuclear power, since 1955 the United States has trained 1,367 Indian technicians.[15]

Between 1970 and 1975, the United States trained nearly 1,500 nationals of forty-one countries in nuclear reactor technology, plutonium recycle/reprocessing, uranium enrichment, and related crucial disciplines, the overwhelming majority (1,300) for nations with sophisticated nuclear programs and therefore technically near nuclear explosive capability. Table 3 provides a breakdown by country and category (showing proximity to explosive capabilities) of the numbers receiving training:

Particularly significant for weapons development is that the United States trained scientists for seven nations in plutonium recycling/reprocessing, including Taiwan, Spain, and India.

TABLE 3. Training of Foreign Personnel in the United States (1970–75)

[In reactor technology, plutonium recycle/reprocessing uranium enrichment and related disciplines]

National	Number of nationals trained
Category O/O+ (Nations which have nuclear weapons/explosives):	
France	38
Great Britain	27
India	22
U.S.S.R.	3
Category I (Nations with full access to weapons-grade material and with broad-based technology support):	
Belgium	6
Canada	6
Germany (West)	155
Italy	127
Japan	281
Netherlands	7
South Africa	4
Sweden	16
Taiwan	355
Category II (Nations with limited weapons-grade material sources and some nuclear technology program):	
Argentina	7
Australia	8
Brazil	72

Table printed in *Congressional Record*, September 22, 1976, pg. H–10856.

The India case illustrates the "wrong-headedness" of American policy. More than ten years ago, India was known to have a reprocessing plant not under international safeguards, but the AEC recommended nevertheless that the United States provide "encouragement and assistance toward the recycle of plutonium produced in India's nuclear power plants," at the same time making the Orwellian assertion that such help was "of direct pertinence to encouragement of peaceful uses and deterrence of military uses."[16] The reverse, of course, was true; the weapons-grade plutonium that comes from reprocessing can as well be used for nuclear explosives as for nuclear fuel.[17]

Concern over continuing the American training of foreign nationals in nuclear technology led the House of Representatives during the consideration of the Export Administration Act Amendment (H.R. 15377) in September 1976, to adopt the Fraser-Long amendment, calling for a six-month study by the Executive Branch on the extent to which—

"the education and training of foreign nationals within the United States in nuclear engineering and related fields contribute to the proliferation of explosive nuclear devices or the development of a capability of producing explosive nuclear devices." [18]

Ford Administration opposition prevented the Senate from going to conference and the provision was not enacted.

To illustrate the crucial role played by the United States in underwriting the spread of nuclear technology around the world. Table 4 lists five categories of American aid given to twenty-two low-income near-nuclear countries.

Nuclear power has been further disseminated around the world by the United States subsidy of its domestic nuclear industry. The large accumulations of spent nuclear fuel which may be reprocessed into plutonium intensifies the threat of weapons spread. Thus, the United States has sent abroad the doubtful word that nuclear power is a most modern and inevitable form of energy. Worse, the creation of a sizable nuclear industry has set in place powerful interests among industry, labor, and the universities that bitterly oppose any nuclear restraints as a threat to their investments, their jobs, and their consulting fees. The nuclear industry, the Atomic Energy Commission (now the Energy Research and Development Administration), and the Joint Atomic Energy Committee have so far stymied efforts to restrain nuclear proliferation. Domestic subsidies have ranged from direct government expenditures, to tax breaks, to below-cost charges for nuclear fuel and waste disposal.

[1] The list of countries was derived from the Wohlstetter Report, "Moving Toward Life in a Nuclear Armed Crowd?," pp 36–37 and 39–40. Several countries which had received research reactors from the United States, were also included. Most European and developed nations were not included in order to provide a list of the small, lower-income countries generally discussed as the most likely new nuclear powers. South Africa is not a low-income country but was included because it is often mentioned as interested in developing nuclear weapons.

[2] AEC assistance was provided under the atoms-for-peace program and included grants for research reactors and other nuclear research equipment.

[3] Sensitive material includes uranium with 20 percent or more uranium-235, plutonium, uranium-233, and heavy water. The designation "L" signifies a large quantity of sensitive material, and the designation "S" signifies a small quantity. The significance of uranium-235, uranium-233, and plutonium is that all three substances can be used to make nuclear weapons. The significance of heavy water is that it can be used as a moderator in a reactor fueled with natural uranium, which is easier to obtain than enriched uranium fuel. India used a heavy-water-moderated research reactor to obtain the plutonium for its nuclear explosive, and the United States provided 10 tons heavy water for that reactor. If a country received more than 10 kilograms of uranium with 20 percent or more uranium-235 or more than 10 tons of heavy water, it was designated "L". If not, it was designated "S". No country received more than 700 grams of plutonium or more than 5 grams of uranium-233.

[4] AID funding includes capital assistance and technical assistance financing of foreign nuclear energy projects and activities cumulative as of Sept. 30, 1974, and also, program assistance financing of nuclear equipment and materials from July 1968 to June 1974. AID has not funded foreign nuclear programs since 1974.

[5] Personnel trained from 1955 to date. Data from Office of Assistant Administrator for International Affairs, ERDA, February 1977.

Export Reorganization Act of 1976, hearings of the Committee on Government Operations, U.S. Senate, 94th Cong., 2d sess., on S. 1439, p. 18–19 and p. 813. Letter Feb. 2, 1977, from Norman H. Brand, Chief, Visits and Assignments Branch, Office of International Program Implementation, International Affairs Division, ERDA.

THE PAST ROLE OF CONGRESS

The "peaceful" nuclear explosive detonated by India in May 1974 aroused the House of Representatives to a spate of legislative activity, including the passage of an amendment to the International Development Association (IDA) Authorization bill requiring the United States representatives to the International Development Association to vote against any loans to India.[19] At about the same time, the House passed (194 to 191) an amendment to the International Nuclear Agreements Congressional Review Act (H.R. 15582), requiring prior congressional approval of all nuclear agreements. The amendment was thrown out in the House-Senate Conference of the Joint Atomic Energy Committee (a mock conference in which the Committee met with itself), even though the Senate had almost passed a similar amendment.[20]

The Indian explosion prompted other bills, amendments, and statements on the House and Senate floors. The FY 1975 Foreign Aid Authorization bill, passed in December 1974 and now public law, contained a provision prohibiting the use of funds for nuclear reactors or nuclear reactor fuel for Egypt or Israel. Also included in the 1975 authorization was an amendment earmarking funds for the much-needed strengthening of IAEA safeguards.[21]

These modest steps paved the way for a heightened sensitivity to nuclear proliferation in the last months of the 94th Congress. Environmentalists and public interest groups set out to awaken the public and alert key Congressmen and Senators to the danger. In March 1976, Representative Richard Ottinger took the lead in criticizing continued United States nuclear fuel shipments to India. His efforts and those of interested organizations resulted in the first public hearings (July 1976) on a United States nuclear export license. The Nuclear Regulatory Commission suspended further nuclear fuel shipments to India until more effective nuclear safeguards could be devised.

Any efforts by Congress to stop promoting nuclear energy/weapon proliferation owed nothing to its leadership, the Ford Administration, or to the Joint Committee on Atomic Energy. This Committee, the only joint committee of Congress with legislative authority, sought to block or gut every congressional attempt at strong nonproliferation measures, thus continuing to demonstrate that it was more responsive to the industry and to the Executive than to the Congress. Indeed, until March 1976, the Joint Committee had held only one hearing on nuclear proliferation in five years, and, of the seven nuclear export measures reported by the Joint Committee between 1971 and 1976, five authorized increases in exports and none undertook seriously to limit exports.

In the Senate, the Committee on Government Operations under the leadership of Senator Abraham Ribicoff, undertook a two-year effort to draft legislation to combat nuclear proliferation. The Joint Atomic Energy Committee opposed Ribicoff's effort under the guise of jurisdictional questions. The Government Operations Committee's work during 1975 and 1976 was largely responsible for the drafting of S. 3770 (H.R. 15273), the Nuclear Explosive Proliferation Control Act of 1976, which set forth a com-

prehensive national proliferation policy.[22] Senator Stuart Symington succeeded in adding to the International Security Assistance and Arms Control Export Act of 1976 an amendment to cut off foreign aid to countries receiving sensitive nuclear fuel reprocessing or enrichment facilities; however, the amendment was weakened in House-Senate Conference to allow the President to waive the prohibition on aid under certain circumstances.[23]

Increasing disenchantment with the Joint Committee in 1976 was indicated in the House by the support generated by the Long proposal to set up a Select Committee on Nuclear Proliferation and Nuclear Export Policy. House Resolution 951 had 143 House sponsors, including Morris Udall, John Brademas, Philip Burton, and Peter Rodino, and the endorsements of the many national organizations concerned over nuclear proliferation.[24]

In the final days of the 94th Congress, the Joint Committee killed two bills which had been reported favorably by the Senate Foreign Relations Committee and the Senate Government Operations Committee. The version of the Nuclear Explosive Proliferation Control Act of 1976 (H.R. 15419) reported by the Joint Committee was gutted by Administration amendments accepted in the Joint Committee without debate.[25]

The 94th Congress adjourned on October 1, 1976, without enacting any of the following nonproliferation proposals:

Four related bills (S. 3770, two versions of H.R. 15419, and the Percy substitute for S. 3770) to establish a national nonproliferation policy with supporting international negotiations and limitations on American nuclear exports.

An amendment to the ERDA Authorization bill (Sec. 201 of H.R. 13350) to restrict the export of enriched uranium to countries that have not ratified the Nuclear Non-Proliferation Treaty.

An attempt to add nuclear export limitations and restrictions on nuclear fuel reprocessing to the Export Administration Act Amendments (the Zablocki-Findley provision, Section 18 of H.R. 15537).

An amendment (Fraser-Long amendment) to the Export Administration Act Amendments which had passed the House, to require a study of American nuclear training of foreign nationals.

House Resolution 951 to establish a House Select Committee on Nuclear Proliferation and Nuclear Export Policy.

The Joint Committee on Atomic Energy had come to be seen as a major roadblock to a strong policy of nuclear export restraint. After the close of the 94th Congress, retirements and defeats greatly altered the Joint Committee's make-up, especially on the Senate side, and set the stage, along with the recommendation of the Senate Committee on Committees, for further action to curb its power.

To do this, Representative Jonathan Bingham (D–NY), with my help and that of Representative Ottinger and others, led a successful fight in the 95th Democratic Caucus of early December 1976 to amend the House rules to strip legislative authority from the Joint Committee on Atomic Energy and transfer its jurisdiction to several standing committees in the House, with the nuclear export responsibilities going to the Committee on International Relations. This action was ratified by the full House when it convened on January 4, 1977.

LEGISLATIVE FOR THE 95TH CONGRESS TO END EXPORT PROMOTION

Major reforms, based on the stronger bills from the 94th Congress are now being drafted,[26] and action can be expected on those bills as well as on several bilateral nuclear agreements and on certain applications for export licenses now pending before the Nuclear Regulatory Commission.

The following is an outline of nine general legislative proposals to insure that nuclear exports from the United States do not get financial assistance from the Government.

1. Amend the Export-Import Bank Act of 1945 to prohibit loans or guarantees for nuclear reactors, fuel, heavy water, or other nuclear related items.

2. Amend the Foreign Assistance Act to deny aid to any country to purchase nuclear reactors, fuel, and technology, and to deny guarantees or insurance (such as those of the Overseas Private Investment Corporation) for the same purpose.

3. Amend the Foreign Assistance Act, the Export-Import Bank Act, the Agricultural Trade Development and Assistance Act (Food for Peace Program), the Arms Export Control Act, the Commodity Credit Corporation Charter Act, and any other aid legislation to reduce the foreign aid credits, or guarantees, to the extent that the recipient country is spending on expanding its nuclear power capacity. Such action would prevent our foreign aid and other resources from being used indirectly to finance nuclear exports (through the fundibility of foreign exchange and financial resources).

4. Instruct the American representatives to the multilateral development banks and to United Nations aid programs to oppose aid to countries with expanding nuclear programs and to advocate that the banks advise against nuclear power. Investigate the desirability of ending American contributions to the multilateral development banks and United Nations aid programs if such policies against nuclear power are not adopted.

5. Enact legislation requiring a study of the effect of American nuclear training of foreign nationals at government facilities or in private universities on the spread of nuclear weapons. Amend the Atomic Energy Act of 1954 to require the full cost of such training to be paid by the government whose national is to be trained.

6. Investigate the extent to which American nuclear firms are supporting foreign subsidiaries either by supplying nuclear reactors for their foreign home markets or in exporting American-licensed nuclear technology to third countries.

7. Provide the Nuclear Regulatory Commission with power to license the transfer by American businesses of nuclear technology or know-how. Further require that public hearings on such transfers to other countries be held if requested and that the Congress receive sixty-day notice of such transfers, during which the Congress could act to disapprove.

8. Instruct the Executive Branch to propose that the IAEA separate the funding of promotional and safeguards activities with a view to confining all United States funding to the safeguards budget.

9. Amend Title V of the Trade Act of 1974, which provides preferences for developing countries, to prohibit duty-free treatment for goods of any developing countries which expand their nuclear power programs.

Ending all these government subsidies would not, of course, forbid private financing. It is difficult however, to see how private financing would long continue without subsidies in view of the doubtful profit prospects. For those who profess faith that the profits are there, but perhaps hidden or in the future, here is a chance to prove that faith by putting up their own money.

A major objection certain to be raised against curbing United States subsidy of nuclear energy/weapon proliferation is its economic cost. This bears some resemblance to the objection that abolishing disease will have an adverse economic impact on doctors and nurses. Elimination of nuclear proliferation would in any case, be desirable, even without the nuclear weapon issue, simply because nuclear power is economically inappropriate for developing nations, as will be noted below.

APPROPRIATE ENERGY SOURCES FOR DEVELOPING COUNTIES

For many reason, nuclear power is economically inappropriate for developing countries:

1. Nuclear power requires excessive amounts of capital and managerial skill, both of which are expensive and in short supply in the developing world.

2. Nuclear power diverts scarce resources from roads, schools, hospitals, irrigation projects, fertilizers, agricultural implements, and housing.

3. Nuclear power lures the poor countries—as it does the rich—from the search for energy sources (including renewable ones) which are less costly in capital and less damaging to the environment.

4. Nuclear power is centrally generated, and, without additional large capital expenditures, cannot be distributed to the rural poor, who are scattered over wide distances and often over rugged terrain.

5. The average nuclear power plant—1,000 megawatts—is too large for the electric grids of most developing nations and, if shut down, could not be replaced readily by auxiliary power sources.[27] So many energy eggs in one basket makes the power supply vulnerable to sabotage or breakdown, especially in view of the shortage of highly skilled maintenance personnel.

If nuclear energy is economically inappropriate for developing countries, what then are the alternatives? Waiting in the wings are numerous energy sources which do not lead to apocalyptic weaponry and which, if not discouraged by price policies and heavy subsidies that drain factors of production away to nuclear power, may be competitive and environmentally sound solutions to the energy problem. To accomplish this objective, a rural development strategy is needed which focuses on the use of simple, inexpensive, labor-using tools and techniques that are appropriate to the scarcity of capital and the abundance of labor in poor countries. These tools and techniques, described by others variously as "intermediate" or "appropriate," or "village," I call "light capital technologies."[28] Light capital energy technologies are small-scale, low-cost, simple, reliable, repairable with semi-skilled labor; and produced from local, renewable resources (such as sun, wind, flowing water, and vegetation). In some parts of the world, energy is already being provided from these non-polluting, renewable sources, through the use of devices such as: (1) small, water-powered turbines or hydraulic rams for pumping water, for providing mechanical energy, or for generating electricity,[29] (2) windmills to pump drinking and irrigation water; to crush sugar cane, thresh or grind grain, shell peanuts; and to power small electric generators; (3) bio-gas or methane plants to fuel irrigation pumps and other engines, and to produce organic fertilizers as substitutes for more expensive chemicals; and (4) solar energy collectors to heat water, or dry crops for storage.

Energy, like a penny, is as good saved as produced, and the developing world like the United States, is wasting it as if it were still cheap. Methods for saving energy in rural areas of developing societies include:

More efficient cooking stoves, pots, and methods to reduce burning of wood, crop residues, and dung.

Improved clothing, blankets, and shelter to reduce heating-fuel consumption.

Organization of human labor, sharing of draft animals to break labor bottlenecks at planting, weeding, harvesting, and threshing

Footnotes at end of article.

time, in order to make optimum use of available animate energy.

Replacing energy-intensive chemical fertilizers with natural and organic fertilizers.

Use of drip irrigation with earthen pots and pipes which reduce the amount of water required—and the energy required to move it.[30]

It should be noted, however, that many developing nations—such as Argentina, India, Pakistan, the Philippines, Turkey, Korea, Mexico, Zaire, Angola, Morocco, Brazil and other countries of Latin America—possess unexploited fossil fuel (oil, natural gas, coal, oil shale and tar sands) as well as geothermal and hydroelectric resources sufficient for their own energy needs.[31]

The encouragement of light capital energy technologies must be institutionalized.[32] A World Energy Conference could be a forum to convince developing nations to move away from nuclear power, to plan for replacing nuclear and capital-intensive energy sources with light capital energy technologies, and to explore foreign aid as a means of nudging developing countries toward light capital technology and away from nuclear power.[33]

Needed especially are credit organizations available in the villages, coupled with extension systems to show local people how to adapt, use, and repair the energy sources. To accomplish this institutionalization, use could be made of the Kissinger proposal of 1975 for an International Energy Institute.

Congress can provide leadership in specific, yet undoubtedly controversial, ways:

1. Earmark funds for ERDA's Cooperative Research and Development Program with Developing Countries.

2. Direct the Appropriate Technology Fund, now beginning its work, to undertake demonstration or pilot projects in light capital energy sources and technologies.

3. Earmark foreign aid funds (under AID and other programs) for light capital energy projects, with emphasis on the creation of country and regional light capital energy institutes.

4. Enact guidelines for United States foreign aid programs to provide incentives for poor countries to cooperate with United States anti-proliferation policies, to eschew nuclear power and to adopt light capital energy.

5. Direct American representatives to the multilateral development banks and to other international organizations to stress light capital energy policies and projects.[34]

OBJECTIONS THAT WILL BE RAISED TO THE LEGISLATIVE PROGRAM

Objection: *Poor nations must have nuclear power to replace oil imports and save foreign exchange.*

Response: Nuclear power offers the prospect not of relieving shortages of foreign exchange and capital in poor nations but of exacerbating them. Nuclear power requires enormous capital—approximately $1 billion in capital construction costs for a 1,000 magawatt reactor, substantially more than for coal or oil-powered plants of that output.[35] Reactor parts, highly skilled technicians, and nuclear fuel would have to be imported at additional foreign exchange cost; whereas more conventional power plants could use indigenous factors of production.

Furthermore, if the bill to develop nuclear power in the underdeveloped nations is paid by the United States it would be at the expense of aid for food production, irrigation, and fertilizer, roads, education, health, ports, and housing. To construct the projected nuclear capacity for urban India alone in 1990 (not counting annual fuel costs) would require about $20 billion,[36] and this immense sum would do nothing for the energy needs of the rural poor who make up four-fifths of the Indian population and who represent the real reason for seeking economic development.

Some of the oil-producing nations claim they need nuclear power to replace their oil when it gives out; but with oil for decades, they have time to seek out non-nuclear solutions and should certainly not get our subsidies to go the nuclear power route. If the oil-rich nations nevertheless choose to go the nuclear route to get to nuclear weaponry, they should have to use their own wealth.

Objection: *If the United States stops subsidizing nuclear exports, other nations will take over the nuclear market.*

Response: The threat of abandoning the nuclear market to other suppliers would be more formidable if the nuclear market were lucrative.[37] Those who claim it is profitable should be asked to substantiate their contention. Even the French may ultimately get the message that nuclear exports have a way of costing the taxpayers more than the industry earns in profits. If France, Germany, or any other nation chooses to lose money, or to give away its resources to other countries, this is hardly reason for us to follow its example.[38] In any case, with our efforts subtracted from the others, the proliferation of reactors would presumably be less, and anything that reduces nuclear proliferation of reactors is of course a gain. As Albert Wohlstetter has suggested, better less than more and better later than sooner.[39]

Moreover there is some chance that United States leadership combined with economic and political pressure could bring other countries to cooperate. Chancellor Schmidt of West Germany has said that he was not aware of any official American displeasure with the German-Brazilian nuclear deal.[40] United States pressure forced South Korea to rescind its order for a French reprocessing plant. The French have recently agreed to stronger nuclear export controls; the Canadians have gone further in their controls than the French,[41] and the Soviet Union reportedly agrees with the stronger Canadian restraints.[42] Further, the major nuclear exporters—France and Germany—depend on American enriched nuclear fuel to keep their domestic power reactors going if they continue to divert their own fuel for export.[43] There are other avenues of economic pressure—such as American influence in the International Monetary Fund to affect loans to countries in balance of payments difficulties, food exports, and capital restrictions. What evidence is there that the levers at our disposal cannot be made to work, if we use them in good faith?

It is even possible that clear American leadership and example will be supplemented by the burgeoning opposition to nuclear power in many developed countries, including a number of the nuclear exporting nations. Sweden's recently elected Prime Minister, Thorbjorn Fallidin, promised to dismantle his country's nuclear program, if elected; he has just presented legislation to the Swedish Parliament that severely restricts future nuclear power development. A British Royal Commission chaired by Sir Brian Flowers, a member of Britain's Atomic Energy Authority, recently recommended against development of fast breeder nuclear reactors—which produce huge amounts of weapons grade plutonium—in favor of development of alternative, nonnuclear, energy sources. France and West Germany have had sit-ins, mass demonstrations, and instances of sabotage at nuclear sites, and West Germany and Switzerland face legal fights over reactor construction. Denmark, Norway, and the Netherlands are having second thoughts about expanding their nuclear power capacity.[44]

Objection: *It is too late to stop nuclear proliferation.*

Response: Although the spread of nuclear reactors and weaponry has been allowed to go too far, proliferation has just begun. Preventing any nation from going nuclear will preserve neighboring nations from the fierce internal political pressures to do likewise, out of fear. Examples of nations seeking to keep up with the nation next door are Egypt as a result of Israel, Pakistan as a result of India, and Brazil as a result of Argentina. Any nuclear moves we can abort now can head off some multiple of these moves in the years to come.

Tough as is the nuclear lobby now, it will get tougher, if the industry is allowed to multiply here and abroad. Anybody who has tried to resist the national defense lobby with its firms and workers in nearly every congressional district and its highly paid consultants in universities, will appreciate the urgency of acting before the political clout of the nuclear industry approaches the dimensions of that of the defense industry.

Objection: Ending nuclear export subsidies will jeopardize thousands of American jobs.

Response: So far as job creation is concerned, there are two objections to nuclear exports as a source of employment. First the nuclear industry, being capital intensive, furnishes few jobs and the highly-skilled, highly-paid people it does employ are not, for the most part, this nation's main unemployment problem. Digging holes and refilling them to make work is good economics in comparison with subsidizing an industry that could lead to the destruction of much of mankind, if the only purpose is to provide a few thousand jobs.

The fact is that there are virtually trillions of dollars of projects vitally needed in this nation that offer exciting employment prospects, conditional only on first solving the inflationary effects: housing, mass transit, health care, education (including special education for the handicapped and the gifted), pollution, abatement, flood control, helping the aged. So far as inflation is concerned, any of these avenues of job creation would lead to less cost and price increase than the nuclear industry.

If the United States withdraws nuclear export subsidies, how will this money get to the providers of employment? With these funds no longer extracted from the American capital markets, investment money will become available on somewhat easier terms to the nonnuclear types of job creation. More jobs can be created in other industries where less capital is needed per worker, including industries producing other types of energy, than there would be jobs lost from diminished nuclear exports.

Objection: *Nuclear export subsidies are needed to shore up an unfavorable United States balance-of-payments.*

Response: It makes little sense to remedy an unfavorable balance-of-payments by creating terrifying long term problems, even if the unfavorable balance were large, and even if it could be remedied in this manner. In fact, nuclear exports are scarcely 1 percent of total United States exports,[45] substantially smaller than the statistical error in computing the balance of payments. In any case, there is a question whether subsidizing nuclear exports could help the balance of payments. At least one economist has argued that subsidizing an export produces no overall increase in exports, but simply increases imports by the same amount, and thus decreases employment in the import substitution.[46] My own reasoning is that subsidizing one kind of export also tends, by raising factor costs, to be at the expense of other exports, again without improving the total.

CONCLUSION

It is my conviction that the greatest danger confronting the balance of this century is nuclear weapons proliferation among nations; that the major impetus to nuclear power and weaponry has been United States subsidy and promotion; that past Congresses

Footnotes at end of article.

abandoned leadership to the President and the Joint Atomic Energy Committee; that the United States Congress can act during this session to stop this subsidy and promotion; and that ending the subsidy of nuclear proliferation would be wise economically and environmentally.

I emphasize this economic justification because it is so often argued that if the United States stops subsidizing nuclear proliferation, other supplier countries will move in to fill the vacuum. Reasons have been cited here to suggest that other nations are seeing the folly of doing this and could see the folly even more clearly if the United States took leadership in pointing the way. But, if other nations insist on promoting nuclear proliferation, there will obviously be less than if we, the world's largest proliferator, continue in our wrong-headed policy.

The legislative efforts to stop this promotion were begun in the 94th Congress but can proceed in the 95th, one hopes, under the leadership of President Carter, who has spoken strongly on this issue. The measures will be admittedly drastic, but there is no other hope. Proposals to wait for agreement among other supplier nations are proposals not to do anything, since any agreement will be at the mercy of the least common denominator, with numerous loopholes and long delays. The longer the delays, the more the proliferation to additional nations. The more nations with nuclear weapons, the harder to get agreement. Similarly, the larger the nuclear industry, in the United States and elsewhere, the more formidable the political lobby.

The main obstacles to stopping nuclear proliferation will in fact be political pressure groups. To counter them will require arousing the American people to the imperatives of the proliferation issue. If there is one thing I have learned in fourteen years in Congress, it is that the finest oratory on the floor of the Congress is as nothing compared to a flood of letters from the folks back home. But such grass roots pressure requires arousing the public—scarcely easy in view of the complexity of the issue and the distasteful vision of the future that people are asked to ponder.

There is the risk, of course, that if the public becomes sufficiently frightened to demand that something be done, the result might be over-reaction. Democracy does not function well in a state of panic. All the more reason to deal with the problem now while it is still manageable and can still be be debated in an atmosphere of calm reason.

[21] "Foreign Assistance Act of 1974," Public Law 93–559, enacted December 30, 1974, Section 9(a)(1)(g) and Section 43.

[22] See the following sources:

The Export Reorganization Act—1975, Hearings before the Committee on Government Operations, United States Senate, Ninety-Fourth Congress, First Session; *The Export Reorganization Act of 1976;* and *Peaceful Nuclear Exports and Weapons Proliferation, A Compendium*, prepared for the Committee on Government Operations, United States Senate, April 1975.

[23] Public Law 94–329, enacted June 30, 1976, Section 305, pp. 27–28. See also "Conference Report on International Security Assistance and Arms Export Control Act of 1976," Ninety-Fourth Congress, Second Session, House Report 94–1272, pp. 53–54.

[24] The endorsements from outside Congress were as follows:

David Lilienthal, First Chairman, Atomic Energy Commission; Jeremy Stone, Director, Federation of American Scientists; Common Cause; Committee for a SANE Nuclear Policy; Sierra Club; Friends Committee on National Legislation; Friends of the Earth; Environmental Policy Center; Ralph Nader's Congress Watch; National Taxpayers Union; The National Council of Churches; The Jesuit Office of Social Ministers; The Independent Phi Beta Kappa Environmental Study Group; Citizens Rights Committee; Women Strike for Peace; Council for a Livable World; United Auto Workers; Network.

[25] H.R. 15419, as reported, removed most obstacles to nuclear deals such as those between Germany and Brazil and between France and Pakistan; had no requirement that loopholes in existing nuclear agreements between the U.S. and other countries be closed; delayed any U.S. action to tighten nuclear export controls until all nations agreed to the stronger system, thus making any strengthened system a dead letter; and hobbled Congress' ability to scrutinize a presidential decision to overturn a Nuclear Regulatory Commission ruling against a nuclear export license by eliminating the requirements for 60-days notice and a detailed explanation of the President's decision. For further information, see Rep. George E. Brown, Jr., "Additional Views (Dissenting) on H.R. 15419, as amended," House Report 94–1613, pp. 55–60.

[26] Principal provisions of nonproliferation legislation would probably include: strengthened licensing criteria to be applied immediately by the U.S. to all its nuclear exports; provisions for international negotiations to establish strengthened nuclear export conditions by all nuclear suppliers, procedures to be followed in the event a nation violates its agreement with a nuclear supplier nation, and procedures to be followed in the event of diversion, theft or sabotage of nu-

clear materials; the closing of loopholes in U.S. bilateral nuclear agreements with other nations through renegotiation of those agreements; provisions for adequate participation by Congress in examining nuclear agreements for cooperation and amendments thereto, including a nonproliferation assessment statement on nuclear exports by the Arms Control and Disarmament Agency; and increased support to the safeguards efforts of the International Atomic Energy Agency (IAEA).

[29] *Energy for Rural Development: Renewable Resources and Alternative Technologies for Developing Countries,* National Academy of Sciences, Washington, D.C. 1976, pp. 155–160.

[30] For discussion of improving efficiency of energy use in both less developed and industrial nations, see Barry Commoner, "Energy," *The New Yorker,* February 2, 9, and 16, 1976; Arjun Makhijani, *Energy Policy for the Rural Third World,* International Institute for Environment and Development, September 1976; and Amory Lovins, "Scale, Centralization, and Electrification in Energy Systems," paper prepared for the Oak Ridge National Laboratory Symposium entitled *Future Strategies of Energy Development,* October 17, 1976.

[31] Barber Associates, pp. III 37–41 and figures III–3 and III–4.

[32] Some action in light capital energy development is occurring within the Energy Research and Development Administration (ERDA) and within AID. In November, 1976, ERDA initiated a Cooperative Research and Development Program With Developing Countries, with emphasis "on the development of small-scale, decentralized energy technologies." However, as of this writing, this program has received practically no funding. AID has at least two sources of statutory authority for programs in light capital energy technologies. Section 106 of the Foreign Assistance Act, enacted in December 1975, authorizes foreign aid for "programs to help developing countries alleviate their energy problems by increasing their production and conservation of energy, through . . . research and development of suitable energy sources and conservation methods, . . . and pilot projects to test new methods of production or conservation of energy."

Section 107 of the Foreign Assistance Act, enacted at the same time, provided up to $20 million for "the development and dissemination of technologies appropriate for developing countries." An Appropriate Technology Fund has been created to carry out this program. Further the House Committee Report on this legislation ("International Development and Food Assistance Act of 1975," House Report 94–442, pg. 52) makes clear that additional funds under the Food and Nutrition category (Section 103 of the Foreign Assistance Act under which the largest part of AID's budget is authorized) can be used for "activities in the energy field directly related to agricultural or rural development." Within AID, the African Bureau has contracted for a study to recommend actions on village energy sources in Africa.

[33] As a beginning in sensitizing international opinion, U.S. participation in the 1979 U.N. Conference on Science and Technology could emphasize light capital technologies in general and light capital energy technologies in particular.

[34] Some of the international organizations in which the U.S. can advocate light capital energy technologies are the International Energy Agency, the Council on International Economic Cooperation in Paris, the World Bank Group, the Inter-American Development Bank, the Asian Development Bank, the United Nations and its member organizations such as the U.N. Development Program, the World Food Council and other international food organizations such as the newly-capitalized International Fund for Agricultural Development, the Organization of American States, the Organization for Economic Cooperation and Development (OECD), the Development Assistance Committee (DAC), the International Monetary Fund (IMF), and the consultative groups on aid to particular poor nations in which the U.S. participates.

The Long amendment to the Inter-American Development Bank Authorization Act required the U.S. to propose that "the development and utilization of light-capital or intermediate technologies should be accepted as major facets of the Bank's development strategy, . . ." (See Public Law 94–302). Language in the FY 1977 Foreign Aid Appropriations Bill Committee Report (House Report 94–1228, pg. 40) calls for action by the multilateral development banks in the field of light capital energy technologies.

[35] Division of Reactor Development and Demonstration, Office of the Assistant Administrator for Nuclear Energy, ERDA. This figure represents the cost for a nuclear reactor for which construction begins now and which begins operation in 1985.

THE 1977 LABOR DAY MESSAGE

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. PHILLIP BURTON. Mr. Speaker, the esteemed Lane Kirkland, secretary-treasurer of the AFL–CIO, has prepared a set of remarks to the American people on Labor Day. I deem them important enough for inclusion in the CONGRESSIONAL RECORD:

THE 1977 LABOR DAY MESSAGE

(By Lane Kirkland)

Since 1894 the first Monday in September has been set aside to honor the men and women who built America, who keep the wheels turning and maintain the flow of goods and services in the largest and most complex economy the world has ever seen.

On this Labor Day 1977 our country is entering its third century of the great struggle to create a just society—a society in which every citizen has a chance to achieve his or her highest potential, a chance to learn to the limit of his capacity, a chance to do productive and worth-while work and to share fairly in the rewards of work.

We take pride in what we and our forebears have contributed in the struggle for social and economic justice. From the beginning our unions have fought for better schools, better health care, better housing; for equal justice and equal opportunity.

We intend to keep fighting for all of these things, not merely for ourselves but for all men and women, at home and abroad.

One important part of that fight, one that should concern every American who wants to see his country move ahead toward justice and decency, is the fight to see that everyone who works for a living receives a living wage.

Very few union members have any personal stake in the federal minimum wage. Most have succeeded, through collective bargaining with their employers, in raising their earnings well above any conceivable legal minimum.

But we are appalled that there are 10 million Americans who work 40 hours a week, 52 weeks a year, often at hard and dirty jobs, and who are paid less than poverty wages. The hourly rate the government says is absolutely necessary today to raise a worker above the poverty level is $2.81. The minimum wage the government says an employer may now pay a worker is $2.30 an hour. That is a disgraceful commentary on America's national priorities.

It is disgraceful that more than one worker out of 10, no matter how hard he tries to pay his own way, still must turn to public assistance, to food stamps, to private chari-

ties, to keep his family together with a roof over their heads.

It is even more disgraceful that a great many workers are illegally paid even less than the minimum. The Labor Department recently reported that in the first half of fiscal 1977, unscrupulous employers swindled more than 300,000 minimum wage workers out of nearly $58 million.

The Labor Department made a survey of the workers who were cheated last year. It found that two out of five of those workers were the primary earners of families. A fourth had two or more dependents. Half of them were women. One in five was black. Two-thirds were over 40 or under 20. Three-fourths were retail trade workers or service workers. Two-thirds lived in the South.

Those workers were the lucky ones, the ones whose employers were caught and compelled to pay up what they had stolen. A great many violations are never reported. There are, for instance, a million and a half household workers who are covered by the Minimum Wage Act and who are paid an average of $2,732 a year and have no sick leave, vacation pay, pensions or holiday pay. This, again, is a disgrace to American society.

Early this year the AFL–CIO Executive Council urged the Congress to increase the minimum wage to $3 an hour and to include an automatic mechanism in the Act to maintain the minimum wage at 60 percent of average hourly earnings in manufacturing. That recommendation was, and is, fair and reasonable. The minimum wage should not be a poverty wage. It should be a wage that meets the definition in the Act itself and allows a worker to maintain at least a "minimum standard of living necessary for health, efficiency and general well-being."

But because further delay is intolerable, the AFL–CIO is supporting a bill now before Congress that will raise the minimum to $2.65 next January 1 and raise it to 53 percent of the average wage in manufacturing by January 1, 1980. It is not all that we wanted or sought. But it is a good bill that will go a long way toward providing economic justice for the lowest-paid workers in the country.

Modest and reasonable as it is, however, the bill is under heavy fire by employers who want to preserve the status quo and maintain a pool of cheap labor.

Back in 1938, when the first minimum wage was established by the Congress at 25 cents an hour, business spokesmen wrung their hands and cried that the economy would never survive, that inflation, unemployment and ruin were just around the corner. They have repeated those arguments every time since then that the Congress has acted to raise the minimum, and they are repeating them today.

There has never been a word of truth in those arguments, and there is no truth in them today. Studies by the Labor Department in both Democratic and Republican administrations have shown that minimum wage increases have never had more than a slight and temporary adverse effect. Every increase has been followed by higher employment and increased economic activity.

But the enemies of fair wages don't want to be confused by facts. They will be raising the same battle cry when the bill comes up in the House in mid-September and again later in the Senate.

In the fight to keep millions of their fellow citizens in poverty, they have these goals:

First, they will try to set a subminimum wage for teenagers on the pretense of trying to lower youth unemployment. In truth, this scheme has nothing to do with teen-age unemployment. It is simply a device to give fast-food operators and other employers a large labor source to exploit.

A youth subminimum would increase unemployment among older workers, starting with those 20 to 24 who are trying to establish families and going right through the minority mothers and fathers who would be thrown out of work so that the employer could hire their sons and daughters at a cheaper rate. Discrimination against the young in the form of wage cuts makes no more sense than wage cuts for blacks, women, Spanish-speaking citizens, Vietnam veterans or any other group with a high unemployment rate. The only solution to unemployment is more jobs, not discriminatory wage rates.

The second effort will be to eliminate indexing—the setting of the minimum wage at a percentage of the average wage in manufacturing. Without indexing minimum wage workers will never get above the poverty line. But with indexing at 53 percent they will do so, reducing their dependence on public assistance and making them independent, self-supporting citizens and taxpayers. Indexing must not be defeated.

Finally, there will be an effort to reduce the $2.65 minimum. That figure, effective next January, would only restore half of the buying power lost since the last time the minimum wage was increased. Any reduction below this figure would deprive minimum wage workers of what they absolutely need to live decently and it would deprive the economy of the boost it would receive from a restoration of buying power for low-wage workers.

These are the goals of the people who have a vested interest in poverty, who see fatter profits in human exploitation and who like a society in which a large pool of cheap labor is fighting over jobs at starvation wages.

It is that kind of society America has been struggling to put behind her in the long fight for decency and justice.

But they are not decent goals for a country that has been struggling for 200 years to achieve human justice.

If America is ever to become the integrated society of creative, self-supporting citizens envisioned by its founders, Congress must not let the exploiters have their way in this matter. And it is the job of every citizen to see that Congress does its duty.

NATIONAL SICKLE CELL MONTH

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. FORD of Tennessee. Mr. Speaker, I am pleased to join Congressman CARDISS COLLINS in the cosponsorship of legislation which will declare September "National Sickle Cell Month." Sickle cell anemia, a genetic blood disease which affects 1 out of every 400 black Americans, has no cure at the present time. It is, furthermore, a disease which has not been subjected to aggressive and careful research and as a consequence, a number of misconceptions and negative attitudes exist about it.

During the August congressional recess, my awareness of the problem and attitudes associated with sickle cell anemia was pointedly enhanced when a constituent of the Eighth District, Tennessee, was rejected by the Air Force Academy Preparatory School—after being admitted—due to his having the sickle cell trait (SCT). According to Air Force Academy officials, anyone having the SCT is not eligible for admission. With this being the case 10 percent of all black Americans are automatically disqualified for admission to the Air Force Academy.

Of course, it should be realized that merely having SCT is not the disease itself. Moreover, SCT is an area of particular ambivalence in the medical field. Dr. William Crosby, a veteran in hematology, stated a few years ago that "everything about SCT is not plain black and white, and SCT is a harmless genetic marker." He emphasized the fact that 1 in 10 black Americans carries SCT, therefore, a most common finding.

Because so little is known about sickle cell anemia in general, and because so much needs to be learned, I feel not only a responsibility but also an obligation to support any move which has as its purpose the promotion of the cure and a wider comprehension of every aspect of this disease.

Neither my district, nor your district, hence America, can afford to lose the leadership of promising young minds as a result of conjecture and theory which needs to be proven. Let us all rally behind the wisdom and foresight of the gentlelady from the seventh district of Illinois and support the declaration that September be named "National Sickle Cell Month."

CONGRESSIONAL REVIEW OF POSTAL SERVICE CHANGES

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. NIX. Mr. Speaker, I have introduced today a bill to amend title 39, United States Code, to provide for congressional control over proposed changes in the levels and types of services provided to the American people by the Postal Service.

Under existing law, the Postal Service currently has the sole power to make such changes. Whenever the Postal Service wishes to make a change in the levels or types of services which would result in a reduction of such services on a nationwide or substantially nationwide basis, it must first seek an "advisory opinion" from the Postal Rate Commission. But, regardless of the Commission's advice, the Postal Service may unilaterally proceed to make the change. For instance, if the Postmaster General decided to eliminate Saturday mail delivery, he would simply notify the Postal Rate Commission of his plans. The Commission is required to hold a hearing, and as a practical matter, the Postal Service probably would not make the change effective until the hearing had been completed and the Commission had issued its opinion. But, regardless of the nature of the advisory opinion, the Postal Service may proceed to do as it wishes.

The legislation which I introduce today will change that. If the Postmaster General wishes to make a reduction in the levels or types of services, he will have to submit a proposal to the Congress; and if either House adopts a resolution of disapproval within 60 days, the change cannot become effective. This is similar

to the procedure followed when the President submits a reorganization plan to the Congress.

The Postal Reorganization Act did not define what is a "level or type" of postal service, or what is a change which has a "nationwide or substantially nationwide" impact. The legislation which I introduce today includes such a definition. More importantly, it will clarify what the Postal Service can and cannot do without the approval of the Congress.

I believe this legislation strikes a proper balance. It would preserve the independence of the Postal Service from day-to-day supervision by the Congress, but would require congressional approval of major policy changes which, of course, is the basic constitutional role of the Congress.

SOCIAL SECURITY AND DEPENDENCY

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. FRASER. Mr. Speaker, last July, I testified before the Social Security Subcommittee of Ways and Means to raise objection to a portion of the administration's social security bill, H.R. 8218. The portion of the bill to which I addressed my remarks is found in title III, "The Equal Rights Amendments of 1977."

The administration proposes to reinstitute the dependency test for husband's and widower's benefits struck down by the Supreme Court last March, and extended its applicability to wife's, widow's, mother's, and father's benefits. The Court found the test discriminatory, because it was imposed only on men seeking benefits from the wage records of their fully insured wives. The test was not imposed on similarly situated women.

Carolyn Shaw Bell, who holds the Katharine Corman Chair in Economics at Wellesley College, published an article in Newsweek which discusses why the notion of dependency no longer fits family and work patterns of contemporary society. I believe she creates a good argument against the administration dependency plan which further entrenches the notion in a system struggling with its applicability already. The article follows:

SOCIAL SECURITY AND DEPENDENCY

(By Carolyn Shaw Bell)

The Census defines a family as a group of two or more people related by blood, marriage or adoption who live together: families exist, obviously, because people want them to. For some reason, however, we think and talk about the family as if it existed all by itself, apart from its members. We describe the "family life cycle," and worry about the "death of the family." Business and government view policy decisions in terms of "the average family." President Carter has even promised a "family impact" statement to accompany new legislation.

Most of us accept without question the repeated use of that "typical" American family—the married man supporting a wife and two children—when we talk about social and economic policies. The Census Bureau has just revealed, however, that this familiar type has practically vanished. There are 56 million families in this country and only 3.3 million of them fit this pattern—a more 6 percent of the total.

Why don't we stop having families as the focus of our concerns, and concentrate on individuals instead? If we stopped pretending there was such a thing as "the typical American family," we might be more sensitive to the actual problems posed by the many different ways we live—both in and out of families.

TAXES AND CHOICES

Start with income taxes. Most income in the country is earned at work and consists of wages and salaries. But families don't work and earn wages, family members do. "The worker" is an individual—the worker's income belongs to the earner. How those of us who earn wages choose to share our income is our business, not that of the tax authorities. If you want to spend your income supporting a wife and I want to spend mine supporting a child and somebody else wants to spend his supporting a hobby of collecting antique automobiles or a crusade for preserving the wilderness, let us respect each of our individual choices. Why involve "the family"?

Of course, if we Americans decide that having children is a good thing, and if we want to help parents support their children, then we can provide cash payments, or subsidies to parents. Such children's allowances exist in most European countries and in Canada to express society's interest in its future citizens.

Move on to national health insurance. If we want good medical care, we want it for individuals. Families don't get measles, or heart attacks, or die of cancer. If we want to pay for medical care by taxing payrolls, that doesn't mean medical benefits have to be provided via the people on payrolls—"the worker and the worker's family." Most workers are married to other workers so they'll both pay taxes to provide medical benefits.

THE COST OF LIVING

Why tie health care to "the worker's family" when people move in and out of families. Babies are born, children go off to college, young adults leave to form their own families or live alone. Death or separation breaks up a family unit and some adults become new dependents for their relations. Once we recognize that "the family" is a dynamic concept, and that families incessantly change, then we can agree that caring for individuals is what's essential.

Consider the high cost of living, and the battle (if there's to be one) against inflation. Our basic measure of living costs, the Consumer Price Index, doesn't pretend to measure every price change that affects us. Although a new, more representative index will shortly appear, the current figure includes only those commodities purchased by a fairly small group of families—urban wage earners and clerical workers.

Furthermore, the cost of living figures most frequently quoted refer to that same familiar group—John Doe supporting his wife Mary and their two kids Dick and Jane—that makes up such a tiny minority of all families. We need cost-of-living data for childless couples—who outnumber the "typical" family eight to one. We need to know how inflation hits the single mother supporting her children—there are twice as many of them as of the mythical average family.

Think about minimum wages. George Meany protests that $2.50 an hour (proposed by the White House) is below the poverty level. But he's referring to the poverty-level income for a family, not for an individual worker.

When minimum wages were first enacted during the Depression of the '30's, the "typical" American family was a lot more prevalent. Most children lived in homes where the father was the breadwinner and most women were supported by their husbands. One man's wages probably did represent one family's income, and the link between minimum earnings and poverty did make sense.

Today the one-earner family is in the minority. Fourteen million husbands support their wives, with or without children. One and a half million wives are the sole earners for their husbands and families, and there are 5 million other women without husbands, whose earnings provide family income. But all told that's less than one out of three families. Most wage earners live in families with other wage earners. And families come in all sizes—it's impossible to calculate a minimum wage for one person that would keep all kinds of families above the poverty level.

Of course, we may wish to provide additional income for poor families. But let's keep wages a matter of the individual worker and the individual job.

ISSUES AND INDIVIDUALS

You can try thinking about other social issues in terms of individuals. It would help the city welfare administrator struggling with three definitions of the family to determine eligibility for housing, for medical care, and for public assistance. It would help the elderly widow and widower who won't marry because they'll lose social security benefits.

I think we should start thinking about individuals because we exist. More of us are being separate persons rather than family members these days. Between 1970 and 1975 the number of people living by themselves increased by about 40 per cent. We live individually as young adults escaping from our parents, as older adults choosing not to marry, as people of any age whose marriages have dissolved through death or separation.

Thinking about individuals doesn't mean that families don't count, or that the family way of life is obsolete. It does mean that we live and grow as human beings, we move in and out of different families as family members, but each of us is a person from birth to death.

JULY 29, 1977.

Hon. DONALD M. FRASER,
House Office Building,
Washington, D.C.

DEAR CONGRESSMAN FRASER: I applaud your testimony, before the House Social Security Subcommittee, in its characterization of the concept of dependency as "outmoded." As you know, I have long favored earnings-splitting since my early testimony before the JEC.

At this point I think it would help, in trying to get people to realize that dependency does not mean much anymore, to emphasize that the majority of working families contain two adult working partners. The BLS figures that are quoted say that over half the husband-wife families in the country have both spouses working. In reality the percentage is much higher if you exclude some 5 million families where neither partner is working: both partners are retired, or still finishing their education. Rather than argue the economic role of women, I would urge you to reiterate that the single earner family is obsolete and that dependency is not a useful concept if it cannot easily, and objectively, be determined.

I enclose a copy of my article in the May Newsweek. I would be very happy to discuss these issues further with you if it would help.

Sincerely yours,

CAROLYN SHAW BELL,
Katharine Coman Professor of Economics.

ENVIRONMENTAL HAZARDS OF COAL PRODUCTION—ASSESSMENT BY THE EASTERN PENNSYLVANIA GROUP SIERRA CLUB

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. EDGAR. Mr. Speaker I am pleased to share with my colleagues an excellent briefing on the environmental impact of increased coal production. This briefing prepared by Albert J. Slap and Dena Sukol Wright, both of the Eastern Pennsylvania Group of the Sierra Club, describes the problems which occur to our land, water, and air as a result of underground and surface mining. The House, in approving H.R. 8444, endorsed the President's goal of increasing domestic coal production to over 1 billion tons. I agree with the President that we should rely more heavily upon our abundant resources of coal to meet our energy needs while maintaining the quality of our land, water, and air. I am indebted to Mr. Slap and Ms. Wright for helping me understand the complexities of coal-related environmental problems, and I believe that their August 3, 1977, briefing deserves the attention of our colleagues:

AUGUST 3, 1977.

Congressman ROBERT W. EDGAR,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN EDGAR: You have requested that we submit to you an analysis of that part of the National Energy Act (H.R. 8444) which addresses coal conversion. A combination of time constraints and complexity of issues involved has necessitated an overview of the problems and possibilities that we see, rather than a comprehensive report.

The bill establishes in Section 3(5) a national energy goal which would increase annual coal production at least 400 million tons above 1976 production levels of 671.2 million tons (figure provided by the National Coal Association, Washington, D.C.), by 1985. Our major concern is how this 60% increase in coal production and resultant consumption impacts upon the environment. As you are aware, EPA Administrator Douglas Costle has testified before Congress that increased sulfur dioxide emissions, as a result of coal conversion, would largely be offset by utility reductions if proposed conservation and clear air controls are adopted. We do not have before us the data Mr. Costle used in making this determination; however, from the research we have done, we are skeptical that this offset will actually occur. The environmental issues raised by coal conversion include not only increased sulfur dioxide pollution, but the environmental problems inherent in mining itself. We, therefore, would like to provide you with a brief overview of the environmental impacts of increased mining and coal combustion.

MINING

There are two principal mining methods—the underground and surface. These two types are further broken down into subcategories relating to more specific methods used, dependent on applicability of land area/coal quantity to mining method. (Contour surface mining and area surface mining, for example.) In all types of mining, land preparation includes clearing vegetation from the construction site. In this respect, any choice of mining method poses serious reclamation problems because after the land is disturbed recontouring and revegetation are difficult. Although the aerial disturbances of surface mining are generally more visible than underground, both methods disturb the surface, produce wastes that require disposal, can affect water resources, and expose materials that produce acids when dissolved in water.

In surface mining, the major reclamation problem is dealing with surface disruption. This includes restoring surface topography, replacing topsoil, fertilizing and revegetating. In contrast, the reclamation problems associated with underground mining relate more to the disposal of materials mined with the coal. While these materials are often removed at the surface through a cleaning process, they cannot be piled up and left uncovered because they produce acid water runoff when dissolved by rain, landslides, and other dangerous conditions. Another problem associated with reclamation after underground mining is subsidence. In some situations, the surface will subside, limiting subsequent surface usage. These, then, are the two general problems associated with reclamation of mined land.

SURFACE MINING—ENVIRONMENTAL CONSIDERATIONS

Water: The principal water pollutant in surface mining is suspended solids. These solids are a product of runoff from solid waste piles. Under controlled conditions, drainage and runoff water is collected, allowed to settle and treated. Suspended solids are thereby reduced to a 30 ppm concentration and a zero acid content.

Air: Air pollutants are generated from two sources: diesel-fueled support equipment and wind erosion. Using electrical equipment does not eliminate air pollutants, but merely transfers them from the mining site to the electric power station site. While reclamation reduces particulates resulting from erosion, it increases other pollutants by requiring more diesel-powered trucks, tractors, etc.

Solids: Solid wastes vary as a function of surface mining techniqûe. An area strip mine excavating 10,000 tons of coal per day would produce 100 tons of overburden per day, an amount approximately equal quantitatively to the daily municipal refuse from a town of 40,000 people. The same coal production from a contour mine would result in 120,000 tons of overburden per day—approximately equal, again quantitatively, to the quantity of municipal refuse of 48 million people. (Statistics from Energy Alternatives: A Comparative Analysis. Prepared for Council on Environmental Quality by The Science and Public Policy Program, University of Oklahoma, Norman, Oklahoma.)

Land Use: In general, area surface mining, which is used in flat terrains is more land-economical than contour surface mining, which is used in hilly or mountainous terrains. Area surface (strip) mining requires 5.9 acres per 10^{12} Btu's in Northern Appalachia as compared to 12.0 acres per 10^{12} Btu's required in contour mining. Moreover, surface mining in general, is less land economical in Northern Appalachia than for example in the Northwestern section of the country. This is due to the differences in seam thickness of the coal. A Northwest mine producing 10,000 tons of lower Btu coal per day would strip 2.5 square miles in 30 years; a comparable mine in Northern Appalachia would strip 27 square miles in 30 years. However, in the Northwest section, other environmental problems, i.e. nondegradation of clean air regions, result.

UNDERGROUND MINING—ENVIRONMENTAL CONSIDERATIONS

Water: The principal water pollutant in Appalachia (where most underground mining is done) is acid drainage. The other dissolved solids are sulfates and minerals which contribute to hardness. Lime treatment is effective in reducing acidity to zero and the resultant effluent then meets EPA guidelines.

Air: Because electrically powered equipment is generally used underground, air emissions are not a problem. (Dust within the mine, however, poses an occupational hazard.)

Solids: Solids produced when mine water is treated amount to 56,000 tons per year for a typical mine in Northern Appalachia.

Land: Subsidence and refuse storage sites, as well as a water treatment facility site are the major impacts on land use.

An additional problem with underground mining, not developed here, is occupational-related hazards (black lung).

In summary, the environmental problems associated with coal mining are diverse. We are concerned that the House Bill, while making reference to environmental safeguards, may not adequately address the specific environmental problems posed. Specifically, strict regulation of solids disposal from underground mining and strip mining legislation which addresses land reclamation in surface mining is essential. We are aware that H.R. 2—a Surface Mining Bill—has just today been signed by President Carter. Unfortunately, we have not been able to research this bill thoroughly; however, we are aware that the final bill as approved by the joint conference allows both strip mining in national forests in the west and on western "alluvial valley floors", subject to certain provisions. Unless this permissive approach is counterbalanced by sufficiently strong regulations by the EPA, we foresee serious environmental consequences.

COMBUSTION

The major environmental problem associated with coal combustion, as EPA Administrator Costle has noted, is an increased level of sulfur oxides emitted into the air. However, this does not fully address the environmental impacts of the combustion process. Additional problems are caused by increased levels of carbon dioxide and respirable particulates. Further, while under the best of circumstances, air quality in a coal-burning area would meet the ambient standards established by the EPA, other hazardous pollutants may be involved. We are concerned that without adequate, ongoing research, new environmental problems, generated by coal combustion will be overlooked. Within the past week, we have become aware of two such studies which are rather alarming. This first appeared in *The New York Times*, July 25, 1977, in which the National Academy of Sciences after a 2½ year study, warns that heavy use of coal in which additional CO_2 is emitted into the air, may bring an adverse shift in the climate (the greenhouse effect). The study indicates that this increase in temperature could "radically disrupt food production, lead to a 20 foot rise in sea level and seriously lower productivity of the oceans."

The second study was done by Brookhaven National Laboratory in New York at the request of the Energy Research and Development Administration. The Brookhaven Study warns that increased coal use could raise the sulfur-caused annual death toll to 35,000 by the year 2010. This report does not square with Administrator Costle's evaluation of increased sulfur dioxide emitted into the atmosphere. We strongly advise legislation which makes flue gas desulfurization devices (Scrubbers) mandatory. "Scrubbers" remove the sulfur from stack gasses after combustion but before emission into the atmosphere. Another technical possibility in this area is the conversion of raw coal into a gas or liquid fuel, thereby reducing sulfur dioxides during combustion. The processes

which accomplish this end are not fully developed. Moreover, while they reduce pollutants at a point before combustion, they (the processes themselves) cause their own pollutants.

Another major concern that we have is related to deterioration of those areas designated as Class I areas. Currently, these areas are in the best "environmental condition." Allowing large facilities (e.g. new electric utility plants) to move into these areas may not raise the ambient levels above EPA guidelines; nevertheless, there would be an overall worsening of air quality in these regions. We strongly oppose legislation which would allow encroachment on these areas by new facilities. The Clean Air Act, as it now stands and as interpreted by the courts, provides safeguards against this problem. However, current proposals to amend the Clean Air Act pose serious threats to these safeguards. The House has adopted the Breaux Amendment which guts most of the significant deterioration provisions which protect clean air regions of the country. The Senate, by contrast, rejected the equivalent of the Breaux Amendment. If the Breaux Amendment is finally adopted, protection in the Clean Air Act for air quality over national parks and wilderness areas would be ineffectual. Thus, we would oppose the present coal conversion legislation without the nondegradation safeguard.

SUMMARY

Significant problems are raised by the massive conversion to coal use. The tradeoffs between energy independence and environmental quality require complex problem-solving with no easy solutions. Because of time constraints, we have been limited in our ability to provide you with an in-depth study of the problems. However, we have focused on four major areas of concern: strip mining reclamation, increased controls on sulfur dioxide emissions, increased controls on solid wastes disposal, and deterioration of clean air regions in the country. Additionally, we are concerned with potential problems generated by increased coal consumption which are not yet known. We recognize that H.R. 8444 has made provisions for studies to be carried out which address environmental problems associated with increased coal consumption, by providing a budget of $2 million for such purposes. The adequacy of this amount should be monitored carefully to assure that it does not seriously undermine vital information-gathering processes necessary for public health and welfare decision-making.

Coal is an abundant resource with a developed technology for its recovery. It offers much in the way of energy-independence for this country. But, it is not a cheap resource. In order to make its utilization environmentally acceptable, strong safeguard technologies must be developed and implemented. These processes cost money and must be calculated as part of the cost of the resource itself.

We hope that this cursory overview provides you with useful input. We strongly support your past record in environmental legislation. Please let us know if you wish additional materials from us for possible future legislation which addresses environmental problems associated with our national policy of increaed coal consumption.

Sincerely yours,

ALBERT J. SLAP, ESQ.,
Chairman, Eastern Pennsylvania Group.
DENA SUKOL WRIGHT,
Research Assistant.

"NEW ICE CREAM STANDARDS UNJUSTIFIED"

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. RICHMOND. Mr. Speaker, on August 2, the Agriculture Subcommittee on Domestic Marketing, Consumer Relations and Nutrition, which I chair, and Mr. Rose's Subcommittee on Dairy and Poultry, conducted a joint hearing to investigate a Food and Drug Administration proposal to change the standard of identity for ice cream. Following comprehensive studies of the testimony received during and after the hearing, I have found no justification for the change in ice cream standards.

The proposed regulations were formulated several years ago as a simple requirement for ingredient labeling. During the past 2 years though, they have been changed. The FDA has been convinced by the ice cream industry that milk-derived, rather than whole milk ingredients would be adequate to meet half the milk requirement for ice cream. Today's ice cream contains only 20 percent milk. The new standards would require that ice cream contain only 10 percent whole milk; the other 10 percent could include dairy-derived ingredients such as whey and caseinates. These are not whole milk products. They are milk by-products.

Depending on the combinations used—and there will be many—each carton of ice cream will have different ingredient labeling. By substituting whole milk with milk by-products, there is no guarantee present nutritional standards will be maintained. We can be sure ice cream manufacturers will use the cheapest ingredients possible by disguising them with more artificial flavorings.

This issue is not one to be taken lightly. More than 800 million gallons of ice cream are manufactured each year. Ice cream is used in Federal feeding programs as a nutritious source of calcium, vitamin B_{12} and riboflavin. The new regulations would completely ignore these nutrients.

Instead, the FDA has decided that the nutritional quality of ice cream should be based entirely on protein. Ice cream has never been considered a significant source of protein, nor is the average American's intake of protein a problem.

Additionally, the ice cream industry stands to reap profits of more than $70 million a year, and there is no guarantee these profits would be passed on to customers. In the meantime, additional stocks of nonfat dry milk, displaced by imported caseinates and cheap, domestic whey, would cost the consumer dearly. Additional Federal tax dollars would be committed to the Government dairy loan program. Taxpayers would pick up the tab, which could be more than $200 million annually.

Mr. Speaker, consumers are not about to sit still while the agency mandated to protect our food tampers with one of their favorites. FDA Commissioner Donald Kennedy is expected to announce his decision on the new regulations soon. I hope he will listen to the voice of the people. Following are excerpts of letters I have received from angry ice cream lovers:

". . . Sometimes I almost believe that the people in Government are against the American people. It's things like this that disgust me . . ."—Rochester, N.Y.

". . . Please don't let the FDA add caseinates or other fakes to ice cream. We have enough junk put in our food now . . ."—Scotia, N.Y.

". . . One thing is for sure: Nobody but a chemist will be able to figure out what the ingredients in phony ice cream are because they have chemical names . . ."—Oklahoma City, Okla.

". . . I feel very strongly that the Food and Drug Administration should work to protect the consumer against ersatz-makers instead of cooperating with them . . ."—Astoria, N.Y.

". . . I think the FDA has dabbled in so many useless and unnecessary things and has ignored the real problems of "junk food" (perhaps from fear of the big food companies). I wish someone would straighten them out. I don't like to see the taxpayers' money wasted on things such as this . . ."—Washington, D.C.

". . . The American people have been so conditioned to poor products that many cannot tell good ones from poor ones . . ."—Edwardsville, Ill.

". . . It is difficult to understand why the Food and Drug Administration should concern itself with this issue whose only purpose would be to serve the ice cream manufacturers when there are so many other pressing nutrition problems in this country. This misunderstanding of priorities, or perhaps it is a lack of priorities, characterizes many of the nutrition programs of Federal agencies . . ."—Washington, D.C.

". . . The credibility of the FDA has suffered greatly in recent years. This matter doesn't help them . . ."—Tucson, Ariz.

". . . If any food in America needs to be kept upgraded and full of pure, healthful contents, it is ice cream—a food that is fed to babies, invalids, and old people and every other American under the sun . . ."—Seattle, Wash.

A TRIBUTE TO CHIEF HARRY "CHIP" CORNWELL

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. WOLFF. Mr. Speaker, I would like to take this opportunity to pay tribute to Chief Harry "Chip" Cornwell of company No. 1 of the Mineola, N.Y., Fire Department. Mr. Cornwell will be honored on September 9, 1977 at a dinner given by his colleagues for 50 years of distinguished and loyal service to the department.

Chief Cornwell began his career of dedicated assistance to the department and the community in September of 1927 when his application to join company No. 1 was approved. His abilities and ambition were soon recognized, however, and in 1931 he was promoted to the presidency of company No. 1. From that

point on he continually rose in the ranks of public service, from second lieutenant, first lieutenant, captain, warden, executive secretary, deputy chief, and ultimately to chief of the department in 1955.

In addition to his many duties as chief, Mr. Cornwell has been involved in the supportive affairs and operations of both the company and the department. He has been a true leader in both the community and the department. There is no doubt in my mind that he will continue to be so.

Chief Cornwell's career had been highlighted by his dedicated and responsible performance. I extend my heartiest congratulations to an outstanding public servant on this his golden anniversary.

GOVERNMENT TOO BIG TO HANDLE

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. ABDNOR. Mr. Speaker, while other dates have gone down in history as memorable, Dave McNeill, executive vice president of the Greater South Dakota Association, believes a 1977 day in August is memorable. In his weekly news column, Mr. McNeil made the following observations which merit the consideration of my colleagues:

MONDAY, AUGUST 22, 1977—A DAY TO REMEMBER

PIERRE—The economic news report of the morning of August 22, 1977, provided the most astounding report ever heard by American taxpayers. The Federal government has fallen 7 billion dollars behind in spending this year. The commentator went on to tell of the negative impact on the U.S. economy this "short fall" would cause. It may sound unbelievable, but we are now being told that the taxpayer can't win at the Federal level. Overspend the Federal budget . . . taxes go up. Underspend the Federal budget . . . the economy sags from unemployment and other waves created by government spending.

It's all over at the Federal level. The citizens have lost control; our Federal bureaucracy is too big to handle. The way things are going we would need a billion-dollar study commission to understand why we can't afford to live if the Federal budget isn't spent to the penny. With the Federal budget in the neighborhood of 400 billion dollars per year (granted 6 or 7 billion one way or the other would be considered good estimating), they tell us now that because of the Federal spending impact, we must hit the spending level with pinpoint accuracy.

The kicker is we must get pinpoint accuracy from the Feds who just last week lost enough plutonium to blow up half the world. Pinpoint accuracy from the Feds who not long ago were ripped off to the tune of $800,000 by a Transportation Department employee who simply told the computer to write him some checks. Pinpoint accuracy from the Feds whose computers are capable of sending checks to Social Security recipients with 5 or 6 too many zeros.

Looks like our fate is lost at the Federal level. Thankfully, at the state level we still have a chance to see spending cuts produce tax savings.

HERE IS WHAT THE GENERAL SAID

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. McDONALD. Mr. Speaker, Lt. Gen. Donn A. Starry recently got into trouble with the Carter administration for giving a speech to a high school graduation in which he speculated that the U.S.S.R. and Red China might get into a war and that the United States might be forced to choose sides. For this, ostensibly, the General was recalled from his position post in Germany as Commander of the V Corps, U.S. Army, Europe, and shifted to the position of Commanding General, U.S. Army Training and Doctrine Command at Fort Monroe, Va., a lessor post. Actually, I question whether his speculation about a Sino-Soviet war was the real reason he was censured in this manner. If you read his entire speech, it was a speech concerning basic truths, values and a plea for realism and realistic thinking in this day of sloganeering and "pie in the sky" solutions to the world's problems.

By way of background, the General is not a lightweight. He has a total of 29 years commissioned service, has a master's degree in international relations, and is a decorated combat veteran holding the Silver Star, Bronze Star, and the Purple Heart. Therefore, I believe the General's speech has to be read in its entirety in order to have any perspective on his remarks on a possible war in the Far East. I commend his speech to the attention of my colleagues as it appeared in the Review of the News for July 6, 1977.

HERE IS WHAT THE GENERAL SAID

I thought perhaps we could spend these few minutes considering several things that seem to me to trouble your generation. You might not put them in the order that I do; you might not label them the way I do; but I think you'll recognize them for what they are—I'd call them peace, truth, God, and you.

Peace because a lot is being said about it. A lot of things are being done in its name, but it is and will remain an elusive vision through your lifetime, and so perspective about peace is important to you.

Truth because no one seems to be telling it much any more. There is loss of confidence in the truthfulness of our government, in the integrity of elected officials, which is having an effect on our society; it will continue to do so through your lifetime. So a perspective on the truth is important to you.

God, because although the "Liberals" tried to bury God several years ago, the basic values of our society are still those of our Christian heritage. You will live with the problem of decline of these values through your lifetime, and so perspective on God is important to you.

And you because this is your day. A day to pause a moment to consider who you are, where you are heading, and what you might carry along with you.

So here we go.

MEN CRY "PEACE"

Peace is an illusion. The absence of peace in the world is, always has been, and always will be a fact of life. Conflict of some kind is a natural state of man—not so much war, as competition, competitiveness—in economics, in foreign affairs, in the quest by governments for goals for the governed. Conflict reflects the imperfectness of man in his world, and the perfectness of God in his universe. There will probably be war in your lifetime. The Soviets will continue to encourage and help their Arab friends try to eliminate the state of Israel. Our country may not be willing to go to war over this, but to turn our backs on Israel would be very difficult, and to allow Soviet control of the oil resources of the Middle East would be almost impossible.

The more critical the situation becomes the more likely we are to respond with violence. In your lifetime the Soviets will fight the Chinese, possibly simply continuing their ten-year-old border conflict, but more probably in a major war. Difficult as it may be to see the United States becoming involved in such a war, it is likely we would do so once it became apparent that one or the other of the antagonists was about to win and gain absolute control over the bulk of the Eurasian land mass. On the other side of the conflict spectrum, intra-national war—that is, war within the borders of a country—will be more likely, as both the Soviets and the Chinese continue to export their brand of revolution. The question of how to intervene in such situations without violating the national sovereignty of smaller states, when and how to meddle in what is essentially someone else's business, is not one easy to answer. More nations will have nuclear weapons—just as India has recently. This just increases the chances that a deliberate or irresponsible act by some small nation could trigger a war between larger nations. Could a nuclear attack on Los Angeles arranged by the Communist government of Ethiopia be distinguished from a Soviet attack in time to prevent the United States from launching a retaliatory attack on the Soviet Union? No one knows.

And so true peace will not come in your time. The only peace you can expect, and the only peace of any value to you, is peace of mind; peace that comes with understanding the imperfections of mankind and of having figured out how to cope with this imperfectness. It is a peace that puts you as much at ease as you can expect to be with your fellowman and the imperfections of the world you live in. Ultimately the price of that peace of mind is a willingess to sacrifice something for it; for it is still true that nothing worth having can be had for nothing.

TRUTH HAS A PRICE

Truth is a fragile commodity. The true state of things is frequently unpleasant. That's why we don't tell the truth more often—to ourselves or to others. It is more convenient not to. Instead we rationalize our own imperfections and those of the world around us. If we work hard enough at those rationalizations, we soon believe them ourselves, and when we do, our grasp of the truth is a little less sure than before. Like peace, truth is perfection; its distortion in our world is a measure of the imperfections of that world, and of the perfectness of God. For us there is no absolute truth; there are versions of what is, bound up in the bias of those who observe and report. In your lifetime the truth will be harder to learn than ever before. The "Liberal" press has adopted the adversary doctrine. They are not interested in the truth, only in the five percent or so of the news that deviates from the norm, which in an imperfect world is the only truth there is.

Presumably they would be willing to muckrake around over every public administra-

tion just to see it fall, without concern for the consequences to the country, or to the quality of public administration. By someone's standards we are all less than perfect. If one wants to make an issue of imperfections, some reason can be made to attack every man who has held or could hold public office. The ensuing turmoil simply feeds into the hands of those who claim our form of government is not viable anyway, and has no right or hope for survival. Being objective is important, being skeptical is necessary, seeking after all the facts you can get is essential, in order to make reasonable judgments about what's going on around you, and what you should do about it. The price of truth is a willingness to ask difficult questions, knowing all the while that if the truth really comes in response, the answers will be equally difficult.

THE LIVING GOD

Several years ago the "Liberals" buried God. He wasn't important to them. They found their God in a liturgy which denies that anything—peace, truth, God, even life—is worthy of reverence. And because the Christian ethic is the very basis for our culture, western civilization has been stricken with the cancer of declining morality. Just over a month ago I stood in the Garden of Gethsemane, then walked the long trail across the Valley of the Dead to Golgotha, over the land where seething masses of people have struggled so many thousand years. It struck me that in the time of Christ they had a problem not at all unlike ours. They found peace and destroyed it with war; they found truth and denied it with lies; they found God and hung Him on a cross. The denial of God will continue in your lifetime; you will be called on to decide about Him, who He is, who you are in relation to Him. Perhaps it's not all that important; many people live their whole lives without solving this problem, but I suggest that your life takes on meaning, that the greatest value of a life is to spend it for something that lives after it, that in the end you become what you are through some cause you have made your own. And if you follow that line of reasoning, deciding about the part God plays in your world is important.

WISDOM AND YOU

And now what about you? This is your life. We reviewed some unpleasant realities simply to challenge you to think realistically about some hard questions that face you. Thinking seriously about what I've said could make you want to drop out of society. You can't drop out of society and remain a part of it. Three hundred years ago the Bounty mutineers did that and the society they created to replace the one they left came to be filled with all the disillusionments from which they had fled in the first place.

You are young and full of dreams. Your elders say that you'll get older pretty soon, more mature, and then you'll be all right. Well, that's not quite right. Youth is important. It's important that you stay young. Youth is not a time of life, it is a state of mind. Nobody grows old by living years. People grow old by deserting their dreams. Youth is a quality of the imagination, a vigor of emotions, a predominance of courage over timidity, and appetite for adventure opposed to the love of ease. Whatever your years, keep in your heart the dreams, the urge to challenge events, the unfailing childlike appetite for what's next, and the knowledge that the joy of life is in the living; that when you fail to live it to its fullest you miss all the joy of it. You are as young as your faith, as old as your despair. So long as your heart holds dreams of hope, beauty, courage, so long are you young.

TO SERVE AN IDEAL

And so tonight you pass this turn in the road of your life, full of hope, full of dreams, full of anticipation for what comes next. I hope you will strive for and achieve great things. But remember, in many ways it's a far higher ideal to live an ordinary life in an extraordinary way, to serve an ideal amid the drab, humdrum surroundings of everyday life, and still retain a vision of the common man as a shadow of God.

And so your world goes out on every side, no wider than your heart is wide, and up above the world your sky no higher than your soul is high.

May the road ahead rise with you to new heights, may the wind be ever at your back, and may God carry you always in the palm of His hand.

BLUE SUEDE SHOES

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mrs. SCHROEDER. Mr. President, the following comment appeared in the August 29, 1977, issue of the New Yorker:

We have a letter from a man who was thirteen years old in 1956:

I would like to tell you about one song recorded by Elvis Presley. It is a song he recorded in 1954 for the Sun label in Memphis, and it is called "That's All Right." I heard it two years later. The first words of the song are:

> Well, that's all right, Mama,
> That's all right for you.
> That's all right, Mama,
> Just any way you do.

Elvis Presley's voice is like a high, sharp shiver. There isn't any part of the song not covered by a thrilling energy. This is a significant American song, sung by a significant man. I still have my copy of "That's All Right," on a long-playing album called "For LP Fans Only." That is a stupid name for an album—"For LP Fans Only." Whoever gave that title to that album understood the nature of Elvis Presley's simple energy but was afraid of it. The album is under the RCA label, but it has a number of songs, like "That's All Right" and "Mystery Train," that he recorded for Sun.

Elvis Presley was a cool guy. He was the coolest guy I have ever seen. He had a gift—a gift as great as, say, the gift of Marilyn Monroe for romantic comedy—and he had an instinctive generosity, too. He didn't know what he was about, but he was protected for a while by his naïveté and by his simple energy. He cut through gruesome layers of self-consciousness, although they closed in on him later. But they didn't close in on him completely, you know. Whatever there was toward the end of his life which was grotesque was probably the result of an attempt to keep his integrity and his cool—as he, imperfectly, understood the nature of his integrity and his cool. And he was cool up to the end. His single "Way Down" was on the charts the week he died.

I haven't seen anything on television or in the papers that gets to the point about how cool he was. Just drugs and money, and bad movies and Las Vegas and bodyguards and "hip-shaking" and getting fat. I saw a television newscast about Elvis and it made me mad, because the newsman who conducted it was exactly the kind of nineteen-fifties guy—full of false inflection and false authority—who was completely blown away by Elvis; and there he was again, full of false inflection and false authority still, condescending to him. The newsman cut away to a little group of post-adolescent "experts," and they were worse. The new false post-adolescent authority that needs to be blown away by somebody. The only decent tribute I saw to Elvis was in the hallway of a building at the corner of Sullivan and Prince Streets. Somebody had put an old pair of blue shoes on a chest of drawers in the hallway with a handwritten sign. "Don't Step on My Blue Suede Shoes—In Memory of Elvis," the sign said.

FUNDING FOR ADVISORY NEIGHBORHOOD COMMISSIONS IN THE DISTRICT OF COLUMBIA SHOULD BE CONTINUED

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. FRASER. Mr. Speaker, Congress should not delete funding for advisory neighborhood commissions—(ANC's)—in the fiscal year 1978 District of Columbia appropriation bill.

ANC's were authorized by Congress in the District of Columbia Home Rule Act to bring the views of the local neighborhood to the attention of the locally elected officials and city agencies. District residents voted 3 to 1 for ANC's as a special item on the ballot of the home rule charter referendum.

A typical ANC is in Southwest Washington where I live, as do several other Members of Congress. The nine ANC members were elected at the polls in Southwest last year and serve without compensation, in a neighborhood of about 20,000 people. The Southwest ANC's annual budget of $21,000 pays for a part time employee, an office in the neighborhood, telephone, newsletter, and notices of meetings.

ACTIVITIES OF ANCS

The August–September issue of the Southwester, the Southwest community newsletter, tells of Southwest ANC activities on these neighborhood problems:

New zoning in Southwest, proposed by the city planning office to include higher density commercial and hi-rise apartments.

The city's urban renewal proposal for a new building by the railroad tracks in Southwest.

The Southwest neighborhood health clinic staffing by the city Department of Human Resources (DHR).

Maintenance, security and fire problems at public housing hi-rises in Southwest were brought to the atention of city officials.

Residential parking permits for Southwest.

The ANC in Southwest is clearly filling a needed function in a large city like Washington, D.C.—the 11th largest city in the country, ANC's throughout the city are valuable links between citizens in the neighborhoods and 40,000 officials

and employees of the many city departments, offices, boards, and bureaus.

Funding should be continued for ANC's in the District of Columbia budget.

A UNILATERAL CURB ON SPACE WEAPONS?

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. SYMMS. Mr. Speaker, I have learned that Paul Warnke and Adam Yarmolinsky, chief Disarmament Agency officials, are recommending to President Carter that the United States unilaterally refrain from developing space weapons essential to protecting our intelligence and communications systems.

Warnke and Yarmolinsky are suggesting to the President that if the United States announces a policy of not developing devices such as killer satellites, then the Soviet Union will follow suit.

This faulty logic ignores, however, the fact that the Soviets have been developing hunter-killer satellites and other space weapons for several years now. Furthermore, the Warnke-Yarmolinsky thesis of unilateral restraint in countering Soviet weapons buildup has been consistently contradicted by Soviet actions for some 30 years now. Should Warnke and Yarmolinsky prevail the United States would be placed in such serious disadvantage that it would be next to impossible to redress.

Warnke and Yarmolinsky have vigorously opposed every new U.S. strategic weapons program. They have been ardent advocates of what amounts to unilateral disarmament, and they profess that the arms race is all our fault. Consequently, Mr. Speaker, it is imperative that the Congress and the American people keep an eagle eye on the SALT negotiations and the policy advocates at the Disarmament Agency.

The following Evans and Novak column from the August 27, 1977, Washington Post should be noted and deserves our concern:

A CURB ON SPACE WEAPONS?

(By Rowland Evans and Robert Novak)

A proposal to slow development of space weapons essential for protecting U.S. intelligence and communications in an all-out war is expected to go before President Carter soon in presidential review memorandum (PRM) 23.

Although finishing touches have not yet been put on PRM 23, the thrust of the inter-agency study is certain at this writing. It will seek to lead the President away from the Ford administration's push for swift development of outer-space weaponry.

The importance of developing top-secret technology to defend against possible Soviet attacks on U.S. satellites would seem obvious on its face. A Soviet attack destroying communication and spy satellites would leave the U.S. helpless. Nevertheless, the arms-control lobby, now riding high with Paul Warnke as director of the Arms Control and Disarmament Agency (ACDA), looks to outer space for an early test of the Warnke thesis on arms control.

Warnke's thesis: The United States should unilaterally abandon new weapons systems as an example to the Russians, assuming the Kremlin would then follow that example. This thesis, unsupported as yet by any evidence during the past 30 years of U.S.-Soviet relations, would be applied at once to outer-space warfare—if the President accepts the thrust of PRM 23.

In its dying days, the Ford administration conducted two secret studies into how the United States should respond to alarming Soviet advances in the technology of offensive outer-space warfare—satellite-killing Soviet satellites, sometimes called satellite interceptors. The Ford answer: full speed ahead for the United States.

A footnote: Compounding the U.S. danger was the conviction last spring of two Americans on espionage charges in TRW's top-secret weapons plant in California. They were charged with passing to Moscow this nation's most advanced outer-space warfare technology, immediately making U.S. satellites more vulnerable to potential Soviet attack.

JAYNE SCHIFF: SPIRIT AND DETERMINATION

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. WOLFF. Mr. Speaker, I rise today to pay tribute to one of my constituents, Jayne Schiff, who has through her own efforts and determination been able not merely to endure her physical disabilities, but to prevail over them as well.

Jayne was involved in an accident which severely damaged her spinal cord. In spite of this injury, however, she has continued to be interested in competitive swimming. As we are all aware, training for competitive athletics is a difficult, sometimes painful, ordeal even under the best of circumstances. It is surely an undertaking which tries not only individuals' physical stamina, but also their will to achieve and their desire to excel. In Jayne's case the challenge was especially difficult and required exceptional courage. I believe that is why notice of her achievement in the RECORD is especially well-deserved.

On June 17 Jayne set a new national record in winning the 200-yard freestyle swimming event in the National Wheelchair Games, which took place this year in San Jose, Calif. To win her gold medal, she had to swim the 8 laps in 4.41. Jayne was also awarded two silver medals for her second place finishes in the 25-yard butterfly and the 25-yard freestyle.

Mr. Speaker, individuals are always confronted with challenges. Some shrink from the task for want of incentive or for lack of inspiration. I believe that Jayne's efforts and accomplishments should be an inspiration and incentive to us all and should serve as a reminder that adversity need not be an impediment to achievement; it can also be an opportunity to excel.

PROPAGANDA CLOUDS THE REALITY OF GIVEAWAY TREATIES

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. DORNAN. Mr. Speaker we are currently being inundated with deceptive propaganda aimed at brainwashing the American people and their Representatives in Congress. The goal of this propaganda is to persuade them to accept proposed new giveaway treaties for the Panama Canal which were never authorized by Congress. As a result of this misleading propaganda, there is far more confusion about the realities of the situation and the treaties than understanding.

The projected treaties involve the disposal of territory and other property of the United States. Under article IV, section 3, clause 2 of the U.S. Constitution, this power is vested only in the Congress, which agency includes the Senate and the House of Representatives.

Among the veteran Washington correspondents who have closely followed the canal treaty question and written extensively on the subject over a period of years is Robert S. Allen.

In his syndicated column dated September 8, 1977, he summarizes the current situation in the Congress and emphasizes the power of the House of Representatives.

Mr. Speaker, because the indicated article by Colonel Allen should be of wide interest particularly in the Congress, I quote it here as part of my remarks:

(By Robert S. Allen)

Washington, September 8, 1977: There is a significant omission in the elaborately staged grandiose fanfare and hooplah glorifying the formal signing off the Panama Canal treaty.

It's the absence of recognition of the key role of the U.S. House of Representatives.

Imposing honors are being bestowed on the big-name participants of the U.S. Senate, but strikingly those of the House are virtually ignored. What attention they're getting is largely fleeting and incidental.

Yet the House is directly and crucially involved in the highly volatile battle over the Canal pact.

Without House concurrence, it will be basically meaningless.

That's due to the fact that the treaty involves the transfer of billions of U.S. property and the payment of hundreds of millions of dollars to a foreign country—and that can only be done by legislation voted by both branches of Congress.

So while the Senate has the constitutional function of ratifying treaties, in the instance of the Panama accord, the House will play an equally momentous role.

READY AND WAITING

Further, this vital legislation must originate in the House.

Not only will the House have first crack at it, but long-time opponents of a "Panama Canal giveaway", as they vehemently characterize it, are chairmen of the committees that will frame the legislation.

Foremost among these hostile die-hard crusaders are Representatives John Murphy, D-N.Y., chairman of the Merchant Marine and Fisheries Committee which has jurisdic-

tion over the Canal and Zone, and Daniel Flood, D-Pa., chairman of a key Appropriations subcommittee. It is the Appropriations Committee that will handle the huge financial aspects of the treaty.

These two powerful and strategically-placed House leaders are no johnny-come-latelies on the Panama Canal issue.

They had a lot to do with torpedoing President Lyndon Johnson's 1964 attempt to negotiate a Panama treaty. In the years since then, they have maintained a constant drumfire of blasts against tampering with U.S. sovereignty over the strategic waterway and adjoining Zone.

Throughout they have had plenty of bipartisan backing. In the eight months of this Congress alone, more than 50 Republican and Democratic congressmen have sponsored bills and resolutions against a new treaty.

The real militant core of hardnose congressional opposition to the pact is in the House rather than the Senate.

For President Carter, that's where the rub comes in.

Because even though in the end he may pressure and wheedle Senate ratification, he still has a long way to go—and in many respects far rougher and more uncertain.

Getting the House to enact the so-called "implementing legislation" will be a truly monumental undertaking—with the odds heavily against him.

WARNING SHOTS

Graphically illustrative of what the President is up against are the following unsparing comments:

Representative Flood: "This giveaway treaty was not authorized by Congress. It's part of an organized and crafty communist conspiracy to wrest control of the Canal from the U.S. Panama is utterly incapable of operating the complicated canal. In 1955, when it assumed responsibility for its own sanitation, it was unable to collect garbage from the streets of Colon and Panama City.

"Prior to 1904, the Isthmus was the pesthole of the world. Construction of the canal transformed the area into models of tropical health and sanitation. Panama has been and is the greatest single beneficiary of the canal, with total benefits from U.S. sources in 1976 of more than $243 million."

Representative John J. Flynt, Ga., chairman of the Ethics Committee: "While under the Constitution, the House will not have a direct vote on ratification of the treaty, it will have a decisive voice in the appropriations process. The American people, overwhelmingly agianst relinquishing control of this indispensable defense and economic resource, can be assured the House will fully and forcefully exercise its authority on this all-important issue."

Representative Murphy, West Point graduate, has bluntly served notice on Administration leaders in the House that his committee will not consider any legislation dealing with the Canal issue this year. He told them, "We have too many other pressing matters awaiting action, and the Panama question can wait—particularly as a great majority of American people are against it.

"When Congress meets next year, we'll see how the situation is and decide what we'll do about Panama—if anything. One thing is certain: I have no intention of being rushed on this matter."

And that goes for scores of other House members facing unpredictable re-election campaigns.

As they see it, the ball is in their corner and they're going to call the turn and not the President. He needs them a lot more than they need him. As one tartly put it:

"He negotiated this treaty. The House didn't ask him to. So let him worry about it. Most of my constituents want no part of it, and neither do I!"

FROM SOUTH DAKOTA—KEEP THE HATCH ACT

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. ABDNOR. Mr. Speaker, during my August recess travels across South Dakota a number of citizens have expressed their concern over House passage of amendments to the Hatch Act. Most of them feel, as I do, that this act as it presently exists serves to not only protect Federal workers, but protects the public. They are hoping the Senate will not go along with the House in this matter. South Dakota views are pretty well summed up in this editorial from the Sturgis (S. Dak.) Tribune, a newspaper serving many Federal employees at a nearby veterans hospital, veterans cemetery, national forest, and Air Force Base:

RETAIN THE HATCH ACT

There's a serious effort underway in Congress to repeal the Hatch Act. That's the act that prohibits federal employees from holding elective office or participating in partisan political campaigns, those who favor its repeal contend that it discriminates against federal workers and violates their Constitutional rights.

The Hatch Act was originally enacted to remove politics from the Civil Service system. Until it became law the federal bureaucrats had subtle ways for coercing employees into supporting, both with contributions of time or money, candidates and programs with which they were not in sympathy. Much as labor unions have subtle ways of pressuring non-union workers into "joining up or else." It may be unconstitutional to force people to join organizations they'd prefer to pass up. But, believe us, it's being done in this land of the free and the home of the brave.

The Hatch Act, it should be pointed out, does not prohibit federal employees from voting for the candidates of their choice. But it does prevent them from spending money, which comes from the taxpayers, and devoting time, while under the employ of the taxpayers, for partisan political candidates and campaigns. Without the Act, workers who earn their livelihood at the public trough could conceivably lobby for candidates and programs that are unwanted by the taxpayers who support these workers.

The dangers of abuse might not be so disconcerting if the federal workers would become involved in partisan politics on their own time and with their own money. But the temptation to use governmental resources, including stamps, envelopes, addressing and duplicating machines, not to mention office hours, all financed by the taxpayers at large, for partisan political purposes might be overwhelming. There are zealots in every campaign who'll do anything needed to win. We have the sorry experience of Watergate as testimony to this fact, although it involved federal employees not covered by the Hatch Act. It's frightful to contemplate the possibilities of abuse if the lid was off of partisan political participation for all federal employees.

Frankly, we don't think it's asking too much that people whose livelihoods are provided at public expense be prohibited from holding elective office at the same time, and from becoming political partisans. As long as they have the privilege of the secret ballot, like all the rest of us, we don't think they're being unfairly restricted by the provisions of the Hatch Act. It's served the country well over the years, although it's not been enforced to the extent we'd like, and, in our opinion, it should be retained.

PROTECT MILITARY BENEFITS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. McDONALD. Mr. Speaker, the trend in recent years has been to chip away at military benefits in order somehow, it appears, to get even with the U.S. military because they dared to follow orders and fight a no-win war in Vietnam against the Communists. The logic of this situation is upside down, because it was the national leadership of this country that engaged this Nation in a losing and futile effort and never gave our military a chance at victory. However, under the guise of economy, the trend to diminish or take away military benefits has continued. Therefore, I was pleased to note the editorial in the Washington Star on August 3, 1977, discussing why these so-called benefits are not only necessary but are earned by the military. The military falls into the same category as the police and firemen. You do not cut back on policemen and firemen benefits because crime and fire are increasing. And in the face of the growing Soviet juggernaut, we can ill afford to lower the quality of armed services by the steady erosion of benefits. The editorial follows:

PROTECT MILITARY BENEFITS

The Senate Armed Services Committee has completed hearings on bills that would prohibit members of the armed services from joining labor unions. Perhaps it will not be long before this legislation becomes law.

Until lately, the thought of labor unions in the military was so far-fetched that legislation hardly seemed necessary. But with some unions ready to mount organizing efforts on military installations the need for laws banning such activity has become obvious.

Yet Congress should not think that banning union membership will eliminate the climate that has led unions to view the military as a "fertile field" for organizing efforts.

A major element in producing this "fertile field" has been the constant criticism lately—and some actual erosion—of benefits to military personnel. Vietnam brought the military into disrepute in some quarters, making it a convenient whipping boy for politicians and a target for cost-cutters on Capitol Hill and elsewhere in government.

Every year, for example, military commissaries come under attack in congressional appropriations committees for making groceries available at discount prices. One would think from the criticism that the taxpayers are being ripped off to the tune of about $300 million a year by well-heeled generals and admirals loading up on cheap foodstuffs, when in fact the vast majority of commissary customers are families of enlisted personnel, some of whose income is near or below the poverty level, and of lower-ranking officers, who are hardly getting rich in the military.

If the government can provide about $80 million a year in subsidies for a few thou-

sand tobacco farmers to grow a substance demonstrably bad for health, what's wrong with subsidizing commissary operations by $300 million a year to benefit about 2 million members of the armed services who are on call 24 hours a day to defend the country?

There's also been a hullabaloo lately about "double dippers"—retired military people who work for the government and draw civilian pay while continuing to collect military pensions. The fact is that most of these "double dippers" are enlisted retirees whose average retirement pay is around $5,000 a year and whose civilian jobs are in the lower echelons of the civil service; but the critics focus on the 10 retired admirals and generals whose combined military pension and pay for top-level civilian jobs put their total compensation above that of Cabinet officers.

The "double dipper" controversy has triggered criticism of the entire military retirement system, which allows personnel to receive partial retirement pay after 20 years service and full retirement benefits after 30 years. Critics have suggested that early retirement be ended, that no retirement be paid before a certain age, that service personnel be required to contribute a portion of their active duty salaries toward retirement pay.

Nor are educational and medical benefits for the military what they used to be. And promotions come slower nowadays.

Add in the frequent long hours—there's no overtime pay in the military—the regular uprooting of homes, the frequent family separations, and the possibility of risking life in defense of the United States or an ally. It takes some dedication, if not rose-colored glasses, to see military service as a really attractive life.

The retirement benefits, the medical services, the commissary privileges and the rest were offered to induce men and women to join and make a career of the military. The fewer benefits, the less attractive it becomes; already the military is having difficulty filling quotas for the all-volunteer services, and there is talk of returning to the draft.

Yes, Congress should ban unions from the armed forces. But Congress also ought not chip away at military benefits and contribute to a climate that fosters unionism. Congress is, in effect, the shop steward to which military men and women look for protection of their rights, privileges and a decent livelihood.

VILLAGE OF KENSINGTON RECEIVES AAA SPECIAL CITATION

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. WOLFF. Mr. Speaker, I would like to enter into the RECORD due recognition of the Village of Kensington of the Sixth Congressional District of New York. On August 25, 1977, Mayor Marvin G. Florman announced that the town had received the AAA Special Citation for Casualty Record for no pedestrian fatalities for 45 consecutive years and no pedestrian injuries for 12 consecutive years.

The award will be presented to representatives of Kensington by Commissioner James Melton and president of the Automobile Club Harold C. Meyers at a special awards ceremony to be held at Tavern on the Green on September 19.

The AAA pedestrian safety inventory program evaluates comparable communities throughout the Nation. Awards are given to those communities who have compiled the best safety records for 1977.

My sincere congratulations to my neighbors the fine citizens of Kensington and their outstanding accomplishment; may they continue to set such a fine example for all communities.

TRIBUTE TO MRS. JOHNETTA HALEY

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. CLAY. Mr. Speaker, numbered among the many outstanding citizens of St. Louis is Mrs. Johnetta Haley. I would like to take this occasion to pay tribute to her for this most recent achievement. The article follows:

[From the St. Louis Sentinel, Aug. 11, 1977]

ELECTED TO BOARD OF CURATORS AT LINCOLN U.

Johnetta Haley, assistant professor of music at Southern Illinois University at Edwardsville, was recently elected president of the Board of Curators at Lincoln University in Jefferson City, Mo.

the board in the history of the university

Mrs. Haley is the first woman president of which was founded in 1866. She was appointed to the board in 1975 by former Missouri Governor Christopher Bond.

Mrs. Haley received her B.S. degree in music education from Lincoln University in 1945. Her mother was graduated from the university in 1913.

The SIUE musician also attended the University of Illinois and Washington University in St. Louis. She received her master of music degree from SIUE.

Currently, she serves on the board of directors for the Metropolitan YWCA in St. Louis. Mrs. Haley was a chief organizer of the "World's Largest Garage Sale," sponsored by the YWCA in June at the St. Louis Gateway Convention and Exposition Center.

Mrs. Haley also serves on the Council of Lutheran Churches, Advisory Council of the Danforth Foundation's St. Louis Leadership Program and the Artist Presentation Society.

She holds memberships in Alpha Kappa Alpha service society, Mu Phi Epsilon professional music sorority, Pi Kappa Lambda music honor society and numerous professional and civic organizations.

Mrs. Haley is listed in Who's Who of American Women, Who's Who Among Black Americans. Who's Who in the Midwest, Notable Americans in Community Service and Who's Who Among the World's Musicians.

Before coming to SIUE in 1972, she was vocal music director and chairperson of the music department at Nipher Junior High School in Kirkwood, Mo. Previously she had been choral director at Lincoln High School in East St. Louis and an elementary music specialist in the Kirkwood Schools. She also worked with the Human Development Corp. and was director of the St. Louis Council of Black People in 1970.

In July, Mrs. Haley received the Distinguished Alumni Award from Lincoln University at the university's national alumni convention held in San Francisco.

A native of Alton, she now lives in University City with her husband, David. They have two children.

CARTER AND THE CHINA QUESTION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. CRANE. Mr. Speaker, in appraising the Carter administration's efforts in foreign policy, namely the Soviet Union, the Middle East, Europe, Africa, and finally Asia, one is left with an uneasy feeling of not knowing whether progress is being made, the equilibrium is being restored, or whether we are following a detrimental course which will lead to the demise of the free world, as we know it today.

Today, and in the next few days, I would like to focus on the so-called China question and the Carter administration's efforts in that area. During the August recess, many articles were written on China and Secretary Vance's recent trip to the People's Republic of China. Many of these articles dealing with "normalization of relations" with Peking reflected the great doubts which many of us hold regarding our imprudent sacrifice of the Republic of China for equally doubtful assumptions of the benefits and advantages the United States can derive from relations with Peking.

I would like to share with my colleagues an article by Prof. Thomas Etzold entitled "Are 'Full Relations' Important to China?":

ARE "FULL RELATIONS" IMPORTANT TO CHINA?

(By Thomas H. Etzold)

In observing the China policy of the Nixon-Kissinger years and now of the Carter administration, I am reminded, sadly, of certain metaphysical disquisitions of the late Middle Ages. Then, learned men debated a fundamental question of human outlook, that of whether the earth was, or was not, the center of the universe. Of course it was not, any more than the United States today is the center of international politics. Yet, in approaching the issues of Sino-American relations, especially those surrounding the Taiwan-U.S. tie and so-called "normalization" of relations with Peking, the government of the United States appears to have persisted in a Ptolemaic view, an "Americacentrism" that distorts perception of how things fit together and, therefore, of what one should expect in the relations between China and the United States.

One misapprehension resulting from a Ptolemaic view is the notion that in relations with China the United States has influence naturally and by right rather than by circumstance. It is, however, wrong to imagine that the United States is central, or even very important, in the larger concerns of the Communist leaders of modern China. In a remarkable lack of percipience, Americans have probably never realized adequately the extent to which the domestic reconstruction of China after 1949 overshadowed external affairs. The aim of the revolution was no less than to make a new society for a nation four or more times larger than the population of the United States, with a cultural and

political heritage some 30 times longer. Indeed, the Chinese seem to have established a priority for national policy often advocated for the United States in recent years, but never attained: internal affairs first and foreign affairs second.

Despite its relative unimportance in the overall Chinese scheme, the United States of late has received a lot of attention from China's chiefs. This has caused some befuddlement in the United States, for many Americans—including some who should know better—have mistaken these courtesies for indications that the United States has become more important to China; that this is a fundamental and enduring change; and that with certain adjustments on either side, a warm, substantial and profitable political-economic relationship might develop. The United States has only to withdraw from support of Taiwan and, in turn, the People's Republic of China will open its economy, country and culture, and perhaps take up a "constructive" role in regional and world politics.

But the reasons for China's regard for America's dignitaries are much less profound or promising than the Ptolemaic politicians, the wishful thinkers of Washington, would like to believe. For they arise from circumstances, not from any intrinsic American importance in the Chinese perspective. One reason for the amount of notice the United States has received in recent Chinese considerations—an obvious one—surely is the Sino-Soviet animosity. There is no doubt, as many have observed, that, much as we do, the Chinese seek to insure themselves against Russian menaces by playing at triangular politics, even to the point of seeking military sales and assistance from the United States.

Another such reason for the modicum of importance assigned to the United States in China's foreign affairs has been the American guarantee of Taiwan. Here there has been significant misperception on the American part. The Taiwan connection has grown into the central issue of Sino-American relations; it has been easy, though erroneous, to assume that similarly Taiwan has become something more for the Chinese than it has always been—namely, a peripheral, though contentious, matter alongside the problems of leadership and governance facing China's headmen.

It is evident that now, with the Sino-Soviet dispute in full swing and the security treaty with Taiwan intact, the United States has some influence, some standing, with the leadership of the People's Republic of China. It is not as evident, however, that in the long run the United States may well retain more influence by irritating Peking rather than by placating it. And here, perhaps, some explication is necessary.

The first important fact to recognize is that the United States cannot ensure the long continuation of the Sino-Soviet dispute in terms that offer political advantage or require the Chinese to show solicitude for America's leaders and interests. Further, as George F. Kennan has noted in "The Cloud of Danger," it is precarious policy, poor statecraft, to base one's relations with another country on that country's bad relations with still a third. Nor is it in the interests of the United States to encourage dangerously hostile relations among any two other countries, much less such powerful ones as China and Russia. Such a policy can only make the climate of great power relations less agreeable for all, and somewhat more risky.

The second point of importance follows from the first: Precisely because the United States cannot depend on the continuation of advantage from a Sino-Soviet dispute, it must retain its connection with Taiwan, and thus its ability to command some measure of consideration in the councils of the People's Republic of China. This may seem paradoxical. It has been more popular to argue, as have the officials of the PRC and their tame American academics and journalists, that once the shadow of the U.S.-Taiwan treaty is lifted, Sino-American relations will flower. But has anyone been observing how difficult it has been in the last several years to conceive just what would be the ingredients of "normal good relations" and how they would benefit the United States? China could scarcely do more than it does now to pin down Soviet military capabilities to the benefit of the United States and its Western allies. The U.S. government does not—and should not—wish to encourage China to political activism outside its borders. And the United States can, after all, absorb only limited quantities of tung oil and hog bristles, which are China's leading exports to America. Moreover, I would venture to say that, before long American Ping-Pong players will tire of being paddled to pieces by the wizards of wei-hai-wei.

Recently the administration has given increasing indication that it will move speedily toward full, "normal" relations with Peking, and, because it is critical to Peking's definition of "normal" relations, toward abrogating the defense treaty with Taiwan. The expectation is that great and good relations cannot be far behind. Yet one must suspect that this idea is nothing more than the 1977 version of the hoary China myth—if only every Chinaman would buy a shirt with a tail four inches longer!—that bemused Americans for generations, only to prove unfounded. There never was much substance either to the China market or to the Sino-American relationship. George Kennan, who otherwise favors abrogation of the defense treaty, made an important point both in his recent book and in an interview broadcast in December 1976: "I think," he said, "that [the Chinese] don't particularly like foreigners. I don't think they're terribly interested in us, and I think they're capable, along with their great delicacy of behavior, of great ruthlessness when you least expect it of them. I would feel that Americans ought to be very careful in their dealings with them."

In the long run, it is going to be more essential for the United States to get the attention of China than to remove the irritant of Taiwan from Sino-American relations. As things stand, only that relationship with Taiwan seems likely to assure the United States of a decent regard from Peking. It is up to the People's Republic of China to demonstrate how badly it wants full relations with the United States, and how much these may be worth both to them and to the United States. And for this demonstration, the United States can afford to wait; there is no need either for unseemly haste or for the imprudent sacrifice of an ally. If the United States does not pause, one must fear the day when America's relations with China may resemble nothing so much as comic lines in a tragic play:

"GLENDOWER. I can call spirits from the vasty deep.

"HOTSPUR. Why, so can I, or so can any man;

But will they come when you do call for them?"

Will the Chinese come? Will they even answer, when the United States has given in on the Taiwan issue and the terms of Sino-Soviet relations offer less opportunity? A modern-day disciple of Ptolemy would be certain of a positive answer. That in itself may be reason enough to be uncertain, and therefore cautious about seeing things in the manner of Ptolemy and doing things in the manner of Peking.

POSTAL SERVICE: A VIEW FROM RURAL AMERICA—V

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. ABDNOR. Mr. Speaker, like most of my colleagues, I listened to a lot of comment concerning the Postal Service during the August recess. Most of the comment was not favorable. People in South Dakota are worried about losing Saturday mail delivery; they are a little suspicious that the proposed citizen rate mail may not be all it is cooked up to be; they are worried about soaring deficits and postage rate increases.

Their views are pretty well reflected in this series of editorials from South Dakota newspapers:

CITIZENS OPPOSE CURTAILMENT OF MAIL SERVICE

Five-day-a-week mail service as has been proposed by the Commission for Study of the Postal Service?

"No" respond those who depend upon the mails, according to an Aberdeen American News survey of its readers, 85.7 per cent of whom . . . more than four out of five . . . opposed it.

Many obviously fear that reduction to five-day service, eliminating Saturdays, would be only a first step in continuing erosion of mail service.

Here are typical responses:

Ellendale, N.D.—"No; we do not favor five-day mail delivery, for the mail is our sole means of communication with the rest of the world. We are employed on a farm and depend on our daily newspapers."

Leola, S.D.—"No; I'm certain this could not stop a postage increase but only inconvenience the rural area. Items ordered by mail many times cannot survive the long delay."

Java, S.D.—"No; Congress should get rid of the wrecking crew and reestablish the old Post Office Department which was never intended for profit, but free delivery service to all."

Ashton, S.D.—"No; I don't believe the savings would warrant the demise of the once proud Postal Service. Five day, then three day, then no service at all."

Conde, S.D.—"No; if it was reduced to five days how many more offices and workers would have to be put on in Washington to institute this change. We need our Saturday mail."

Miranda, S.D.—"No; five day service will not improve service or save dollars. Even Zip code mail goes astray to Eureka, Northville, etc."

Faulkton, S.D.—"No; five days would delay news, especially newspapers. This is in complete disregard of the best interests of our small town businesses and their ability to communicate with outside interests."

Warner, S.D.—"No; I also think that the American News should keep reminding people to write to their congressmen about this five-day delivery bit. Because if they let them knock out Saturday delivery, the next thing the Postal Service will do is knock out another day of delivery and we could end up with two or three days a week."

Roscoe, S.D.—"No; we as farmers depend on six day mail route, both by getting our letters and by mailing letters in return."

Aberdeen—"Yes; if the day off is not Saturday. We are retired farmers and know what a disappointment that would be. Rural

people look forward to the mail and especially the paper."

The S. D. Postmasters Association at its recent state convention in Sioux Falls adopted a resolution opposing elimination of mail service on Saturdays. Many other groups have also opposed it.

Adds the Sioux Falls Argus Leader:

"A nation which can put its men on the moon and target intercontinental missiles within a hundred yards should be able to zero in on problems affecting such a basic government service as the U. S. mails."

TWO-TIER LETTER RATE APPEARS NOT TO BE SOLUTION TO POSTAL PROBLEMS

Many persons concerned about the problems and costs of mail delivery are unhappy over considerations of the Postal Service to establish a two-tier rate for first class letters.

It appears to them that in its confused effort to improve conditions the Postal Service is about to jump from the frying pan into the fire.

The Rapid City Journal said the proposal, suggested by President Carter, to boost the first class mail rate for business by three cents while holding the line at 13 cents for individuals smacks of populism rather than a sound economic approach to the Postal Service's fiscal problems.

The Journal said:

"From the administration's standpoint, holding the line on rates for individuals will ease the political pressure on President Carter to reassert White House control over the independent postal agency and to support large additional federal subsidies to keep mail rates from rising. Increasing these subsidies could upset the President's hopes of balancing the budget by 1981.

"In moving quickly to adopt the Carter suggestion, Postal Service officials are hoping the President will resist pressures to back legislation that would strip them of their independence.

"Politics aside, the two-tier system seems fraught with difficulties.

"While the rate break to the 20 per cent of the first class mail users who are individuals will total $300 million a year, the savings to any one individual will be relatively small. But the task of policing the two-tier system to detect cheating could be both time-consuming and costly. We foresee the use of hundreds of inspectors to be sure some businesses don't try to take advantage of the citizen's rate not to mention the time and money spent to prosecute offenders.

"Charging businesses more for first class mail service may be politically popular but, as with any other cost of doing business, increased mail charges will be passed on to consumers in the cost of goods and services.

"If the Postal Service is to be self supporting, all users should share in the cost of service. It costs the same to process and deliver a first class letter from IBM to a business client as it does a birthday card to grandma. The stamp on both should cost the same."

The Yankton Press & Dakotan called the "citizen's mail" vs. "business mail" solution one of the most ridiculous bureaucratic suggestions to come out of Washington in a long time. The Newspaper said:

"Being a little suspicious of almost anything the top dogs in the U.S. Postal Service do, it wouldn't surprise us a bit if this proposal is simply a smokescreen for the Postal Service to get its way on eliminating the Saturday delivery of mail—even though Mr. Bailar (postmaster general) didn't propose it in his recommendation to the Postal Service Board of Governors.

"We assume he thinks—and he's probably right—that there would be more flak aimed at increasing the postage rates for business than he might get from eliminating the Saturday delivery—so the compromise can be made—regardless of how the six-day mail delivery service would cause great hardship in Rural America.

"And so we can assume, that if enough fuss is raised over the variable rate proposal—that the compromise would be the elimination of Saturday service.

"Neither should happen.

"If the United States Postal Service operated in the same businesslike manner that most businesses, which Mr. Bailar now proposes to penalize, many of the problems of that big agency could be overcome."

SAVE SATURDAY MAIL

Results of our survey concerning the proposed discontinuing of Saturday mail delivery re-emphasizes the vast amount of discontent by people in our trade area for the postal tailoring project.

The early response was overwhelming in opposition to such plans, with 183 or 190 responding indicating their discontent with the elimination of Saturday mail service.

The responses, coming from 54 different communities is a solid indicator of the feelings of the people in South Dakota. Where other newspapers have conducted similar surveys, the results have been equally onesided in opposition to the plan.

We are encouraged by the results of the reader response, but in effect, we must also reach Congress to direct our feelings to them.

There is a need to gain support from our federal lawmakers from all sectors of the country to establish the fact that the proposal is against the public wishes.

As our responses indicated, it will be a particularly difficult hardship placed on rural customers who already find some mail delayed a day. There can be no mistake about the feelings of our subscribers. They have, through their participation in this survey, indicated a given number of reasons for their concern.

Some of the responses from subscribers follow:

"I will be agreeable to curtail Saturday mail delivery when the Pentagon becomes self sufficient financially."

"Put a larger postal rate on junk mail. I feel it is discrimination against the rural people."

"We as heavily taxed farmers have a right for Saturday mail service.

"Loss of Saturday service means no newspapers, check, perishable items etc. Canceling Saturday service will cause large mail terminals to get behind as they do on holidays. How will they ever catch up?"

"The mail carrier is already complaining there is too much mail to carry and that a lot of mistakes are being made because of it."

"We are tired of being told what we have to do by people in Washington, D.C. We have some rights. We all pay taxes."

"How can it save money? They'll have to hire more people to take care of the Saturday build-up."

"What the postal department needs is a course in old-fashioned arithmetic. But too many are trying to get their hands on easy money."

The Daily Republic survey will be reported to our congressmen, but it is important that you take the time to write to your senators and representatives if you have not done so to express your feelings.

Sen. George McGovern, 2313 Dirksen Office Building, Washington, D.C.; Sen. James Abourezk, 1105 Dirksen Senate Office Building, Washington, D.C.; Rep. Larry Pressler, 1238 Longworth House Office Building, Washington, D.C. or Rep. James Abdnor, 1227 Longworth House Office Building, Washington, D.C.

In addition, here are names and addresses of key subcommittee members that will decide the future of Saturday mail service.

Rep. James Hanely (New York), chairman of the House and Sub-committee on Postal Operations and Services, Room 239, Cannon House Office Building, Washington, D.C. 20515; Rep. Charles Wilson (Texas), chairman of the House Sub-committee on Postal Personnel and Modernization, Room 2409, Rayburn House Office Building, Washington, D.C. 20515; and Sen. John Glenn (Ohio), Chairman of the Senate Subcommittee on Energy, Nuclear Proliferation and Federal Services, 204 Russell Senate Office Building, Washington, D.C. 20510.

ANOTHER STUPID POSTAL PROPOSAL

If the United States Postal Service could improve its service as easily as it can cause confusion—we would have the best postal service in the world.

A case in point:

Just this week, Postmaster General Benjamin Bailar made it quite plain that the American Businessman will no longer be considered a "citizen" of this great nation of ours—at least from the standpoint of the USPS.

In one of the most ridiculous bureaucratic suggestions to come out of Washington in a long time was the suggestion of President Carter to establish a "citizen's mail" category with a discount on postage—and then to have it "seconded" by Bailar who went so far as to suggest that the first class postage rate for business be increased by three cents while holding postal rates for individuals at the current 13 cent rate.

Certainly Pres. Carter as a businessman is certainly aware that even the cost of labels on the jars of peanut butter must be passed on to the consumer—even though Mr. Bailar may not even have that much sense.

Certainly, any increase in postage for businesses will have to be passed on to the consumer—the same "citizen" who supposedly is getting a break on the postage rate under the proposal by Mr. Bailar.

Being a little suspicious of almost anything the top dogs in the U.S. Postal Service do, it wouldn't surprise us a bit if this proposal is simply a smokescreen for the Postal Service to get its way on eliminating the Saturday delivery of mail—even though Mr. Bailar didn't propose it in his recommendation to the Postal Service Board of Governors.

We assure he thinks—and he's probably right—that there would be more flak aimed at increasing the postage rates for business than he might get from eliminating the Saturday delivery—so the compromise can be made—regardless of how the six-day mail delivery service would cause great hardship in Rural America.

And so we can assume, that if enough fuss is raised over the variable rate proposal—that the compromise would be the elimination of Saturday service.

Neither should happen. . . .

If the United States Postal Service operated in the same businesslike manner that most businesses, which Mr. Bailar now proposes to penalize, many of the problems of that big agency could be overcome.

While we make no pretense of being a constitutional lawyer, we have grave doubts of having two different rates for the same class of mail. What legal definition can be used to differentiate between a "citizen" and a businessman?"

Whatever decision is made, the "citizen" who is supposed to get the break under the Carter-Bailar proposal is still going to have to pay in the end—and both of those men know it.

Aren't there more important things for the President of the United States to do?

Aren't there more businesslike ways to approach the problems of the U.S. Postal Service beside the "shotgun" approach we have seen used so often by Mr. Ballar and previous Postmaster Generals?

PEOPLE WANT 6-DAY DELIVERY

Brookings Daily Register subscribers are no different than people in other parts of the state who have responded to the question of five-day mail delivery. Through Thursday, 86 per cent of those responding to a straw vote do not favor dropping Saturday mail service. We, of course, couldn't agree more.

Gov. Richard Kneip has also gotten into the act, as evidenced by his recent letter to Rep. James Hanley, chairman of the House and Subcommittee on Postal Operations and Services. Here is part of the Governor's letter:

"One of my chief concerns is the recommendation calling for the elimination of Saturday mail service. In South Dakota, where three-quarters of the post offices are designated 'third' or 'fourth' class, our people are dependent upon the postal service as a vital link with other people and with all levels of government. They rely heavily upon newspapers to provide them with the most recent news, market and weather information, and the newspapers themselves are dependent upon the Postal Service for quick dissemination of the news at the lowest possible cost."

Kneip further said that to eliminate Saturday mail delivery would cause a delay in the delivery of both Friday and Saturday editions of daily papers, and in the case of a Monday holiday, it would mean delivery of Friday's news on the following Tuesday.

"I would have to believe that many subscribers would be discouraged because of these undue delays in receiving news and advertising, and I am strongly opposed to cutting service back to five days a week," Kneip said.

We hope that the strong support for six-day service voiced by rural areas will be listened to in Congress, even though the sparsely populated states like South Dakota, who have the most to lose, don't carry a lot of weight in Washington.

MYSTIFYING

President Carter's intention to oppose any change in the nation's postal system is, to say the least, mystifying.

The "business-like" Postal Service created by the Postal Reorganization Act of 1971 is now counting its deficits in the billions of dollars.

Rates for all classes of mail are rocketing upward at a pace which puts even the oil producers to shame. And all of this is occuring while basic services are being slashed with a meat cleaver. The morale and efficiency of postal employes has never been lower.

And President Carter proposes to do nothing? So it seems. On Sept. 8, according to published reports, the President will dispatch Bert Lance, director of the Office of Management and Budget to Capitol Hill to bury H.R. 7700, the postal reform bill which has generated such broad support because of its obvious merit, and its obvious necessity.

The President, it seems, does not agree that the Postal Service is a public service. He thinks the postal system should be run as a self-supporting business enterprise. And, evidently, he thinks the Postal Service has been doing a fine job of it.

H.R. 7700 is a broad-minded, realistic and workable approach to an issue which affects every individual and every organization in this nation: the crisis of our postal system.

It recognizes that there are problems with the existing system, and makes the hard decisions on how to solve them. It recognizes the folly of doing nothing.

Before you go and kill H.R. 7700, Mr. President, do your fellow citizens a favor. Take a look at the facts.

CARTER BYPASSES CONGRESS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. DORNAN. Mr. Speaker, since the initialling of the proposed Panama Canal Treaties a few weeks ago, the news media have given widespread coverage to the provisions of the treaties. Unfortunately, most of the media fell into line with the White House propaganda that the giveaway was long overdue and well within the power of the President to negotiate.

However, a few of the more knowledgeable publications have seen through the White House distortions and presented objective analyses of the ramifications—not only of the giveaway itself—but of this unprecedented grab for power on the part of a would-be imperial presidency.

One such analysis is that given by Senator ORRIN G. HATCH in the September edition of the Conservative Digest. In his articulate and well-reasoned article, the Senator from Utah strips the treaty negotiations of the administrations' smokescreen of constitutional misinterpretation.

In summary, the Senator establishes conclusively that the negotiations have been conducted without regard to constitutional requirements and that they pose a threat not only to our Nation's security but to the ability of Congress to restrain raw Presidential power.

I commend this article to my colleagues:

PANAMA CANAL GIVEAWAY VIOLATES CONSTITUTION

Our venerable octogenarian, Ellsworth Bunker, veteran of more than 25 years service to the State Department, and Ambassador-at-Large directing negotiations with Panama for a new treaty, says that "the United States does not own the Panama Canal Zone." His assistant, Ambassador Sol Linowitz, claims that "the Panama Canal is a colonial enclave carried over from the early part of this century and which has caused bitter resentment and indeed hostility."

The story of the Panama Canal, as they tell it, is rather like the leftist folklore surrounding the history of capitalism. They would have us believe that "Yankee Imperialists" descended upon a helpless people, wrongfully took possession of the isthmus of Panama under the guise of a fraudulent treaty, and built a canal to exploit the Panamanians in the selfish interests of commerce and militarism.

Like the Greeks, Bunker and Linowitz now come bearing gifts. And what are these wondrous gifts? They are the gift of redemption for past crimes and sins against the people of Panama, and the prospect of better relations with our Latin American neighbors. To get them, we need only make a gift of the Panama Canal. Besides, America doesn't really need this Canal, we are told. What we really need, so far as the Canal is concerned, is a clear conscience, a cleansing of the American soul, a real purging of guilt and shame. What better way to do this than by simply giving the Panama Canal away? Just so there are no hard feelings, we'll even go so far as to pay the Panamanians for taking it off our hands.

And so, negotiations begun under Secretary Kissinger in 1974 for a new treaty with Panama are now in their final stages. On July 29, President Carter met with American and Panamanian negotiators in the White House, and stated that he was pleased with the progress of negotiations and with "Panama's very constructive attitude." Expressing hope that the accord could be signed in time to bring it to the Senate before the Fall recess, Carter declared that the United States "will cooperate to the fullest degree to rapidly conclude an agreement for a treaty."

The last remaining obstacle, it appears, is the question of "conscience money." In addition to the territory of the Canal Zone and the canal itself, which are valued at approximately $7 billion, the Panamanians demand $5 billion for our continued use of the canal and the rental of military bases. Forget, if you will, that we already own all of this free and clear, and that the Panamanians already enjoy the highest per capita income of any people of Central America because of the annuities and other benefits derived from our Canal. But $5 billion is apparently too much even for our "hard-headed" diplomats, who have indicated that "more realistic amounts" will have to be agreed upon before the treaty is concluded.

In anticipation of the ratification struggle that lies ahead, the negotiators have been preparing the American people for acquiescence by attempting to discredit the treaty of 1903. One device relied upon rather extensively is the familiar one of rewriting history. The object of this ploy is to lay a moral foundation for the surrender of the Canal by creating guilt feelings and redefining the terms of the original treaty.

Thus the advocates of a new treaty have come up with the novel idea that we don't really own the Canal after all, and must return it to its "rightful owners." The original treaty, they say, simply transferred "rights" in the Canal Zone rather than full sovereign control—even though such an interpretation flatly contradicts the expressed intent of the 1903 negotiators and the terms of the treaty itself.

They have also expressed the curious view that the Canal Zone is "leased" territory and that the United States pays a "rental" for its use. In truth, of course, the Canal Zone is not a leased area but a "grant in perpetuity" for the perpetual maintenance, operation and protection of the canal. What Panama actually receives is an annuity, not a rental.

Article II of the 1903 treaty grants to the United States "in perpetuity" the use, occupation, and control of the Zone—meaning ownership. The word "lease" does not appear in the treaty with reference to the Canal Zone; but the word "grant" makes nineteen appearances. The phrase "in perpetuity" occurs seven times. The treaty, unlike a lease agreement, contains no provision for renegotiation and no terminal date for the obvious reason that it was intended to be a final and absolute transfer of sovereignty in perpetuity. Though an embarrassment to the negotiators, these are facts which they can easily manipulate, if not ignore; for once the treaty is signed, the question of U.S. sovereignty over the Canal will become moot.

What the supporters of the treaty cannot ignore, however, are the political, military and legal realities of the situation. For one thing, General Omar Torrijos of Panama, who will take possession of the canal, is a dictator. His administration is riddled with Marx-

ists. These realities not only cast a cloud of suspicion on his intentions, but raise the issue of whether the Canal can be insulated against the harsh winds of ideology and political instability which so often sweep across Latin America. If the Canal were in the hands of this petty tyrant, the United States would surely find itself increasingly embroiled in Panama's internal affairs in order to maintain the Canal's security and protect the flow of Commerce.

For another, the American people are overwhelmingly against the giveaway of the Panama Canal. The drumming insistence of the negotiators that we must lie down and be sheared like sheep in the name of Latin American "justice" has not been convincing. More persuasive are American military leaders such as Admiral Thomas Moorer, former Chairman of the Joint Chiefs of Staff, and three former Chiefs of Naval Operations, who recently informed President Carter that "under the control of a potential adversary the Panama Canal would become an immediate crucial problem and prove to be a serious weakness in the overall U.S. defense with enormous potential consequences for evil." Little wonder that recent public opinion polls show that the American people oppose a new treaty by a ratio of 5 to 1. They understand the realities of the situation, even if Bunker and Linowitz do not.

We may be thankful that many of our representatives in Congress are already antagonized by the Administration's methods and procedures. Resentment is widespread because the members have neither been informed of the substance of negotiations nor asked to authorize them—as is customary. Laboring at their self-appointed task in secrecy, the negotiators have defied our constitutional process, realizing that they lack congressional support and constitutional authority for their actions.

Though largely ignored by the press, constitutional issues of major proportions have recently surfaced in the Senate concerning the new treaty with Panama, adding another wrinkle to the controversy. One issue involves the economic assistance provisions of the treaty. The negotiators have not told Congress how much money will be given to Panama, or whether it will come in the form of a cash grant or loan package. But one matter is clear: a treaty cannot appropriate funds. The Constitution expressly provides that "No money shall be drawn from the Treasury but in consequence of Appropriations made by law." This means that the approval of both houses of Congress, and not just the Senate, must be given in order to validate this type of treaty. The Administration, however, has given no assurances to Congress that it will definitely seek implementing legislation regarding the economic and financial arrangements contained in the treaty.

The other issue is whether the President has the constitutional authority to transfer U.S. territory in the Canal Zone to the Republic of Panama by treaty and by-pass the House of Representatives. In hearings before the Separation of Powers Subcommittee of the Senate Judiciary Committee which I attended, legal advisors to the State Department argued that the President may make such a treaty because he possesses "concurrent" authority with Congress to give away U.S. property. Ratification of the treaty by the Senate, they stated, was all that was necessary. Under cross-examination, however, the witnesses were unable to give me a single valid judicial precedent for this extraordinary and unconstitutional view of the President's power.

My own studies lead me to the conclusion that the proposed treaty with Panama is unconstitutional, unless both Houses of Congress enact accompanying legislation authorizing the transfer of Canal territory. Article IV of the Constitution states, "The Congress shall have the power to *dispose* of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States." The courts have repeatedly ruled that this is an exclusive power of the full Congress. Any authority of the Executive to dispose of U.S. property, therefore, must first be derived from authority given by an Act of Congress.

In light of these considerations, a constitutional crisis is about to erupt between Congress and the President. There is no precedent in American history, to be sure, for the disposal by treaty, and without congressional authorization, of U.S. territory that has been acquired by purchase. Likewise, there is no precedent for the broad and sweeping exercise of the treatymaking power which the President is now claiming.

If he persists, and the Senate ratifies the treaty, Americans will lose more than the Canal, more than an important American territory, and more than a vital link in our strategic defenses and international trade. They will have lost another restraint on the powers of the President. "If the Executive is permitted to sidestep the House of Representatives on this vital constitutional issue of disposal of Canal property," John Murphy, Chairman of the House Merchant Marine Fisheries Committee recently observed, "it will try to sidestep the Senate on another issue, and the Judiciary on still another. The very fundamental precepts of the Constitution are at stake and we have already had one instance in which the Executive Branch attempted to expand its powers, resulting in the worst scandal in our nation's history—Watergate."

HEALTH EDUCATION PROGRAM

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. RINALDO. Mr. Speaker, there has been a great deal of concern voiced recently about rapidly escalating health care costs. There also is the growing realization that the providers of health care services and health insurors cannot, by themselves, control these costs. Success in controlling the rate at which the costs of health care services increase requires the active participation of the individual.

We are beginning to realize that nothing we do will impact on the quality of life or the cost of health care as greatly as a lifestyle that includes good health habits. No matter how much money or "know-how" pours into health care, we cannot hope to overcome the physical destruction and financial deterioration resulting from poor health habits.

Realizing this, Blue Cross of New Jersey this year undertook an extensive program of health education emphasizing the importance of good health habits in ultimately reducing the incidence of health care needs, and thus controlling the rate of increase in the cost of health care services.

This widely praised program includes distribution of six health education booklets dealing with stress, nutrition, smoking, alcohol, childhood health problems, and taking better care of your body. To date more than 150,000 copies of these booklets have been distributed as a result of personal contact with enrolled groups, advertising, and the cooperation of the State's press in making their readers aware of their availability.

Citations for this effort have been awarded to Blue Cross by the New Jersey State Senate, the American Cancer Society on the State and national levels and the New Jersey Affiliate of the American Heart Association.

Mr. Speaker, at this time I would like to commend Blue Cross of New Jersey for its health education efforts on behalf of the citizens of New Jersey.

A STRANGE RHODESIAN PLAN

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. McDONALD. Mr. Speaker, whatever one thinks about Rhodesia, many people feel that the present negotiations being carried on by U.N. Ambassador Young and British Foreign Secretary Owen are among the most bizzare in history. Here we have the strange scene of the United States and Great Britain negotiating for the Soviet backed terrorists and asking the Rhodesians to disband their army, which protects them from these terrorists and to accept some sort of U.N. peace-keeping army while a new army is formed. Do we need a repeat performance by the U.N. of its Congo intervention? One can imagine what sort of vision of slaughter to come this conjures up in the minds of the whites and the blacks who have cooperated with the Ian Smith government. The terrorists have won no battles. They have slaughtered many blacks, missionaries, and an occasional isolated farmer. Is this supposed to show support for their cause amongst Rhodesians? A thoughtful editorial on this matter appears in the Washington Star of August 26, 1977, and I commend it to the attention of my colleagues. The editorial follows:

A STRANGE RHODESIAN PLAN

If the bewildering struggle over Rhodesia's future shows any intelligible pattern, it is a pattern of irreconcilable ambitions.

It is the belated ambition of Prime Minister Ian Smith, who has so long miscalculated the odds on the survival of his regime, to find a moderate black leader influential enough to negotiate with him the inevitable transition to "majority rule." Two candidates have emerged. One is Bishop Abel Muzorewa of the United African National Council, whose following among peaceful black Rhodesians is as great as his political clout is weak; the other, a late-comer to the internal peace movement, is the Rev. Ndabaningi Sithole, who recently returned to the country after an unsuccessful bid for influence in the militant nationalist ZANU organization, which has been hammering Rhodesia's borders in guerrilla raids from Mozambique.

On the other track, with a wholly different ambition, are the Russian-armed nationalist

fronts operating with the sanction of Rhodesia's neighbors. They seek an abrupt, and if necessary violent, end to the Smith regime. Their bloodthirsty raids on isolated Rhodesian farms and settlements, with innocent black laborers often the main victims, grow more audacious—and atrocious—every week.

On traditional Western political values and principles, it would seem that regardless of the political odds—which seem incalculable in any case—there is but one honorable course for Anglo-American policy. That is to support—if and where it is in earnest—the search for an internal negotiated solution, whether the vacillating "front-line" presidents approve or not. If on the other hand the terrorist course succeeds, as it might, it will set a shameful precedent, and will very probably result in the establishment of a hostile regime in Rhodesia from whose clutches white settlers and blacks with backgrounds of cooperation with the Smith government will be lucky to escape alive. The triumph of the terrorists may also open a vacuum for the intrusion of one of the Communist states, not unlike the Cuban presence in Angola.

Yet, astonishingly, the latest rumors about the British-American diplomatic initiative suggest that the lawful internal efforts and the outlaw insurrections are to be placed on an equal footing. According to an obviously leaked story from Lagos, Nigeria, British Foreign Secretary David Owen and U.S. Ambassador Andrew Young have devised a new plan to reconcile the irreconcilable, equating the Rhodesian army which is trying to protect the citizenry from illegal violence with the terrorists who wreak that violence. Both Prime Minister Smith and the insurrectionary organizations would be pressed to disband their armed forces and leave the task of keeping order in Rhodesia to a "peacekeeping" force of Nigerians. That's right, Nigerians.

For all we know, this strange plan may commend itself to the world's ethical sense, distorted as it is by a furious impatience with Mr. Smith's ill-advised stubbornness. World opinion, at least as expressed at the U.N. and in official statements, attaches a mindless urgency to the single political value of "majority rule" for Rhodesia—a valuable principle to be sure, but hardly the only one at stake.

No observer of the Rhodesian tragedy, or of the recent history of sub-Sahara Africa, could honestly suppose that "majority rule" is any but a camouflage term for the ultimate rule of one or more of the many contending factions. What we are talking about, then, is probably in the upshot some kind of minority rule of Rhodesia other than Mr. Smith's minority, probably militaristic in cast, possibly vengeful, and certainly less competent.

Some negotiated arrangement between Mr. Smith and Bishop Muzorewa or another black moderate, looking to a peaceful transfer of power, might approach the reality of "majority rule" in its accepted democratic sense. But the bishop has no armed divisions; and the firebrands seem determined to obstruct a peaceful settlement in any case.

As for the projected role of the Nigerian army, it is, if a serious proposal, the most startling of all the elements of the reported Young-Owen plan. Memories are short, but just for memory's sake it may be in order to recall that in the late Sixties the Nigerian army was winning its spurs in a cruel, unconscionably bloody suppression of the Biafran secession, involving the slaughter of Biafrans by the tens of thousands. Peacekeeping force? The kind of peace the Nigerian army keeps would appear to be the peace for which another name is desolation.

COORS STRIKE ISSUE EMPLOYEE RIGHTS, NOT WAGES

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mrs. SCHROEDER. Mr. Speaker, over the recess the Rocky Mountain News had an informative article on the issues in the now 5-month-old brewery workers strike against the Adolph Coors Co. I commend the article to the attention of my colleagues:

BREWERY STRIKERS FIGHT FOR PRINCIPLES—RIGHTS, NOT WAGES, THE ISSUE IN 4-MONTH COORS WALKOUT

(By Alan Cunningham)

Paul, Frank and Art sat around a table in a dark corner of the union hall on a gloomy morning last week and discussed their lives.

They are working men; anybody could see that by looking at them. But now they explained why none of them had worked during the past 138 days.

All are members of Brewery Workers Local 366. Since April 5, its members have been on strike against the Adolph Coors Co. of Golden.

In Washington, Albert J. Zack talked about the strike. Zack is the chief spokesman for the AFL–CIO, which has contributed funds to the walkout and endorsed a national boycott of Coors beer.

"These people are striking for a lot more than just wages and hours," Zack said over the telephone. "They're striking to protect themselves against an employer who seems to think he has the right to indulge in lie detector tests and patdown searches and other violations of individual privacy."

The three men in the union hall can claim credit for 60 years and three months of service at the Golden brewery. But 58-year-old Art Harris accounts for half of that by himself. He went to work at Coors in January 1947. He's been operating equipment that makes the beer ever since with the exceptions of the summers of 1957 and 1977.

Both of those years, he has spent the summer walking picket lines.

"It was a little different then," he said of the earlier strike, which lasted 117 days, or three weeks shorter than this one has already run.

"We're fighting for our rights this time. Last time, it was more or less about wages. Now it's what they're trying to take away from us."

Harris recited the union's grievances: the company wants to assign days off, shifts and vacations rather than give senior workers their preference; the company wants to use more polygraph tests; and Coors wants to require forced physical examinations whenever supervisors think an employee needs to take one.

With Harris were Paul Davidson, 51, who has put in a quarter century at Coors, and Frank Smith, 42, who is a relative newcomer, having started there about four years ago.

Smith was born without hands. Coors gave him a job as a "general brewery worker" or GBW. He does custodial work, taps kegs, pours beer in the lunch room and whatever else he is asked to do.

"The company was good enough to hire me, and I was grateful for that. I told them I would give them 100 per cent, and I done it. But I also promised to uphold the union, and now it's their turn."

"I just about broke twice and went in," Smith said. "But I got sick to my stomach. Besides, my kids was after me not to. I just decided to heck with it."

He and his wife, Melanie, have three teenagers ranging from 14 to 17. At the start of this month, she went to work at an Arvada bank. It was a painful reality for Smith, who believes it's the husband's responsibility to support his family. It's the first time Mrs. Smith has been employed since before the birth of their first child.

None of the men has worked since the walkout began. Harris, who is divorced, is living with his daughter, "or else I couldn't get by." Davidson said he had seen the strike coming and put money aside to prepare for the payless spell.

Many of the 500 or so remaining strikers have taken full- or part-time jobs. But some have had to abandon the fight. Their new employers required that they resign from the union and promise not to go back when there is a settlement.

Thus, the ranks of the strikers continue to erode. It has been a hard fight for both sides.

For the company, the strike came in a year when several unrelated factors caused them to take a beating in the marketplace.

In May, brewery executive Bill Coors said the company had run into a soft market and "an unexplained drop in consumption." A recent article in the New York Times reported that the nation's largest brewer, Anheuser-Busch, is engaged in a vigorous marketing struggle with the third largest firm, Miller Brewing Co.

It said these two firms are swallowing more of the market shared by the industry's "big five"—including fifth ranked Coors.

For weeks after the strike began, Coors wouldn't admit the boycott was affecting sales. But by mid-summer, the company was grudgingly conceding it had been hurt by the campaign.

All these developments seem to indicate that the companys' initial strategy of maintaining "business as usual" hasn't been as successful as the firm hoped.

Harris and the others claimed that picket lines have reliable sources on what's going on inside the brewery.

"They should have been up to making 80 brews a day now, and they're only making 44," Harris said. "That's winter production," he added contemptuously.

A "brew," he explained, is 440 gallons.

"When we went out, it was at 64, and it was supposed to go up to 80. But I don't think they ever went over an average of 50 this year."

The strikers claimed the number of railroad cars being used to transport the brew out of the plant also had been reduced so sharply that Coors had turned 200 cars back to the railroad because they weren't needed.

A company spokesman said Coors never had made its production figures public and didn't plan to start doing so. He said the firm had no desire to get into a duel of claims and counterclaims about the amount of beer brewed.

But if things haven't panned out well for the company this year, the summer has brought some disappointments for the strikers as well.

One of the unions' chief disappointments came in mid-July, when an administrative law judge from the National Labor Relations Board came to Denver to hear charges that Coors had indulged in unfair labor practices during the dispute.

Confident that the charges had merit, the strikers had believed for weeks that they would win a favorable ruling, which would force the company back to the bargaining table.

But union officials were crestfallen when the judge announced at the close of the

hearing that he was going on vacation and planned to rule on several other cases first. He gave attorneys until Sept. 22 to file briefs.

Even if he rules quickly and the unions' assumptions should prove true, it is not likely that anything will happen to end the strike before October.

The AFL-CIO's Zack was asked whether the strike might not prove to be a long standoff, in which case the local might die without its members winning the opportunity to go back to work.

"I don't think the union will erode and die," he insisted. That it's going to be a long fight is pretty obvious, but when the fight started, everybody knew it wasn't going to be an easy one.

"There have been a lot of very long strikes in the United States, but because the fight is a tough one doesn't mean we give up. We're pretty stubborn people.

"I think there's a hell of a lot of people that don't like big people pushing little people around. Obviously, Coors are big people and the workers are little people and it's obvious as hell that they're tryin' to push 'em around."

His tone was more militant than that of the three striking workers in the union hall.

A trace of weariness crept into their voices as they repeatedly voiced disappointment about the lack of public understanding about their fight. They said the issue was often being portrayed as a demand for higher wages when that wasn't the case.

"It wouldn't cost him a dime for a fair contract," Smith said at one point, apparently referring to Bill Coors' brother, Joe. At another point, he quipped: "I would be willing to take as many polygraph tests as they want if only Bill and Joe would get on there and let themselves be asked if they gave us a decent proposal."

Harris reminisced about the other strike and a couple of short-lived walkouts in the 1950s. He contended that the present dispute centers around an effort by Coors to strip benefits won over the past two decades.

The others agreed, saying they would be happy if things could simply stay as they were.

"I think the whole union would settle for the old contract," Davidson declared.

"I know they would," said Harris.

UNITED STATES SHOULD KEEP PANAMA CANAL

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. ASHBROOK. Mr. Speaker, I am deeply distressed that President Carter is attempting to give away the Panama Canal. I cannot understand why we should even consider turning over this valuable waterway to an unstable country ruled by a leftist military dictator.

The Panama Canal is of vital economic, military, and political importance. Approximately 70 percent of all the traffic through the canal either originates or terminates in American ports. All but 13 of the ships in the U.S. Navy—the exceptions being the giant aircraft carriers—can pass through the canal.

Hanson W. Baldwin, a former military correspondent for the New York Times and Pulitzer Prize winner, has written an excellent article in opposition to a Panama Canal giveaway. According to Baldwin:

The future security and well being of the United States are threatened by the Administration's proposed abandonment of sovereignty over the Panama Canal and the Canal Zone.

Following is the text of Baldwin's article which appeared in the August 20 San Francisco Chronicle:

TRANSFER OF SOVEREIGNTY THREAT TO U.S. SECURITY

(By Hanson Baldwin)

The future security and well-being of the United States are threatened by the administration's proposed abandonment of sovereignty over the Panama Canal and the Canal Zone.

Any such action would have global consequences, nowhere more adverse than in the Caribbean Sea-Gulf of Mexico area. The vital interests of a nation can be defined in territorial and regional terms or as political, psychological, economic, or military interests. By any and all of these yardsticks, the security of the Caribbean, the ability of the United States to control the Caribbean in war and to be a dominant influence there in peace, is vital to our country.

Yet that capability has already been gravely weakened; the turning point was the Communist's seizure of power in Cuba, the Caribbean's most important island, only 90 miles from our shores.

It is in this broad perspective—the future of the Caribbean-Gulf of Mexico area—that any basic change in the status of Panama Canal must be judged.

It is ironic, indeed, that in an era when the United States Navy needs the canal to a greater degree that any time since end of World War II, Washington is considering its abandonment. The navy today is in the same strategic bind it was prior to World War II: it is a one-ocean navy (in size and power) with two-ocean responsibilities.

While the 13 giant aircraft carriers of the U.S. Navy have too large a beam to pass through the 110-foot width of the present locks, well before 2000 a new generation of ships will begin to replace them—smaller, but more effective, with advanced weaponry.

Every other ship in the U.S. Navy can transit the canal, a fact of major importance in limited war, the type of crisis we are most likely to face.

The Panama Canal Zone offers facilities unavailable elsewhere under the U.S. flag for training troops in jungle warfare. More important, the zone is oriented towards the problems of Central and South America, and the zone's army schools and training facilities have fostered and helped to develop a close and productive military liaison between the armed forces of many nations in the southern hemisphere and the United States.

The economic factor is also of major importance to the canal-Caribbean equation. To the American economy, and particularly to U S. overseas shippers and importers, the canal has major importance; it has been estimated that, of all cargoes transiting the canal in ships of all flags, about 60 to 70 per cent are bound to or from U.S. ports.

One of the plans for transporting the oil of Alaska's North Slope to the hungry markets of the "lower 48" contemplates shipment by tanker through the Panama Canal Gulf and East Coast ports.

Even more compelling than the military and economic importance of the canal are the political and psychological considerations. As the Pueblo, Mayaguez, and other incidents have shown, even second- and third-rate powers now dare to tweak Uncle Sam's nose.

This process of losing not only face and prestige, but also control, has gone far in the Caribbean; it will accelerate greatly if we abandon the canal.

Contrary to those assertions from public officials who should know better, we did not steal the canal, nor does Panama have residual, titular, or any other kind of sovereignty over it. The United States bought the canal territory — a strip across the Isthmus of Panama some 50 miles long and ten miles wide — at a cost to the American taxpayer that far exceeded that of any other territorial acquisition.

The answer from those who advocate retreat evades the issue. American supporters of a transfer of sovereignty to Panama try to make the shift seem a minor adjustment which will ensure happy relations with a friendly and stable Panama and stress that "control" of the canal would remain in our hands.

But without sovereignty it is clear that we shall not be able to carry out the terms of the Hays-Pauncefote treaty with Britain, nor shall we be able, regardless of the wording of any attempted compromise solution, to "control" the canal.

If we transfer sovereignty over the canal to Panama—an act that seems to be, under the Anglo-American treaty, legally questionable unless Britain agrees—we should leave the isthmus, lock, stock, and barrel; our "control" would become completely ineffective, probably after protracted wrangling, unending disputation, and perhaps repeated clashes.

We cannot insure control without sovereignty; the mere phrase is doublespeak. We cannot provide military security for the canal without sovereignty; to attempt it would be to accept responsibility without authority.

EL CAJON TEAM CAPTURES RUNNER-UP SPOT IN 1977 LITTLE LEAGUE SERIES

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. BURGENER. Mr. Speaker, I just want to take this opportunity to salute the El Cajon little league baseball team, which captured second place in the recently concluded little league world series at Williamsport, Pa. After disposing of some of the best little league competition in the West, the El Cajon team demonstrated their diamond supremacy over the best teams in the Nation and moved into the little league world title game against the Taiwanese team.

Although the Taiwanese have dominated series play for the last decade, the El Cajon team turned in the most respectable game an American team has played in years against the Taiwanese, as the Californians were "in the game" all the way.

Mr. Speaker, the El Cajon little leaguers made all of us proud, not only because of the way they played, but because of the way they conducted themselves. These young men are the best ambassadors of good will a city could

possibly have, and I would just like to tip my cap to the players, managers, coaches, and others involved in the El Cajon little league program. They have shown us they are the best—not only of the West—but of the United States.

TWO PAPERS BY MARYLAND HIGH SCHOOL STUDENTS

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. STEERS. Mr. Speaker, this summer I sponsored a 3-week seminar for 44 outstanding high school seniors from my district who examined our Government through a series of speakers and field trips.

At the conclusion of the program, the students submitted papers on current topics which they were able to study through the Library of Congress congressional reports and interviews.

I have submitted for inclusion in today's RECORD, two of these papers.

The first paper, "Congressional Policy on Illegal Aliens," is by Babette Salus, a senior at Montgomery Blair High School in Silver Spring. Babette, 17, is a member of the National Honor Society and a member of a symphonic band.

The second article, by Sharon Plunkett of the Academy of the Holy Cross in Rockville, examines U.S. policy toward Cuba. Sharon, also 17, is editor in chief of her high school paper and president and founder of her school's Political Science Club.

The two articles follow:

CONGRESSIONAL POLICY ON ILLEGAL ALIENS

(By Babette Salus)

Due to an economic imbalance between the United States and almost half the other countries of the world, an exorbitant number of illegal aliens. somewhere in the vicinity of five to eight million, from at least fifty-nine countries, have entered the United States. Illegal aliens, foreigners who either enter the United States unlawfully, or who enter legally, but after admittance violate the terms of their entry, usually by overstaying or by accepting unauthorized employment, come to the United States with hopes of finding employment. It is because of this motive that "The primary impact of the illegal aliens in the United States is believed to be on the labor market."[1] The staggering number of illegal aliens, approximately 770,000 a year, entering the United States has been a matter of great concern in Congress for the last seven years. Despite the interest Congress has shown in reducing the number of illegal aliens entering the United States, the legislation passed seems to be inadequate if a long term solution to the problem is to be achieved.

At the present time, "The basic U.S. law governing immigration is the Immigration and Nationality Act of 1952, as amended."[2] This act defines an alien as "any person not a citizen or national of the United States."[3] It also states the distinction between immigrants and nonimmigrants as aliens admitted for permanent residence and aliens granted temporary admission, respectively. The act sets the immigration ceilings and criminal sanctions for illegal entry. Although this act "defines the smuggling, harboring, transporting, or encouraging of illegal entrants as felonies," the Southwest proviso passed in 1952, states that employment of illegal entrants does not constitute harboring and therefore is not a felony.

Two very significant groups of amendments to the Immigration and Nationality Act of 1952 are those passed in 1965 and in 1976. The major point of the 1965 amendments was that the national origins quota system would be replaced by a ceiling on Eastern and Western Hemisphere immigration beginning July 1, 1968. Immigration from the Western Hemisphere was to be limited to 120,000 people a year, the Eastern Hemisphere to 170,000. The 1976 amendments set an annual limit of 20,000 immigrants per country in both hemispheres, a limit which previously had been in effect only in the Eastern Hemisphere. The 1976 amendments also extended, to both hemispheres equally, a modified version of the seven-category preference system giving priority to family members, people with desired skills, and refugees.

In an effort to deal with the illegal alien problem, Congress has also amended several other laws and regulations. In 1974, Congress amended the Farm Labor Contractor Registration Act of 1963 to include criminal penalties for unregistered farm labor contractors who knowingly engage the sevices of illegal aliens. In 1972, Congress passed an amendment to the Social Security Act centered on cutting back the use of social security cards for employment purposes by noncitizens not legally entitled to work. It was also attempted to reduce the participation in Federally funded benefit programs by the illegal aliens. In addition in 1974, Congress amended the Farm Labor Contractor Registration Act of 1963 to include criminal penalties for unregistered farm labor contractors who knowingly engage the services of illegal aliens. By restricting benefits to citizens and legal aliens and by creating more strict penalties for the conscious hiring of illegal aliens, it was hoped by Congress, that the incentive for aliens to come illegally into the United States and for United States employers to hire them would be lessened.

On January 11, 1977, Joshua Eilberg introduced H.R. 1663 which would amend the Immigration and Nationality Act of 1952. The proposed legislation in summary:

"Amends the Immigration and Nationality Act to make it unlawful for any person knowingly to employ, continue to employ, or refer for employment any alien in the United States who has not been lawfully admitted for permanent residence, unless the employment of such alien has been authorized by the Attorney General. Establishes a three-step procedure for the imposition of civil and criminal sanctions against employers violating the provisions, and also provides for an injunctive remedy. Authorizes civil action by the Attorney General in the event of alleged discrimination regarding employment on the grounds of national origin. Provides for the regularization of status of certain illegal aliens who entered the United States prior to June 30, 1968."[4]

The House Judiciary Committee of the 94th Congress found that the primary reason for the illegal alien problem was the economic imbalance of the United States and other countries, with the greater chance of finding employment in the United States. On the basis of this finding a series of bills was written prohibiting the knowing employment of illegal aliens and establishing a series of administrative, civil and criminal penalties for violators of this prohibition. There are, however, two reasons why these and other pieces of legislation concentrating on the illegal alien issue are not successful in solving the problem.

The first is that the laws are not carefully enforced. A great deal of the impact of illegal aliens in the United States is due to the violations of the existing legislation by the aliens, employers and administrators of public welfare programs. If labor standards were enforced on the employers of illegal aliens, it would be of no advantage for the employers to hire illegal aliens.[5]

However, even if the current laws on illegal aliens were more effectively enforced, a successful, long-range solution to the problem would not be achieved. This is because the legislation which Congress has concentrated on so far does not deal with the causes of the problem, but rather its effects. If, relatively speaking, no jobs were available in the United States for illegal aliens, they would still come to the United States in the hope of finding "non-existent" jobs or getting on a Federally-funded benefit program. As long as the economic state of Mexico, from where 89% of the illegal aliens come, remains unstable and the unemployment rate high, approximately 40%,[6] the people who are starving will go elsewhere in search of basic human needs. Therefore, the long-range solution to the problem can only be reached when Mexico achieves economic stability.

One possible solution to the problem would be a program based upon temporary employment permits, controlled by both the United States and Mexico, which would expire after 180 days. These would be issued to a limited number of Mexicans for work in the United States. The permittees would earn the same wages as United States residents, with the bulk of their earnings being spent in Mexico after their return. The United States government would collect the same taxes from these aliens as it does from residents. However, since it would not have to supply so much in the way of Federally-funded benefit programs for these aliens as it does for its residents, a portion of the collected taxes would be forwarded to Mexico. This program would help the Mexican economy by lowering the unemployment level there, with an associated gain in Mexican revenues and taxes by reason of the new capital. The United States would have to enforce its labor laws more strictly with particular attention to the holders of temporary employment permits to make sure they do not overstay.

In addition to any alien labor program which may be devised, the United States is going to have to aid Mexico in large scale trade. The economy of Mexico will not stabilize without increased trade.

The legislation before the 95th Congress, like that of the 92nd, 93rd, and 94th Congress, does not form a very optimistic approach to the permanent termination of illegal immigration. The legislation attempts to reduce the effects of the result, the high immigration, rather than diminish the causes of the problem, the economic upset coupled with the promising job market of the United States. Even if the legislation as written could solve the illegal alien situation, it would not until enforcement was improved. The only way the United States is going to achieve a permanent solution to this problem is to devise a controlled labor plan, to enforce that plan, and to assist the countries from which the illegal aliens come, mainly Mexico, in stabilizing their economics.

U.S. Policy Toward Cuba: In Direction of Normalization

(By Sharon Plunkett)

The relationship between the United States and Cuba was severely handicapped from the time Fidel Castro took over Cuba in 1959. After the overthrow, the two nations adopted very opposite policies. Cuba expropriated all property owned by U.S. citizens, supported uprisings in neighboring Caribbean countries and instituted the Communist system of government. The United States halted their economic as well as military aid and placed an embargo on exports to and imports from Cuba. Furthermore, the Bay of Pigs invasion in 1961 and the Cuban Missile Crisis in 1962 just widened the rift between the two countries. On January 3, 1961 the U.S. broke diplomatic and economic ties with Cuba.

The U.S. policy toward Cuba has been based upon the Cuba Resolution of October 3, 1962. This resolution was instigated because of congressional reaction to Soviet military buildup in Cuba.

The resolution stated that "the U.S. is determined to prevent by whatever means sphere." It also declared that the U.S. "would prevent in Cuba the creation or use of an may be necessary . . . the Marxist-Leninist regime in Cuba from extending by force or the threat of force, its aggressive or subversive activities to any part of this hemiexternally supported military capability endangering the security of the U.S."[1]

U.S. policy was also based on two decisions taken in the Organization of American States in 1962 and 1964. In 1962 the OAS decided to exclude Cuba from the organization. In July, 1964, the OAS took action to impose sanctions on Cuba because of Venezuelan charges of smuggled weapons to pro-Communist guerrillas.

During the past, U.S. policy toward Cuba has changed because of various actions to normalize relations. This paper will show just how the U.S. is trying to normalize their relations with Cuba.

Since 1971, the U.S. has been trying to improve relations. Many Senators have called for a reexamination of our policy toward Cuba. During 1971, Senators Frank Church, William Fulbright, and Charles Mathias took action to repeal the 1962 Cuba Resolution.

Since 1973, both countries had given promising indications that their policy toward one another was softening. During 1973, Cuba and the U.S. signed an anti-hijacking agreement. Statements made by President Ford and Secretary of State Henry Kissinger suggested changes from Mr. Nixon's policy. Even the OAS in 1975 voted to lift certain aspects of the embargo and as of April 1977, eleven Latin American nations had reinstituted diplomatic relations with Cuba.

Since the fall of 1976 and with the election of President Carter the movement toward normalization of relations looks very encouraging. The President has indicated this by the further liberalization of U.S. restrictions on Cuba. Also shortly after taking office the President secretly ordered an end to the SR–71 reconnaissance flights over Cuba.

The latest movement toward normalizing relations was the April signing of agreements on fishing and maritime boundaries in Havana. These agreements are a new beginning in U.S.-Cuban relations.

Other efforts have also been made to help relations. Recently, Senators McGovern and Abourezk visited Cuba. During their visit they talked to Castro and reported back to the President on some of his comments.

The U.S. House of Representatives voted down an amendment to the Foreign Relations Authorization Act "which would have prevented funds from being used for negotiation of reestablishing diplomatic relations with Cuba.[2]

Also a Gallup poll taken on reinstituting diplomatic relations showed 53% in favor of normalization of relations and ⅓ opposed to the move.

While the U.S. is trying to normalize relations, Cuba is also showing their effort. On June 22, 1977 Cuban officials granted their consent for the resumption of cruise line service between a U.S. port in New Orleans and Havana since the break in relations.

Even though diplomatic relations have been going well since 1976 some people are still in opposition to normalization because of Soviet influence, Cuban involvement in Angola and Puerto Rico, compensation for expropriated property, the Guantanamo Naval Base, the sugar issue, the trade embargo, and the political prisoner question.

The Soviet influence in Cuba is a reason for normalization because with normalization our stand with the Soviet Union might improve and it could also promote trilateral discussions between Cuba, the Soviet Union, and the United States.

Cuba was involved in Angola but the Cubans have said that half of their troops have been withdrawn. They also stated that the Army would not become involved in Southern Africa. Concerning the involvement in Puerto Rico, President Carter said that serious discussions of this matter should be held with the Cubans.

The sugar issue and the claims for expropriated property are not major obstacles in normalization. With the case of the sugar, the U.S. and other sugar-producing countries could get together and in time, solve this problem. It would not be reasonable to wait before this issue is all solved before normalization occurs. The claims for expropriated property is also not an issue because it could be dealt with after relations are normalized.

In reference to the Guantanamo Naval Base, this is not as hot an issue anymore in normalizing relations to Fidel Castro. At first he demanded that the U.S. give up Guantanamo. The Cuban Foreign Ministry officials now have softened their position. They said the U.S. would have to make a "willingness to negotiate." At least with this position, the U.S. could talk and some kind of compromise could result out of this issue.

A real concern to Castro about normalizing relations was the lifting of the embargo. On May 10, 1977, the Senate Foreign Relations Committee voted to partially lift the embargo against Cuba and to permit the export of agricultural supplies, food, and medicines. This amendment to the State Department authorization bill was a modification of an earlier amendment proposed by Senator McGovernor. This "partial" lifting of the embargo could lead to the "whole" lifting of the embargo. This is surely a possibility for the future.

Recently, the political prisoner issue along with human rights has been a top priority with the normalization of relations. This issue is important but should not be a factor in normalizing relations because the U.S., even after criticizing, maintains relations with countries like Chile, Brazil, and the Soviet Union, who were charged with having political prisoners and treating them unfairly.

Carter's very outspoken statements on human rights has been cited as an obstacle in relations with Cuba. At the present time, this is true but once countries understand President Carter, his human rights issue may be much more of a help than a harm. In time, this issue will become comfortable enough so countries will be able to talk intelligently about this and come to a solution.

There are also other topics that are believed to be in the way of normalization. These are Cuba's use of export of subversion, and the OAS.

Cuba is not as dangerous to peace and security in Latin America today as it was in the 1960's because Castro no longer uses export of subversion as a revolutionary symbol. Also the Department of Defense has stated that within the past few years the level of Cuban-supported revolutions has decreased.

The OAS embargo on Cuba was held firm until 1970 when Chile resumed trade and then diplomatic relations with Cuba. Since that time, eleven countries have recognized Cuba. In July, 1975, the OAS passed a resolution which gave each member-nation the right to make its own decision about relations with Cuba. This decision was supported by the U.S. and signaled an end to the eleven year ban on Cuba. These actions of the OAS are not an obstruction but a help to normalize relations.

Before and during 1961, the U.S. was opposed to Communism and the Soviet impact on Cuba. But today, the U.S. has somewhat accepted Cuba and is interested in benefits that could be gained from normalization with this unique government.

There are some political as well as economic benefits to be derived from a change in U.S. policy toward Cuba. Aside from reducing international tensions, especially those within the Western Hemisphere, improved relations could lead to reduced Russian military influence in Cuba. Recognition could provide economic development in the Caribbean area if Cuba was included in an economic program.

If U.S.-Cuban relations normalized Cuba would be a very important trade partner. A Cuban official told Minnesota businessmen, who were visiting Cuba, that U.S. trade with Cuba could total $1.5 billion within one or two years after normalization occurred.

Finally, the reintegration of Cuba into the Inter-American system, the OAS, would make a whole out of the Western Hemisphere idea. "Cuba by history, language, religion, culture, and tradition is part of the Western Hemisphere and it is only natural that the island nation be part of it again."[3]

It is about time that the U.S. is seriously negotiating and trying to normalize relations with Cuba. This time is long overdue and at the rate the two nations are trying to become friends again they will soon achieve this promising goal.

THE BO CALLAWAY CASE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mrs. SCHROEDER. Mr. President, in the August 1977 issue of Colorado/Business Senator FLOYD HASKELL had an opportunity to discuss charges made earlier in that magazine, as well as in Harper's, that the inquiry by his Subcommittee on Environment and Land Resources into former Army Secretary Howard "Bo" Callaway's role in obtaining Government approval for the expansion of his Crested Butte, Colo., ski area was an election year stunt with little or no basis in fact.

Senator HASKELL correctly presents the issue in the Callaway case: "Did he attempt to use his high office to influence a Government agency to act favorably toward his private interests—his ski corporation?" And he points to two earlier cases—one during the Kennedy administration and the other during the Eisenhower administration—in which top Government officials resigned under circumstances similar to those presented in the Callaway case.

The full article follows:

SINCE YOU ASKED ME . . .

(By Floyd K. Haskell)

Your columnist, Paul FitzPatrick, indulged himself in your July issue. His stimulus, of course, was the Harper's magazine article on my inquiry into Howard "Bo" Callaway's role in the proposed expansion of his Crested Butte, Colorado, ski area.

Mr. FitzPatrick's column did not betray his background—which includes stints on the staffs of Republicans Sen. Peter Dominick and Rep. Mike McKevitt and duty last fall in Republican Ed Scott's campaign against Democrat Tim Wirth in Colorado's Second Congressional District.

Colorado/Business readers deserve to know how one newsman who covered the inquiry—and a Pulitzer Prize winner at that—viewed the Harper's article. NBC's Jim Polk characterized it for the Rocky Mountain News as "selective journalism" which practices the very "distortion" it accuses me of. Mr. Polk also said the author of the piece used "cheap shot tactics."

As to my interest in Mr. Callaway's conduct, the issue was very simple: did he attempt to use his high office to influence a government agency to act favorably toward his private interests—his ski corporation?

The public record leaves no doubt that Mr. Callaway did indeed seek to use the fact and the trappings of his office in an attempt to influence Forest Service decisions in his corporation's favor.

Another generation of Republicans, for example, would remember an incident involving Fred Korth, Navy Secretary under John Kennedy. When the smokescreen finally cleared, the nation learned that Mr. Korth had used Navy Dept. stationery to write personal business letters. Like Mr. Callaway who also wrote personal business letters on official stationery, Mr. Korth freely admitted it. Also like Mr. Callaway, Mr. Korth denied he had done anything criminal or in violation of departmental conflict of interest codes. And, like Mr. Callaway, Mr. Korth missed the point.

The Justice Dept. found that Korth was not guilty of a conflict of interest. But Korth was asked to resign for violating standards set down by Kennedy for his administration in 1961. They declared: "Even though a technical conflict of interest . . . may not exist, it is desirable to avoid the appearance of such a conflict from a public confidence point of view."

A few years and one administration earlier, Harold E. Talbott resigned as Secretary of the Air Force under similar circumstances.

As the New York Times described it, "At issue in the Talbott affair were the Secretary's activities from his Pentagon office" in behalf of an engineering concern in which he held a partnership.

Talbott asserted his activities had been "within the bounds of ethics." President Eisenhower, in accepting the resignation, termed Talbott's decision to resign "the right one." He said officials of his Administration must behave "impeccably from the standpoint of ethics" as well as legality.

Sen. Wayne Morse, Democrat of Oregon, said, ". . . on the basis of his indiscretions and his publicly admitted mistakes, Mr. Talbott ought to be kicked out of office." In essence, he was. And even Republican senators thought it was the right decision—both for Talbott and the President. Sen. Mundt cited the President's response as evidence of his administration's integrity.

I think Mr. Callaway's conduct in the 1975 expansion of his corporation's ski area and in an earlier 1973 incident place both his feet in the latter camp. The 1973 incident was of interest to the subcommittee mainly because it showed that what happened two years later was no aberration; it was part of a pattern whose efficacy had been clearly demonstrated.

On July 19, 1973, the Crested Butte Development Corp. applied for the addition to its existing ski area permit of a parcel of public land known locally as Tony's Parking Lot. The Forest Service informed ski area officials the addition could not be made without an environmental impact statement. Mr. Callaway involved himself in the issue in October through an old friend in the Agriculture Dept. arranging for ski area officials to meet the high-level Forest Service officials in Washington, completely bypassing an appeal to the regional forester in Denver.

The Washington meeting initially produced only a reiteration of the Forest Service's denial. But in February, 1974, Ralph Walton, who is Mr. Callaway's brother-in-law and a ski corporation official, contacted the old family friend, Richard Ashworth, in the Agriculture Dept. to push the request again. Ashworth called the chief of the Forest Service, John R. McGuire. McGuire called the assistant regional forester in Denver. Twenty-four hours later, that official telephoned Walton to outline a method of incorporating Tony's Parking Lot into the ski area permit. Memos outlining that plan flowed from Denver to Washington, to McGuire, to Ashworth emphasizing "Secretary Callaway's interest in this matter."

Top Forest Service and Agriculture Dept. officials were thus involved in a minor local Forest Service decision affecting a small ski area in a remote part of Colorado. The same pattern recurred in 1975 when the issue was expansion of the ski area to an adjacent mountain. Forest Service witnesses before the subcommittee termed such high-level involvement in an agency field decision unique in their experience. What set Crested Butte apart from others similarly situated? Only Mr. Callaway's ownership.

Harper's magazine seems to find this conduct above reproach, Mr. FitzPatrick agrees. I disagree. The subcommittee disagreed. I am confident that people who understand the very simple issue involved also disagree.

SPECIALTY STEEL: AN INDUSTRY AT A CROSSROADS

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. OBERSTAR. Mr. Speaker, I would like to bring to the attention of my colleagues the situation surrounding import limitations on specialty steels, generally known as stainless steels, high speed, and tool steels, high temperature alloys, and electrical, magnetic, electronic, and refractory metals.

In the 15 years since 1960, imports of specialty steels have increased 835 percent, a major factor causing unemployment in the domestic specialty steel industry to rise as high as 40 percent. On January 16, 1977, the U.S. International Trade Commission determined that the imports were a "substantial cause of serious injury" to the domestic specialty steel industry. The Commission found that quantitative limitations for a 5-year period were "necessary to prevent or remedy such injury."

Relying upon the Commission's findings, the President negotiated a marketing agreement with Japan and imposed quantitative restrictions for a 3-year period, beginning June 14, 1976, on the other foreign countries that refused to negotiate.

After being in effect for only 14 months, the import limitations are just beginning to prove effective and production and employment in the specialty steel industry are increasing. More importantly, management has made major capital investment decisions with the belief that the market would be temporarily stabilized. However, in May of this year, President Carter announced plans to review the specialty steel import restraints with the option of continuing, reducing, or totally eliminating the limitations now in effect.

It is my firm belief that the removal or reduction of the import restraints at this early stage would undermine the entire recovery process and counter whatever gains have been made. The jobs of more than 65,000 workers, 15,000 of whom are iron ore miners in my district, will be in jeopardy and full recovery will remain uncertain unless import relief is continued. Perhaps most crucial to long-term recovery, modification of the import restraints would cause management to seriously reevaluate its major capital investment commitments so important to the future of the industry.

Specialty steel is an essential industry, critical not only to the production of aircraft, automobiles, oil refining equipment, and communication devices, but also in the fabrication of the major portion of our defense weapon system. We cannot, therefore, let foreign imports erode and weaken our domestic industry.

Even though 14 months of import restraints have helped, domestic specialty steel production in 1976 was approximately 20 percent below the total for 1974, employing 14 percent fewer people. Moreover, capacity utilization in 1976 re-

mained very low with no product line exceeding a 64 percent utilization rate. This contrasts with an 80 percent capacity utilization registered for U.S. manufacturing in general. Similarly the net operating profits as a percent of sales before taxes for the specialty steel industry was less than half of that registered for all U.S. manufacturing in general. Clearly then, the industry is still a long way from full recovery and merits the continuation of the import restraints.

I would like to point out that the disruptive market penetration of imports has not occurred because foreign specialty steel is a superior product. On the contrary, according to the ITC the United States has long been a leader in developing new processes of specialty steel and many of the processes currently being used throughout the world are the result of research in the United States. The U.S. steel industry is forced to compete with companies that are actively supported and/or subsidized by their governments and forced to compete with companies that use predatory pricing practices to acquire market shares. In addition, Japan maintains a virtual embargo on imports of specialty steel in their home market and the Europeans have agreements limiting Japanese imports to their countries.

I am confident that the continuation of our import limitations will give our specialty steel industry an opportunity to compete with these foreign countries. My belief in the strength of the American steel industry was reaffirmed when the specialty steel quotas were imposed in June 1976, resulting in increased domestic production without price increases. According to the ITC, "* * * domestic producers augmented their profits by increasing output, and thus achieving economies of scale, rather than by raising prices."

In light of all these facts, I urge the administration to continue the 3-year import restraints on specialty steel initiated in 1976 in order to give the American specialty steel industry a chance to recover from foreign assault, stabilize itself, and, thereby, become competitive again.

SUPPORT AMERICAN SPECIALTY STEELWORKERS

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. ASHBROOK. Mr. Speaker, the American specialty steelworker and industry is again under attack. American specialty steel has been hard hit by imports. Last year, the International Trade Commission recommended restrictions placed on these imports. Then President Ford placed restrictions on certain imports.

Now President Carter is reviewing the specialty steel import restraint program. The International Trade Commission is holding hearings on this subject.

Removal of these restraints would be a mistake. I am submitting a statement to the International Trade Commission and contracting the President to express my opposition.

In 1975, I first contacted the International Trade Commission, urging import restrictions to guarantee American specialty steelworkers a fair shake. After the ITC made its recommendations I contacted President Ford on a number of occasions urging his support of the ITC's proposals. President Ford did announce import limitations on certain specialty steels and negotiated an agreement with Japan to set quantitative limits for a 3-year period.

The limitations have begun to have some impact and now President Carter is reviewing them. The restrictions should be left in place. Any removal of them would harm American workers. As I have stated before, basic American interests need protecting and one of the most basic is jobs.

Before limitations were placed on imports, the American specialty steel industry was being hard hit by what I consider unfair foreign competition. Now the limitations are beginning to have some impact and President Carter is having them reviewed. The limitations should be allowed to run their course.

Earlier in the year, the specialty steel industry was hit by a ban on Rhodesian chrome that was supported by the Carter administration. I opposed and voted against banning Rhodesian chrome which is used in the specialty steel industry. Prohibiting importation of Rhodesian chrome increases our reliance on Soviet chrome at higher prices. The American specialty steel industry cannot afford higher costs.

Foreign specialty steel makers have been subsidized directly or indirectly by their own governments while the U.S. Government has given little protection to our own industry. The result has been more imports and less American jobs. The Carter administration should give the present limitations a fair chance to work and not cave in to foreign pressure.

ROYAL NAVY TRAINING FOR YUGOSLAVS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. McDONALD. Mr. Speaker, Communist dictator Tito has been able to have the best of both the Communist and non-Communist worlds due to Western stupidity and the love of American policymakers for the so-called Third World that Tito is supposed to represent. However, whether the issue is Vietnam, the revolt in Hungary of 1956, or war in the Middle East, Tito has always helped the Communist world to the detriment of the West. Going along with artful game, it was interesting to learn that British are now permitting two Yugoslav naval officers to attend the staff course at the Royal Naval College, in Greenwich, England. The article from the London Daily Telegraph of August 14, 1977, follows:

R.N. TRAINING FOR YUGOSLAVS

(By Desmond Wettern)

Naval officers from a Communist country are, for the first time, undergoing training with the Royal Navy in Britain.

A Yugoslav Commander and a Lieutenant Commander are just completing six months on the Staff Course at the Royal Naval College, Greenwich.

I understand that the invitation was made to Yugoslavia at the urging of the Foreign and Commonwealth Office.

Although officers on the course do not normally have access to classified material their presence would have had to have been drawn to the attention of the several defence establishments and factories and shipyards producing defence equipment which students visit during their course.

SYMPATHETIC TO BRITAIN

The purpose behind their visit is probably to help build up a nucleus of officers in the Yugoslav armed forces who could be expected in the future to have an understanding of and to be sympathetic towards Britain.

The possibility of severe pressure from Moscow for Yugoslavia to join the Warsaw Pact after the death of President Tito has long been a source of concern to Whitehall and Washington who have been keeping a close watch on Russian support for Croatian separatist movements anxious to end Slav domination of Yugoslav politics.

IMPORTS STILL RISING—POSE THREAT TO U.S. INDUSTRIES AND JOBS OF AMERICAN WORKERS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. EILBERG. Mr. Speaker, in recent months I have repeatedly spoken out on the international economic policies of this administration, which, like its predecessor, has shown undue favoritism to foreign producers of goods.

This favoritism continues to work to the extreme disadvantage of American industry and to the workers which American firms employ. At a time when unemployment in the United States remains stuck close to the 7 percent mark—with millions of workers unable to find employment—it is incredible to me that the administration would continue to permit expansion of foreign imports.

An ominous report on the continued growth of textile imports appeared in the August 22, 1977, issue of Southern Textile News, the newsweekly serving the textile industry. According to this report, these imports will grow at a pace that will be more than double the growth rate of the domestic industry. Inevitably, this continued acceleration of imports will further depress the domestic industry, inhibit its growth, and destroy job opportunities for thousands of American workers.

Mr. Speaker, I commend to the earnest

attention of my colleagues the full text of the Southern Textile News article which follows:

IMPORTS EXPECTED TO CONTINUE RISING

CHARLOTTE, N.C.—Textile imports into the U.S. will apparently be increasing, not dropping, during the years ahead.

The growth rate during the next four years will be 6 percent a year, trade sources say. This expansion is permitted under terms of the Multi-Fiber Arrangement (MFA) which expires on Dec. 15 of this year but which is being extended for a period of four more years. The negotiations have been completed but the pact has not been signed.

The U.S. textile industry had hoped to limit growth to 2.5 percent, said Rick Utley, southeastern manager of public relations for the American Textile Manufacturers Institute (ATMI).

"We asked that the growth rate be no more than the growth rate of the domestic industry (2.5 per cent) over the last 11 years," he said. But government trade negotiators decided that a more reasonable goal would be the renewal of the present MFA, which allows for 6 per cent annual growth in imports.

The MFA is an international pact on bilateral agreements negotiated under the General Agreement on Tariffs and Trade. In addition to this pact, the U.S. has 18 bilateral pacts with textile-producing nations. Eleven of the bilateral pacts also expire this year.

Some American textile executives say that the foreign countries, particularly Hong Kong and South Korea, pay low wages in the mills and ship most of their low-priced goods to the United States, depressing the market here.

The trade pacts give some protection to the U.S. textile industry, since quotas are set limiting how much yarn and apparel can be shipped to this country.

But each year the limits increase and the volume of imports rises.

In the U.S., apparel and textile imports rose almost 40 per cent last year alone, equal to more than one-third of the U.S. trade deficit. The penetration varies; more sweaters came into the U.S. last year than the total number of sweaters made in this country, but the import rate was low for fashion items.

However, the style-oriented portions of the apparel market account for much less volume than the commodity-oriented segments where imports have had their greatest effect.

Negotiations began in June in Geneva to renew the MFA, but broke down in July although the U.S., Japan and the major less-developed countries were favorable to extension of the agreement.

"The majority of the European Community countries feel that way, too, but the French and British were adamant about changes or some special considerations for European countries," said Ellis Meredith, an official of the American Apparel Manufacturers Association.

Michael B. Smith, chief U.S. textile negotiator, presented a protocol on renewal of the MFA which will allow for departures from the agreement in cases where the impact of foreign goods on a domestic industry is severe.

This flexibility means that bilateral agreements can be reached between nations providing for lower growth rates for some kinds of imports and higher rates for others, so long as overall growth averages out to 6 per cent a year.

But Meredith notes: "That doesn't thrill us a bit, since we have no interest in helping one part of the industry at the expense of another sector."

NATIONAL ENERGY ACT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for August 10, 1977, into the CONGRESSIONAL RECORD:

NATIONAL ENERGY ACT

The Congress has struggled with the energy crisis since the Arab oil embargo in 1973–1974. It has considered hundreds of energy bills, enacted several of them, and rejected many. Historically, the problem for the Congress has been that although the people apparently want the President and the Congress to enact a comprehensive energy program, they are against many of the crucial proposals in any energy package.

Tackling the energy crisis once again, the Congress just approved a bill creating a Department of Energy, and the House of Representatives approved the National Energy Act, the most important energy legislation yet considered by the Congress. The National Energy Act has three principal objectives: energy conservation, conversion to coal, and increased production. Its goals are to be accomplished primarily by raising the price of energy, especially the price of oil and gas, in order to reduce demand and to increase the competitive attractiveness of coal. It establishes six goals to be achieved by 1985: 1. Reducing the average growth rate of energy consumption to 2 percent each year; 2. Reducing oil imports to less than 6 million barrels a day (imports now are 9 million barrels a day); 3. Achieving a 10 percent reduction in gasoline consumption from the 1977 level; 4. Retrofitting for energy conservation 90 percent of residential and commercial buildings in the United States; 5. Increasing coal production by at least 400 million tons each year over 1976 levels and; 6. Using solar energy in more than 2½ million homes.

To achieve these goals, the National Energy Act provides for:

1. Conservation in Buildings: tax credits, loans and grants for energy conservation programs for existing residential and commercial buildings.

2. Crude Oil Tax: a tax on crude oil to raise the price over a three-year period to the world price of oil. Taxpayers and adult nontaxpayers would receive rebates of the tax.

3. Natural Gas Pricing: a single uniform price policy for natural gas produced in the United States with an incentive price of $1.75 per million BTU's.

4. Business Taxes and Credits: a use tax on business consumption of oil or natural gas to discourage consumption and an additional 10 percent investment tax credit for investment in equipment for conservation and conversion to other fuels.

5. Public Utility Regulatory Policy: A method to move electric utilities toward pricing electricity at the cost of providing service to each class of consumer so as to encourage conservation.

6. Other Provisions: tax incentives for geothermal, gas and oil drilling ventures and mandatory efficiency standards for appliances.

This bill seeks to deal with the fundamental problem of energy policy: the insecurity of U.S. oil supply. Each day the United States is moving toward an increasingly perilous position in regard to the adequacy and the reliability of its energy supply. In 1973–74 oil prices quadrupled, and the United States produced $375 billion less than potential output in the 1974–1976 period. Last year the United States spent $32 billion for imported oil and this year we are running about 50 percent above the same period for last year. The United States now imports almost 50 percent of its oil supplies, up from 23 percent in 1970. As these statistics show, it is vital to decrease significantly U.S. vulnerability to a change in the international oil market, and that is what this bill seeks to do.

Nobody knows the precise impact of the National Energy Act, but it is estimated that it will reduce imports by between 2.6 million and 2.9 million barrels a day in 1985. It will have a measurable, but modest, inflationary impact, estimated to increase the price level from 0.3 to 0.4 percent. The taxes raised by the bill will largely be returned to the taxpayer through reduced withholding of federal taxes, thus substantially restoring the purchasing power. The average taxpayer will be given enough added take-home pay to cover his higher energy prices.

The action of the House this week will probably only enforce existing trends toward energy conservation, higher oil and gas prices and conversion to coal. These trends may outpace the goals of the energy program. Energy intensive industries are forecasting energy savings of 15–20 percent, the automobile industry is ahead of schedule in realizing the mandated goals for achieving better miles per gallon, and coal supply is increasing.

I am not satisfied with every provision of this bill. I supported additional production incentives, which were not approved, and I opposed the additional gasoline tax, which was deleted from the bill. I voted for the bill on final passage, however, because I believe it is essential that we put into place a comprehensive energy policy. It is easy to criticize certain provisions, and to persuade ourselves that one provision or another is unnecessary or unwise. The bill may not be all it is touted to be, but it is an initial step toward what must be a disciplined effort by Americans to cut down the use of fuel. My guess is that other, and even less popular steps will be necessary.

MEXICAN INDEPENDENCE DAY

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. KILDEE. Mr. Speaker, this September 16 our great neighbor Mexico will celebrate its 167th anniversary of independence. It is appropriate on this occasion to extend on behalf of the American people our sincere congratulations to the people of Mexico. The growing and prosperous democracy of Mexico has contributed much to our great heritage. Mexican Americans have lived in the United States for more than 350 years, as exemplified by Santa Fe, N. Mex. established in 1598.

Throughout our country, the Independence Day of Mexico is celebrated by many Mexican-American communities. Traditionally these celebrations serve as excellent opportunities to examine the rich cultural, social and economic contributions of Mexican Americans and all Americans of Spanish speaking heritage.

I am proud to share with you that on September 11, 1977, in cooperation with the city of Flint, the Mexican flag will

be raised and flown over Flint City Hall. This event, sponsored by the Spanish Speaking Information Center of Flint, commemorates Mexican Independence Day. It serves as an opportunity to re-examine the overall status of our Spanish-speaking peoples. And it provides a focus in which to better understand contributions of Mexican Americans.

I would therefore ask that the House of Representatives join me in congratulating the Spanish Speaking Information Center of Flint, Mich. and all people participating in the celebration of Mexican Independence Day.

HUMPHREY ON LIVING

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. QUIE. Mr. Speaker, during the recess I paid a brief hospital visit to Senator HUMPHREY and was struck again by how rich his life is—even with cancer. And by how much his current illness is helping many learn more about living.

We in Minnesota have great respect and a deep love for our senior Senator. And it has often been during times of difficulty in his life that he has lifted the spirits of others by his example and tremendous attitude.

Someone shared with me an article in the August issue of the Reader's Digest by the Senator on how he is dealing personally with his illness. Senator HUMPHREY knows how to live. All of us can gain something very profound through his words.

Our people should be grateful for a man such as this.

The article follows:

"YOU CAN'T QUIT"—THE DISTINGUISHED SENATOR FROM MINNESOTA TELLS HOW HE HAS COPED WITH CANCER—AND LIVES LIFE TO THE FULLEST

(By HUBERT H. HUMPHREY)

The worst moment in my life was when I discovered that I had cancer. I know what this dread disease can do to a person and what the chances for survival are. But if you think of yourself as a statistic, then you're really in trouble. You have to believe that somehow you can win this fight. You have to gear yourself to the continuity of the struggle, knowing that there will be days when you won't feel too good.

My faith and hope get me from day to day. A favorite verse in the Bible is from St. Matthew: "If ye have faith as a grain of mustard seed, ye shall say unto this mountain, Remove hence to yonder place, and it shall remove; and nothing shall be impossible unto you." Deep down, I believe in miracles. They have happened to a lot of people who were given up to die and then were restored to health.

But there are days when I get discouraged. I look at myself in the mirror and say, "Humphrey, you look like a sad sack." Because of the chemotherapy, I've lost a lot of hair, and got much thinner. My trousers don't fit; my shirt collar is the wrong size. When I start feeling sorry for myself, I tell myself: "The doctors told you this would happen. You can't do anything about it, so get on with living." Then I go and have my clothes altered.

THE WILL TO HANG ON

If you don't overcome self-pity, the game's all over. My father taught us there was no time for self-pity in life. You had work to do. On the plains of South Dakota, adversity was part of daily life. I remember the dust storms, the blizzards, the summer heat and droughts. Yet when the crops failed, you always thought, There's another year coming. I'll prepare the soil and pray. You were always future-oriented.

My family lost a lot, especially during the Depression. One of my saddest memories is of my mother crying and my dad with tears in his eyes because they had to sell our home to pay the bills. But in life it isn't what you've lost, it's what you've got left that counts. We had a lot left. We had ourselves, our family, our store. It was only a question of time before things would get better. The important thing was who would be the survivors. Who had the will to hang on for a better day.

I think the biggest mistake people make is giving up. Adversity is an experience, not a final act. Some people look upon any setback as the end. They're always looking for the benediction rather than the invocation. Most of us have enough problems so that almost any day we could fold up and say, "I've had it." But you can't quit. That isn't the way our country was built.

Life's always a struggle. If anything's easy, it's not likely to be worthwhile. I made up my mind very early that I would have to improve myself. I went back to the University of Minnesota after a six-year absence and, let me tell you, it wasn't easy. My wife, Muriel, had a job, earning something like $45 a month. She used to make sandwiches that we could sell to earn extra money. I was carrying a heavy academic load, but I worked six hours every night in a neighborhood drugstore. I never felt I couldn't make it.

One of my hardest battles was running for the Presidency in 1968. I had been given the chance I dreamed about, to be the standard-bearer of my party, but there were moments when we were so far behind that I got discouraged. Our party was broke. I remember saying to Muriel, "If we can't afford an airplane, we'll get in a car or a bus because, damn it, we're not going to give up, we're not going to quit."

To come as close as we finally did to winning the highest office in this land and then to lose it was hard. But in writing my concession speech, I told myself, "This has to be done right because it is the opening speech of your next campaign!" I was already looking ahead.

I've often thought of how we could have handled things differently. But I don't have any bitterness. Bitterness takes too much energy and accomplishes nothing. It doesn't hurt the other person. You think you're sending out the rays of bitterness like laser beams, but they stay inside of you—consuming you. As Lyndon Johnson often said, you can tell a fellow to go to hell, but it's hard to make him go.

SOURCES OF STRENGTH

The important thing in any setback is whether you can pick yourself up. That helps me with my illness. I keep thinking, "Well, tomorrow is another day." There may be people who'll say, "It's all right for you to talk about tomorrow being another day, but if you knew how much pain I suffer . . ." I do know. When I had to take X-ray treatments, I used to get up in the middle of the night with bladder spasms. One time I was in such agony that I honestly wanted to give it all up. But even in the deepest despair you have to look up—keep your eyes on the mountaintop. I believe, I know, that a positive outlook can influence your physical well-being, that it can help you fight something like cancer. If you have the will to live, it can help the process of recovery. Medical experience has supported this.

But I feel, also, that not all of my life is in my own hands. There is a power beyond man—Divine Providence, the will of God. It is a powerful source of strength if you can get in tune with it. Like anybody else's my faith is sometimes rocked. When I'm feeling low, I draw strength from the prayer of St. Francis of Assisi. Part of it says, "Where there is doubt, let me sow faith; where there is despair, hope; where there is darkness, light; and where there is sadness, joy." I think it is the perfect prayer.

One of the greatest sources of strength throughout my illness has been my family, especially Muriel. We've been married more than 40 years, and she's put up with an awful lot from me. When I found out I had to have surgery, we decided to tell the children in a family gathering. Muriel fixed a brunch at our home in Waverly, Minnesota, and they all came. Then I called them to attention and told them: "You've just got to have faith with me that this is going to come out all right. Because if you doubt whether I'm going to make it, that's ten points off my chance."

I would be dishonest if I didn't say that there were some bad moments. At one point, when I was in the hospital, Muriel said, "Last night I was so angry that I cried. I keep asking, why you?" I told her I had felt that way, too. I don't know the answer. Looks like I always win the little elections and lose the big ones. But it *is* me, so why spend time trying to figure out why?

During those inevitable periods of depression and anger, another thing that kept me going was the great outpouring of love in telegrams, cards and letters from all over the world. I tell you they had a real healing effect on me. The greatest gift that has come to me is the affection of so many—far more important than people feeling sorry for me. In fact, feeling sorry for someone is simply to give him a little pain reliever. Love is a healing force.

When I was in the hospital, people marveled that I was up so quickly, visiting other patients. Can you imagine Hubert Humphrey strapped to a hospital bed? By the third day after surgery, I was walking around saying hello to people I knew were in worse shape than I was. I was doing it for them and for me.

Let me tell you something. What you give, you receive back a thousandfold. After World War II, this country was mangnanimous and magnificient. We shared with all and the more we gave, the more we had. If you have a well and draw water from it, it fills. If you don't draw water, it gets stagnant. You have to learn to give yourself

LIFE TO THE FULLEST

One reason I can keep going is that I enjoy living. I have a great inquisitiveness about the future. I see so many people younger than I who have no interest in tomorrow. But I want to live to the year 2000, to be around to see what's going to happen.

When you're older, you're bound to think about how many more days or years you have left. It certainly goes through my mind. Then I think, well, Humphrey, there's not much you can do about that, is there? Except live life to the fullest.

I must say it doesn't help when someone comes up and says, "Gee, you look bad." Back in January when the Senate opened for the new session, I had just had major surgery. Then I got the flu. I looked and felt pretty bad. But I came for the opening of the Senate because I was in the contest for Majority Leader.

Well, seems that day every camera in the United States was focused on me. The press kept running those pictures, and they stressed how drawn and haggard I looked. I said to one reporter, "Don't bury me prematurely. I'm apt to get right out of the coffin."

Anyone who has experienced what I have knows damn well how bad he looks. I got so tired of hearing people talk about it that Muriel and I went to the Virgin Islands to rest and relax. When I got back, looking better, I thought, "Take my picture now."

It helps in life to have a sense of humor. If not, you start taking yourself too seriously and lose perspective. While in the Virgin Islands, I liked to tell my friends, "What a wonderful place this is! They've got Greta Garbo down here who doesn't talk to anybody and Hubert Humphrey who'll talk to everybody."

I hope I can demonstrate for others that you don't have to throw in the towel when you have something like cancer. Be grateful for every day of life. Be buoyant with it and do the best you can with what you have.

My goodness, there are people who live their lives with physical defects—doing marvelous things. Ray Charles is blind and he's one of our great musicians. Look at Max Cleland who is a dynamic director of the Veterans Administration. He came from Vietnam minus two legs and a right arm. Franklin Roosevelt was crippled by polio and needed steel braces to stand; but the pain never showed on his face as he conveyed to the nation his message of confidence and moving "forward with a strong and active faith."

A month after my surgery, I went back to work. There's nothing worse for a person with something like cancer than to have nothing to do. If a person can't work, there are other things to do. It's important to be involved with people and activities.

My staff tells me I ought to cut down on my schedule. There are days when I wonder if I'm really making the best use of my time. But I enjoy being a Senator. When I'm in committee meetings, handling foreign affairs, economic and social problems, agriculture issues, I feel that I'm a part of the life of this country. I feel vital.

The day after I withdrew from the Majority Leader race last January, my colleagues made me "Deputy President Pro Tempore of the Senate." It provided me with such things as extra salary and a special office. But far more important, I would be included in the Senate leadership meetings at the White House. It showed that my colleagues recognized that I had given a lifetime of service to my party and that I still had more to give. They bestowed a great honor on me. They also gave me something more to live for.

I'm sure many people think my odds against cancer are not very good. But it's a race I'm in, and I can't get off the pony. I've got to ride it and hope that I'm going to win. How long should a person live? I don't know. What's more important is how you live and what you live for. As long as I have a breath of life I'm going to try to live actively and be a part of the daily life of my family and friends, my job, neighborhood, community and country. I'm not changing my life because I have had cancer. With the help of the good Lord, my wife and family, the love and affection of so many friends, the care of my doctors, and my own love of life, I expect to be around for quite a while.

CHANGE IN SECURITY EXCHANGE ACT

HON. ROBERT W. DANIEL, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. ROBERT W. DANIEL, JR. Mr. Speaker, today I am introducing legislation to make a small but important change in the Securities Exchange Act of 1934. This legislation would delay for 2 years the effective date of a section of that law which prohibits stock brokerage firms which manage money from also effecting brokerage transactions for those managed accounts.

This prohibition was included in the Securities Acts Amendments of 1975. Much has happened since the passage of that legislation—most importantly, an end to fixed commission rates—and the prohibition contained in section 11(a) of the Securities Exchange Act may no longer be appropriate.

It seems prudent, then, to delay the effective date of the prohibition to allow additional experience with the changing market systems before determining whether section 11(a) should be amended, repealed, or allowed to take effect. My bill, therefore, simply changes the effective date of that prohibition from May 1, 1978, to May 1, 1980.

POWERLINE TRAGEDY SHOWS VALUE OF CPR TRAINING

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. FORD of Michigan. Mr. Speaker, we frequently discuss the need for more widespread training of safety officers in modern cardiopulmonary resuscitation, but rarely do we see, first hand, the value of such training.

During the August recess, I had the experience of seeing just how important such "CPR" training can be; how it can literally mean the difference between life and death.

On August 6, my constituents celebrated my birthday, as they have for the past 13 years, with a huge picnic in my honor. Some 6,000 persons were in attendance.

One of the highlights was a demonstration of cable-controlled model-airplanes flying over the park. Tragedy struck when one of the planes snagged on a power line. Within seconds, three men were lying on the ground—victims of electrical shock.

Stationed nearby, was a police officer, Cpl. Donald Woods, a member of the Taylor Police Department, whose members have all had CPR training.

Corporal Woods rushed to the scene, and immediately applied cardiopulmonary resuscitation to one of the victims, who was unconscious and had stopped breathing. The officer revived the man, and moved on to the other two stricken men, to whom he also applied CPR tactics.

Meanwhile, the first victim had again lapsed into unconsciousness, Corporal Woods rushed back, again restored him, and then ordered him sent to a hospital, where, tragically, he died a short time later. The other two victims, under Corporal Woods' skilled CPR work, recovered completely.

Mr. Speaker, I cannot too highly praise Corporal Woods, and the Taylor Police Department, headed by Chief Raymond Quiel, who had the foresight to insist on CPR training for his entire department.

Too often, Mr. Speaker, we take for granted the knowledge and training of our dedicated public safety officers.

I am pleased to bring this story to the attention of our colleagues, and to publicly thank Cpl. Donald Woods. It was a tragedy which might have been much worse but for his quick and skillful use of his CPR training.

1977 LEGISLATIVE QUESTIONNAIRE RESULTS

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. UDALL. Mr. Speaker, I would like to take this opportunity to place in the RECORD the results of my 1977 legislative questionnaire.

Nearly 18,000 constituents from the Second Congressional District of Arizona took the time to respond and many included their own well-thought-out and informative comments.

I am pleased and flattered that my constituents care enough about the issues of the day to inform their Congressman of their views.

The questionnaire results follow:

1977 LEGISLATIVE QUESTIONNAIRE

Below are several questions followed by a series of statements. For each question, please check the blank space following the statement which most nearly expresses your opinion. You'll notice that I have provided three answer spaces beside each statement so that three members of your household may respond to this survey. If none of the statements expresses your view, please feel free to write me separately.

1. In 1972, Congress approved a proposed constitutional amendment (the Equal Rights Amendment—ERA) that says, "Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex." To date, 35 state legislatures have ratified the amendment. Three more states must approve it before it can become part of the Constitution. I feel that:

a. The ERA should become part of the Constitution, 54 percent.

b. The ERA should not become part of the Constitution, 40 percent.

c. Other or undecided, 6 percent.

2. The Supreme Court has ruled that abortion in the first six months of pregnancy is a private decision for the woman and her doctor. My opinion on this is:

a. Abortion is morally wrong, and should be prohibited in all but life-or-death cases, 28 percent.

b. I agree with the Court that abortion is a private matter, to be decided by the woman and her doctor, 69 percent.

c. Other or undecided, 3 percent.

3. In most places, simple possession of marijuana is a serious crime, punishable by jail terms or heavy fines. My view is that:

a. Marijuana is a dangerous drug whose use should be controlled, and so I favor keeping the criminal penalties as they are, 38 percent.

b. No harmful effects have been shown from marijuana use. I feel it should be "decriminalized"—possession of small amounts for personal use should be treated as a minor

civil offense similar to a traffic violation, 51 percent.

c. Other or undecided, 11 percent.

4. Large oil and gas companies own wells, refineries, and gas stations. Recently they have been expanding their operations into other fuels such as uranium and coal.

a. I feel that if oil companies are allowed to buy up coal and mineral reserves, we will see the same price fixing and excessive profit-making we now have with oil. They should not be allowed to expand in this way, 56 percent.

b. Oil companies have the capital and expertise our country needs to develop alternate sources. They should be permitted to expand into any of the other energy sources, 34 percent.

c. Other or undecided, 10 percent.

5. President Carter has proposed that we place a "gas guzzler" tax on cars that get poor mileage and then rebate that money to buyers of cars with good gas mileage. I feel that:

a. This is a good way to encourage energy conservation because it does not force anyone to do what they don't want, but instead provides a strong incentive to buy cars which save gas, 31 percent.

b. I don't think this would be effective because people who can afford to buy and drive "gas guzzlers" can also afford to pay the extra tax. We should instead limit the number of cars getting low gas mileage which auto manufacturers may produce, 53 percent.

c. Other or undecided, 16 percent.

6. The Central Arizona Project (CAP) is a $1.6 billion proposal to bring Colorado River water to the Phoenix and Tucson areas, with 80 percent of the costs to be repaid through water rates and property taxes. Congress has spent $390 million so far, and 20 percent of the Project has been built. My feeling is:

a. CAP should be completed, 61 percent.

b. CAP is an expensive mistake and should be terminated, 23 percent.

c. Other or undecided, 16 percent.

7. Nuclear energy now generates about 10 percent of all U.S. electricity. More plants are being proposed and built, and some people are opposed to these additional plants.

a. I feel that there are serious problems of cost, energy, safety, and reliability of nuclear plants, and problems with the disposal of long-lived radioactive wastes. We should stop building new plants and phase out existing ones, 17 percent.

b. We have had nuclear plants for 15 years with no major accidents. They are reasonably safe and cleaner than coal. I feel we should build more or the economy will suffer, 41 percent.

c. I feel we need to "go slow" on building more nuclear plants until we find ways to ensure safety at existing plants, even if this adds to the cost of new plants, 38 percent.

d. Other or undecided, 4 percent.

8. This year's defense budget is $112 billion and represents about 25 percent of our total Federal spending. I feel that:

a. We are wasting money which could be better spent improving the welfare, health, and education level of our people. We could cut defense spending by $5 to $10 billion and still have a strong defense, 37 percent.

b. The U.S. is presently keeping up with the Soviet arms buildup, and for our continued security we need to keep the defense budget at its current level, 29 percent.

c. We are underestimating the defense needs of the U.S. in the face of a major arms buildup by the Soviet Union, and we need to spend more, 27 percent.

d. Other or undecided, 7 percent.

9. In 1976, much of the cost of electing a President was paid for by a new system financed by people who "checked off" $1 on their income tax returns for this purpose. Some say that this is a good system which worked well and it should also be used to pay part of the cost of elections for the House or Senate. I think that:

a. Public financing promotes honest elections and diminishes the role of special interest groups. I think it should be extended to Congressional general elections, 59 percent.

b. People should not be asked to finance private political campaigns with public money, 31 percent.

c. Other or undecided, 10 percent.

10. Currently, our government regulates prices on domestic oil and gas. Because of this regulation, domestic oil and gas prices have risen less steeply in the past several years than has the price of foreign oil. There is lively debate in Congress this year over whether oil and gas price controls should be removed. I believe:

a. We should "deregulate" and do away with all these controls so that oil companies will have increased earnings to develop vital energy resources, 23 percent.

b. Because the large oil companies form a monopoly, there really is no free market in petroleum products. We need to protect consumers by regulating oil and gas prices. Prices have already risen more than fourfold in recent years, providing plenty of incentive as well as profits, 70 percent.

c. Other or undecided, 7 percent.

THE LIGHT WATER BREEDER REACTOR: A NAVAL REACTOR MEANS CIVILIAN ENERGY

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. TEAGUE. Mr. Speaker, on Friday, September 2, the Science and Technology Committee was informed that a small prototype reactor with a thorium breeding blanket became operational for the first time in Shippingport, Pa. Without fanfare, the operation of the first light water breeder reactor marks another milestone in the Naval Reactor Development program of the Energy Research and Development Administration. More than 20 years ago, this program was responsible for the timely development of the type of light water reactor which is the foundation of our current nuclear power industry.

Today, when it has become critical to conserve our nuclear fuel resources, this program has advanced nuclear power generation in the civilian sector by providing a reactor that is a much more efficient user of nuclear fuel. Though it is not a true breeder—it does not produce more fuel than it uses—it may open up the world's thorium reserves as a source of nuclear fuel.

It is, of course, only a first tentative step—no steam has been generated, no electrical power has been put on the local grid. The most important lesson to be learned from the operation of the light water breeder is the continuing creativity of ERDA's Naval Reactor Development program for civilian applications.

The program is a paramount example of the positive interaction between civilian and military programs in the ERDA. This result is possible because the program has always had a unified management in ERDA with the civilian applications closely tied to the development of naval reactors. Within Congress, the program has historically been seen as a research and development effort. This means that most of the work is, in large part, independent of its applications. To split the effort, either in ERDA or in Congress, would be to destroy the very synergism and creativity which has made it so successful. Admiral Rickover and his staff and the many devoted workers are to be commended for their continued outstanding work.

AMERICAN BAR ASSOCIATION AND GRAND JURIES

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. CLAY. Mr. Speaker, I wish to call to the attention of my colleagues the most recent position the American Bar Association has adopted on the grand jury system.

The Washington Post editorial was published a month—August 10, 1977—after my own appraisal of the system appeared in the Boston Globe—July 11, 1977. I find it amazing how much in agreement I am with this organization. It is even more amazing how much in agreement they are with me.

The articles follow:

[From the Boston Globe, July 11, 1977]

GRAND JURIES: IT'S TIME TO REFORM OR ABOLISH THEM

(By William Clay)

If grand juries are not abolished, they ought to be altered to curtail the prosecutorial abuses inherent in the present system. The original intent of the grand jury was to protect the innocent who had been accused falsely. It supposedly was conceived as a group of peers deliberating in secrecy to determine if sufficient evidence existed to bring criminal charges against a neighbor.

The idea was transported to this country from England and developed as an intricate and prudent body of law to balance the interest of individual freedom with the interest of the state in protecting society against criminals.

However, in recent years grand juries have been composed almost exclusively of society's elite. The interest of the individual has been totally disregarded as prosecutors use the juries as a personal tool to harass, intimidate and frame those who espouse radical causes or differing political opinions.

Citizens who are targets of grand jury investigations, or more precisely the targets of prosecutors, are denied "due process" of law and most assuredly are not guaranteed the secrecy of the proceedings. In fact, most prosecutors have arrangements with the media to leak derogatory, unsubstantiated testimony to discredit and destroy the accused. In addition, the accused is not permitted legal counsel while appearing before the grand jury, not afforded the basic right to be confronted by his accusers nor is he allowed to cross-examine.

The argument that the proceedings are not adversary is groundless. In this age of "Kojak", investigative reporters hell bent on over-dramatizing, over-exploiting, over-sensationalizing every accusation of crime, a grand jury indictment becomes synonomous with guilt. In my opinion, the present system constitutes a blatant disregard of rights of the individual. Most grand jurors are pawns in the hands of many unscrupulous

prosecutors who select what evidence will be considered, which witnesses will be called to testify, who will be granted immunity and which charges will be leveled.

Most indictments are written by the prosecutor independent of consultation with the jurors and then automatically signed by them. In effect, grand juries are no more than rubber stamps placing the onus of guilt on the accused.

There is a real need for the Congress to either reform the system drastically or abolish it. If evidence exists that indicates a person committed a crime, why not take that evidence before the court in a preliminary hearing and give the accused the right to cross-examine?

Why go through the sham, the charade of pretending to be judged by an impartial panel of one's peers? The only justification I see for the continued use of a grand jury would be in the most extreme cases dealing with fraud and other complex white-collar crimes where extensive documents and bookkeeping, suspects, witnesses and lawyers make public presentations difficult and cumbersome; crimes alleged to have been committed by public officials or policemen; and cases where the protection of witnesses is essential or where some suspects are still at large.

[From the Washington Post, Aug. 11, 1977]

HOW TO MAKE GRAND JURIES WORK

Legislation pending in Congress to change the rules under which federal grand juries operate got a helping hand Wednesday when the American Bar Association approved a set of principles for grand-jury reform. Chief among them is a recommendation that a witness be allowed to have a lawyer present when being questioned in the grand-jury room. This recommendation, if accepted by Congress—and we hope it will be—should go a long way toward eliminating the abuses by prosecutors that have made the grand-jury system suspect. In doing so, it may save the grand jury from extinction.

Originally created in England as a mechanism for protecting citizens against an overbearing government, the grand jury has been used instead by many prosecutors as an instrument for harassing witnesses and browbeating defendants before they are indicted. The Nixon administration was especially skillful at using grand juries for political rather than law-enforcement purposes.

While the Department of Justice has recognized the need for new rules to end such abuses, it is not prepared to go as far as the Bar Association in fundamental reform. Attorney General Griffin Bell, in fact, argued before the lawyers against giving witnesses the right to have a lawyer with them—at present, witnesses' lawyers are required to wait outside the grand-jury room. His fear, and that of many prosecutors, is that grand-jury proceedings will come to resemble those of a trial, thus making the task of law-enforcement officials even more formidable than it is now. We think such fear is exaggerated. But even if it were not, this basic change in the law would be needed to preserve the grand jury's intended function.

Grand juries have been much criticized in the past few decades. They were abolished in England in 1933 and have been eliminated in several states. Their life expectancy in the remaining states and in the federal system was not considered great a few years ago because of the ways in which the juries had been abused. But that has changed. The Watergate affair provided a striking example of their usefulness in investigating and bringing indictments in situations where no other technique could have enjoyed public confidence. They are worth saving—but only if they are restored to the function intended by the Bill of Rights. The best way to do that would be for Congress to pass legislation along the lines suggested this week by the nation's lawyers.

PANAMA'S STORMY PAST

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. WHALEN. Mr. Speaker, two of the United States' most capable diplomats, Ambassadors Ellsworth Bunker and Sol Linowitz, have concluded negotiations with representatives of the Republic of Panama resulting in long-overdue agreements designed to replace the Hay-Bunau-Varilla Treaty of 1903.

Last evening heads of state and Cabinet Ministers from 23 other Western Hemisphere nations gathered at the Organization of American States to witness the signing of new treaties and, by their presence, to testify to their concurrence with and approval of the contents of these documents.

Within our own country at this time, however, there is little knowledge of the specific terms of the new accords, or of their implications for the future. Between now and the new year when the Senate will consider ratification of these documents, a truly informative and soul-searching debate will be in order.

This highly volatile issue, already the subject of much rhetoric and hair-pulling, may be the most important single issue to confront this Congress. The crucial impact of our decisions on future hemispheric relations cannot be overstated.

Yesterday's Washington Post carried a brief and objective article by Don Oberdorfer relating the history of our involvement in Panama. Members who are already committed to either side of the debate, as well as those who have not taken a firm stand, will find the following article helpful and informative:

A CANAL CHRONICLE—"HIGHWAY OF CIVILIZATION" HAS HAD A STORMY PAST

(By Don Oberdorfer)

The Panama Canal treaties to be signed tonight are the product of 13 years of U.S. Panamanian negotiations and 74 years of history.

For large numbers of Americans, the transfer of the canal to Panama is a puzzling "giveaway" of a major U.S. asset created by Yankee ingenuity, sweat and dollars.

But for Panamanians and many other Latin Americans, the new canal treaties are the long-delayed redress of a historic wrong and the end to an era of Yankee colonial domination.

"We bought it, we paid for it, we built it," declared former California Gov. Ronald Reagan in campaign oratory last year against the "giveaway" of the canal.

The historians say Reagan understated the case in one crucial respect: in order to arrange for the construction of the canal by the United States and its operation forever under favorable conditions, President Theodore Roosevelt virtually created the country of Panama in 1903 as a compliant negotiating partner.

Late in the 19th century a French company went broke trying to dig a canal between the Atlantic and Pacific oceans across the steamy jungle of Panama, which was then an obscure province of Colombia. About the turn of the century Roosevelt became interested in the project and pressed Colombia to sign a treaty allowing the United States to dig and operate a canal.

Colombia refused, but Roosevelt would not take no for an answer. Arguing that Colombian "jackrabbits" should not be permitted to bar "one of the future highways of civilization," Roosevelt encouraged the province to secede from Colombia and sent a U.S. gunboat and troops to make sure the "rebellion" succeeded.

On Nov. 18, 1903, two weeks after the secession, Washington signed a treaty with the infant "Republic of Panama" providing U.S. rights in perpetuity over a 10-mile zone bisecting the country as the site of the future canal. "I took the Canal Zone," Roosevelt later boasted. Secretary of State John Hay, who signed the treaty for the United States, called it "vastly advantageous to the United States and, we must confess, not so advantageous to Panama."

The clouded origin of the 1903 treaty and Canal Zone was little known to Americans, but the engineering and construction feat that followed stirred public pride. Costing $387 million and the lives of 32,000 people—who died of malaria, yellow fever, other diseases and accidents—the building of the canal was a historic achievement.

"It was the moon shot of the day," former Canal Zone Gov. David S. Parker said recently.

Since the grand opening of the canal on Aug. 15, 1914, the 51-mile-long waterway has won a place in world commerce and military strategy. During World War II, 24 million tons of military supplies passed through, saving 8,000 miles and about 30 days over the Cape Horn route around South America. During the Vietnam war, about 70 per cent of the cargo for the war zone passed through the canal.

Today the largest U.S. aircraft carriers and supertankers are too big to navigate the canal, and its economic importance is declining. Only about 4 per cent of U.S. coast-to-coast trade uses the canal, less than half the proportion of a decade ago. The canal is considered by U.S. authorities to be militarily and economically important but not as vital as in the past.

Half a century after its creation, the Republic of Panama increasingly was imbued in the 1950s and 1960s with the nationalistic spirit that swept the rest of the "Third World." To this country of 1.7 million people and 29,200 square miles—almost the size of Maine—the U.S. operation of the canal and the Canal Zone under the 1903 treaty was a vestige of colonialism and a national indignity.

In 1964, mounting tensions erupted into riots over the issue of the flying of the Panamanian flag in the Canal Zone. Four Americans and 20 Panamanians were killed and 80 other people injured. Panama broke diplomatic relations with the United States and took its case to the United Nations and the Organization of American States.

President Johnson, after consulting former Presidents Eisenhower and Truman in a bid for bipartisan support, agreed to renegotiate the 1903 treaty. Three draft treaties were agreed upon in 1967, but no action was taken toward ratification in either country due to their controversial nature.

The Panamanian government formally rejected the drafts in 1970 after Gen. Omar Torrijos took power in a bloodless coup with the canal as his major issue.

Talks resumed in 1971 but gained momentum only after the United States vetoed a U.N. Security Council resolution supporting Panama in 1973.

In 1974, Secretary of State Henry A. Kissinger signed a "statement of understanding" for the Nixon administration, agreeing to principles for a new treaty of limited duration.

President Ford continued the negotiations but, faced with a right-wing challenge in the Republican Party and a tough race last year for election, he did not push for an early conclusion.

During the presidential campaign Jimmy Carter took a cautious position, favoring a treaty but saying he would not give up "practical control" of the canal.

After the election, Carter called the issue a "festering problem" for the United States in Latin America and instructed his negotiators to push full speed ahead to a new arrangement by June, 1977, if possible.

PHILADELPHIA TO SPEND $1.5 MILLION BUILDING SEVEN SENIOR CITIZENS' FACILITIES

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. EILBERG. Mr. Speaker, the city of Philadelphia—the "City of Brotherly Love"—is also the city with an abiding concern for its senior citizens. These are the people whose hands helped build America, and Philadelphia is continuing its efforts to provide the good life for them in their retirement years.

Mayor Frank L. Rizzo has just announced that the department of recreation will construct seven senior citizens' facilities at its centers around the city, at a total cost of $1.5 million.

Contracts totaling $142,400 have already been awarded for the first of these centers at the East Germantown Recreation Center, Chelten Avenue and Ardleigh Street.

Other facilities exclusively for the goldenagers are slated for the Lower Mayfair plaground, Battersby and Robbins; Mann Recreation Center, 5th Street and Allegheny Avenue; Ziehler playground, B Street and Olney Avenue; Conshohocken and Windemere playground, King Recreation Center, 22d Street and Columbia Avenue and the playground at Bustleton and Solly Avenues. Contracts will be awarded in the future for these facilities.

"I have been concerned about the problems of our older citizens for a long time, and I am most gratified that we have been able to arrange for these facilities," Mayor Rizzo said.

The money for the construction originates from a special citizens section of the community development program.

The initial building at East Germantown will be a one-story brick structure containing a 1,000 square foot all-purpose room, a kitchenette, an arts and crafts room, a director's office and a utility room. All activities in the building will be designed for senior citizens.

Mayor Rizzo also announced that $100,000 in contracts has been awarded under the senior citizens' program for the construction of a new bocce facility at Vine and Daggett Streets.

The court will be built on the stricken Daggett Street which is adjacent to the Granahan playground (65th and Callowhill Streets) and Cobbs Creek Parkway. There is a large following of the sport of bocce in the area.

CHINA—CAPTIVE NATION

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. DERWINSKI. Mr. Speaker, Captive Nations Week is celebrated with special spirit in the Republic of China, as the citizens there are ever mindful of their counterparts on the Chinese mainland who suffer so horrendously under a dictatorial regime.

On July 22, in Taipei, a rally was held in observance of Captive Nations Week. One of the featured speakers was our own distinguished colleague, Congressman WILLIAM L. DICKINSON of Alabama. His was a most significant address which I wish to insert into the RECORD at this point, as I consider it a statesmanlike expression of the views on this subject held by a vast majority of Americans:

CAPTIVE NATIONS WEEK

(By William L. Dickinson)

President Yen (Chia-Kan), Mr. Chairman, distinguished guests, Ladies and Gentlemen: It is indeed a privilege for me to be here today representing the great majority of the American people who stand as firm friends of the free peoples and nations represented in the membership of the World Anti-Communist League. Yours is an organization of which true democratic peoples have great admiration. You are now in your tenth annual convention and the free world owes you for the valiant battle you have been waging on behalf of freedom during these past ten years and to the organization which preceded you, The Asian Peoples Anti-Communist League, which was founded in 1954.

This week marks the 18th anniversary of Captive Nations Week. In 1959, the U.S. Congress passed the Captive Nation's Week resolution which President Dwight D. Eisenhower signed into U.S. law. The historic resolution continues to focus American moral and political attention and concern on the world's captive nations and peoples who are under communist domination. We continue in our determination to assist in every peaceful way their eventual freedom and independence. This resolution is still in force. Its strength lies in the fact that despite the so-called era of détente, the majority of the free peoples of the world continue to maintain their concern about captive peoples. Today as we meet here well over a billion human beings live under these dreadful conditions.

Many in my country urge that we "coexist" and cooperate with tyranny, but I am not one of them. That great American, Abraham Lincoln, once observed that no nation can endure half-slave and half-free, that liberty and tyranny are incompatible. The same axiom can be applied to the world at large. Freedom and slavery are in perpetual conflict and, in the end, one or the other must triumph. The leaders of the Free World must recognize that there can be no peace with oppression. The only real choices are victory or surrender. For this reason. I am not interested in "detente" or "coexistence" with Communism. I am interested in victory over communism. Only through victory can genuine peace ever be achieved.

Your theme this year is: Anti-Communism for Freedom and Human Rights! Today we hear a lot being said about human rights in certain quarters. However, I don't believe enough is being said about the human rights of those peoples living under communist domination. Indeed, persecution and the denial of fundamental human rights continues unabated behind the iron and bamboo curtains. We see an intensified clampdown on dissenters in the Soviet Union and Eastern Europe.

Word continues to leak out about inhumane treatment and imprisonment of human beings who simply desire to do personal things like worship God—having nothing to do with politics. It is clear to me, in spite of pledges to the contrary made by the Soviet and Eastern European Communists, two years ago during the Conference on Security and Cooperation in Europe, no acual human rights improvements have been realized in that area of the world. All we have seen this year, as the same 35 nations convened again, are public-relations-type demonstrations and statements from behind the iron curtain about improved human rights, new constitutions and the like—but nothing of substance has been accomplished for real human rights.

Because we are honored this week to be the guest of the Chinese people, in the Republic of China, Free China, I would simply like to close my brief remarks by paying what I believe to be just tribute to the brave and tenacious people of the Republic. You are a bright, happy, creative people—ever improving the quality of life. You have been on the firing line for Freedom in Asia for over 50 years. While you grieve about your brothers and sisters on the mainland who exist without freedom, you have continued to shine brightly as a beacon of liberty—to provide them with hope that some day the entire great Chinese peoples will again live together in freedom.

I contrast what I see here with what I saw when I was in Communist China in April of last year. I was saddened by what I saw. They are a colorless, drab society, mirthless—without joy—regimented from birth. I was saddened when I heard a propagandized child say, "I was happy when I woke up this morning because last night I dreamed of Chairman Mao." An example of the yearning for Liberty by people on the mainland, was the occasion just two weeks ago of a pilot of the Chinese Communist Air Force miraculously escaping that Communist dictatorship. Why did he say he escaped? Because he could no longer live without freedom.

What did he escape to? What did he escape from? Although starting at a point of equal devastation with the Communists in 1949 the democratic Republic of China (ROC) has far outdistanced Communist China in every measurable field of comparable endeavor. We all know the Republic of China has enjoyed substantial growth and now has one of the highest standards of living in Asia. The per capita income in the Republic is approximately three times that of Communist China. This progress is a characteristic of freedom. You have a wonderful, thriving, progressive society.

Two hundred and one years ago the founders of my country declared that "All men are created equal." By this they meant that all men everywhere are equal in their natural yearning for liberty. It is in the very nature of man to be free. They believed, as I do, that some day every man on this planet will be free. Yet believing in this alone will not bring it about. Freedom is not free. Mankind must fight to win it and must always be prepared to fight to defend it. The founders of my country were tired of the yoke of tyranny and took it upon themselves to throw it off. These were men who were determined to change the course of their destinies and, against tremendous odds, would

settle for nothing less than total victory. If it could be done in America, then it can be done anywhere in the world. And I tell you—the majority of the American people stand with you in your hope that one day we will see freedom throughout all China.

In closing, I want to emphasize, that until all captive peoples and nations achieve their objectives of liberty we must not mute our concern, support, and solidarity with their unfulfilled aspirations. As free men and women, we must continue to work for the freedom for others that we have for ourselves. We cannot—indeed no free men or society can—rest until all men possess the same cherished existence. Thank you for allowing me to be a part of this wonderful activity.

SECOND LOOK AT SACCHARIN URGED BY CANADIAN PAPER

HON. SAMUEL L. DEVINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. DEVINE. Mr. Speaker, a controversial public health debate was precipitated in March of this year when Canadian Health Minister Marc Lalonde announced a ban on saccharin, based on animal tests purporting to show a potential risk of cancer. The U.S. Food and Drug Administration, acting upon the findings of the Canadian agency, subsequently announced a proposed ban on the artificial sweetener on March 9, 1977, thereby touching off a dispute within our borders which continues to split the scientific community and which has produced a shocked and angry reaction from many Americans, particularly diabetics and those with weight control problems. They believe that saccharin has been safely used by the public for more than 80 years and that, as the only noncaloric sweetener permitted on the U.S. market, saccharin has positive beneficial effects which outweigh any theoretical potential risk. As a result of this debate, legislation is now pending in the House—of which I am cosponsor—which would delay for 18 months any proposed ban by the FDA and which would permit further scientific review by the National Institutes of Health.

It is, therefore, quite significant that one of the leading newspapers of Canada, the Toronto Star, has recently urged the Canadian Health Minister to bring back saccharin and in an editorial dated September 1, has accused Canadian health officials of failing to "look before you leap" in their attempt to eliminate a "remote and theoretical" risk.

Mr. Speaker, when one of the leading newspapers of Canada calls for reversal of the saccharin decision, I believe that we in the United States have stronger reason to believe that the Canadian precedent is not one which we should blindly emulate. For that reason, together with my colleague, the Honorable DAVID E. SATTERFIELD, III of Virginia, we have scheduled a saccharin briefing for Members and their staffs, from 3 to 5 p.m., September 15, in room 2125, Rayburn House Office Building, at which a number of scientists who have been reviewing the Canadian test data as well as other studies can assist us in placing in perspective the public consequences of a U.S. saccharin ban. We will hear new scientific evidence on saccharin from Dr. Philip Cole, Harvard School of Public Health, who will review the Howe/Miller Canadian epidemiological study; a paper authored by Sir Richard Doll of Oxford University, England, will be provided; new American epidemiological information will be presented by Dr. Irving Kessler of Johns Hopkins University and R. Ernest Wynder, founder and president of the American Health Foundation, and Dr. Neal S. Bricker, director of Institute of Kidney Diseases of the University of Miami, will present new animal research data. I am sure my colleagues will find this briefing by prominent scientists both up-to-date and information:

OTTAWA SHOULD BRING BACK SACCHARIN

"Look before you leap" is a proverb which Health Minister Marc Lalonde should take to heart. His ban last March on the artificial sweetener, saccharin, on the ground that it was a possible cancer hazard, now threatens to create a new and much more serious health danger.

The banning of saccharin was not due to any medical evidence that the substance causes cancer in human beings: no human case of cancer has ever been traced to it. The decision was based on a laboratory experiment in which rats were fed enormous doses of saccharin, after which some of them developed bladder cancer.

The ban was sharply criticized at the time. Scientists pointed out that to get as much saccharin as was given the rats, a human being would have to drink 500 cans of diet pop a day. It was also noted that similar experiments conducted on monkeys—which are much closer to human beings in their anatomy and physiology than rats—showed no ill-effects from the use of saccharin.

But the federal health officials were adamant and imposed a staged ban to eliminate saccharin from food and drink by the end of the year.

This decree is having consequences which the Ottawa mandarins apparently did not foresee. Saccharin has been used largely in low-calorie foods and soft drinks for diabetics, weight-watchers and others on special diets with a minimum of sugar.

Now the replacement many manufacturers are looking at, fructose, is apparently similar to ordinary sugar in the way it affects diabetics and others with health problems. The danger is they could end up using low-calorie products without realizing that they are, in fact, getting more than their safe intake of sugar.

Health officials are now scurrying about trying to devise protective measures. It has apparently only just begun to dawn on them that they may have created a real and immediate health hazard in their efforts to eliminate what may be a remote and theoretical one.

Bring back the saccharin.

TO HONOR BERTHA MODRZYNSKI

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Ms. OAKAR. Mr. Speaker, I would like to call the attention of my colleagues to the accomplishments of one of my constituents, Mrs. Bertha Modrzynski, who has been recognized as an outstanding leader in the Polish community in Cleveland. She is being honored by the Polish Falcons of America, Saturday, September 10, for her many accomplishments.

She has received a number of awards from the Polish community and has been active in promoting growth and understanding of the Polish tradition in the Greater Cleveland area.

In addition to her activities in the Polish community, Mrs. Modrzynski has found time to serve as a member of the Cuyahoga County Democratic Central Committee, and as a member of the Federated Democratic Women of Ohio.

I want to congratulate Bertha Modrzynski, wife, mother, grandmother, community leader, political activist. She is living proof that a woman can have a place in the home and in the world, and be a success in both.

RATIFICATION OF THE PANAMA CANAL TREATY

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. STUMP. Mr. Speaker, with the signing of the Panama Canal Treaty, it is now the duty of the Senate to ratify it. However, separate questions should be addressed by the House in the treaty's ratification process—that of disposing of the U.S. property and expenditures of public money. For the following reasons, I have cosponsored a House resolution which would allow the House of Representatives to represent the views of our constituents by voting yes or no on the ratification of the treaty. The 1903 Haybunau-Barilla treaty provides:

> The Republic of Panama grants to the United States all the rights, power and authority with the zone * * * which the United States would possess and exercise if it were the sovereign of the territory * * * to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority.

In 1906, the U.S. Supreme Court found that as a result of the treaty the Canal Zone was U.S. territory. The U.S. Constitution specifically states that Congress has the power to dispose of all property belonging to the United States.

The Constitution also gives Congress authority over expenditure of public money. Huge amounts of money are involved in this treaty deal, but the administration is also attempting to carry out the financial end through back door loans and grants to Panama without the consent of the House.

One question is whether the $600 million Panama Canal Operations Fund currently on deposit with the U.S. Treasury goes to Panama as part of the financial package over which Congress is being denied its constitutional voice. This country has an investment of $6.15 billion in the Panama Canal. Payments to Panama to take the canal are $1.89 billion. If Panama wants the canal, they should be buying it from the United States and not being paid to take it.

Not all of the questions are financial. Even now, Alaskan oil which is needed desperately all over the country is being transported through the Panama Canal. The security of that oil is vital to the future of this country. The question of oil alone shows the potential effect of the canal on national security.

Before the American people allow the canal to be given away, they want to know that the Government of Panama is stable and responsible enough to run the canal. Without the stability, rights under the proposed treaty would be meaningless.

Those who are trying blackmail to obtain acceptance of this treaty by threats of guerrilla war have chosen the worst possible way to persuade Congress and the American public. If the treaty cannot stand on its own merit, we must stand up for our rights or this country will have no international credibility.

Until these and many other questions are answered I shall oppose the treaty and fight for a vote in the House of Representatives.

BOUNDARY WATERS CANOE AREA

HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. BLOUIN. Mr. Speaker, I would like to present my testimony concerning the Boundary Waters Canoe Area proposals given August 4, 1977 before the House Subcommittee on National Parks and Insular Affairs:

Mr. Chairman, and members of the subcommittee—let me say first of all that I appreciate the opportunity to testify before this subcommittee this morning and I am honored to follow in the footsteps of my distinguished colleagues, Mr. Fraser, Mr. Vento and Mr. Oberstar, all of whom have illustrated a concern and an interest in the preservation of natural resources which I think is exceptional and commendable. I, for one, appreciate their concern and their leadership and I want to state that for the record.

Mr. Chairman, I am particularly grateful for the opportunity to discuss briefly with the subcommittee the preservation and conservation of one of the nation's precious natural resources: The Boundary Waters Canoe Area.

Over 60 years ago, President Theodore Roosevelt—writing in an issue of Outlook magazine—drew a parallel which is no less dramatic . . . and certainly no less correct . . . today than it was then, in 1913. "The civilized people of today," he wrote, "look back with horror at their medieval ancestors who wantonly destroyed great works of art . . . or sat slothfully by, while they were destroyed. We regard attic temples and roman triumphal arches and gothic cathedrals as of priceless value . . . but we are, as a whole, still in that low state of civilization where we do not understand that it is also vandalism to wantonly destroy or to permit the destruction of what is beautiful in nature—

Whether it be a cliff, a forest or a species of mammal or bird."

Today, some 63 years later . . . and thanks in no small measure to people like Teddy Roosevelt and those who followed in his footsteps . . . we have made some obvious progress in terms of environmental programs—and in terms, too, of the public awareness of the value and the necessity for such programs.

President Carter, in his environmental message to Congress last May, recognized the overwhelming importance of a meaningful environmental protection and conservation program. "Americans long thought that nature could take care of itself," the President said, "or that, if it did not, the consequences were someone else's problem. As we know now, that assumption was wrong."

In a section on wilderness areas and wildlife, the President wrote: "In its land and its history, a nation finds the things which give it continuity. By preserving places that have special natural value, we can ensure that our children and grandchildren have a chance to know something of the America that we and our ancestors simply took for granted."

I know the subcommittee is familiar with the boundary waters issue. It represents perhaps a classic confrontation between conservationists and commercial interests, it poses questions which reach far beyond the immediate issue—

Questions which speak to some very basic decisions about this nation's commitment to wildlife and wilderness preservation.

We're talking about over one million acres—some of it marred by man-made scars, but much of it as pristine and virgin as it was a thousand years ago . . . a place of incredible beauty, natural variety and ecological stability . . . wilderness one-third larger than the combined total of wilderness areas this side of the Rockies.

We're talking about an area where the pine trees are over three centuries old . . . where the rugged terrain and jutting cliffs have been left virtually unchanged since the glaciers melted some 14,000 years ago . . . an area dotted by some 1,000 lakes and 1,200 miles of canoe routes . . . the nation's largest and relatively complete example of a northern conifer forest—a place which has been called, and accurately, a living biological laboratory.

I think those of us who have had the experience of being out alone on a river early in the morning, when the sun is just starting to peek over the tree tops. . . or have been camping with just a few other people in a secluded woods or on a quiet river island appreciate what we're talking about . . . that kind of undescribable communion with nature which man feels when he's left alone in the wilderness. It's that kind of experience . . . that kind of opportunity . . . that we want to preserve . . . that we should be anxious to protect.

As you are well aware, the legislation introduced by Congressman Fraser in 1976 and again this year would preserve the entire boundary waters area. It totally outlaws lodging, motorized carriers or mining within the area.

I want you to know that I strongly endorse Mr. Fraser's approach and I urge the subcommittee to approve the Fraser bill. I think it represents nothing less than the least we can do to insure the preservation and survival of a unique natural resource—one which belongs not so much to the commercial interests which border the area, but to the American people. It is truly a national asset as well as a natural resource.

The subcommittee has on file petitions signed by over 10,000 Iowans urging its support for the Fraser bill. That, I think, dramatizes how strongly my fellow Iowans feel about preserving the boundary waters area.

Naturally, we have something of a vested interest in the area . . . Last year, over 6,500 Iowans registered as visitors to the boundary waters wilderness, a number second only to visitors from Wisconsin and Illinois among the estimated 83,000 out-of-State residents who visited the boundary waters area in 1976. That figure is hardly surprising when you realize that the closest wilderness area for most Iowans, besides the boundary waters, lies as far east as the Appalachians and as far west as the Rockies—and none can match the size, variety or sheer beauty of the boundary waters area.

But at the same time I am constantly impressed with the number of people who are absolutely committed to the preservation of the boundary waters area, even though there is very little likelihood that they will ever have an opportunity to visit the area in person. They recognize it for the natural resource it really is. They are people who believe that we simply cannot compromise on preserving the nation's largest eastern wilderness area and our only lakeland wilderness.

I am reminded of something I read recently in a booklet published by an organization called friends of the boundary waters wilderness. The very closing paragraph, I think, summarized the issue well when it said: "There will always be those who would turn the last stands of virgin timber in the boundary waters into magazines and waste paper . . . who would trade its cold, clear waters for cold, clean cash. There will never be a law so perfect and immutable that the boundary waters can be considered "saved" forever. But good protective laws and informed citizens can do the job."

The Fraser bill is that kind of law. We need that kind of law, and I am hopeful that this subcommittee in its wisdom will see fit to pass favorably on legislation that includes the major provisions of Mr. Fraser's bill.

NO BONDED DEBT FOR YOLO—THANKS ERV MEIER

HON. ROBERT L. LEGGETT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. LEGGETT. Mr. Speaker, one of the lessons we all learned early in our careers in Congress is that no Federal program, however well designed and funded, will be effective unless a talented and committed administrator makes the program work on a daily basis. The same is true for our local units of government.

For the past 16 years, the citizens of Yolo County have benefited from competent administration of their county government under the leadership of county executive Ervin Meier. Erv was selected in 1961 as Yolo County's first county executive and has served admirably in that post ever since. He will retire on September 15 and it is appropriate that we pause for a few moments to salute Erv Meier's long record of outstanding public service.

Erv Meier is a man with an extensive record of accomplishments dating back to service with the War Labor Board. Later, as a private consultant, Erv helped reorganize government programs in the city of Los Angeles, the State of Washington, and the Republic of El Salvador, among others. He made a number of significant contributions in the State of California as the administrator of the Weimar Medical Center, and as executive secretary of the Joint Transportation

Committee of the California State Legislature. In each of these positions he demonstrated a tenacity and understanding of the subject matter that impressed his professional colleagues.

Erv's tenure as county executive in Yolo County has been equally productive. A new jail was constructed. The county courthouse was remodeled and facilities for the Public Works Department and almost all other government agencies were expanded, and in a reasonable and orderly fashion. Erv is particularly proud of the expansion of the county library system so that the several small towns in Yolo County now enjoy modern library programs.

During Erv Meier's administration, he has seen the county of Yolo grow from a population of 60,000 to 110,000. The staff of the county government has grown from 600 to 1,300 and again in a reasonable and orderly manner.

During Erv's tenure, Yolo County made the transition from a rural county to a county with many suburban communities. The expansion and improvement of government services to keep pace with this growth made many demands on Erv's imagination and administrative talents. With typical attention to detail, Erv and the board of supervisors accomplished this expansion on a pay-as-you go basis and as Erv leaves his post, the county has no bonded indebtedness whatsoever. Additionally, the county has a healthy contingency fund. Erv's successor is in an enviable position inheriting such a program. In light of the well publicized difficulties faced by many local governments, Erv Meier's fiscal achievements are particularly noteworthy.

Erv always made it a point to do his job and stay out of the politics that often engulf administrators in our local governments. Maybe this is one of the secrets of his success. He left the politics to the politicians and quietly and competently went about the business of administering the county government.

Erv Meier has achieved these accomplishments by hard work and long hours. Indeed, the members of the board of supervisors have often complained that he did not take enough vacation time. I might say, this was the only major complaint lodged by the supervisors during Erv's many years as county executive. Some complaint.

Erv is still a young man in his early sixties and has much more to contribute. He has indicated that he will continue as executive secretary of the 14 county Sacramento-Mother Lode Regional Association of County Supervisors and will do consultant work once again. He and his wife, Carol, are planning to take a trip to Europe. It is high time, in my opinion, that Erv finally takes a well-deserved vacation.

It has been a personal pleasure to work with Erv. I and the many friends he has made over the years wish him well in the years ahead and thank him for his outstanding contributions to county government in California.

"GIVEAWAY" OF THE PANAMA CANAL

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. CARTER. Mr. Speaker, during the August recess, I had county meetings throughout my district in Kentucky. I listened to hundreds of my constituents voice their viewpoints and concerns. One frequently mentioned concern was the proposed "giveaway" of the Panama Canal. And let me say that a "giveaway" is exactly how the fine people I represent describe the proposed treaty. The people with whom I met rightly believe that the Panama Canal belongs to the United States in perpetuity, every lock, stock, and barrel of it.

Do the people want to give the canal away? Let me just say that the following letter to the editor of the Richmond Daily Register by Mr. Robert E. Lanter of Richmond, Ky., exemplifies what many people in the United States and in my congressional district are saying about the canal treaty. It is a shame that this administration has not been listening to the people or else we might not now have the treaty.

The letter follows:

RICHMOND, KY.,
August 16, 1977.

The EDITOR,
Richmond Daily Register,
Richmond, Ky.

DEAR SIR: We Americans are being taken for a bunch of fools. O.K., so you've heard that old song before, but does it ever shock or alarm you? It should. Sad to say, most people couldn't care less. But let me explain.

As we all know, it is against the law of the land to give or sell secrets or anything which is vital to the security of America, especially to those who are openly hostile to our way of life and way of government. And don't ever let yourself be led to believe for a moment that there are not those in the great scheme of world politics who are not working night and day to bury U.S. As a matter of fact, they are right on schedule in their program.

But back to the subject at hand. It concerns the pack of lies the American people are being fed concerning our ownership of the Panama Canal. The treaty drawn up between Panama and the United States in 1904 is as clear as any document can be. The treaty plainly states the ten-mile wide canal zone and the canal itself are to be United States property "in perpetuity" or as the dictionary defines it, "lasting for eternity." Any fool knows that doesn't mean the year 2000.

Now there was no great clamor for us to give up the Canal until the present, unelected, viciously criminal, Communist dictator, Omar Torrijos, overthrew the former government in a military coup about ten years ago. Torrijos is not only a Communist, he has time and time again shown his utter contempt for the United States in his remarks about us. We owe him less than nothing. There is no reason we should even deal with him. For the most part, the people of Panama realize the great advantage of the United States presence in the "Zone" and they let that fact be known.

I mentioned the Communist program earlier. Latin America is very much a part of that program. This program as set forth well over fifty years ago was summarized and paraphrased into the following famous outline: "First, we will take Eastern Europe. Next, the masses of Asia. Then we shall encircle the last bastion of capitalism, the United States of America. We shall not have to attack; it will fall like overripe fruit into our hands." Who said this? That's right. Lenin wrote it over fifty years ago.

Now our man in the White House is making it come true.

As I said earlier, giving or selling things which are vital to our security is against the law. They call it treason.

Are we really stupid enough to fall into such a trap? I would hope not.

ROBERT E. LANTER.

THE CLINCH RIVER BREEDER REACTOR: A POOR INVESTMENT FOR JOBS

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 8, 1977

Mr. DOWNEY. Mr. Speaker, opponents of President Carter's decision to forgo construction of the Clinch River breeder reactor demonstration facility—CRBR—have argued that President Carter's decision is antiemployment. This memorandum answers this argument.

The proponents of the Clinch River breeder reactor state that the CRBR is a jobs issue in two senses. First, it is contended that the CRBR is necessary to meet our energy needs. If there is not enough energy there will be unemployment because energy is necessary to run an industrial economy. Second, it is contended that the construction of the breeder and its support facilities will, itself, create jobs.

THE CLINCH RIVER BREEDER REACTOR IS NOT NEEDED

On numerous occasions, the Secretary of Energy and the Council of Economic Advisors have stated that the Clinch River breeder facility simply will not be needed. They have shown that the fuel needs of nuclear reactors can be supplied with domestic uranium. This position is supported by data collected by the Nuclear Regulatory Commission, as well as the uranium experts of the Energy Research and Development Administration. Independent assessments by such organizations as the Ford Foundation and by a study sponsored by the conservative American Enterprise Institute also support this conclusion. In sum, without building the Clinch River breeder reactor, the United States will be able to fuel its nuclear reactors. To the extent to which atomic reactors are necessary for a functioning economy, they will be supplied with fuel.

MILLIONS OF OTHER NUCLEAR RELATED JOBS WILL BE CREATED

Second, it is argued that the Clinch River breeder reactor should be built because the project itself creates jobs. Just about any Federal expenditure creates employment directly or indirectly. How-

ever, the charge that the Carter administration is antijobs because it is canceling the construction of the Clinch River breeder reactor must be placed in perspective. The Carter administration supports the construction of about 300 more nuclear powerplants in this country between now and the end of this century. In contrast to the approximately 4,000 man years of employment produced this last year by the Clinch River breeder reactor project, the construction and operation of these 300 powerplants and their fuel cycle facilities for the plants' lifetimes will create over 6,500,000 man years of employment in nuclear-related job categories.

Overall manpower requirements for 300 powerplants' man years

Activity:	*Nuclear*
Construction of 300 nuclear powerplants	1,588,500
Construction of fuel cycle support facilities	81,000
Annual operation and maintenance	30,000
Annual operation of fuel cycle	124,200
Total annual requirements	163,200
Total operation and maintenance requirement for 20 years for 300 nuclear powerplants	4,896,000
Total manpower for construction and 30-year operation (typical, assumed plant lifetime)	6,565,500

(The information on labor requirements has been collected from reports of the Atomic Energy Commission, the Project Independence Reports and trade association sources.)

CLINCH RIVER BREEDER REACTOR: A POOR INVESTMENT FOR JOBS

Not only are the number of jobs in the CRBR project relatively few in comparison to the much larger scale of employment in nuclear-related industries contemplated by the administration's nuclear policies, but building the Clinch River breeder reactor itself is an economically wasteful method of creating jobs.

If the Clinch River breeder reactor is not built, the funds will either be spent as normal Federal expenditures or will be spent in the private sector. In either case, about twice as much employment will be created by either of these alternative expenditures.

For instance, ERDA has estimated that the $196 million fiscal year 1977 budget would have produced 4,367 direct jobs. Normally, such an expenditure of Federal funds produces 50 percent additional indirect employment. Thus, the CRBR expenditures for 1977 have produced approximately 6,500 jobs. Each of these jobs, then, would cost about $29,923 to create, by building the Clinch River breeder reactor. In contrast, according to the Bureau of Labor Statistics, $11,104 in average Federal expenditures creates a job. In sum, spending the money on the Clinch River breeder reactor will actually cause unemployment. Spending the money through the Federal Treasury or returning it to the private economy will create more employment.

For more information, contact James M. Cubie, legislative representative, New Directions, 2021 L Street NW., Washington, D.C. 20036, phone No. (202) 452-1050.

HOUSE OF REPRESENTATIVES—*Friday, September 9, 1977*

The House met at 10 o'clock a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Be of good courage and He shall strengthen your heart, all you that trust in the Lord.—Psalms 31: 24.

O God of life and love, breathe Thy Spirit upon us as we pray, and help us to realize anew our constant need of Thy strength, Thy wisdom, and Thy peace. Give us to know that Thou art with us and that with Thee we are made equal to every experience and ready for every responsibility.

We pray for peace in our world, for good will among our people, for justice in our land, and for a faith which makes us strong, gives us courage, and spurs us on the upward way to life, liberty, and the pursuit of happiness for all.

Into this day may we go strong in Thee and in the power of Thy might. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1307. An act to require case-by-case review under uniform, historically consistent, generally applicable standards and procedures prior to the award of veterans' benefits to persons administratively discharged under other than honorable conditions from active military, naval, or air service, and for other purposes; and

S. 1560. An act to restore the Confederated Tribes of Siletz Indians of Oregon as a federally recognized sovereign Indian tribe, to restore to the Confederated Tribes of Siletz Indians of Oregon and its members those Federal services and benefits furnished to federally recognized American Indian tribes and their members, and for other purposes.

APPOINTMENT OF CONFEREES ON H.R. 7555, LABOR, HEALTH, EDUCATION, AND WELFARE APPROPRIATION ACT, 1978

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7555) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes, with the Senate amendment remaining in disagreement, insist on the House amendment to the Senate amendment numbered 82, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, and I do so only to receive once again the assurance, which I am sure the gentleman from Pennsylvania (Mr. FLOOD) can render to us, that if, in fact, we do now go back to conference without a motion to instruct being offered to the House conferees, that the House conferees will continue to insist upon the language of the so-called Hyde-Conte amendment dealing with abortion funding?

Mr. FLOOD. If the gentleman will yield, Mr. Speaker, as usual the gentleman from Maryland (Mr. BAUMAN) has stated the case and the answer is yes.

Mr. BAUMAN. The gentleman, of course, knows full well that the House has voted twice on this issue by substantial margins and therefore I do not think it would be necessary at this point to reaffirm that stand by a motion to instruct the conferees.

Mr. FLOOD. That is correct.

I might add that it so happens that what was the Hyde-Conte amendment, because of a procedural matter, had to be reintroduced through my amendment, but it is the same.

Mr. BAUMAN. Forgive me, I should have said the Flood amendment, in honor of my distinguished colleague from Pennsylvania.

I thank the gentleman for his assurances.

Mr. FLOOD. I did so just out of an abundance of caution.

Mr. BAUMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none, and appoints the following conferees: Messrs. FLOOD, NATCHER, SMITH of Iowa, PATTEN, OBEY, ROYBAL, STOKES, EARLY, MAHON, MICHEL, CONTE, O'BRIEN, and CEDERBERG.

THE SALE OF F-15 SUPERSONIC FIGHTERS

(Mr. DODD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DODD. Mr. Speaker, I was disturbed to learn last week that the Defense Department has recommended the sale of 60 F-15 supersonic fighters to Saudi Arabia. This proposed sale is objectionable in so many respects that I am hard put to understand why it is receiving serious consideration.

Sale of our most advanced attack fighter to Saudi Arabia would drastically alter the regional military balance in

the Middle East by placing Israel within the range of Saudi fighters. This would both increase the likelihood for a renewal of hostilities and increase the security problems facing Israel. Inevitably, Israel would be required to spend more of its scarce resources to meet this new threat, and we would find ourselves once again in the position of fueling both sides of an arms race.

In addition, this sale is totally unnecessary from the standpoint of Saudi Arabia's legitimate defense needs. The 90 F–5's ordered by Saudi Arabia—combined with Saudi Arabia's extensive network of Hawk antiaircraft missiles—will be more than sufficient to meet the potential threat from Iraq's Mig 23's. Any additional sale of fighter aircraft at this time is totally unnecessary.

Finally, this sale would violate President Carter's policy of limiting the transfer of high technology military systems while it would continue the very questionable policy of increasing the overall flow of American weapons abroad. This weapons proliferation problem extends beyond the narrow confines of the military balance in one region. It goes to the whole question of American relations with the world. I agree with the President that the United States should have a much more selective and discriminating arms sales policy. This policy must be inaugurated at the earliest possible date.

Bearing these factors in mind, I am today writing to the Secretary of Defense requesting a full explanation for the Department's recommendation of this sale. I will also be writing to express my concern to the President, and will ask other concerned Members to join me in that letter. I am hopeful that after consideration of all of these factors, the President will decide not to recommend this sale to Congress.

NEW YORK TIMES, MEET PRESIDENT CARTER

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, it would be useful if supporters of the treaty would clarify precisely what the canal means in terms of our national security. President Carter has said:

> I consider the canal, now and in the future, to be very important for the security and defense and strength of our country.

Yet the New York Times, which supports the treaty, stated editorially, the morning after the treaty was signed:

> Since the canal is no longer vital either to United States security or commerce, the very slight risks involved in transferring control are well worth taking.

Treaty supporters cannot have it both ways.

PROVIDING FOR CONSIDERATION OF H.R. 6566, ERDA AUTHORIZATIONS FOR NATIONAL SECURITY PROGRAMS

Mr. YOUNG of Texas. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 640 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 640

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6566) to authorize appropriations for the use of the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one and one-half hours, one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, and one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Armed Services now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and said substitute shall be read for amendment by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The Chair recognizes the gentleman from Texas (Mr. YOUNG) for 1 hour.

Mr. YOUNG of Texas. Mr. Speaker, I yield 30 minutes to the distinguished minority member, the gentleman from Illinois (Mr. ANDERSON), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 640) is the rule providing for the consideration of the bill (H.R. 6566) to authorize appropriations for the use of the Energy Research and Development Administration for fiscal year 1978 for national security programs.

It is a 1½-hour open rule, 1 hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services and one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology. The bill shall be read for amendment under the 5-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Armed Services now printed in the bill as an original bill for the purpose of amendment under the 5-minute rule and this substitute shall be read for amendment by titles rather than by sections.

I am aware of no opposition to this rule.

Mr. Speaker, this bill would authorize appropriations for the use of the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974 for operating expense and for plant and capital equipment for national security programs. This national security program of ERDA consists of the functions and responsibilities once vested in the Atomic Energy Commission and deals with 31 percent of ERDA's fiscal year 1978 budget request of $2.663 billion out of a total budget for this agency of $8.526 billion.

The bill was sequentially referred to the Committee on Science and Technology so that this committee might consider those portions of the bill relating to nonmilitary nuclear energy research and development which fall within its jurisdiction. The two programs specifically under this committee's jurisdiction are those for civilian applications of laser fusion and the naval reactor program. This jurisdiction also comes to Science and Technology from the former Joint Committee on Atomic Energy. The action taken by the Science and Technology Committee was twofold: First, laser fusion was increased by $9.2 million and a proviso was added to the bill to insure civilian applications for moneys to support the program. Second, the authorization language for the naval reactor program was deleted from the bill since the committee had already included authorization of the program in its ERDA authorization bill, H.R. 6796.

Mr. Speaker, this bill is part of an important package of legislation dealing with the Energy Research and Development Administration and should be promptly passed. Accordingly, I urge adoption of the rule to permit consideration of the bill.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 640 is a simple, 1½-hour open rule making in order the consideration of H.R. 6566, the fiscal 1978 national security ERDA authorization. One hour of general debate time would be divided between the chairman and ranking minority member of the Armed Services Committee, and a half-hour would be similarly divided between the chairman and ranking minority member of the Science Committee. The rule further provides that the Armed Services Committee substitute printed in the bill be considered as an original bill for the purpose of amendment and that the substitute be read for amendment by titles rather than by sections. Finally, a motion to recommit is in order, with or without instructions.

Mr. Speaker, H.R. 6566 authorizes $2.6 billion for the national security program of ERDA which includes control of restricted data, nuclear weapon design, development and production, naval propulsion reactor development, military space nuclear systems, and military power reactors, and production of special nuclear material, such as plutonium, tritium, and highly enriched uranium. Approximately two-thirds of the authorization is for operating expenses and a third for plan and capital equipment. Under the operating expenses, the largest item is

$1.2 billion for weapons activities, followed by $416.4 million for special materials production, and $211.7 million for naval reactor development. The Science Committee has recommended amendments to strike all authorization for naval reactors since these are already provided for in the other ERDA authorization, to reduce funds in program management and support related to naval reactors by $4.5 million, and to increase laser fusion funding by $9.2 million with at least 60 percent allocated for civilian application.

Mr. Speaker, this bill was reported from the Armed Services Committee on May 5 by a vote of 23 to 0, and from the Science Committee on May 12 by voice vote. Likewise, the rule was reported from the Rules Committee on June 16 by voice vote. I know of no opposition to the rule and urge its adoption.

Mr. YOUNG of Texas. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SEBELIUS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 348, nays 0, answered "present" 1, not voting 85, as follows:

The Clerk announced the following pairs:

Mr. Ashley with Mr. Aspin.
Mr. Fountain with Mr. Biaggi.
Mr. Brooks with Mr. Corman.
Mr. Rostenkowski with Mr. Dent.
Mr. Addabbo with Mr. Ford of Michigan.
Mr. John L. Burton with Mr. Moss.
Mr. Howard with Mr. Young of Missouri.
Mr. Charles Wilson of Texas with Mr. Broyhill.
Mr. Pepper with Mr. Cederberg.
Mr. Chappell with Mr. Horton.
Mr. Rosenthal with Mr. Pritchard.
Mr. Leggett with Mr. Quie.
Mr. Harrington with Mr. Cochran of Mississippi.
Mr. Fascell with Mr. Cohen.
Mr. Koch with Mr. Symms.
Mr. Delaney with Mr. Stangeland.
Mr. Roe with Mr. Skubitz.
Mr. Wirth with Mr. Winn.
Mr. Badillo with Mr. Young of Alaska.
Mr. Patterson of California with Mr. Finley.
Mr. Richmond with Mr. Dickinson.
Mr. Ambro with Mr. Dornan.
Mrs. Boggs with Mr. Lent.
Mr. Conyers with Mr. Early.
Mr. Krueger with Mr. Quillen.
Mr. Murphy of New York with Mr. Sarasin.
Mr. Roncalio with Mr. Wydler.
Mr. Sisk with Mr. Bonker.
Mr. Vanik with Mr. Cotter.
Mrs. Chisholm with Mr. Lehman.
Mr. Rangel with Ms. Mikulski.
Mr. Roybal with Mr. Dicks.
Mr. Zeferetti with Mr. Johnson of California.
Mr. Diggs with Mr. Carr.
Mr. Clay with Mr. Moffett.
Mr. Gammage with Mr. Traxler.
Mr. Giaimo with Mr. Kemp.
Mr. Bob Wilson with Mr. Solarz.
Mr. Meeds with Mr. Walker.
Mr. McKinney with Mr. Hall.
Mr. Fithian with Mr. Marlenee.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 6796, ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION AUTHORIZATION FOR NONNUCLEAR PROGRAMS, 1978

Mr. YOUNG of Texas. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 657 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 657

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6796) to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed three hours, two hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, one-half hour to be equally

divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, and one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in italic in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be read for amendment by titles instead of by sections, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI, clause 5, rule XXI, and section 401 of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. It shall be in order to consider en bloc the amendments recommended by the Committee on Armed Services to title I of said substitute. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. KILDEE). The gentleman from Texas (Mr. YOUNG) is recognized for 1 hour.

Mr. YOUNG of Texas. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Illinois (Mr. ANDERSON), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for the consideration of H.R. 6796, a bill authorizing appropriations for the Energy Research and Development Administration for fiscal year 1978.

The resolution provides for a total of 3 hours of general debate with the Committee on Science and Technology controlling 2 hours and the Committee on Armed Services and the Committee on International Relations each controlling one-half hour. The rule further provides that the committee amendment in the nature of a substitute shall be considered as the original bill for purposes of amendment. Provision is also made for the bill to be read by titles instead of by sections.

In addition the rule grants three waivers of possible points of order. Those waivers are to clause 7 of rule XVI which is the germaneness rule; clause 5 of rule XXI which is the rule that prohibits appropriations in a legislative measure; and section 401 of the Congressional Budget Act.

Lastly, the rule provides for a motion to recommit with or without instructions.

H.R. 6796 would authorize appropriations to ERDA for fiscal year 1978 in the amount of $6.7 billion. The funds authorized under the bill would go to programs in fossil fuel development, solar energy development, geothermal energy development, conservation research and development, nuclear research and development, and environmental research and development.

A total of three legislative committees were involved in the development of this legislation. There are in fact some differences between the committees in certain areas of the legislation. The rule, however, provides each of the committees with an opportunity to present their position and to have the matter decided by the whole House.

Therefore, Mr. Speaker, I urge the adoption of House Resolution 657 so that we might debate and vote on H.R. 6796.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 657 would make in order the consideration of H.R. 6796, the civilian research and development authorization for the Energy Research and Development Administration. The rule calls for 3 hours of general debate, with 2 of those hours allocated to the Science Committee, and one-half hour each to the Armed Services and International Relations Committees. As always, the time will be equally divided and controlled by the chairmen and ranking minority members on those committees. The rule further provides that the Science Committee's substitute, now printed in italic in the bill, be considered as an original bill for the purpose of amendment, and that the bill be read by titles instead of sections for the purpose of amendment under the 5-minute rule. Moreover, the rule would permit the Armed Services Committee's amendments to title I of the substitute to be considered en bloc. I would want to stress at this point that this is a completely open rule as far as the offering of germane amendments is concerned.

Mr. Speaker, Members will notice that on page 2 of the rule, beginning at line 14, there are three waivers of points of order against the Science Committee substitute. The first would waive clause 7 of rule 16, which, as you know, is the germaneness rule. The waiver is necessary because the substitute is broader in scope than the original bill which it amends. Whereas the original bill had only two titles, the substitute has six titles, and titles 3, 4, 5, and 6 contain new provisions which were not contained in the original bill.

The second waiver is of clause 5 of rule 21 which prohibits appropriations on an authorization bill. I am informed that there are three separate provisions in the substitute which are in technical violation of that rule. The first provision is on page 36 of the bill, beginning on line 8 which is designated as subsection (c)(1). That provision would permit up to 1 percent of all funds appropriated pursuant to any annual authorization act for "operating expenses" to be used by the Administrator for construction, expansion, or modification of laboratories or other facilities, including the acquisition of land, at any location under the control of the Administrator, if the Administrator determines that such action is necessary due to either changes in the national programs funded by the act or new scientific or engineering developments, and if he determines that deferral of such action would be inconsistent with the policies established by the Congress for the administration.

The second provision in the bill requiring a waiver of clause 5, rule 21, is on page 41 of the bill, beginning at line 15 and designated as section 203. That provision permits the use of funds appropriated for magnetohydrodynamics under the ERDA Act or any other law, for or in connection with facilities at such sites as may be selected by the Administrator, with the exception of the component development and integration facility which is currently under construction.

The third provision in the bill requiring a waiver of clause 5, rule 21, is on page 116 of the bill, beginning at line 15 and designated as subparagraph 3. That provision states that, in the event of any default by the borrower in the payment of taxes guaranteed by the Administrator on a project under the geothermal loan guaranty program, the Administrator shall pay those taxes from the Geothermal Resources Development Fund, and shall have by reason of such payment a claim against the borrower for all sums paid plus interest.

Mr. Speaker, the third and final waiver in this rule is against section 401 of the Budget Act which is designed to prohibit so-called backdoor spending in the form of either contract or borrowing authority or entitlement authority. Section 206(b) of the bill, on page 45, beginning at line 18, would give the ERDA Administrator authority to enter into a contract with any governmental or other entity to which payments are required or authorized to be made in connection with the transfer of municipal installations to those entities. Since section 401(a) of the Budget Act prohibits consideration of any measure containing new contract authority unless it is subject to amounts provided in advance in appropriations acts, this provision would clearly be in violation of that provision. The Rules Committee has received a letter from the Budget Committee chairman (Mr. GIAIMO), dated June 21, 1977, in which he indicated that because Chairman FLOWERS will offer an amendment to bring this provision into conformity with the Budget Act, he would not object to a waiver in the rule. In other words, it is necessary to waive the Budget Act on this provision so we can proceed to consider the bill; but the violation will be remedied by an amendment.

This is also the case with respect to section 206(a)(1) of the bill on page 43, beginning at line 13. That provision is a 10-year entitlement program of annual assistance payments to these governmental and other entities to which municipal installations are transferred. Section 401(b)(1) of the Budget Act prohibits the consideration of any measure containing a new entitlement which would become effective before the first day of the fiscal year that begins in the calendar year in which the bill is reported. Since it is conceivable that this bill will be signed into law before October 1, 1977, and section 206(a)(1) would become effective immediately upon enactment, it would be in violation of the Budget Act's entitlement requirements. Here again Mr. GIAIMO has indicated that Chairman FLOWERS will offer an amendment to bring the provision into conformity with the Budget Act, but we need the waiver now so we can pro-

ceed to consider the bill and the correcting amendment which will be offered. So, I would emphasize, in the two instances in which this bill does violate the Budget Act, amendments will be offered to correct those violations.

Mr. Speaker, I think I have explained, to the best of my ability the waivers contained in this rule. The rest of the rule follows the regular procedure including the right to demand separate votes in the House on any amendments adopted in the Committee of the Whole, and the right to offer a motion to recommit, with or without instructions. The bill the rule would make in order is a very complex and important piece of energy legislation which authorizes some $5.9 billion in fiscal 1978 for the various civilian energy programs of ERDA. I urge adoption of the rule so we can proceed to consider this very vital legislation.

Mr. YOUNG of Texas. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 338, nays 14, not voting 82, as follows:

Mr. SEIBERLING changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 2176, FEDERAL BANKING AGENCY AUDIT ACT

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 728 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 728

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2176) to amend the Accounting and Auditing Act of 1950 to provide for the audit, by the Comptroller General, of the Federal Reserve Board, the Federal Reserve banks and their branches and check clearing, wire transfer, and security facilities, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment

in the nature of a substitute recommended by the Committee on Government Operations now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, the House resolution provides for the consideration of H.R. 2176, the Federal Banking Agency Audit Act, as amended. This legislation authorizes the Comptroller General to conduct independent audits of the Federal Reserve System, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

House Resolution 728 provides for a 1-hour, open rule waiving a point-of-order which would otherwise prevent consideration of the bill, as introduced, because it could be interpreted as authorizing appropriations during fiscal year 1977. Section 402(a) of the Congressional Budget Act prohibits consideration of legislation which authorizes funds if legislation is not reported by May 15 preceding the beginning of that fiscal year. The committee substitute, however, has eliminated that problem, and Chairman GIAIMO of the Budget Committee has indicated to the Rules Committee that he has no objection to the waiver.

House Resolution 728 also provides a waiver of rule XVI, clause 7 (germane amendments), which is needed since the committee substitute amends title 18 of the United States Code. It is not a substantive amendment, but technically section 3 of the substitute amends a title of the code that was not amended by the original bill and, therefore, requires a waiver.

The resolution provides a fair procedure for consideration of this legislation and I urge adoption of the rule. I reserve the balance of my time, and I yield to the gentleman from Mississippi.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution provides for a 1-hour, open rule to consider H.R. 2176. The Federal Banking Agency Audit Act. Section 402(a) of the Congressional Budget Act, which prohibits consideration of legislation authorizing new budget authority reported after May 15 preceding the beginning of the fiscal year, is waived. The rule also makes in order the amendment in the nature of a substitute recommended by the Committee on Government Operations now printed in the bill as an original bill for purposes of amendment. Rule XVI, clause 7, the germaneness rule, which could lie against the committee amendment, is waived. A motion to recommit with or without instructions is provided.

The legislation authorizes a General Accounting Office audit of the Federal Reserve Board, the Federal Reserve Banks and their branches and check clearing, wire transfer, and security facilities, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency. There is language in the bill that purportedly will prohibit GAO from auditing monetary policy and foreign central bank transactions and from commenting on monetary policy deliberations and decisions or on the economic effects of such decisions. GAO is required to make reports on its audits to Congress as frequently as practicable while maintaining the confidentiality of all documents and files in its possession.

This year's version of the Federal Reserve audit legislation is similar to a bill considered and tabled by the Rules Committee during the last Congress. The reason that measure never got to the House floor was the great concern of a majority of the members of the Rules Committee that it would have allowed Congress to influence monetary policy. In particular there was substantial fear that the integrity of the Central Bank would have been compromised if GAO had been permitted to audit the policy operations of the Federal Reserve System.

This year's bill attempts to avoid this problem by supposedly directing GAO toward a supervisory audit instead of a financial one. I am having trouble determining how such a change in direction will protect monetary policy decisions from political pressure. I believe that an extraneous political influence will remain, notwithstanding the so-called safeguards in the legislation.

The cost of the GAO audit is estimated to be a little over $800,000. I am advised that this figure is substantially understated and that the annual cost is more nearly over $2,000,000.

It is my understanding that several amendments will be offered to more narrowly define the auditing duties of GAO when this bill is considered on the floor. I urge my colleagues to give these amendments their full attention at that time.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. ROUSSELOT. I wonder if we could ask the majority member of the Rules Committee, why are we waiving points of order for the Budget Act? This bill supposedly is not going to cost much money, so why are we waiving the points of order for Budget Act in the rule?

Mr. LONG of Louisiana. The bill as submitted to the Rules Committee, in answer to the gentleman's question, would have constituted legislation that was not reported by the May 15 deadline preceding the fiscal year in which it is to become effective. Consequently, it required a waiver of the Budget Act, to which the chairman of the Budget Committee readily agreed.

Mr. ROUSSELOT. My understanding is that if the bill passes and is signed prior to October 1, it conceivably could run into conflict with the budget resolution. Is that not correct?

Mr. LONG of Louisiana. I do not understand the gentleman's question.

Mr. ROUSSELOT. Well, I just make this point: the rule is another example of waiving points of order for the Budget Act unnecessarily. This act will really not require any great expenditures, and I do not understand why we have to waive the points of order relating to the Budget Act. I realize that certain amendments are proposed, but I still do not understand why we have to waive the Budget Act.

Mr. LONG of Louisiana. Mr. Speaker, if the gentleman will yield, I would say that what the position of the Committee on Rules has generally been, and perhaps it is worthy of reconsideration here, with the technical nature of the Budget Act in these first few years we have been inclined to waive it only when it was approved by the chairman of the Committee on the Budget, and we intended to make a careful determination as to whether or not the waiver requested was substantial enough to justify our not waiving it. Perhaps the gentleman is correct.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, it is my judgment that the Committee on Rules ought to resist more consistently the waiving of points of order for budget conflicts if we are really going to stand by the budget controls. I hope the Committee on Rules will take notice on that point.

Mr. LONG of Louisiana. I appreciate the gentleman's comments.

Mr. BROWN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I normally support all rules unless there is something in the rule itself that prompts me to oppose it. I am going to oppose this rule today, not because of anything that is in the rule but, rather, because I think it is very untimely to consider this legislation. We know that the director of OMB has been in the headlines very much lately because of his prior banking experience, and I am sure that to bring up an audit bill of a regulatory agency, bank regulatory agencies, in this atmosphere can very well prompt an overreaction and that we will enact legislation that in a different atmosphere we would not enact.

I think it is unfortunate that this rule is being taken up today. I think it is unfortunate that the legislation will be here next week, not because of anything that this side of the aisle is responsible for but, rather, the atmosphere as a result of the administration on that side of the aisle.

Mr. LOTT. Mr. Speaker, I have no further requests for time.

Mr. LONG of Louisiana. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 312, nays 47, answered "present" 1, not voting 74, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR THE CONSIDERATION OF H.R. 5383, AGE DISCRIMINATION IN EMPLOYMENT ACT AMENDMENTS OF 1977

Mr. MURPHY of Illinois. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 738 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 738

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5383) to amend the Age Discrimination in Employment Act of 1967 to provide that all Federal employees described in section 15 of such Act shall be covered under the provisions of such Act regardless of their age. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, forty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, and twenty minutes to be equally divided and controlled by the chairman and ranking minority member of the Select Committee on Aging, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. It shall be in order to consider an amendment to the committee amendment in the nature of a substitute printed in the Congressional Record of August 4 by Representative Spellman of Maryland if offered by a member of the Committee on Post Office and Civil Service, and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. MURPHY) for 1 hour.

Mr. MURPHY of Illinois. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 738 provides for the consideration of H.R. 5383, the Age Discrimination in Employment Act Amendments of 1977. This resolution provides for an open rule with 1 hour of general debate, 40 minutes to be divided and controlled by the Committee on Education and Labor and 20 minutes to be divided and controlled by the Select Committee on Aging.

House Resolution 738 makes in order the consideration of the Education and Labor Committee's substitute now printed in the bill as the original bill for purposes of amendment. All points of order are waived against amendment for failure to comply with clause 7 of rule XVI—the germaneness rule.

The rule also makes it in order to consider an amendment printed in the CONGRESSIONAL RECORD of August 4 by Representative SPELLMAN, if offered by a member of the Committee on Post Office and Civil Service. All points of order are waived against this amendment for failure to comply with the provisions of clause 7 of rule XVI—the germaneness rule.

Both the International Relations and the Post Office and Civil Service Committees have withdrawn their requests for sequential referral of H.R. 5383. An agreement was reached to accept the Post Office and Civil Service Committee amendment to section 5 of the bill on the floor. This agreement was made in an effort to expedite the consideration of the legislation. It also gives both of these committees the opportunity to review at a later time mandatory retirement provisions for certain Federal occupations such as air traffic controllers, firefighters, and the Foreign Service.

This rule allows for a motion to recommit with or without instructions.

H.R. 5383 would reduce the incidence of mandatory retirement for workers in private and State and local employment as well as for most Federal workers. Specifically, this bill amends section 12 of the Age Discrimination in Employment Act to raise the upper age limit from 65 to 70 for all non-Federal employees covered by the act. The bill also removes the upper age limit of protection for Federal workers, thus eliminating mandatory retirement on account of age for most Federal employees. The bill clarifies the exemption for employee benefit plans to prohibit early mandatory retirement. Protections already in the act will be extended to these expanded age groups.

This bill also requires a report from the Secretary of Labor on mandatory retirement and the feasibility of eliminating the upper age limit in the act.

Mr. Speaker, I know of no opposition to this rule. Therefore, I urge the adoption of House Resolution 738 in order that H.R. 5383 may be considered.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of this rule is to provide for the consideration of H.R. 5383, the Age Discrimination in Employment Act Amendments of 1977. The rule provides a total of 1 hour of general debate, which will be controlled by two committees. Forty minutes of the general debate will be controlled by the Committee on Education and Labor, and 20 minutes of the general debate will be controlled by the Select Committee on Aging.

In order to preserve the normal amending process, the rule makes the committee substitute recommended by the Committee on Education and Labor in order as an original bill for the purpose of amendment. The rule waives points of order against the substitute for failure to comply with the germaneness rule, clause 7 of rule XVI. This waiver is necessary because the committee substitute is broader than the introduced bill, and deals with subjects not covered in the introduced bill.

The rule also provides for the consideration of an amendment to the committe substitute printed in the RECORD of August 4 by the gentlewoman from Maryland, Mrs. SPELLMAN, if offered, by a member of the Committee on Post Office and Civil Service. Points of order are waived against that amendment for failure to comply with the germaneness rule. The waiver is necessary because the Spellman amendment is broader than the section it amends.

Mr. Speaker, the primary purpose of H.R. 5383 is to reduce the incidence of mandatory retirement for workers in private and state and local employment and to eliminate mandatory retirement on account of age for most Federal workers.

H.R. 5383 would raise the current upper age limit of 65 in the Age Discrimination and Employment Act to 70, remove the upper age limit of protection for Federal workers, and clarify the exemption for employee benefit plans to prohibit early mandatory retirement. Protections against all forms of age discrimination now prohibited by the Age Discrimination in Employment Act would also be extended to older workers in these expanded age groups.

Mr. Speaker, I support the rule so that the House may work its will on the legislation made in order by the rule.

Mr. MURPHY of Illinois. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 362, nays 0, not voting 72, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. REUSS. Mr. Speaker, on the rollcall vote on House Resolution 738 just completed, I was at a post with my card inserted in the electronic voting device. I was voting "yea," but the record failed to show my vote for some reason. I make this statement to indicate that had the apparatus been working, it would have recorded me as voting "yea."

PROVIDING FOR CONSIDERATION OF H.R. 6683, EARTHQUAKE HAZARDS REDUCTION ACT OF 1977

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 639 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 639

Resolved, That upon the adoption of this resolution it shall be in order to move, section 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6683) to reduce the hazards of earthquakes, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one and one-half hours, one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, and one-half hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 6683, it shall be in order to take from the Speaker's table the bill S. 126 and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and insert in lieu thereof the provisions contained in H.R. 6683 as passed by the House.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 639) is the rule providing for the consideration of the bill (H.R. 6683) to reduce the hazards of earthquakes.

It is a 1-hour open rule equally divided between the Committee on Interior and Insular Affairs and the Committee on Science and Technology. Each committee's time is equally divided between the chairman and ranking minority member.

The rule makes in order as an original bill for the purpose of amendment, the amendment in the nature of a substitute reported by the Committee on Interior and Insular Affairs.

It also waives a point of order which could be raised against consideration of the bill under section 401(b)(1) of the Congressional Budget Act. This section prohibits consideration of any bill which contains an entitlement which could take effect before the first day of the fiscal year which begins during the calendar year in which the bill is reported. Section 5(b)(3)(F) of the bill reported by the Committee on Science and Technology provides that members of an advisory committee established by the bill would be entitled to reimbursement for travel expenses. While the amount would be small and it is unlikely that there would be any expenditure during fiscal year 1977, the language is an entitlement within the meaning of the act.

It should be noted that the amendment reported by the Committee on Interior and Insular Affairs is made in order as an original bill. It contains no comparable provision and is therefore subject to no point of order. As a result the waiver is regarded as technical and presents no controversy.

Mr. Speaker, the bill (H.R. 6683) establishes a Federal program designed to reduce the hazards of injury, death, and property damage from earthquakes. Both committees envision a multiagency cooperative program. Both recommend a 3-year authorization whose costs are estimated by the Congressional Budget Office as follows:

[In millions]

Fiscal year:	*Interior*	*Science*
1978	$42.1	$42.9
1979	68.2	69.2
1980	79.5	84.3
1981	20.2	21.6
Total	210.0	218.0

Mr. Speaker, this is an important bill and I urge adoption of the rule to permit orderly consideration.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 639 provides an open rule with 1½ hours of general debate for the consideration of H.R. 6683, the Earthquake Hazards Reduction Act of 1977. One hour of the debate shall be controlled by the chairman and ranking minority member of

the Committee on Science and Technology, and 30 minutes shall be controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs. To expedite the amending process, it shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs.

The rule waives section 401(b)(1) of the Congressional Budget Act which makes it out of order for the House to consider any bill providing new entitlement authority which is to be effective before the first day of the fiscal year which begins during the calendar year in which the bill is reported. This waiver applies to the original bill since the committee amendment does not contain the entitlement provision which required the waiver.

The rule also provides one motion to recommit with or without instructions. After the passage of H.R. 6683, it shall be in order to take from the Speaker's table the bill S. 126 and amend with the provisions of the House-passed bill.

Mr. Speaker, the purpose of H.R. 6683 is to reduce the risk of life and property from future earthquakes in the United States. The legislation directs the President to establish an Office of Earthquake Hazards Reduction or designate a lead agency to be the central coordinating body for all earthquake program activities. It also places heavy emphasis on research and earthquake prediction by establishing an Earthquake Prediction Evaluation Board. Finally, maximum authorization levels are set for fiscal years 1978, 1979, and 1980 for the earthquake programs of the U.S. Geological Survey, and the National Science Foundation, and provides a separate authorization to the President to carry out the purposes of the act.

Mr. Speaker, I have no further requests for time and suggest the House express its will on the resolution.

Mr. Speaker, I have no further requests for time and reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 350, nays 3, not voting 81, as follows:

Mr Charles Wilson of Texas with Mr. Zeferetti.
Mr. Badillo with Mr. Boland.
Mr. Walker with Mr. Thornton.
Mr. Wampler with Mr. de la Garza.

Mr. BAUMAN changed his vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR THE CONSIDERATION OF H.R. 6669, NATIONAL CLIMATE PROGRAM ACT OF 1977

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 641 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move, section 401(b)(1) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6669) to establish a national climate program, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for the consideration of H.R. 6669, the National Climate Program Act of 1977.

The resolution provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology. The bill contains language that could be construed as an entitlement necessitating a waiver of section 401(b)(1) of the Congressional Budget Act.

May I explain, Mr. Speaker, that the committee has a letter from the chairman of the Budget Committee agreeing to this waiver, and it agrees that the language that would be the subject of a point of order would apply until actually they are authorized in an appropriate budget resolution.

The purpose of H.R. 6669 is to establish a national climate control program which will enable the Nation to respond more effectively to climate induced problems. The program would entail the gathering and analysis of climate data to better assess weather trends and the impact of weather on human activities and resources.

Mr. Speaker, I suggest that we need only to look at the impact of this past harsh winter, followed by the droughts in so many areas of our country this summer to appreciate the need for a better understanding and ability to predict weather patterns. This legislation will create a vehicle for making those assessments.

Therefore I urge the adoption of House Resolution 641 so that we might debate and vote on H.R. 6669.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for the consideration of H.R. 6669, the National Climate Program Act of 1977, under an open rule with 1 hour debate. Points of order against the bill are waived for failure to comply with section 401(b)(1) of the Congressional Budget Act, which relates to new entitlement authority during the current fiscal year. It is my understanding that the authorizing committee has amended this language to alleviate the problem with the Budget Act.

The purpose of the legislation is to establish a national climate program to be administered by a full-time National Climate Program Office, which is to be located within a lead agency. The program may make grants to educational institutions to support regional climate studies. A Management Council comprised of representatives of Federal agencies is created to advise and participate in budget planning. An Advisory Council also is established to insure the involvement of scientists and users of climate information in the program. An annual report is to be submitted to Congress on the activities of the office.

The legislation authorizes $50 million for fiscal year 1978.

Mr. Speaker, a question arose when this bill was before the Rules Committee as to what could a National Climate Program Office do that is not already done by various Federal agencies. The answer given by the author of the bill was that the current state of the art for weather prediction is not adequate, and a need exists for placing emphasis on the coordination of climatic variation data.

I know of no opposition to the rule.

Mr. PEPPER. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 348, nays 2, not voting 84, as follows:

Mr. Madigan with Mr. Dornan.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7933) entitled "An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes," and that the Senate agreed to the amendments of the House to the amendments of the Senate, numbered 20, 30, 40, 41, 46, 47, 54, 63, 67, 71, 76, and 82, to the foregoing bill.

PERSONAL EXPLANATION

(Mr. SIMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SIMON. Mr. Speaker, I regret that due to a commitment I made to Senator HUMPHREY to fill in for him at a gathering in Norfolk, Va., yesterday evening, I missed four rollcall votes.

Had I been present, I would have voted "no" on the amendment increasing the deficit by $175 million to provide for tax credits for higher education; "no" on the amendment reducing budget outlays by $110 million to reduce commodity credits for South Korea; "no" on the amendment reducing budget authority for national defense by $33 million and budget outlays for international affairs by $110 million to prohibit any aid for South Korea. I would have voted "aye" to the passage of the revised budget resolution.

EARTHQUAKE HAZARDS REDUCTION ACT OF 1977

Mr. THORNTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6683) to reduce the hazards of earthquakes, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arkansas (Mr. THORNTON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6683, with Mr. DAN DANIEL in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Arkansas (Mr. THORNTON) will be recognized for 30 minutes; the gentleman from New Jersey (Mr. HOLLENBECK) will be recognized for 30 minutes; the gentleman from Texas (Mr. KAZEN) will be recognized for 15 minutes; and the gentleman from Michigan (Mr. RUPPE) will be recognized for 15 minutes.

The Chair recognizes the gentleman from Arkansas (Mr. THORNTON).

Mr. THORNTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I yield myself such time as I may consume. I support the bill, H.R. 6683. At the outset I would like to thank the Members of the House who have made it possible to bring the bill to the floor today. The gentleman from Texas, Chairman TEAGUE, is a constant inspiration to us and a chairman of great wisdom and fairness. I thank him for the privilege of working with him in support of this bill.

I am particularly pleased that our former colleague, Charles Mosher, is once again associated with the Committee on Science and Technology. Along with GEORGE BROWN, Charlie Mosher was one of the two prime movers of the bill. We have been very fortunate on the Science and Technology Committee, because when we lost Charlie Mosher as ranking minority member of the committee we gained an equally distinguished replacement. I am referring, of course, to the gentleman from New York, JOHN WYDLER. His nonpartisan support made it possible to report the bill unanimously from committee. The work of the gentleman from New Jersey (Mr. HOLLENBECK) is appreciated just as highly.

Our colleagues on the Interior Committee, Chairman UDALL and Chairman KAZEN acted promptly on the bill when it was referred, and I thank them for their action and support.

Mr. Chairman, many other Members have also helped bring this bill to the floor and without naming them all I would like to give them my sincere thanks.

Mr. Chairman, in order to expedite consideration of this legislation, which was sequentially referred from the Committee on Science and Technology to the Committee on Interior and Insular Affairs, we have agreed with the gentleman from Texas (Mr. KAZEN) that following these preliminary statements, the distinguished gentleman from New Jersey (Mr. HOLLENBECK) and I will reserve our time in order that the Committee on Interior and Insular Affairs can proceed to use their time under the rule, following which the Committee on Science and Technology will proceed with the discussion of the bill under the rule.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield for a question?

Mr. THORNTON. I am pleased to yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, would the gentleman tell us how much this bill is going to cost and how many more employees it will add to the Federal Government?

Mr. THORNTON. I am pleased to respond by saying that the total authorization for the year 1978 under the bill is $56 million. That is an increase in authorization over the authorization which presently exists and an increase in the amount which has been appropriated for that purpose.

The number of employees to be added is quite small. Some 40 more employees will be authorized under the legislation over the number presently authorized.

Mr. BAUMAN. Mr. Chairman, if the gentleman would yield further, he has given me only a partial response.

How much is the total multiyear authorization in this bill as it is now presented to us?

Mr. THORNTON. The authorization in the bill for the year 1978 is $56 million; for the year 1979 it is $72 million; and for the fiscal year 1980 it is $82 million.

Mr. BAUMAN. So we are talking about $200 million-plus, at least.

Mr. THORNTON. That is a very close

approximation. The actual figure is $210 million, I believe.

Mr. BAUMAN. Mr. Chairman, I thank the gentleman.

Mr. HOLLENBECK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman. I rise in support of H.R. 6683, the Earthquake Hazards Reduction Act of 1977. At the outset I wish to commend the distinguished chairman of our Science, Research and Technology Subcommittee, Mr. THORNTON, and another member of our subcommittee, Mr. BROWN, for their diligent efforts in bringing this needed legislation to the floor. The bill that we have before us today is the product of work and hearings that began in the 94th Congress.

During our hearings on the development of an adequate national earthquake hazards reduction program, our subcommittee was alerted to the fact that the hazard of earthquakes is not confined to the west coast of the United States. In fact, all 50 States are vulnerable to the hazards of earthquakes to some degree. Included among those States subject to major or moderate seismic risk are my own State of New Jersey and other Eastern States such as New York, Massachusetts, and South Carolina.

Testimony before our subcommittee showed that many fault locations in the Eastern United States have never been adequately mapped due to funding limitations although a New York quake could be 20 times more damaging than a similar one in California due to the age of rock in the East. Advances in earthquake prediction require a prior knowledge of fault locations. In California and much of the Western United States the larger fault zones have been mapped and there is a large amount of information as to what faults are known or may be active. This is not the case in much of the Eastern United States. For example, only recently has it been shown that the Boston region is as faulted as areas of southern California. This is apparently the case for large portions of New England. The hazard and potential for disaster is there, but not many people are aware of it. An effective earthquake program such as that established in H.R. 6683 will be of great benefit in minimizing the effects of a potentially devastating earthquake.

Mr. Chairman, The United States has been extraordinarily lucky in avoiding most destructive earthquakes during our 200-year history. The earthquake estimated to have been the most violent in our history occurred near New Madrid, Mo., in 1812. Because the area was largely wilderness, few lives were lost, but eyewitness accounts related that the seismic shock was so great that the flow of the Mississippi River was briefly reversed. Of course, we are all aware of the 1906 earthquake and subsequent fire which destroyed much of San Francisco and took 700 lives, the highest earthquake-related toll in U.S. history. The 1964 Alaska earthquake killed 131 and caused $500 million in damage. The 1971 earthquake centered near San Fernando, Calif., took 65 lives and caused $550 million in damage. As tragic as these and other U.S. earthquake disasters were, they were relatively mild when compared to foreign earthquakes. In 1976 alone, three devastating foreign earthquakes made headlines in the United States. In February 23,000 lives were lost in Guatemala. In July, Tang-shan, China, a city the size of Houston, was completely destroyed with an estimated 650,000 killed. In November, Turkey suffered a violent earthquake with 5,000 lives lost.

As the population of the United States continues to grow and urbanized areas continue to spread, the potential for great earthquake destruction will increase correspondingly unless proper preparation is made. Scientific studies indicate that a repeat of the San Francisco earthquake of 1906, or a large earthquake in the Los Angeles area, could cause approximately 10,000 deaths, 40,000 serious injuries and $20 billion in property damage. H.R. 6683, before us today, places heavy emphasis on the type of research and prediction capabilities that will significantly lessen the disaster proportions of such an earthquake.

Mr. Chairman, I would like to take a few moments to explain some of the provisions of the Earthquake Hazards Reduction Act of 1977. The version of H.R. 6683 with which we are working today is virtually identical to the Senate bill, S. 126. Changes from the original H.R. 6683 reflect the actions of the Committee on Interior and Insular Affairs following sequential referral to that committee. It is my understanding that the compromises incorporated in these changes will facilitate the establishment of the earthquake program.

The bill provides that the President establish and maintain a coordinated earthquake hazards reduction program. Within 30 days after enactment the President must designate the Federal agency or department responsible for completion of the implementation plan and within 210 days after enactment the President must submit that implementation plan to the congressional authorizing committees. This procedure is very important. It will provide the blueprint for coordinating the earthquake program, assigning the role and responsibilities of various Federal agencies. At the present time the U.S. Geological Survey and the National Science Foundation have the largest budgets for earthquake work. However, many other agencies are also involved in one way of another. USGS and NSF will retain their dominant role under H.R. 6683, but greater coordination of effort will be effected among all involved agencies.

The Earthquake Hazards Reduction Act provides for great Presidential flexibility in establishing and maintaining an effective program. However, certain important objectives are set out in the bill. Included in these objectives is the development of technologically and economically feasible earthquake-resistant designs for both new and existing structures. Of particular importance are structures such as schools, hospitals, high occupancy buildings, public utilities, and dams. Obviously, these types of structures are crucial to public safety in the event of an earthquake and the post-quake period.

A second objective is the development of a prediction capability, especially in those areas where the risk of earthquakes is high. This would include a broad research program as well, leading to a better understanding of the control or alteration of seismic phenomena. At the present time we have no control capability and only a very rudimentary prediction capability. The value of even a slightly more advanced prediction capability was illustrated in China in 1975. A predicted earthquake led to an evacuation of over a million people. Five hours after the evacuation a devastating earthquake destroyed large amounts of property but with little loss of life. The Chinese, however, were not able to predict the tragic Tang-shan earthquake of 1976. Still, the possible benefits of an enhanced predictive capability can be enormous. It is certainly a worthy objective of H.R. 6683.

A final objective of the bill which I would like to note is the development of organized emergency services, of a dissemination system to warn of earthquakes, and planning for reconstruction and redevelopment after an earthquake. This is an area in which we are currently inadequately prepared. The public, including State and local officials, need to be better educated in the proper actions to take before, during and after an earthquake. In this way the tremendous social, economic and legal consequences of a major earthquake can be lessened. If such preparatory steps are not taken, the aftermath of a major quake will be chaos. Obviously every contingency cannot be covered, but we can begin with this bill, to prepare for the most likely occurrences. For example, assuming that our predictive capabilities advance to a stage where it can be predicted that it is highly likely that a major earthquake will occur in a certain area within a month, how do we deal with it? Should the public be warned? Should an evacuation be mandated? How certain is the prediction? Questions like these, with their enormous social and economic consequences, cannot be answered today. H.R. 6683 would provide the beginning of a program that would assure that we do find those answers.

Mr. Chairman, I urge my colleagues to support the Earthquake Hazards Reduction Act. It is a responsible piece of legislation that strikes a correct balance between limiting the role of the Federal Government while initiating a badly needed program that will save lives and repay the investment many times over.

Mr. KAZEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, at the very outset I want to acknowledge the cooperation of the ranking member on the Subcommittee on Mines and Mining, the gentleman from Michigan (Mr. RUPPE), and also the entire subcommittee. They

took this bill after it was sequentially referred to us and made a major amendment to the bill. As the bill comes to us today, the amendment in the nature of a substitute by the Committee on Interior and Insular Affairs will be the bill that is presented to the Members today.

Mr. Chairman, H.R. 6683, as amended, would establish a national earthquake hazards reduction program.

While major earthquakes have shaken the United States many times, this Nation has been extraordinarily lucky to date. The growth of population and the development of large cities are relatively recent in the United States. With such growth and development, however, the potential for devastation resulting from an earthquake has and will continue to increase.

Although the precise location, time, and magnitude of specific earthquakes cannot generally be made now, progress has been and is being made in earthquake prediction. It is known, for example, that Chinese scientists successfully predicted three major earthquakes in China last year. According to Chinese scientists, thousands of lives were saved by the prediction.

The U.S. Geological Survey is presently the lead agency in developing an earthquake prediction system. One of its principal functions is the operation of the worldwide standardized seismograph network. Responsibility for the installation and management of the network was transferred to the Geological Survey from the Coast and Geodetic Survey of the Department of Commerce in 1972.

Recently, a panel of experts assembled by the National Academy of Scientists stated that current funding commitments are seriously inadequate for the proper operation of the Worldwide Network. The bill under consideration will authorize additional funds to the Geological Survey for the proper operation and maintenance of the network.

The amended bill being considered today results from the work of two committees—the Committee on Science and Technology and the Committee on Interior and Insular Affairs. H.R. 6683, as amended, would establish a national earthquake hazards reduction program under the direction of the President to minimize the loss and disruption resulting from future earthquakes.

The program would include four elements:

First, a research element dealing with fundamental earthquake studies, prediction, hazards assessment, and other research relating to the reduction of hazards.

Second, an implementation plan which addresses the need to apply existing information and new research findings to decisionmaking at the Federal, State and local level.

Third, a State assistance program which allows for assistance to be made available to the States under the Disaster Relief Act of 1974.

Fourth, an opportunity for participation in the program by the appropriate representatives of State and local governments and by the public, including representatives of business and industry, the design professions, and research community.

Also, the bill would authorize appropriations to the U.S. Geological Survey and the National Science Foundation for an expanded program for earthquake hazard reduction.

The principal difference between the bill as amended, which is now being considered, and the bill as reported by the Committee on Science and Technology is that the amended bill does not establish an Office of Earthquake Hazards Reduction and does not establish a national advisory committee.

In this respect, the bill, as amended, reflects the views of the administration which advised the Committee on Interior and Insular Affairs through the President's Science Adviser that the administration feels the creation of such an office and advisory committee would be premature before there is a comprehensive review of the implementation plan mandated by the bill.

Under the provisions of the amended bill, the total authorization for the U.S. Geological Survey and the National Science Foundation for the next 3 fiscal years would be $8 million less than the total authorization in the bill reported by the Committee on Science and Technology. The funds authorized for each agency would be equal.

Mr. Chairman, the future losses and disruption resulting from earthquakes in this Nation could be substantially reduced by the earthquake hazards reduction program which would be established by H.R. 6683, as amended. I urge your approval of the bill, as amended.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield for a question?

Mr. KAZEN. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

The gentleman has said that the authorization is $8 million less than the Committee on Science and Technology. What is the total authorization for the full fiscal years covered?

Mr. KAZEN. These authorizations total $56 million in fiscal year 1978, $72 million in fiscal year 1979, and $82 million in fiscal year 1980, representing the total estimated costs contemplated by the committee if this legislation is enacted.

Mr. BAUMAN. I thank the gentleman.

Mr. THORNTON. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Arkansas.

Mr. THORNTON. I thank the gentleman for yielding.

I want to congratulate the gentleman on his statement and on the splendid work done by his committee on this bill.

Members of the Science and Technology Committee are supporting the bill reported by the Interior Committee today because it represents a compromise between the bill reported by Science and Technology and the bill passed by the Senate, a compromise which is acceptable to us and, I believe, to the Senate. There are two matters I would like to ask the gentleman from Texas, Chairman KAZEN, about.

The first regards the Advisory Committee to the earthquake hazards reduction program which was called for by the bill reported by Science and Technology. A description of the Advisory Committee is given in section 5(b)(3) of that bill, which is as follows:

(3) National Advisory Committee on Earthquake Hazards Reduction—

(A) The Committee shall have not fewer than 10 members, including persons concerned with earthquake hazards reduction who are representative of the research community (including the design professions), private industry (including insurance and construction), and government (Federal, State, and local), and shall include qualified individuals experienced in earthquake hazards reduction planning, implementation, or preparedness.

(B) The Committee shall serve as an advisory body, to review and advise on the progress, implementation, and coordination of the Program, and shall perform such other duties as the President may assign.

(C) At least annually the Program plan shall be submitted to the Committee, and the Committee shall evaluate the plan.

(D) The annual report required by section 6 of this Act shall be submitted to the Committee before the report is in final form and the Committee shall comment on the report.

(E) Membership on the Committee shall be for staggered, rotating terms.

(F) Each member of the Committee who is not a Federal employee shall be reimbursed for necessary travel expenses (or, in the alternative, for mileage for the use of his privately owned vehicle and a per diem in lieu of subsistence at not to exceed the rates prescribed in sections 5702 and 5704 of title 5, United States Code), and other necessary expenses incurred by him in the performance of duties vested in the Committee, without regard to the provisions of subchapter I of chapter 57 of title 5, United States Code, the Standardized Government Travel Regulations, or section 5731 of such title 5.

Would the gentleman explain why this provision was not included in the Interior bill and how the Interior bill provides for public input on the overall program?

Mr. KAZEN. The administration advised the committee that it would be premature at this time to authorize the existence of these advisory committees until the program was set up. It is my recollection that the Senate bill does not provide for these advisory committees either.

Mr. THORNTON. I believe that section 5(h) of the Interior bill does provide for public input and requires that public input would include a periodic review of earthquake hazard program plans by an assembled group of public representatives.

Mr. KAZEN. Yes. This was the second point I was going to make.

The bill as reported by the Committee on Interior and Insular Affairs does make that provision and there will be sufficient opportunity for input from the general public.

Mr. THORNTON. I thank the gentleman from Texas. That is a thoroughly satisfactory answer. I hope the administration will follow the instructions the gentleman just cited and the spirit in which they were submitted.

Mr. KAZEN. I thank the gentleman.

Mr. RUPPE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 6683. We are acutely aware that the peoples of Alaska and California daily confront the dangers of possible earthquakes; however, the threat is national in scope with millions of Americans facing some degree of risk. Recent history shows a sharp upturn in the world's seismic activity. Just last year, more than 700,000 lives were lost, mostly due to the July 1976 earthquake which ravished mainland China. Thus far, we in the United States have been fortunate. Less than 1,200 lives have been lost in America due to earthquakes. However, we must not be lulled into complacency. With increased urbanization, larger highrises and a mushrooming population, the United States becomes more and more vulnerable to earthquake disaster. We are indebted to our colleague, BOB LAGOMARSINO, who was not only one of the first to recognize the serious nature of the problem but worked diligently in the Interior Committee to bring this critical legislation to the floor.

H.R. 6683 establishes a national program to reduce the hazards from earthquakes. As the frontiers of science recede, it is more and more likely that major breakthroughs will occur, permitting the prediction of earthquakes as well as reducing their destructive power. This legislation, now under consideration, will stimulate such scientific exploration and assure that new and cogent seismological data will be quickly disseminated to where it is needed.

Such a national program is long overdue. Its expense is infinitesimal when compared to the disaster a major earthquake can inflict. Any measure which reduces the effects of earthquake damage is laudable. Mr. Chairman, H.R. 6683 is sound legislation—legislation of which this Congress can be proud. I urge its passage.

Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. DON H. CLAUSEN), who has been most active on this measure.

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in support of H.R. 6683 which is widely supported on both sides of the aisle as well as in the other body. Its purpose is "to reduce the risks to life and property from future earthquakes in the United States through the establishment and maintenance of an effective earthquake hazards reduction program." The major difference in H.R. 6683 as reported out of the Committee on Science and Technology and the amended version before us today is that greater Presidential flexibility in establishing and maintaining the program is provided.

In accordance with the recommendations of the administration, the President is permitted 300 days in which to determine what Federal entity can best manage the earthquake hazard reduction program rather than having Congress mandate the establishment of a National Advisory Office and Committee on Earthquake Hazard Reduction as early versions of the bill had espoused.

H.R. 6683 authorizes $56 million for fiscal year 1978, $72 million for fiscal year 1979, and $82 million for fiscal year 1980. These funds with the exception of $5 million designated for general administration are to be divided equally between the U.S. Geological Survey and the National Science Foundation. Both of the agencies will then pursue, either through in-house effort or outside contract, related research in the prediction of major earthquakes and the reduction of damages resulting therefrom.

As one who has experienced the impact of earthquakes in my congressional district and as the ranking Republican on the Water Resources Subcommittee dealing with disaster relief, I can provide vivid testimony as to the need for this legislation.

Considering the disaster to lives and property which could ensue, H.R. 6683 is a prudent measure, offering hope to the 70 million Americans, who daily run the risk of moderate to severe damage from earthquakes. Accordingly, Mr. Chairman, I urge all my colleagues to support fully this legislation.

Mr. RUPPE. Mr. Chairman, I yield such time as he may consume to my colleague, the gentleman from California (Mr. LAGOMARSINO), who in my opinion deserves special recognition for his understanding of the problem and for his very diligent work in seeing to it that the Interior Committee took up this bill in such fashion that the Science and Technology Committee as well as the Interior Committee could take the bill up on the floor today.

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of H.R. 6683, which was sequentially referred to the Committee on Interior and Insular Affairs and has been amended to conform to the recommendations of the administration as well as the Committee on Science and Technology. The proposal has widespread, bipartisan support, having undergone the detailed scrutiny of both Houses in the 94th as well as this Congress.

The peril from future earthquakes is national in scope. As a Californian, I am painfully aware of the threat which daily confronts my constituents: Yet, nearly every State in the Union faces some degree of risk and over 70 million Americans in 39 States live under the imminent danger of moderate to major earthquake damage. H.R. 6683 establishes a national program to predict and, subsequently, mitigate the effects of earthquakes in the United States.

As amended, H.R. 6683 authorizes $56 million for fiscal year 1978, $72 million for fiscal year 1979 and $82 million for fiscal year 1980. These funds, with the exception of $5 million earmarked for housekeeping, will be divided equally between the U.S. geological survey and the National Science Foundation to be expended in research studies—economic, scientific, social, and legal—to minimize the effects of earthquakes.

But research is not enough. To be effective, recommendations stemming from research must be disseminated to all concerned agencies at the Federal, State, and local level as well as in the private sector. H.R. 6683 prescribes such detailed coordination and mandates the President to designate within 300 days after enactment a Federal entity charged with primary responsibility for developing and implementing the program.

Considering the disaster to lives and property which could ensue, the bill is a prudent measure, whose costs could easily be repaid many times over in reducing the damage of only one major earthquake.

Accordingly, I fully support the position of the subcommittee chairman on mines and mining, as well as the Committee on Science and Technology, on H.R. 6683 and urge my colleagues to do likewise.

Mr. RUPPE. Mr. Chairman, we have no further requests for time.

Mr. KAZEN. Mr. Chairman, I have no further requests for time. I yield back the balance of my time.

Mr. THORNTON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill which we are presently considering is designed to reduce the harm that might be done by future earthquakes in the United States.

Now, most of us know that some areas of our country are more prone to earthquakes, at least, we think they are, than others. The west coast, particularly California, Washington, and Alaska, have had many more severe reported earthquakes than other regions of our country, and yet I do not believe it is widely known that all sections of our country are subject to the hazards of earthquakes. Indeed, the most severe earthquake ever to shake the North American Continent in recorded time took place in my own State of Arkansas where it borders the States of Missouri and Tennessee in the New Madrid fault area in the winter of 1811–12. The earthquake occurred over a period of 4 months, shaking and rolling that area of the country so violently that it is reported that bells may have rung in different places, like Charleston and Philadelphia on the east coast. Contemporaneously with this enormous quake, an eye witness reported it shot geysers into the air, that logs were hurled into the air and that for a time, the Mississippi river ran backward. Were that severe quake to occur again today, and there have been hundreds of small quakes occurring in this area, it would likely result in property damage ranging from $5 to $50 billion and as many as 10,000 people might lose their lives.

At the time the New Madrid quake occurred in 1811, of course, the region was sparsely settled.

Mr. Chairman, nothing in this bill is designed to suggest that we will be able to modify a quake once it has started. There are some possibilities that by water injection and other means there might be some method of releasing the tensions that occur in the crust of the earth before the pressures build up to

the point of a violent quake. However, the real purpose of this legislation is to provide funds to study these terrible disasters and, hopefully, to find a means of predicting in advance when the quakes will occur, because the loss of life can be mitigated tremendously simply by moving people out of structures which might fall during the occurrence of the quake. The billions of dollars which would be required to reconstruct and to overcome the damage of a quake could be mitigated significantly if we were able to learn where the dangerous areas are and to provide for better use of building construction knowledge in those areas.

For all of these reasons, I think it is vital not only to the coastal areas of our Nation where the great continental plates impact upon each other and result in periodically occurring quakes, but also throughout our country that we have increased resources to predict these quakes and to minimize their destructive effect upon human life and property.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would like to pass a comment on that New Madrid fault. My hometown of Hannibal was established because of that relocation.

I would like to have a little colloquy with regard to the use or choice of use of certain words on page 25 of the bill in subsections 2, 3, and 4 of subsection (f) in regard to specifically the development and promulgation, the use of the word "promulgation" of specifications, building standards and developing a plan by the present administration. The use of the word "promulgation," I hope—and perhaps the gentleman can correct me if I am wrong—does not mean or give the authority to make rules or regulations in regard to the building standards, et cetera?

Mr. THORNTON. That is correct. The gentleman has correctly described one of the functions of the agency which will be required to develop an implementation plan. That plan might include recommendations that local authorities, such as cities or towns, might consider in the promulgation of rules or regulations; but the bill itself does not grant Federal authority to promulgate rules.

Mr. VOLKMER. Mr. Chairman, if the gentleman will yield further, so the use of the word "promulgation" there would not be on rules and regulations; it would only be in the sense of providing for the dissemination of information?

Mr. THORNTON. Part of the plan would be that local agencies could consider recommendations and in that sense it would be dissemination of information to the local community.

Mr. LLOYD of California. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentleman from California.

Mr. LLOYD of California. Mr. Chairman, the people of the United States need this bill now. The bill provides for the support of intensive work to improve the Nation's ability to predict earthquakes.

Earthquake prediction is not a pie-in-the-sky dream. A few small earthquakes have been accurately predicted in the United States. The Chinese put high priority on earthquake prediction and have been predicting earthquakes for several years with some successes and some failures.

The importance of prediction is demonstrated by the Chinese experience. In February 1975 the Chinese predicted a quake and moved everyone in the area outdoors. Hours after the warning a severe earthquake happened as predicted. Comparatively few people were killed by that earthquake. It is estimated that tens of thousands of people would have died if the quake had not been predicted. In contrast to that success, the Chinese apparently failed to predict the July earthquake last year and over 600,000 people are estimated to have died. The difference between the two events was the prediction. An accurate prediction and warning would have saved most of the Chinese who were killed by the July quake.

There are a lot of events that are believed to indicate an earthquake may happen. These events include changes in the speed at which seismic waves travel through the Earth, changes in the water level of wells, upraising of the Earth's surface, changes in electric and magnetic fields, variations in the rate at which small earthquakes usually occur, strange behavior by animals, and changes in the amount of the radioactive gas, radon dissolved in well water. There are others. But it is not known how reliable any of these things are for predicting earthquakes. Further study is needed and needed soon.

In California we have a situation in which at least two of the events thought to precede an earthquake have already apparently happened. There seems to have been a change in the speed of seismic waves and there is definitely an upraising of land surrounding the San Andreas Fault in the vicinity of Palmdale, Calif. The U.S. Geological Survey says a major earthquake in the vicinity is inevitable, but they do not know when—it may be today or it may be 50 years from now. The Palmdale area is being studied intensively now, but the study has required that instruments and manpower be taken out of other earthquake-prone areas. More funds are needed to replace those instruments and people.

This bill will provide authorization of funds for the development of methods of earthquake prediction, for basic and applied research necessary for prediction, and for the development of instruments, systems, and computer programs necessary for prediction. I strongly support the passage of this bill.

Mr. THORNTON. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. BROWN), who has been most responsible for the development of this fine piece of legislation.

Mr. BROWN of California. I thank the chairman very much.

Mr. Chairman, I rise in strong support of H.R. 6683, the Earthquake Hazards Reduction Act of 1977. This bill, which has already passed the Senate and has the strong support of the administration and two committees of this body, is long overdue and extremely important to the millions of people who live in seismically active areas. The money which will be necessary to carry out this act has already been appropriated for the coming fiscal year, which demonstrates that the Congress already believes the costs are justified by the risks involved. The only thing which is missing is the organizational framework, and the congressional commitment to the goals of this legislation. The House should pass this bill to provide these missing elements.

The other supporters of this bill have already described its contents and intent. I would like to thank all of the Members who have worked for the passage of this act, especially those who do not have active fault zones in their congressional districts, as I have. A national legislator is one who supports good legislation that has no direct relationship to their own district, and in the progression of the Earthquake Hazards Reduction Act of 1977 I have encountered many national legislators. I would like to assure these Members and others who may be undecided that earthquake hazard work done under this act will affect the entire Nation, and probably the world, and will benefit, at least indirectly, everyone.

The thrust of this legislation is disaster prevention, rather than disaster relief. This concept is one that is only possible today because of advances in earth sciences, and in the success of past research efforts in seismology and related fields. While the bill requires the development of a coordinated Federal earthquake hazards reduction program to include emergency preparedness, relief efforts, building standards, and materials research, the key new element is earthquake prediction. We have good reason to believe that earthquakes can be predicted at a time, place, and magnitude, and lives can be saved by virtue of these predictions.

Mr. Chairman, I want to make just a few more general comments. I think the bill has been very well and ably explained by the distinguished chairman of the subcommittee, the gentleman from Arkansas (Mr. THORNTON), and the equally distinguished subcommittee chairman from the Interior Committee, the gentleman from Texas (Mr. KAZEN); and the respective minority members of the two committees.

I want to say, by way of historical reference, that this bill has been before the Congress now for some period of time. Work began on it several years ago, as a matter of fact, and it has passed the Senate on two occasions. It was brought to the floor under suspension last year and failed to pass at that time. The bill has been modified this year in order to come closer to the language

preferred by the administration and by the Senate.

I would personally have preferred that we would have been able to enact a slightly more detailed bill with regard to the organizational structure in this program, but I recognize that this will probably develop over time if the structure which we propose has merit.

I would like to say also that the reason that it is possible to bring legislation of this sort to the floor, after a period of study and consideration, stems from the basic nature of the scientific process. It is true that over the past 10 or 15 years, there have been basic breakthroughs in the geological sciences, in large part breakthroughs made possible by the infusion of Federal funds through the National Science Foundation. I point particularly to the development of the theory of plate tectonics in geology, which has allowed scientists to create a theoretical framework for explaining something which we all knew existed—earthquakes—but also to explain many other kinds of related phenomena.

As we gain this greater understanding through science and through research, we get to the point where we are able to enact broad programs for the benefit of mankind. We are at that stage now in connection with the prediction of earthquakes, and possibly even a little further down the road, the amelioration of earthquake severity. Unquestionably we are able, through better planning of human structures, to reduce the damage caused by earthquakes even now, and we should be undertaking these kinds of programs.

So, this legislation essentially is an effort to set in place a modest framework, with some congressional input, some improved degree of coordination, for achieving these kinds of benefits which develop in various areas as man's knowledge becomes greater in a particular field. As a matter of fact, we will be dealing with another bill right after this which represents the same kind of progress in the field of climate prediction, long-range climate analysis, and so forth.

I wanted to make that point because it is essential to the functions of the Committee on Science and Technology, which under the jurisdictional rules which the House has promulgated, is charged with the responsibility of evaluating and providing oversight to this kind of scientific development and, hopefully, bringing its fruits to the floor in legislation.

I wanted to make this point because I thought it was important to understand it in connection with the work of the Committee on Science and Technology.

One other thing which has been emphasized—and I will just stress it very briefly—we in California are sometimes accused of having a parochial interest in earthquakes because it is well known that we suffer more than our share. But as has been pointed out, this is not a phenomenon that is localized in California or any other part of the United States.

I have a very recent clipping here which says more than 200 earthquakes were detected in the New York-New Jersey area since 1971. This article points out that major earthquakes in this area would be potentially 20 times more damaging than a similar earthquake in California because of the geological structure which exists in the East and because of the greater amount of settlement that exists here.

So this is a national problem, one which deserves national attention in a national legislative structure, and I think this legislation deals with the problem in an adequate first approximation form. It will undoubtedly require further attention from the Congress over the years, and I am sure that we will be able to give it that attention as the need develops.

Mr. THORNTON. Mr. Chairman, I yield 3 minutes to the gentleman from California, (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, as a cosponsor, I rise in strong support for H.R. 6683, the Earthquake Hazards Reduction Act of 1977.

There is no need to review the number of earthquakes this Nation and this world have experienced; the frequency has seemed to increase in the last few years. There is also no need to remind Members of the devastation these upheavals can cause and have caused.

What I would like to focus on in expressing my support for this bill is the excellent approach it takes in revamping and revising the way our Government handles one particular natural resource problem. As was pointed out in the hearings on this bill, there are currently more than 35 Federal offices, agencies, and departments that in some way are responsible for earthquake prediction, preparedness, and assistance. While the Disaster Relief Act of 1974 provided for a coordinated earthquake prediction system, but other aspects of earthquake relief and assistance have remained scattered within the Federal bureaucracy.

This bill deals with this chaotic situation in what I believe is a sensible and balanced manner. H.R. 6683 assigns to the President the responsibility of designating a lead agency to head the earthquake hazards reduction program and of setting forth a total implementation plan for the areas of prediction and warning, preparedness, research into the causes and effects of earthquakes and the impact of earthquakes on stricken communities, Federal assistance, and joint Federal-State-local ventures in this area.

It is my hope that the well-chosen approach to a complex management problem will be adopted as a means of solving some of the other similar situations we face. I am thinking in particular of water management. Even though we have suffered from the effects of a terrible drought, we still allow water management to remain in the hands of more than 30 separate Federal agencies. As is the case with earthquake prediction and assistance, it is clear that that number of bodies, with no centralized head or authority, cannot realistically deal with natural disasters with the speed and effectiveness that is required.

Mr. Chairman, I commend the Interior Committee and the Committee on Science and Technology for their work on this bill. It is an excellent, sound approach, and one that I hope we will follow in other areas, as we begin to reorganize the Federal Government. I am confident that this plan will bring order out of the chaos that now exists.

Mr. THORNTON, Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. HALL).

Mr. HALL. Mr. Chairman, the gentleman from California (Mr. PANETTA) touched on this subject just a moment ago, and I would like to pursue it just a bit further.

On page 23 of the report there appears a list of some 30 or 40 agencies which at this time have activities affecting earthquake hazards, and the report indicates this may not be all of the list of agencies in which these assigned responsibilities exist.

I notice, Mr. Chairman, that in the last paragraph on page 15 of the report there appears this language:

> Under the bill activities would continue in agencies which have earthquake programs now, and many activities would be expanded, but the President would give each agency doing earthquake work particular responsibilities in the program so that the pieces fit together in a sensible whole.

My question is this: Will this bill bring all of these agencies under the umbrella of this Earthquake Hazards Reduction Act, or will these 35 or 40 individual agencies continue to act under the umbrella of their particular departments?

Going again to page 23 of the report, I notice there are four committees that are listed as being under the Department of Commerce and there are five listed as being under the Department of Defense. Now, without going through the rest of the list, will all of these agencies be brought under the umbrella of this act?

Mr. THORNTON. Mr. Chairman, will the gentleman yield?

Mr. HALL. I yield to the gentleman from Arkansas.

Mr. THORNTON. Mr. Chairman, the purpose of this legislation is to provide for coordination of the various efforts which have been occurring on a fragmented and noncoordinated basis.

In section 5(b) of this act, under "duties," it is provided that the President shall "within 30 days after the date of enactment of this Act, designate the Federal department, agency, or entity responsible for the development of the implementation plan * * *."

In subparagraph (3) it is provided that "By rule, within 300 days after such date of enactment" the President shall "designate the Federal department, agency, or interagency group which shall have primary responsibility for the develop-

ment and implementation of the earthquake hazards reduction program."

Following that, it is provided that he shall "assign and specify the role and responsibility of each appropriate Federal department * * *."

So it is provided by this act that these efforts will be coordinated, and that an overall purpose will be provided for these various efforts which are presently proceeding in an uncoordinated way.

Mr. HALL. Mr. Chairman, I thank the gentleman.

Mr. THORNTON. Mr. Chairman, I reserve the balance of my time.

Mr. HOLLENBECK. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I think that the point the gentleman from California (Mr. BROWN) made with regard to the fact that this is a national problem and not just a local problem confined to California or the Southeast cannot be overemphasized.

During our hearings the subcommittee was alerted to the fact that the earthquake hazard is not confined alone to those regions. My State is included among those that are subject to major or heavy seismic risks, along with other eastern coast States such as New York, Massachusetts, and South Carolina. There are many fault lines in the Eastern United States in particular that have never been adequately mapped due to funding limitations, although, as my colleague pointed out, it is estimated that a New York earthquake could be 20 times more damaging than a similar one in California, due to the age and structure of the rock in the area and its lesser ability to absorb seismic shock.

I think that other Members have in the course of debate adequately pointed out the obvious important sections of the bill: the goal of predictability, the mitigation methods to be achieved, and the dissemination system which will be created.

Obviously, Mr. Chairman, every contingency cannot be covered in this legislation, but I think this bill is a good beginning to prepare for the most likely occurrences. For example, assuming our predictive capabilities advance to a stage where it can be predicted that it is highly likely that a major earthquake will occur in a certain area, how do we deal with it? Should the public be warned? Should an evacuation be mandated?

Questions like these, with their enormous social and economic consequences, simply cannot be answered today, but this bill does provide the beginning of a program which will assure that we do find those answers.

Mr. Chairman, I urge my colleagues to support the Earthquake Hazards Reduction Act. I think it is a responsible piece of legislation. It strikes a correct balance between limiting the role of the Federal Government while initiating a badly needed program that will save lives and repay the investment many times over.

Mr. Chairman, I yield 10 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Chairman, I think it is unfortunate that there are fewer than 30 Members of the House here today to listen to this debate because, as the gentleman from California (Mr. BROWN), who handled this legislation a year ago indicated, on September 20, 1976, the House, under its suspension procedure, rejected a bill that would cost a great deal less than this one, by a vote of 192 to 192. Not only did the bill not get the required two-thirds; it did not even get a majority.

Mr. Chairman, this pending bill, in many ways, goes much further than the legislation which was turned down by the House in 1976.

The debate so far has been dominated, obviously, by the proponents of the legislation and those from the State of California who have a particular interest in this legislation. Therefore, I hope that the legislative staff here on the floor which informs Members when they come through the door to vote, depending on the whip's instructions, will at least present the view I am going to expound. It may well mean that 192 Members will be caught in the position of having voted one way last year and will be voting another way this year on an even worse bill. Consequently, an obligation rests upon someone to inform the Members as to how they did vote. I will be glad to provide any Member with a copy of the rollcall during the first consideration of this measure.

Mr. Chairman, I know that I should issue at this point a disclaimer so that it is clear that I do not favor earthquakes or the consequent human suffering they cause. I think all Members of Congress will adhere to that position. That really is not the issue. The issue here is the same one that was taken up last year, whether or not this bill is necessary, as we must always ask when legislation is proposed.

Last year in the course of the debate on the bill, the statement was made by the gentleman from California (Mr. BROWN) in response to my question, that the total authorization contained in that bill was approximately $90 million. The gentleman from Arkansas (Mr. THORNTON) and the gentleman from Texas (Mr. KAZEN) have indicated that this authorization exceeds $210 million, nearly a quarter billion dollars of the taxpayers' money which we are being asked to spend.

Mr. Chairman, if we were not already doing something in the Federal Government about this problem, I might support the legislation. However, the fact of the matter is that right now we have at least 450 employees alone in the Geological Survey of the Department of the Interior, who are devoting themselves full time to this matter. There are many others.

The gentleman from North Carolina (Mr. BROYHILL), to whom I will yield in a moment, brought to my attention earlier an entire list of agencies that will not only not be eliminated, but will continue to act even under this increased authorization.

Mr. Chairman, I yield to the gentleman from North Carolina (Mr. BROYHILL) at this point.

Mr. BROYHILL. Mr. Chairman, I appreciate the gentleman's yielding.

I wanted him to yield in order to ask him to at least amend his amendment.

He has stated that we would be spending over $200 million on this program. I do not think that we know how much we are going to be spending because, as I understand it, there are a number of agencies—and I have a list in my hand of a dozen or more agencies—of the Federal Government that are known to be engaged in activities affecting earthquake hazards and which have authority in this area.

I can find no evidence anywhere in the report which shows how much their authorizations are, so it would appear to me that the total authorizations for these programs could be several times the amount to which the gentleman has referred and could be in the upper hundreds of millions of dollars. We do not know.

Mr. BAUMAN. Mr. Chairman, I thank the gentleman from North Carolina (Mr. BROYHILL) for his correction.

Of course, he is quite right. The figure I stated was only the amounts authorized in this legislation for the National Science Foundation and for the Geological Survey in the Department of the Interior, only two of the many agencies that the report indicates are already involved in this kind of activity.

Earlier the gentleman from Missouri quite correctly pointed out to us the very broad language in this national plan for combatting earthquakes which the President is mandated to carry out by 1980, creating the possibility that even local design standards for buildings in areas over much of the United States could be dictated from the Federal level.

The answer by the gentleman from Arkansas (Mr. THORNTON) was that this was not what the language meant. But what will the bureaucrats do with this authorization?

The point I make is that we in the House spent 2 days this week debating at great length the need for the Government to hold down spending and decrease deficits.

Here the House is today in a perfectly magnificent cause, the cause of trying to predict, prevent, and limit the effects of earthquakes. Yet, we are willing to go right ahead and create another of the thousands of Federal agencies, boards, and commissions which have received so much publicity and which have led so many American citizens to despair that their money will ever be spent wisely by the Congress.

I refer you to the report by the Committee on Science and Technology where, on page 33, under "Effect of Legislation on Inflation" we read the following:

> . . . this legislation is assessed to have no detectable inflationary impact on prices and costs in the national economy.

It would seem to me that a Congress that cannot detect an inflationary im-

pact in spending that kind of money, a quarter of a billion dollars, could not possibly detect an earthquake.

Mr. Chairman, I believe this legislation should be defeated. If there is a need to refocus the actions of a number of agencies then let us pull those agencies together and force them to act in one coordinated fashion. This bill does not do that. It expands the number of employees, it expands the activities and is merely a duplication of other agencies. Therefore, in the opinion of the gentleman from Maryland, it should be defeated.

Mr. FUQUA. Mr. Chairman, one of the most urgent needs in earthquake hazards reduction is coordination among Federal agencies and coordination of Federal actions with State and local actions. This bill provides for both kinds of coordination.

For coordination on the Federal level, the bill requires that a lead agency be named and that the role of each Federal agency in the earthquake hazards reduction program be specified. The bill names 10 agencies which shall be included, where appropriate, in the program. The implementation plan mandated by the bill is required to specify the roles of Federal agencies.

For coordination between the Federal Government and States the bill has several provisions. First, the President is required to provide a method for cooperation and coordination with State and local governments. Second, the implementation plan is to recommend roles for State and local governments in the program. Third, representatives of State and local governments are to be provided an opportunity to participate in the formulation, implementation, and periodic review of the program.

These provsions for program coordination are all included in this bill. I believe it is a sound bill and I urge it be passed.

Mr. PICKLE. Mr. Chairman, it has sometimes been said that we know more about the stars than we know about our own Earth.

The causes and prediction of earthquakes are areas where it would be of immeasurable benefit for us to know a lot more than we now do. Lives and property are the front-line casualties of a serious earthquake and personal tragedy its grim harvest.

Much progress has been made in sizing up, surviving, and predicting earthquakes, but much, much more needs to be done. We especially have very little understanding of the origin of the stresses which cause earthquakes. I support the Earthquake Hazards Reduction Act before us today because it is an effort from which the entire world may gain great benefit.

Before we began consideration of this measure in the Congress, a group of scientists in my own district had been putting their minds to the problem of earthquake prediction.

They are attempting to understand the basic causes of stress and intensification of energy in the Earth's surface which result in earthquakes as well as other phenomenon. To do this, they have taken a somewhat novel approach which does not rely on seismic investigation but instead builds upon the implications of Einstein's theory of relativity as it concerns the Earth's gravitational fields and their relation to the shape of the solid mass of Earth.

This group of scientists, working at the Institute of Applied Harmonics in Austin, Tex., has written a brief description of their approach to the subject and I would like to share that information with any who may be interested at this time:

HARMONIC EARTHQUAKE PREDICTION: A DESCRIPTION OF THE THEORY AND DATA OF THE HARMONIC EARTHQUAKE PREDICTIVE MODEL

It is presently accepted among the majority of seismologists that earthquakes, or tectonic shocks, correspond to the release of elastic strain potential energy in the subsurface crust and mantle which normally manifests as ruptures or faults on the surface of the earth. Though seismology may recognize the kinetic release of the potential energy of these stresses as being an earthquake, it is unfortunate that the true significance of such observational data is, perhaps, best illustrated in the following statement from the Geophysics Research Board of the National Academy of Sciences:

"The origin of these stresses is still essentially unknown." [1]

Before discussing the problems associated with the unknowns of seismology, it would perhaps be proper to review the range of the accomplishments of seismic investigation. There have been established nationally funded seismic centers throughout the world to identify, correlate and record regular seismic activities and their exact locations. Studies of earthquake source mechanisms based on radiation patterns of seismic waves and their scalar, tensor, and vector components in relationship to the earth's crustal structure have been conducted.

The internal structure of the earth, including the core, has been studied by the analysis of body-wave patterns and their travel-time curves on and through the earth's surface and the shear waves in the inner core. Studies have also been undertaken on the nature of the free oscillations of the earth and the changes in these oscillations due to seismic activity. There has been substantial improvement in the technological quality of seismic and gravitational instrumentation. Seismology has also established data bank systems and has taken advantage of advances in electronic data processing.

It should be obvious that the aforementioned research actually deals with the effects (seismic activity is by definition an effect), rather than with the causes of earthquakes. The assumption is that by examining the effects the causes can be arrived at inductively. More recent emphasis in earthquake research has been on the possibility of correlating seismological data with geophysical data. The Geophysics Research Board stated that:

"The extent to which gravity measurements will contribute to the analytical study of the deeper structure of the earth will depend on improved methods of analysis and the rate at which seismological and other geophysical data can be accumulated and gravity observations reconciled with them." [2]

It is evident from this statement that there is a growing awareness of the need to study possible sources of the stresses which result in earthquakes and that a greater understanding of the nature and mechanisms of gravitational fields is essential to this effort.

The nature of gravitational forces was first postulated in the laws of Newton in the 17th century. It should be recalled that Newton was studying the apparent effect of all objects falling at the same rate regardless of inertial mass. This observational and empirical data of bodies in motion which were describing orderly, mathematical orbits (i.e. planetary systems and free-falling bodies) established Newton's gravitational hypothesis that a force of attraction between bodies depends only upon their masses and the distance between them. It should be noted that Newton's conception of a 'gravitational force' is the idea of the 'action-at-a-distance' of modern Newtonian physics and is the causative idea which explains the actual apparent motion of bodies. Seismology and geophysics generally continue to use Newtonian concepts of gravitational force despite the implications of Einstein's Theory of Relativity concerning the nature and source of gravitational fields.

In a speech given at the University of Berlin in 1922, Einstein said:

"According to the general theory of relativity space is endowed with physical qualities . . ." [3]

He further stated that:

"There can be no space nor any part of space without gravitational potentials; for these confer upon space its metrical qualities, without which it cannot be imagined at all. The existence of the gravitational field is inseparably bound up with the existence of space." [4]

On the basis of these considerations, Einstein mathematically deduced equations describing the "field properties" of the gravitational field and its relationship to his "space-time continuum" concept.

It is evident that Einstein considered gravity to be an essential property of space and not a force existing after the fact of the structure of space or the attraction of bodies existing within space, for he also observed that the configurative possibilities of solid bodies are related to gravitational fields. This clearly implies that solid bodies must be considered as a physical quality of space in conjunction with gravitational fields. The obvious application of this to geophysical studies is that an understanding of the earth as a solid body would necessarily provide knowledge of the gravitational field. Such an approach would be the basis of an "analytical study of the deeper structures of the earth" that were previously mentioned as having been called for by the Geophysics Research Board.

The study of the properties and commensurations of solid bodies and three-dimensional space is known as stereometry. The Institute of Applied Harmonics has developed practical applications of stereometric principles which have made possible the formulation of specific research projects. One such application is fundamental to the IAH's Harmonic Earthquake Predictive Model project. By the principles of stereometry the metrical qualities of sphericity apply to all particular spheres. Similarly, the metrical qualities of all configurative possibilities of solid bodies would apply to all particular instances of these possibilities, regardless of distinctive qualities, including volume, area, diameter, substance or any conceivable distinguishing quality whatsoever. Having determined the metrical qualities of the earth as a solid body by the application of stereometric principles, it is logically possible to deduce the nature of the earth's gravitational potentials, for as previously mentioned, Einstein pointed out that gravitational potentials confer metrical qualities upon space and are thus related to form.

On the basis of such considerations and considerations of the IAH's Theory of the Dimensional Generation of Form, the IAH was able to postulate, in the spring of 1974, the existence of a grid of energy on the earth whose metrical configuration corresponds to particular polyhedric shapes.

Footnotes at end of article.

The IAH was soon to learn of the corroboration of the planetary grid hypothesis. It was not without alarm that we received the information that the empirical evidence of the actual existence of the planetary grid had been discovered by Soviet scientists. In May, 1975, an article entitled "Planetary Grid" appeared in the New Age Journal magazine. The author, Chris Bird, who was in communication with the particular Russian scientists, described how this information was substantiated by analysis of polarized light photographs of the earth's surface. It was also noted that the grid pattern was seen by the Russians to consist of polyhedric configurations of energy which they considered to be of a geomagnetic nature.

Ironically, though the Soviets have empirically substantiated the IAH's hypothesis, they have apparently been unable to effectively initiate research applications. This situation could be explained in one of two ways: either they do not have an adequate conceptual framework, or, as is quite possible, such research might have received national security priority.

The significance of the planetary energy grid can be elucidated by a further examination of Einstein's gravitational theories. We have seen that his view is that the possible metrical configurations of solid bodies are inherently related to gravitational fields. Erwin Freundlich in his work. The Foundations of Einstein's Theory of Gravitation, commented on this point:

"Einstein's theory of gravitation is based upon the view that the gravitational forces are the 'binding forces,' i.e. they represent the 'inner ground' of the metric conditions (measure relations) of the space-time-manifold.[5]"

The planetary grid, then, represents the "binding forces" of the "inner ground" of the metric conditions of the earth as a three dimensional solid in the space-time-manifold, (space-time continuum).

It should be pointed out that although the binding forces are referred to as being of a gravitational nature and the planetary grid is referred to as being of a geomagnetic nature, it should not be forgotten that the basis of Einstein's Unified Field Theory is that gravity and geomagnetism are aspects of one unified field. Accordingly, it is quite likely that the planetary grid exhibits properties of both gravitational and geomagnetic fields. It is of particular importance to the proposed Harmonic Earthquake Predictive Model, as it is based on the planetary grid hypothesis, that the manifestation of the energies of the "binding forces" i.e. the grid, fluctuates at particular points. This is consistent with Freundlich's observation that:

"The inner ground of metric relations of the space-time-manifold, in which all physical events take place, lies, according to Einstein's view, in the gravitational conditions. Owing to the continual motion of bodies relative to one another, these gravitational conditions are continually altering . . .[6]"

This alteration in gravitational conditions has been observed by George S. Massingill and discussed in his thesis, An Investigation of Periodicity in the Earth's Gravitational Field.

As might be expected from the previous discussion of Einstein's Unified Field Theory, there are also alterations or fluctuations in the earth's electromagnetic field. It is highly significant that there are strong indications that these fluctuations may correspond directly to earthquake activity. Roger D. Boeka in his thesis, "Correlation of Earthquakes With Low Frequency Fluctuations in the Telluric Field," said:

"Many anomalous changes in the electric field of the earth, or telluric field as it is sometimes called, have been noted in connection with earthquakes. For example, sharp changes in telluric currents have been observed near the times of sizable earthquakes (Richter magnitude 4 or greater) as have induced electric potentials in the atmosphere.[7]"

The IAH, as an extension of its planetary grid hypothesis and upon consideration of the alterations and fluctuations of gravitational and electromagnetic fields of the earth, anticipated that there would be a periodic intensification of energy at a given point on the planetary grid. This is supported by the Russians' observation that:

"There is evidence that the intersections of the grid, which makes up a kind of power matrix, are activated alternately, like traffic lights, and operate for certain intervals of time.[8]"

It should be obvious from this discussion of the source and nature of the gravitational and electromagnetic fields of the earth, their fluctuations and their apparent correspondences to earthquake activity, that this intensification of energy on the grid pattern must be seriously considered in its possible correspondence to earthquake activity and as a possible triggering mechanism of such activity.

It should be pointed out, however, that even if this triggering mechanism could be proven to exist, this would not result in a predictive model unless the energy fluctuations are related to time and the configurative possibilities of solid bodies in the space-time continuum. A predictive model could be derived only if the fluctuations could be shown to occur cyclically or in a periodic manner. The aforementioned research and application of stereometric considerations of the configurative possibilities of solid bodies indicates the likelihood that these fluctuations do occur in predictable cycles which can be discerned from an exhaustive knowledge of the metrical qualities of the earth as a solid body.

It is important to note at this point that earthquakes have been statistically shown to occur in cycles. This is reported on by Edward R. Dewey in his work, "Cycles: The Mysterious Forces That Trigger Events." The IAH considers it of manifest importance that earthquake cycles be studied conjointly with the cycles of fluctuation of the geomagnetic and gravitational fields. The Harmonic Earthquake Predicative Model would incorporate such cycle data within the conceptual framework provided by the stereometric principles of the planetary grid. The resultant collation of these apparently unrelated phenomena would establish casual correspondences that would result in a predictive model.

It was previously mentioned that even if the triggering mechanism were determined and its periodic fluctuations were established this would not in itself provide a predictive model. Even if the triggering mechanism's cycles were corresponded with earthquake cycles the predictive model would not result. It would first be necessary to correlate the periodicity of space with that of time. The fact that natural phenomena occur cyclically is evidence of the periodic property of time. Dewey's research has determined that:

". . . there are thousands of rythmic cycles in our world for which there is no logical explanation, no known cause."[9]

By an extension of stereometric principles the nature and cause of the periodic property of time may be shown to correspond with the periodic property of space. This correspondence in the particular area of earthquake activity would result in an earthquake predictive model that would accurately define the periodicity of earthquake cycles in terms of both time and space such that the precise location and date of future earthquakes could be determined.

The application of the principles of stereometric research indicates that predictive models similar to the IAH-Harmonic Earthquake Predictive Model can be constructed in many areas of naturally cyclic phenomena.

Mr. ANDERSON of California. Mr. Chairman, I rise in support of H.R. 6683, the Earthquake Hazards Reduction Act of 1977.

Without a doubt, our country will be hit by a future earthquake. This bill represents an attempt to prevent death and destruction from earthquakes.

The need for a program is self-evident. Last year, 1976, more than 700,000 people died worldwide as a result of earthquakes. Compare this to the fact that 1,200 people have lost their lives in U.S. earthquakes.

In my own area of southern California, estimates of $25 billion in devastated property, and an incredible loss of 12,000 people have been put forth if the "Palmdale Bulge" becomes a major earthquake.

Moreover, earthquakes are definitely not a west coast problem, since some 70 million Americans live in the 39 States that are wholly or partly in earthquake areas. This legislation should be of vital interest to them.

During our 200-year history, major earthquakes have struck Cape Ann, Mass., 1775; New Madrid, Mo., 1811–12; Charleston, S.C., 1886; San Francisco, Calif., 1906; Long Beach, Calif., 1933; Seattle, Wash., 1949; Hebgen Lake, Mont., 1959; the "Good Friday" earthquake near Anchorage, Alaska in 1964;

and the San Fernando Valley, Calif., quake, 1971.

Worldwide, some 74 million people have died as a result of earthquakes. The second quarter of the 20th century saw 350,000 people lose their lives in earthquakes and related disasters.

I urge my colleagues to join me in support of this needed legislation and pass H.R. 6683.

Mr. TEAGUE. Mr. Chairman, I support the bill, H.R. 6683. The purpose of the bill is to reduce the risks of life and property from future earthquakes in the United States through the establishment and maintenance of an effective earthquake hazards reduction program.

This bill is needed to lessen the severe threat of earthquake damage faced by the United States. There is no State that is free from any chance of earthquakes and at least 39 States face severe or moderate earthquake risks.

The most damaging recent earthquake in the United States hit San Fernando, Calif., in 1971. It killed 65 people and caused about half a billion dollars in property damage. Scientific studies indicate that a repeat of the 1906 San Francisco earthquake could cause 20,000 deaths and $20 billion in property damage.

Compared with other countries the United States has been lucky. Since February a year ago six different countries have had an earthquake that killed more than a thousand people. The greatest recent earthquake killed 655,000 people in China last July. There are ways to prevent deaths if it is known that an earthquake will occur.

Just moving outdoors and out of the way of falling objects is the easiest way to avoid harm. Tens of thousands of lives are estimated to have been saved in China during 1975 when people were moved outdoors just before a large quake occurred as predicted. The key to safety is accurate prediction. The United States needs improved prediction capabilities.

There are also ways to prevent or lessen property damage. Some of these require a prediction to be made, but others do not. For instance, houses and other structures can be designed and built to resist earthquake damage. But not enough is known about earthquake resistant design, especially inexpensive design.

In relation to the severity of the earthquake threat in the United States this country has not provided adequate funds for earthquake programs and has not adequately coordinated the programs that do exist.

The bill, H.R. 6683 authorizes the funding of Federal earthquake programs at an adequate but not excessive level. The bill also has provisions to coordinate Federal earthquake programs and to keep Federal efforts in step with State, local, and private efforts to reduce earthquake hazards.

The bill establishes an earthquake hazards reduction program and requires the President to take a number of actions. First, within a month of enactment of the bill the President must start developing an implementation plan.

The plan is to be submitted to Congress within 210 days of enactment. Second, within 300 days of enactment the President must designate a lead agency, assign responsibilities in the program to appropriate agencies, and establish goals and target dates for the program. Third, the President must provide an opportunity for participation in the program by representatives of State and local governments and expert public groups. Fourth, the President must submit an annual report on the program to Congress.

Because more knowledge is needed about all aspects of earthquakes the bill requires research into nine areas:

First, basic earthquake causes.

Second, earthquake prediction.

Third, artificial induction of earthquakes.

Fourth, earthquake modification or control.

Fifth, preparation of risk analyses and land use guidelines.

Sixth, earthquake effects.

Seventh, methods of designing and building manmade works to resist earthquakes.

Eighth, social and economic adjustments that could lessen the harm done by earthquakes.

Ninth, foreign experience with earthquakes.

The implementation plan required by the bill is to provide for:

First. Preparations for earthquakes—including prediction evaluation, earthquake warnings, and response planning.

Second. Development of ways for State and local governments to use information about earthquake risks in land use planning.

Third. Development of standards and codes for earthquake resistance in structures.

Fourth. Examination of how earthquake hazards can be reduced through Federal construction, loans, and licenses.

Fifth. Determination of the appropriate roles of insurance, loans, and relief in moderating the impact of earthquakes.

Sixth. Dissemination of information about all aspects of earthquakes.

Authorizations given in the bill are for 3 fiscal years 1978, 1979, and 1980. The authorizations are for general purposes, for the U.S. Geological Survey, and for the National Science Foundation. The total amounts are $56 million in fiscal year 1978, $72 million in fiscal year 1979, and $82 million in fiscal year 1980.

These amounts are by no means excessive. An advisory committee to the Foundation and the Survey has formulated possible budgets for earthquake research at low, medium, and high levels. The amounts authorized by the bill over 3 years are nearly identical to the medium level of funding recommended by the committee.

The administration supports this bill and agrees that the level of funding for the program is appropriate.

In conclusion, Mr. Chairman, this is an urgently needed bill. It should be passed today by the House.

Mr. HOLLENBECK. Mr. Chairman, I have no further requests for time and yield back the balance of my time.

Mr. THORNTON. Mr. Chariman, I have no further requests for time and yield back the balance of my time.

The CHAIRMAN. If there are no further requests for time, pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs, now printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 6683

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

That this Act may be cited as the "Earthquake Hazards Reduction Act of 1977".

SEC. 2. FINDINGS.

The Congress finds and declares the following:

(1) All 50 States are vulnerable to the hazards of earthquakes, and at least 39 of them are subject to major or moderate seismic risk, including Alaska, California, Hawaii, Illinois, Massachusetts, Missouri, Montana, Nevada, New Jersey, New York, South Carolina, Utah, and Washington. A large portion of the population of the United States lives in areas vulnerable to earthquake hazards.

(2) Earthquakes have caused, and can cause in the future, enormous loss of life, injury, destruction of property, and economic and social disruption. With respect to future earthquakes, such loss, destruction, and disruption can be substantially reduced through the development and implementation of earthquake hazards reduction measures, including (A) improved design and construction methods and practices, (B) land-use controls and redevelopment, (C) prediction techniques and early-warning systems, (D) coordinated emergency preparedness plans, and (E) public education and involvement programs.

(3) An expertly staffed and adequately financed earthquake hazards reduction program, based on Federal, State, local, and private research, planning, decsionmaking, and contributions would reduce the risk of such loss, destruction, and disruption in seismic areas by an amount far greater than the cost of such program.

(4) A well-funded seismological research program in earthquake prediction could provide data adequate for the design, of an operational system that could predict accurately the time, place, magnitude, and physical effects of earthquakes in selected areas of the United States.

(5) An operational earthquake prediction system can produce significant social, economic, legal, and political consequences.

(6) There is a scientific basis for hypothesizing that major earthquakes may be moderated, in at least some seismic areas, by application of the findings of earthquake control and seismological research.

(7) The implementation of earthquake hazards reduction measures would, as an added benefit, also reduce the risk of loss, destruction, and disruption from other natural hazards and manmade hazards, including hurricanes, tornadoes, accidents, explosions, landslides, building and structural cave-ins, and fires.

(8) Reduction of loss, destruction, and disruption from earthquakes will depend on the actions of individuals and organizations in the private sector and governmental units at Federal, State, and local levels. The current capability to transfer knowledge and information to these sectors is insufficient

Improved mechanisms are needed to translate existing information and research findings into reasonable and usable specifications, criteria, and practices so that individuals, organizations, and governmental units may make informed decisions and take appropriate actions.

(9) Severe earthquakes are a worldwide problem. Since damaging earthquakes occur infrequently in any one nation, international cooperation is desirable for mutual learning from limited experiences.

(10) An effective Federal program in earthquake hazards reduction will require input from and review by persons outside the Federal Government expert in the sciences of earthquake hazards reduction and in the practical application of earthquake hazards reduction measures.

SEC. 3. PURPOSE.

It is the purpose of the Congress in this Act to reduce the risks of life and property from future earthquakes in the United States through the establishment and maintenance of an effective earthquake hazards reduction program.

SEC. 4. DEFINITIONS.

As used in this Act, unless the context otherwise requires:

(1) The term "includes" and variants thereof should be read as if the phrase "but is not limited to" were also set forth.

(2) The term "program" means the earthquake hazards program established under section 5.

(3) The term "seismic" and variants thereof mean having to do with, or caused by earthquakes.

(4) The term "State" means each of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Mariana Islands, and any other territory or possession of the United States.

(5) The term "United States" means when used in a geographical sense, all of the States as defined in section 4(4).

SEC. 5. NATIONAL EARTHQUAKE HAZARDS REDUCTION PROGRAM

(a) Establishment.—The President shall establish and maintain, in accordance with the provisions and policy of this Act, a coordinated earthquake hazards reduction program, which shall—

(1) be designed and administered to achieve the objectives set forth in subsection (c);

(2) involve, where appropriate, each of the agencies listed in subsection (d); and

(3) include each of the elements described in subsection (e), the implementation plan described in subsection (f), and the assistance to the States specified in subsection (g).

(b) Duties.—The President shall—

(1) within 30 days after the date of enactment of this Act, designate the Federal department, agency, or entity responsible for the development of the implementation plan described in subsection (f);

(2) within 210 days after such date of enactment, submit to the appropriate authorizing committees of the Congress the implementation plan described in section (f); and

(3) by rule, within 300 days after such date of enactment—

(A) designate the Federal department, agency, or interagency group which shall have primary responsibility for the development and implementation of the earthquake hazards reduction program;

(B) assign and specify the role and responsibility of each appropriate Federal department, agency and entity with respect to each object and element of the program;

(C) establish goals, priorities, and target dates for implementation of the program;

(D) provide a method for cooperation and coordination with, and assistance (to the extent of available resources) to, interested governmental entities in all States, particularly those containing areas of high or moderate seismic risk; and

(E) provide for qualified staffing for the program and its components.

(c) OBJECTIVES.—The objectives of the earthquake hazards reduction program shall include—

(1) the development of technologically and economically feasible design and construction methods and procedures to make new and existing structures, in areas of seismic risk, earthquake resistant, giving priority to the development of such methods and procedures for nuclear power generating plants, dams, hospitals, schools, public utilities, public safety structures, high occupancy buildings, and other structures which are especially needed in time of disaster;

(2) the implementation in all areas of high or moderate seismic risk, of a system (including personnel, technology, and procedures) for predicting damaging earthquakes and for identifying, evaluating, and accurately characterizing seismic hazards;

(3) the development, publication, and promotion, in conjunction with State and local officials and professional organizations, of model codes and other means to coordinate information about seismic risk with land-use policy decisions and building activity;

(4) the development, in areas of seismic risk, of improved understanding of, and capability with respect to, earthquake-related issues, including methods of controlling the risks from earthquakes, planning to prevent such risks, disseminating warnings of earthquakes, organizing emergency services, and planning for reconstruction and redevelopment after an earthquake;

(5) the education of the public, including State and local officials, as to earthquake phenomena, the identification of locations and structures which are especially susceptible to earthquake damage, ways to reduce the adverse consequences of an earthquake, and related matters;

(6) the development of research on—

(A) ways to increase the use of existing scientific and engineering knowledge to mitigate earthquake hazards;

(B) the social, economic, legal, and political consequences of earthquake prediction; and

(C) ways to assure the availability of earthquake insurance or some functional substitute; and

(7) the development of basic and applied research leading to a better understanding of the control or alteration of seismic phenomena.

(d) PARTICIPATION.—In assigning the role and responsibility of Federal departments, agencies, and entities under subsection (b)(3)(B), the President shall, where appropriate, include the United States Geological Survey, the National Science Foundation, the Department of Defense, the Department of Housing and Urban Development, the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, the National Bureau of Standards, the Energy Research and Development Administration, the Nuclear Regulatory Commission, and the National Fire Prevention and Control Administration.

(e) RESEARCH ELEMENTS.—The research elements of the program shall include—

(1) research into the basic causes and mechanisms of earthquakes;

(2) development of methods to predict the time, place, and magnitude of future earthquakes;

(3) development of an understanding of the circumstances in which earthquakes might be artificially induced by the injection of fluids in deep wells, by the impoundment of reservoirs, or by other means;

(4) evaluation of methods that may lead to the development of a capability to modify or control earthquakes in certain regions;

(5) development of information and guidelines for zoning land in light of seismic risk in all parts of the United States and preparation of seismic risk analyses useful for emergency planning and community preparedness;

(6) development of techniques for the delineation and evaluation of the political effects of earthquakes, and their application on a regional basis;

(7) development of methods for planning, design, construction, rehabilitation, and utilization of manmade works so as to effectively resist the hazards imposed by earthquakes;

(8) exploration of possible social and economic adjustments that could be made to reduce earthquake vulnerability and to exploit effectively existing and developing earthquake mitigation techniques; and

(9) studies of foreign experience with all aspects of earthquakes.

(f) IMPLEMENTATION PLAN.—The President shall develop, through the Federal agency, department, or entity designated under subsection (b)(1), an implementation plan which shall set year-by-year targets through at least 1980, and shall specify the roles for Federal agencies, and recommended appropriate roles for State and local units of government, individuals, and private organizations, in carrying out the implementation plan. The plan shall provide for—

(1) the development of measures to be taken with respect to preparing for earthquakes, evaluation of prediction techniques and actual predictions of earthquakes, warning the residents of an area that an earthquake may occur, and ensuring that a comprehensive response is made to the occurrence of an earthquake;

(2) the development of ways for State, county, local, and regional governmental units to use existing and developing knowledge about the regional and local variations of seismic risk in making their land use decisions;

(3) the development and promulgation of specifications, building standards, design criteria, and construction, practices to achieve appropriate earthquake resistance for new and existing structures;

(4) an examination of alternative provisions and requirements for reducing earthquake hazards through Federal and federally financed construction, loans, loan guarantees, and licenses;

(5) the determination of the appropriate role for insurance, loan programs, and public and private relief efforts in moderating the impact of earthquakes; and

(6) dissemination, on a timely basis, of—

(A) instrument-derived data of interest to other researchers;

(B) design and analysis data and procedures of interest to the design professions and to the construction industry; and

(C) other information and knowledge of interest to the public to reduce vulnerability to earthquake hazards.

When the implementation plan developed by the President under this section contemplates or proposes specific action to be taken by any Federal agency, department, or entity, and, at the end of the 30-day period beginning on the date the President submits such plan to the appropriate authorizing committees of the Congress any such action has not been initiated, the President shall file with such committees a report explaining, in detail, the reasons why such action has not been initiated.

(g) STATE ASSISTANCE.—In making assistance available to the States under the Disaster Relief Act of 1974 (42 U.S.C. 5121 et seq.), the President may make such assistance available to further the purposes of this Act, including making available to the States

the results of research and other activities conducted under this Act.

(h) PARTICIPATION.—In carrying out the provisions of this section, the President shall provide an opportunity for participation by the appropriate representatives of State and local governments, and by the public, including representatives of business and industry, the design professions, and the research community, in the formulation and implementation of the program.

Such non-Federal participation shall include periodic review of the program plan, considered in its entirety, by an assembled and adequately staffed group of such representatives. Any comments on the program upon which such group agrees shall be reported to the Congress.

Measures developed pursuant to paragraph 5(f)(1) for the evaluation of prediction techniques and actual predictions of earthquakes shall provide for adequate non-Federal participation. To the extent that such measures include evaluation by Federal employees of non-Federal prediction activities, such measures shall also include evaluation by persons not in full-time Federal employment of Federal prediction activities.

SEC. 6. ANNUAL REPORT.

The President shall, within ninety days after the end of each fiscal year, submit an annual report to the appropriate authorizing committees in the Congress describing the status of the program, and describing and evaluating progress achieved during the preceding fiscal year in reducing the risks of earthquake hazards. Each such report shall include any recommendations for legislative and other action the President deems necessary and appropriate.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

(a) GENERAL.—There are authorized to be appropriated to the President to carry out the provisions of sections 5 and 6 of this Act (in addition to any authorizations for similar purposes included in other Acts and the authorizations set forth in subsections (b) and (c) of this section), not to exceed $1,000,000 for the fiscal year ending September 30, 1978, not to exceed $2,000,000 for the fiscal year ending September 30, 1979, and not to exceed $2,000,000 for the fiscal year ending September 30, 1980.

(b) GEOLOGICAL SURVEY.—There are authorized to be appropriated to the Secretary of the Interior for purposes for carrying out, through the Director of the United States Geological Survey, the responsibilities that may be assigned to the Director under this Act not to exceed $27,500,000 for the fiscal year ending September 30, 1978; not to exceed $35,000,000 for the fiscal year ending September 30, 1979; and not to exceed $40,000,000 for the fiscal year ending September 30, 1980.

(c) NATIONAL SCIENCE FOUNDATION.—To enable the Foundation to carry out responsibilities that may be assigned to it under this Act, there are authorized to be appropriated to the Foundation not to exceed $27,500,000 for the fiscal year ending September 30, 1978; not to exceed $35,000,000 for the fiscal year ending September 30, 1979; and not to exceed $40,000,000 for the fiscal year ending September 30, 1980.

Mr. THORNTON (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The CHAIRMAN. If there are no amendments to be offered, the question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DAN DANIEL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6683) to reduce the hazards of earthquakes, and for other purposes, pursuant to House Resolution 639, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 229, nays 125, not voting 80, as follows:

[Roll No. 532]

The Clerk announced the following pairs:

Mr. Addabbo with Mr. Sisk.
Mrs. Boggs with Mr. Roncalio.
Mr. Delaney with Mr. Moss.
Mr. Fascell with Mr. Dent.
Mr. Rostenkowski with Mr. Patterson of California.
Mr. Badillo with Mr. Dicks.
Mr. Murphy of New York with Mr. Diggs.
Mr. Richmond with Mr. Anderson of Illinois.
Mr. Conyers with Mr. Moffett.
Mr. Fountain with Mr. Cederberg.
Mr. Bingham with Mr. Wydler.
Mrs. Chisholm with Mr. Aspin.
Mr. Hanley with Mr. Cochran of Mississippi.
Mr. Ford of Michigan with Mr. Findley.
Mr. Koch with Mr. Winn.
Mr. Brooks with Mr. Cohen.
Mr. Waggonner with Mr. Cunningham.
Mr. Johnson of California with Mr. Dickinson.
Mr. Florio with Mr. Krueger.
Mr. Biaggi with Mr. Dornan.
Mr. Harrington with Mr. Leggett.
Mr. Clay with Mr. Bonker.
Mr. Risenhoover with Mr. Quie.
Mr. Gilman with Mr. Symms.
Mr. Rangel with Mr. Howard.
Mr. Charles Wilson of Texas with Mr. Stangeland.
Mr. Metcalfe with Mr. Cotter.
Mr. Wirth with Mr. Quillen.
Mr. Steiger with Mr. Lent.
Mr. Zeferetti with Mr. Livingston.
Mr. Mitchell of Maryland with Mr. Corman.
Mr. Pritchard with Mr. Madigan.
Ms. Mikulski with Mr. Beard of Rhode Island.
Mr. John L. Burton with Mr. Roe.
Mr. Young of Alaska with Mr. Roybal.
Mr. St Germain with Mr. Chappell.
Mr. Wampler with Mr. Vanik.

Messrs. WIGGINS, BREAUX, LEVITAS, MARRIOTT, APPLEGATE, PIKE, and GUYER changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. THORNTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter in the RECORD on the bill just passed, H.R. 6683.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. THORNTON. Mr. Speaker, pursuant to House Resolution 639, I call up from the Speaker's table the Senate bill (S. 126) to reduce the hazards of earthquakes, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. THORNTON

Mr. THORNTON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THORNTON moves to strike out all after the enacting clause of the Senate bill S. 126, and to insert in lieu thereof the provisions of the bill H.R. 6683, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 6683) was laid on the table.

LEGISLATIVE PROGRAM

Mr. MICHEL. Mr. Speaker, I take this time for the purpose of inquiring of the distinguished majority leader the program for the balance of the day, if any, and the program for next week.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Texas.

Mr. WRIGHT. I thank the gentleman for yielding.

Mr. Speaker, in response to the question from the gentleman from Illinois (Mr. MICHEL), there is one more bill for our action today, it being the Climate Program Act of 1977, H.R. 6669, an open rule, which we adopted earlier, with 1 hour of debate.

When that bill is completed, the business for the week will be concluded, and it is anticipated that the House would adjourn at approximately 3 p.m.

Next week the House will meet at noon on Monday. At the present time we have 13 bills scheduled on the Suspension Calendar. They are as follows:

H.R. 3455, Nuclear Regulatory Commission authorizations;

H.R. 3454, Endangered American Wilderness Act;

H.R. 8698, veterans benefits pursuant to upgraded discharges;

H.R. 8701, GI Bill Improvements Act;

H.R. 8175, Extension of Physicians' and Dentists' Pay Comparability Act;

H.R. 4341, eliminating certain VA requirements for inspections of mobile homes manufacturing process;

H.R. 6803, Oil Pollution Liability and Compensation Act;

H.R. 4740, Marine Mammal Protection Act, fiscal year 1978 authorizations;

H.R. 3702, improve Armed Forces survivor and retirement benefits;

H. Con. Res. 282, apportionment of funds for interstate highways;

H.R. 8094, Federal Reserve Reform Act of 1977;

H.R. 8423, renal disease program amendment to Social Security Act; and

S. 1752, ESEA extension.

Those bills are scheduled for votes under suspension of the rules. All votes on suspension will be postponed until completion of all suspensions.

Following that, there are two bills on the District Calendar, which are as follows:

H.R. 6530, to provide authority to borrow from U.S. Treasury; and

H.R. 5813, to revise annual Federal payment for District water and sewer service.

We hope to have the conference report on H.R. 5262, dealing with international financial institutions.

All of that is for Monday.

On Tuesday and Wednesday of next week the House will meet at noon, and we hope to conclude general debate on six separate bills. Rules have already been granted for these bills. It is planned, in observance of the Jewish holidays, that we will have no votes on Tuesday and Wednesday, but we do hope to conclude general debate on the following bills:

H.R. 3744, the Fair Labor Standards Act Amendments of 1977—that, of course, is the minimum wage bill;

H.R. 6566, ERDA authorizations for national security programs for fiscal year 1978;

H.R. 6796, ERDA authorization for civilian research and development;

H.R. 7010, compensation for victims of crime;

H.R. 5383, Age Discrimination in Employment Act Amendments of 1977; and

H.R. 2176, Federal Banking Agency Audit Act.

I repeat that we would involve ourselves only in the concluding of general debate on those six named measures on Tuesday and Wednesday.

On Thursday and Friday of next week the House will meet at 10 a.m. We hope to have for consideration the conference report on House Concurrent Resolution 341, the Second Budget Resolution.

Then we would hope to take up and vote on amendments and final passage of the bill, H.R. 3744, the Fair Labor Standards Act Amendments of 1977.

Following that, we would hope to take up H.R. 4544, Black Lung Benefits Reform Act of 1977; and H.R. 5383, Age Discrimination in Employment Act Amendments of 1977.

Subject to a rule being granted, we would then take up H.R. 8638, Nuclear Antiproliferation Act of 1977.

Then we would vote on amendments and, hopefully, on final passage of the bills on ERDA authorizations for national security programs; and the ERDA authorization for civilian research and development.

The House would adjourn at 3 p.m. on Friday and at 5:30 p.m. on all other days except Wednesday.

Conference reports may be brought up at any time, of course, and any further program will be announced later.

Mr. Speaker, let me make this announcement at this time, because I know there is considerable interest in this, and the Members may want to make plans. A change has been made in the originally scheduled recess or home district work period for the Columbus Day holiday.

Rather than taking the time initially planned, it now has been decided that we will take off only the previous Friday and Monday the 10th of October, 2 days. Thus we will be off from the close of business on Thursday, October 6, until the commencement of business on Tuesday, October 11.

Mr. MICHEL. Mr. Speaker, let me ask this question:

Would there be a clear understanding that there would be only general debate on any bills on that Tuesday when we come back?

Mr. WRIGHT. I cannot give the gentleman that absolute assurance. It is likely that the schedule would involve principally general debate. We would hope to arrange it that way, but it is

impossible for the leadership at this time to give an absolute assurance that there would be no votes. In any case, we will attempt to make it a light schedule.

Mr. MICHEL. I appreciate that.

Mr. Speaker, if the majority leader will respond to one further question, let me say that is a pretty big order for Thursday and Friday for the consideration of amendments and bills, including the Fair Labor Standards Act Amendments of 1977, black lung, et cetera.

Are we to assume that those bills will be considered in that precise order, or would there be an adjustment in the schedule there?

Mr. WRIGHT. The present plan is to consider them in the order in which I have listed and mentioned them. That is subject to change, however.

Mr. MICHEL. And how about the District of Columbia appropriation bill, which has been on and off the schedule? I notice that it does not show on the program for next week.

Mr. WRIGHT. It is the present plan to schedule that legislation for the week which follows, or earlier if possible.

Mr. MICHEL. Mr. Speaker, I thank the majority leader.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday of next week.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT TO MONDAY, SEPTEMBER 12, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

NATIONAL CLIMATE PROGRAM ACT OF 1977

Mr. BROWN of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6669) to establish a national climate program, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. BROWN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 6669, with Mr. DAN DANIEL in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from California (Mr. BROWN) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. WALKER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Chairman, several days of hearings held in our committee have conclusively demonstrated to me the need for a new Federal effort to develop a climate program. This has also been very clearly demonstrated to the man in the street as a result of the extraordinarily cold winter that we have just passed through. I know that you and all our colleagues remember the barges frozen in the Ohio River—barges carrying the heating oil that was desperately needed to keep factories open and homes warm. I know you all remember the plants that were shut down for a lack of natural gas in the East, while at the same time there was natural gas available in other parts of the country.

John O'Leary, Administrator of the Federal Energy Administration, testified this spring in hearings before our Committee that we could have saved many millions—perhaps billions—of dollars last winter if we had had better generalized climate information in advance. If we had known in advance that there would be an extremely cold winter in the East and a milder winter in other parts of the country, we could have reallocated our energy supplies and avoided many of the extra costs, specifically and especially costs of lost production in the shut down factories. It is important to point out here that we did not need to know what the weather would be—we did not need to know that it would snow on a certain day at a certain time in a certain place. What was needed, and what would have been made available had this bill been enacted last year, would be knowledge that we could expect a severe, cold winter over most of the eastern United States and, at the same time, a relatively mild winter in other parts so that we could have shifted our heating supplies. While specific weather predictions—a snow storm in a certain place at a certain time—cannot be made very far in advance, it is nevertheless becoming possible to make predictions as to the climate months in advance. In fact, there are indications that there was information about this winter which was buried in the scientific bureaucracies and not made available in a timely and useful form to people responsible for making energy decisions.

Another generalized way of looking at this problem and the need for this bill is that our society is becoming more centralized and more mechanized, more dependent upon imports, and has at the same time become much more vulnerable to effects of the climate. It should be noted that we have had a twenty year period of extremely favorable agricultural climate. At the beginning of this period of favorable conditions, we accumulated large agricultural surpluses. More recently we have reduced these surpluses. Now we find that as this period of good weather may be drawing to a close, we have drawn down our reserves to a dangerously small level. Among other things, the bill before you today, H.R. 6669, would provide for an assessment of how climatic variation might impact our grain reserves.

Many reports have been prepared on the need for and the importance of a Federal climate program. Our committee issued such a report last year. In 1974, the Domestic Council issued a report which called for a program very similar to the one contained in this bill. In 1976, the Central Intelligence Agency issued a report on the importance of the climate to political stability. Finally, there is also a draft report on a plan for a U.S. climate program now in the process of being cleared by the executive branch. This report was prepared by the Interagency Committee on Atmospheric Sciences, and has existed in one draft after another in the executive branch for many, many months. We have been told several times that this plan is about to emerge, but it has not as of this date.

Let me now very briefly describe the functions of the climate program which this bill sets up. There are five principal functions. First, the monitoring of climatic variables and related phenomena. Second, climatic research, both research into theories and models of the climate and also into the history of past climatic fluctuation and change. The third element has to do with the use of models and theories developed as a result of research to make climatic predictions, as far as this is possible. Here the committee realizes that precise predictions may not be possible and so we provide for the generation of what we call "climatic outlooks," which would be probable climatic states. Fourth, impact assessment. This function has to do with determining the probable impact of a climatic change or fluctuation on various aspects of society. A simple example would be the impact of last year's winter on our energy situation. The fifth and final function is information dissemination. This is meant to be a very active function under which program results would be made available to all users in a form that they can best employ.

The bill provides that the President will name a lead agency to coordinate and administer the Federal climate program. I want to emphasize that while the lead agency does coordinate and to some extent administer the program, the lead agency would not carry out all the functions of the program and would not be empowered to reach into another agency and tell that agency how to carry out its climate-related activities.

A specific example lies in the interrelationship of climate and agriculture. This bill clearly does not imply that any work in the Department of Agriculture on the impact of climate change would be pulled out of the Department of Agriculture. It would, presumably, be made a part of the program here envisaged, but it would stay in the Department of Agriculture. As such, it would be specifically managed by the Department of Agriculture. What this bill would accomplish is close coordination between such work on agricultural impacts being carried out in the Department of Agricul-

ture and climate research, for example, being carried out in the National Oceanic and Atmospheric Administration and other climate activities in third, fourth, and fifth agencies. For example, we do not foresee that the lead agency would take over forecasting crops based on climate information. The reason for this is very clear. Crop yields are determined by many factors, not only the climate. The amount of fertilizer used and the variety planted are the two other important factors. The Department of Agriculture is, of course, aware of the importance of these other factors, and we would expect that they would continue to factor them into their crop yield predictions. Obviously, what we want to do is avoid having serious market fluctuations caused by climate forecasts issued from various Government agencies involved in the program. We want to avoid the possibility of hoarding on the part of consumers who might not fully understand climate forecasts. We want to avoid undue speculation in the futures markets. The Department of Agriculture has for many years issued its crop yields in accordance with strict schedules and regulations to avoid just this kind of market disruption. It is our intention that this sort of careful approach to prediction of climatic impact continue to be followed where necessary. It is for this reason that the language in section 6(d) of the bill provides that impact assessments "shall be conducted by those Federal agencies having national programs in food, fiber, raw materials, energy, transportation, land, and water management and other such responsibilities in accordance with existing laws and regulations."

The bill also provides for a management council, composed of representatives of all Federal agencies involved in the programs and an advisory council of outside experts to insure that we get the best scientific input into this program.

In summary, this bill sets up a framework for making long-range predictions or climate outlooks months or years ahead, wherever this is possible; provides for study of the impacts of climate changes; studies what climatic fluctuations can be expected; study possible manmade changes, such as the changes in climate due to the increase in carbon dioxide which comes from the burning of fossil fuels; finally, the program will have a very strong emphasis on the users of climate information and will serve the people who need the information.

This is a major element of the program envisaged in this bill, and there is no doubt that we need a great deal of basic research to improve our understanding of the climate. However, this bill goes far beyond a mere research program. The reason for this is that we strongly feel that we can take action now, based on what we know, especially in the area of making information available to users and in assessing potential impacts without conducting more research. That is, our present climate research program should go along, hand in hand, with the activities to take advantage of the information that we already have.

Now I want to say a word on what the bill is not about. The bill is not about purposeful weather modification. We passed a bill in the last Congress which called for a 1-year study of weather modification with recommendations for future legislative policy actions. When this report has been submitted it would be appropriate for the Congress to consider that report and determine if any action is necessary with regard to weather modification.

The bill is not about short-term weather prediction. That is, it is not the thrust of this bill that attempts be made to extend the specific 3-day forecast to 4 or 5 days. Rather, the purpose of this bill is to make longer term generalized climate predictions.

Finally, it should be clear that because this bill is not really about weather phenomena, but rather about climate phenomena, we have not assigned the program to the National Weather Service.

This bill will authorize $50 million in new funds over the existing base program. The draft report of the Interagency Committee on Atmospheric Sciences mentioned above shows that at present there is approximately a $38 million base of Federal activities in this area. This ICAS report further recommends that the climate program grow to a total of $85 million. However, the ICAS program, the $85 million program, does not have significant resources devoted to information dissemination and impact assessment. Thus, the program they had envisaged is somewhat narrower than the program provided for in this bill. The 1974 domestic council report recommended an increase in the first year of $40 million over the base, with additional increases of $7.3 million and $9.4 million in the next 2 years. Again, that program was weak on impact assessment and information dissemination. The point of all this, of course, is that our authorization level is conservative, compared with other assessments of the problem.

As indicated previously, hearings were held by our Subcommittee on the Environment and the Atmosphere, chaired by myself, on the 4th, 5th, and 6th of April of this year. All of the witnesses testified in support of the concept of a national climate program. The non-Federal witnesses, for example, representatives of the agricultural community, supported the specific bill before them. Agency witnesses, while noting the importance of a climate program and supporting the general concept, did not specifically support the bill. Their position was that there is already enough authority on the books and we do not need more legislation.

I want to address that point, because I feel that it is an important one. While I agree there is sufficient general authority to conduct this program already existing in the statute books, the authority has not been executed—the program has not been carried out. The very long gestation period of the ICAS report is an example of what we are trying to get around in passing this bill. The present Federal program is not coordinated. It consists of separate efforts in many agencies. The fact that they do not work together is shown in the long time it has taken to get approval of the draft ICAS report. In addition, it is not only appropriate, but it is in this case apparently necessary, that Congress play its role and provide specific instruction to the administration in how the climate program should be carried out. If the administration had a vigorous, well-coordinated climate program, their opposition would have to be very seriously considered. However, in view of the situation that exists in fact, I think it is totally appropriate for us to go ahead and pass this bill instructing them on how to carry out this program.

Some of my colleagues may have noticed that the committee report which accompanies this bill to the floor contains an additional view by Mr. LUJAN of our committee. I think that he will agree with me that he did not add this additional view for any reason except to reiterate his support to the bill and to explain an amendment which he offered to an earlier version of the bill when it was marked up in subcommittee. That was the "sunset provision" contained in section 15 of the bill, which provides that the authorities conferred in this act terminate December 31, 1979. The purpose of this amendment was not to definitely terminate the program at that date, but rather to assure that the program receives a very careful review before it is extended. Since we have only authorized funds for 1 year, fiscal year 1978, we expect that this careful review will be carried out as part of the Science Committee's annual authorization program.

Finally, on the Senate side several bills have been introduced. The Senate held hearings on the 8th, 9th, and 10th of June on climate legislation. They plan field hearings in July. Senator HUMPHREY has introduced this bill H.R. 6669 as S. 1652, with 10 cosponsors: Senators ANDERSON, HART, CULVER, MCGOVERN, BENTSEN, MELCHER, HASKELL, TOWER, ABOUREZK, and DOMENICI.

Mr. Chairman, this is a good bill, and I strongly urge its adoption.

Mr. Chairman, I will be glad to attempt to respond to any questions the Members may have.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. Mr. Chairman, I am happy to yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, I thank the gentleman for yielding to me. If I understand correctly this is only a $50 million authorization—if I may use the word "only"—for 1 year, but that the bill calls for a 5-year program, the other 4 years to be authorized in the future. Is that correct that the bill contemplates a 5-year program?

Mr. BROWN of California. Mr. Chairman, in reply to the inquiry of the gentleman from Maryland (Mr. BAUMAN) let me state that it does contemplate a 5-year program. It calls for the development of a 5-year plan, as a matter of fact, but it also has a "sunset" provision

which, I believe, terminates the program unless further extended by Congress in 1979, December 31, 1979.

Mr. BAUMAN. However, I believe the gentleman would admit that it is reasonable to expect that if this authorizes a 5-year program that there is likely to be an annual request for renewal. The reason I am asking is that I am trying to make a projection and I would assume that $50 million for 5 years is a reasonable expectation of what this would cost.

Mr. BROWN of California. This is in accordance with the estimates that have been made by the executive branch in the past several years and, in fact, in 1974, the domestic council issued a report which called for about that expenditure of funds at that time.

Mr. BAUMAN. On page 6 of the committee report there is listed a number of Federal agencies that are now dealing in one way or another with weather problems that this bill also seeks to remedy. I notice that at least one interdepartmental group or the Committee on Atmospheric Sciences has a similar jurisdiction and role. Will any of these agencies be ended, or will they be consolidated or will they just continue to act?

Mr. BROWN of California. It is our intention that some of the existing interdepartmental coordinated agencies would be replaced by the management council structure that is set up in this legislation. With regard to the actual agencies which include, as part of their functions, some phases of research, it is not our intention to abolish any of these agencies or their programs. This is a point the gentleman quite properly raised in connection with the earthquake bill, but to seek better control over the present program.

Mr. BAUMAN. So that the funds that will be authorized in this bill are in addition to any funds that these existing agencies, dealing with climate, already have authorized? This is all new spending?

Mr. BROWN of California. Yes.

Mr. BAUMAN. I thank the gentleman.

Mr. BROWN of California. Mr. Chairman, if there are no further questions, I will be glad to yield to my distinguished colleague, the ranking minority member, the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in favor of H.R. 6669, the National Climate Program Act of 1977.

My interest in climate has been increasing since 1972, when a series of climate-related disasters, including crop failures in the Soviet Union and India and the failure in the Peruvian fishing industry caused food reserves to dwindle and prices to rise dramatically. Climate has continued to make the news since 1972, beginning with the 1973 drought in the Sahel region of Africa. The weather in 1974 was particularly bad for corn production in the United States due to a combination of spring floods, summer drought and an early frost. The Soviet Union had bad years in 1974 and 1975, and additional monsoon failures affected India. The United States experienced a 1977 winter season that was the coldest since the founding of the Republic. And the drought in the Western United States, now nearly 2 years old, is expected to continue to have heavy impact throughout this fall. Varying interpretations of this climatic evidence have led on one hand to a scientifically valid caution regarding possible instability of present-day climate conditions and on the other hand to predictions that the Earth may be on the verge of a new climatic change. Amid discussions of the nature, impact and predictability of climatic variations and change, legislation has been reported by the Committee on Science and Technology to create an expanded national program that could offer the hope of understanding and anticipating likely effects of climatic variation.

There is some indication that climatic variation comes in somewhat regular and predictable patterns. Our society is particularly vulnerable to climatic change. Over the past 20 years, we have had two particularly good decades of agricultural weather. If we are now entering a period of colder winters and warmer summers some determination must be made on changing crop patterns, food production, and energy policy.

John O'Leary, Administrator of the Federal Energy Administration, testified before the Subcommittee on the Environment and the Atmosphere during hearings on this bill that we could have saved millions—and perhaps billions—of dollars had we only had better general climate information in advance. For example, if we had known a year ago that there would be an extremely cold winter in the Northeast and milder weather in other parts of the country last winter, we could have taken steps to ship energy supplies to the most seriously affected regions and avoided many of the extra costs—specifically the costs of lost production, shutdown of factories, and lost wages. It is important to note that we did not have to know exactly what the weather would be—we did not have to know that it would snow 3 inches in a particular place on a particular date—only that the Northeast would be subjected to much more severe winter weather conditions and the Southwest would be subjected to much milder winter weather conditions than usual.

This bill has received virtually unanimous support. Witnesses during our hearing, both from the administration and from the scientific community, were unanimous in their praise for our effort in support of a national climate program. Both the Subcommittee on the Environment and the Atmosphere and the full Committee on Science and Technology reported this bill out with unanimous votes. Our colleague, the gentleman from New Mexico (Mr. LUJAN) only added his amendment to insure that the committee will have the full opportunity to exercise its oversight function before the national climate program is continued.

The national climate program would incorporate five principal functions. The first would be monitoring of climatic variables and related phenomena. The second is climatic research, to include research into theories and models of the climate and also into the history of past climatic fluctuation and change. The third function has to do with the use of models and theories developed as a result of research to make climatic predictions as far as it may be possible. The committee recognizes that precise predictions may not be possible, and so we provide for the generation of what we call climatic outlook, which would be probable climatic states in the future. Our fourth function would be impact assessment. This function has to do with determining the probable impact of a climatic change or fluctuation on various aspects of society. An example of an impact assessment would be fluctuations in energy utilization in various portions of the country last winter based on climatic phenomena which occurred. The fifth and final function is information dissemination. We expect this to be a very active function under which program results would be made available to all users in a form that they could best employ.

Members of the committee were most emphatic in our belief that the most important function of a national climate program would be to serve the people that most require the information. There is a need to improve basic understanding and to conduct research on climatic dynamics, but there is much information available now, and a great deal can be done to make the information available to the ultimate user in a form that he can best understand to assess potential impacts.

We have left the authority to choose a lead agency for a national climate program to the President. We expect that the lead agency would coordinate and administer the program but would not do all the work. The bill also provides for a Federal management council of other agencies and an advisory council of outside experts.

Under the bill, a planning process for a program is established so that the program can be carried out by the several Federal agencies having climatic expertise. The functions of the program include monitoring, research, prediction, impact assessment, and information dissemination. To achieve these ends, the bill authorizes $50 million in new funds. The Interagency Committee on Atmospheric Sciences has indicated that there is a $38 million base in climatic research, and strongly recommends a program growth to $85 million. The committee has received evidence that the Interagency Committee on Atmospheric Sciences had proposed a program which is weak on information dissemination and impact assessment. We consider these two functions to be among the most important of any national climate program and thus feel that our $50 million is fully justified.

There has been some question in the past over the need for legislation of this type. I am in some ways deeply con-

cerned that the Congress finds it necessary to propose legislation to set up a national program. There is already sufficient authority in various acts to allow most of what we are proposing for a national climate program to be conducted by the various Federal agencies. The problem is that despite available general authority, the administration has done nothing to utilize that authority. We believe that Congress can and must play its constitutional role by providing specific instruction to the executive branch of Government. Our action will show our determination that the past will of the Congress, expressed in past authority granted, begins to be exercised.

In summary, this legislation establishes a framework for making long-range predictions or climate outlooks months or years in advance wherever it may be possible. It provides for the study of the impacts of climate changes and studies of what climatic fluctuations can be expected. The bill also calls for the study of possible manmade or man-induced changes, such as the so-called hothouse effect due to the increase of carbon dioxide in the atmosphere resulting from the burning of ever-increasing amounts of fossil fuels. Finally, the program will have a very strong emphasis on the users of climate information and will serve the people who most need the data to be gathered under this program. There should also be some discussion of what this bill is not about. The bill is not about purposeful weather modification. The last Congress passed legislation, Public Law 94–490, which called for a 1-year study of weather modification with recommendations for future legislative policy actions. When this report has been submitted and studied, it would be appropriate for the Congress to consider any possible recommendations and take whatever action may be required.

The bill is not about short-term weather prediction. It is not the thrust of this bill that attempts be made to extend the existent 3-day forecast to 4 or 5 or 7 days. Rather, the purpose of this bill is to make long-term, generalized climate predictions.

Finally, it should be emphasized that this bill is not really concerned with weather phenomena but rather with climate phenomena. And because we see a clear differentiation between short-term weather phenomena and long-term climate phenomena, we have not assigned the program to the National Weather Service.

Mr. Chairman, I believe this bill represents an excellent exercise in congressional oversight. It is a good bill, and I strongly urge its adoption.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

I would just add that as one who represents an area that suffered under drought this summer, and 27 or 30 inches thickness of ice in the Chesapeake Bay for weeks last winter, I do not think there is one thing the Congress of the United States could have done to prevent those catastrophes.

I would feel a lot more confidence in this legislation if, instead of appropriating $50 million this year and a possible quarter billion over the next 5 years, we forced all these agencies dealing with climate into one coordinated office now. But, as the gentleman from California made plain, this does not do that at all. It may eventually, but it may not. The bill establishes an Office of National Climate Program and a National Climate Management Council and a National Climate Program Advisory Council, all with travel expenses, and grants to universities and research groups, and per diem to be paid to these experts. After all that, I doubt if it will be any better than if we issued a simple instruction to all these agencies to come together in one unit and stop the duplication.

Mr. WALKER. One of the purposes of the legislation is to have all the work done by these agencies put together. At the present time it is not being put together in any kind of cohesive way. The express purpose of this legislation, the reason why the expenditures will be of value, is because we will get specific information coordinated in a way, so that it can be made available to the public.

One of the great problems is that the information is being obtained but no one is hearing about it. This way we will be able to get the information out, especially to farmers, which has been one of my prime concerns about it, in a long-term way so that it will be useful to them. Many farmers would like to make their plans on known quantities 3 or 4 months in advance rather than a few days in advance. The purpose of this legislation is to move us in that direction. I would not be so bold as to say what Congress does here will be to assure us of that result but it will move us in the direction to give us that kind of information in the future.

Mr. BAUMAN. If the gentleman from Pennsylvania will yield further, I am not going to argue with the gentleman that climate can be better predicted by the thickness of the coat of the woolly bear caterpillar or reading the Hagerstown, Md., Almanac, but the point I am making is that this bill will allow spending more money and creating more bureaucracy. The bill is unnecessary because the President can do it by reorganization powers we have granted. It seems always we have to spend more and increase the size of the Government to accomplish a laudable goal which in this case is long-term weather prediction.

Mr. WALKER. This will give us a long-term program which will allow us to reduce the size of the programs. This is a first step in an effort to make certain that the information we are getting is of long-range value as well as short-term.

Mr. BAUMAN. I hope the gentleman is correct, but I know in many of my public remarks one of the biggest responses I draw from the audiences and particularly from farm audiences is when I observe that if the Congress of the United States ever gets the power to control the weather, they will screw that up too. That is the general attitude of the public. I doubt if this bill will do the job its sponsors boast.

Mr. WALKER. I do not think this will give us the power to control the weather but we might be able to do a little bit more about it in the future.

Mr. BROWN of California. Mr. Chairman, if the gentleman will yield, I am appreciative of the remarks of the gentleman from Maryland because he is seeking to grapple with a problem which in all sincerity I have been personally seeking to grapple with also: How do we coordinate and economize on all these magnitudes of the functions that are occurring in the Federal Government?

A classic example occurs in the climate field where in the last year we found the best long-term climate predictions and the impact of them was being generated by the CIA. The CIA felt there were strong defense policy implications in knowing the impact of climate on agricultural production and being able to predict this in the future. In seeking to best achieve public policy, should we take that CIA unit which is doing long-range climate predictions, for example, and put it over under NOAA? I think the answer is "No."

It is conceivable NOAA should have a better program which CIA could call upon to make their assessments of long-range defense strategy, but certainly we want the CIA to retain its own autonomy and not become a part of NOAA.

This bill provides that if an agency has a program related to the overall climate program, then that segment is processed for budget purposes through this climate program so we can see them all together and see if we are getting a coherent program that is giving us value for the money we are putting into it.

That may or may not succeed. I cannot assure the gentleman it will, but it is an effort to address the problem of which the gentleman is keenly aware and we all need to be concerned about.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I hope both sides of the aisle can assure us that they will make every attempt that this is coordinated and that we do have some coordination out of this effort. Usually what happens, or has happened in the past, is that we pass this kind of legislation and then they continue, the various agencies or bureaus continue to go off in several different directions and we really do not achieve a coordination that we were told was going to occur.

Since both my colleagues here have expressed the desire and it is their hope this will create a coordinated effort and that it will not encourage proliferation of these bureaus and agencies involved and that it will, in fact, be a more simplified—maybe not simplified, but a more coordinated reporting system and approach, I hope that actually occurs; but if it does not, that this committee will come back and help us put a better handle on it than we have had.

Mr. WALKER. Mr. Chairman, I thank the gentleman from California for those remarks. I assure the gentleman from California that this side of the aisle is particularly cognizant of that. That is the reason our colleague, the gentleman from New Mexico (Mr. LUJAN) offered an amendment aimed specifically at the oversight function of our subcommittee in this regard. That is the reason we have an annual authorization process in it; it is aimed at having our committee take a look regularly at this program precisely, to assure the coordination we are demanding is, in fact, taking place.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, I appreciate those comments.

Does my colleague, the gentleman from California (Mr. BROWN) intend to do the same?

Mr. BROWN of California. Mr. Chairman, if the gentleman will yield further, I can assure the gentleman we will be extremely assiduous in doing exactly that.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, I hope also it does not go in the direction of some of the National Science projects and some of these strange-sounding names that have come up in regard to that, because supposedly that was one of the things the National Science Foundation was going to do in that area of responsibility.

Mr. WALKER. I am also concerned about some of the projects that the National Science Foundation has pursued.

Mr. HARKIN. Mr. Chairman, I rise in support of H.R. 6669, the Climate Program Act of 1977.

The recent drought conditions which plagued parts of the midwest just this summer have only served to dramatize the need for a coordinated national climate program.

I am pleased to be a cosponsor of this measure which has been so ably managed by the distinguished chairman of the Subcommittee on Environment and the Atmosphere, Mr. BROWN, and the distinguished chairman of the Science and Technology Committee, Mr. TEAGUE.

This legislation would authorize a broad program of climate-related activities. Most important of these would be the continuous monitoring of the climate and climate-related phenomena, and expanded research to increase our understanding of the climate. Information generated by the program would be made available to a variety of users.

In addition, H.R. 6669 would authorize grants to universities and other educational institutions to develop and support centers for climate study.

We have long needed better coordination of climate-related activities being carried out by the Federal Government. This bill will meet this need and I urge my colleagues to support it.

Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. BROWN of California. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Climate Program Act of 1977".

FINDINGS

SEC. 2. Congress finds that—

(1) natural changes and fluctuations of climate can sharply intensify domestic and international food and energy shortages;

(2) a change of climate, even if sustained for only a few years' time, could seriously disrupt land, water, and energy use patterns and could have far-reaching consequences to the national economy, security, and well-being;

(3) longer term changes in climate, whether occurring naturally or resulting from human activities, or both, may be leading to new global climate regimes with widespread effects on food production, energy consumption, and water resources;

(4) the United States at present lacks a sustained and coordinated program of climate monitoring, analysis, information dissemination, and research;

(5) the present ability to anticipate and explain either natural fluctuations or changes or human-induced changes of climate is insufficient adequately to guide policy formulation concerning agriculture, energy, transportation, and other critical sectors of the economy;

(6) promising opportunities to understand climatic fluctuations and changes exist because of valuable international contributions which have been made or can be made in the near future, and because of the commonality of interest among many nations in understanding and predicting climate; and

(7) there is a need for a program that can bring together and utilize all research and monitoring resources with the goal of knowing and anticipating the effects of climate fluctuations and changes in the United States and the rest of the world.

PURPOSE

SEC. 3. The purpose of this Act is to establish a National Climate Program which will enable the Nation to respond more effectively to climate-induced problems (1) by improving climate monitoring in order to make the Government and the private sector aware of, and to enable the Government and the private sector to anticipate, fluctuations and anomalies in climate; (2) by augmenting basic and applied climate research, including research on the potential influence of human activities on regional and global climate; (3) by improving services relating to the climate, particularly the dissemination of climate-related data and information; and (4) by identifying the domestic and international impacts of changes and fluctuations in the climate, in particular on the allocation and use of energy resources, on the management of land and other natural resources, and on the planning of food supplies.

DEFINITIONS

SEC. 4. As used in this Act:

(1) The term "climate" means the state of the atmosphere, hydrosphere, and cryosphere in a region during an extended time period.

(2) The term "cryosphere" means the world's ice masses and snow deposits, including the continental ice sheets, mountain glaciers, sea ice, surface snow cover, and lake and river ice.

(3) The term "climatic anomaly" means the substantial deviation of a particular climate from its average state.

(4) The term "Program" means the National Climate Program established under this Act.

(5) The term "Federal agency" means an executive agency, as defined in section 105 of title 5, United States Code.

(6) The term "Office" means the National Climate Program Office established under section 9.

(7) The term "Management Council" means the National Climate Program Management Council established under section 10.

(8) The term "Advisory Council" means the National Climate Program Advisory Council established under section 11.

(9) The term "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and a territory or possession of the United States.

ESTABLISHMENT OF THE NATIONAL CLIMATE PROGRAM

SEC. 5. The President shall establish a National Climate Program which shall be administered by the National Climate Program Office (established under section 9) and shall provide, in accordance with the provisions of this Act, for research, and for the collection, analysis, forecasting, modeling, and dissemination of data concerning past, present, and future states of the climate and their variations, and shall provide for the assessment of the impact of climatic fluctuations and changes and anomalies on human activities and of the influence of human activities upon climate.

SPECIFIC PROGRAM ELEMENTS: DATA SYSTEM, RESEARCH, PREDICTION, ASSESSMENTS, INFORMATION DISSEMINATION, AND HYPOTHESIS TESTING

SEC. 6. (a) The Program shall provide for obtaining, analyzing, and disseminating climate data. It shall include—

(1) the monitoring of (by satellite and other means), and gathering of data relating to, the global climate and processes that may produce changes in the climate;

(2) appropriate methods to insure and improve the accuracy and precision of the data;

(3) collection of data needed for basic and applied research and services related to climate;

(4) such procedures for the processing and storage of climate data as will make such data readily available to users and potential users at moderate cost in formats suitable to their requirements;

(5) the preparation of such inventories and indices of data as will promote their use;

(6) the periodic publication of reports, in appropriate professional, trade, and popular journals and otherwise, describing the form and manner in which the data are available;

(7) such affiliation and other arrangements with information exchange networks as will promote the use of the data; and

(8) mechanisms for consultation with current and potential users of the data concerning the management and structure of the data, and delivery of services.

(b) The Program shall provide for research, using information from physical, chemical, biological, geological, historical, archaeological, and other investigations, (1) to improve basic understanding of the climate, of the causes of fluctuations and anomalies in the climate (including the influence of human activities on the climate), and of the relationship among atmospheric, hydrospheric, and biospheric processes and their effect on the climate, and (2) to develop models which can be used to predict fluctuations and changes in the climate.

(c) The Program shall provide (1) for improved methods and systems for the detection and prediction of climate changes (and particularly seasonal and annual fluctuations and anomalies in the climate), (2) for a system to provide early alerts of

incipient climatic anomalies, and (3) for a system for evaluating the accuracy of different climate prediction techniques in predicting observed climate.

(d) The Program shall provide support for and encourage continuing assessments, on a global, national, and regional basis, of the observed and potential impacts on human activities, of past, present, and future changes and fluctuations in the climate including impacts on crop production, energy demand and supply, land and water resources, biological productivity and diversity, transportation, and demography. Such assessments shall be conducted by those Federal agencies having national programs in food, fiber, raw materials, energy, transportation, land and water management, and other such responsibilities, in accordance with existing laws and regulations, and shall include analyses, studies, and appropriate recommendations for action concerning—

(1) the impact of small changes in climate on agriculture, the economy, commerce, and technology and other areas of human endeavor;

(2) appropriate changes in agricultural, economic, commercial, technological, and other practices to mitigate the effects of fluctuations and changes in the climate; and

(3) appropriate strategies to reverse or minimize man-induced changes in global and regional climates.

(e) The Program shall provide for active dissemination of information concerning its plans, activities, results, any climate predictions, and other related activities. The Program shall emphasize regular reports, where possible including climate predictions, applicable to specific user groups and on a time schedule most useful to them.

(f) Activities of the Problem shall be carried out, to the extent practical, in a manner which makes explicit the hypotheses concerning the climate which the activities are testing and how the results of such activities validate or invalidate such hypotheses.

COOPERATION

SEC. 7. The Program shall be conducted so as to encourage cooperation with, and participation in the Program by, other organizations or agencies involved in related activities. For this purpose the Program is authorized to cooperate and participate with other Federal agencies, State and local governmental agencies, and foreign, international, and domestic organizations and agencies involved in international or domestic climate-related programs.

SPECIAL GRANTS FOR REGIONAL CLIMATE ACTIVITIES

SEC. 8. (a) The Program may provide for grants to universities, colleges, and other nonprofit educational institutions to develop and support centers for climate study and to support regional studies relating to activities of the Program.

(b) Grants made under this section shall be made upon the submittal of such application and on such terms and conditions and in such amounts as the Program may prescribe, except that—

(1) the amount of any such grant may not exceed two-thirds of the cost of the center or regional study proposed to be supported by the grant, and

(2) no such grant may be used for the purchase of land or construction of any building.

NATIONAL CLIMATE PROGRAM OFFICE

SEC. 9. (a) The President shall designate, not later than thirty days after the date of the enactment of this Act, a Federal agency (hereinafter in this Act referred to as the "lead agency") within which the Program will be administered.

(b)(1) The head of the lead agency shall establish within the lead agency a National Climate Program Office to administer the Program.

(2) There shall be at the head of the Office a Director who shall be appointed by the President, by and with the advice and consent of the Senate.

(3) The Director of the Office shall receive compensation at the rate provided for level IV or V of the Executive Schedule by section 5315 of title 5, United States Code.

(c) The Office may accept personnel detailed from other Federal agencies involved in the Program, and such agencies shall provide for such detailing, to the extent practicable, to the Office upon the request of the Director of the Office.

(d) The Office shall provide the Management Council and the Advisory Council with such assistance and support as each may require to carry out its activities.

MANAGEMENT COUNCIL

SEC. 10. (a) To assure broad Federal involvement in the management of the Program, the President shall ensure (not later than thirty days after the date of enactment of this Act) that representatives of Federal agencies conducting activities relating to the Program, including representatives of each of the Departments of Agriculture, Commerce, Defense, the Interior, State, and Transportation, Energy Research and Development Administration, Environmental Protection Agency, Federal Energy Agency, National Aeronautics and Space Administration, Council on Environmental Quality, National Science Foundation, Office of Management and Budget, and Office of Science and Technology Policy, are designated to serve on a Management Council for the Program. The Management Council may be designated as a Committee of the Federal Coordinating Council on Science, Engineering, and Technology.

(b) The Management Council shall—

(1) advise the lead agency and the Office on the conduct and priorities of the Program and make recommendations to such agency and Office to improve such conduct;

(2) participate in the development of the Program's budget under section 12(b);

(3) advise the Department of State with respect to providing representation at intergovernmental meetings and conferences relating to climate in which representatives of the United States and foreign governments participate; and

(4) make recommendations to the President through the Federal Coordinating Council on Science, Engineering, and Technology with respect to major domestic and international actions the United States should take to strengthen efforts to understand and adjust to changes in the climate.

(c)(1) The Director of the Office shall chair the Management Council.

(2) The Management Council may have such subcommittees as the Council determines to be appropriate to the specific functions and end uses of the program such as:

(A) A subcommittee on dissemination and use of climate information.

(B) A subcommittee on scientific understanding of the climate.

(C) A subcommittee on the impact of climate fluctuations.

(3) The Management Council shall meet not less often than four times each year, and at least one of such meetings shall be held jointly with the Advisory Council.

ADVISORY COUNCIL

SEC. 11. (a) To insure the involvement of scientists and users of climate information in the Program, the head of the lead agency shall (not later than sixty days after the date of enactment of this Act) appoint in consultation with the Management Council not less than eleven, and not more than fifteen, individuals, who, as a group, are representative of diverse interests relating to the Program, to serve on an Advisory Council for the Program. The individuals appointed shall not be full-time officers or employees of the United States.

(b) The Advisory Council shall (1) continually review the Nation's climate activities, especially the Program, and based on its findings advise the Office on the conduct and priorities of the Program, particularly with respect to the scientific rigor of the Program and the delivery of services under the Program; (2) make recommendations to the President with respect to actions the United States should take to strengthen international efforts to understand and adjust to changes in the climate; and (3) make an annual report as an appendix to the annual report provided for in section 12(c) which appendix shall not be subject to clearance by any other agency.

(c)(1) Members of the Advisory Council shall be appointed for terms of three years, except that (A) of the individuals first appointed one-third shall be appointed for a term of one year, one-third shall be appointed for a term of two years, and the remainder shall be appointed for a term of three years, as determined by the President and (B) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed, shall be appointed only for the remainder of such term. No individual may serve as a member of the Advisory Council for any part of more than two consecutive terms.

(2) Members of the Advisory Council shall each be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS 18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Council. While away from their homes or regular places of business in the performance of services for the Council, members of the Advisory Council shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5, United States Code.

(d) The Advisory Council shall elect its own Chairman. The Advisory Council shall meet not less often than three times each year, and at least one of such meetings shall be held jointly with the Management Council.

(e) Unless extended by law, this Advisory Council shall cease to exist three years after the date of the enactment of this Act.

PLAN FOR, ANNUAL BUDGET OF, AND REPORTS ON, NATIONAL CLIMATE PROGRAM

SEC. 12. (a)(1) The Office shall, afer consultation with the Management Council, and not later than one hundred and eighty days after the enactment of this Act, publish a preliminary plan for the first five years of the Program.

(2) Such plan shall provide for goals and priorities for the Program over the five-year period, and shall contain details as to (A) the involvement of Federal agencies, the staff, and Federal funding required in order for the Program to meet such goals and (B) the milestones required in order to achieve such goals by the end of the period.

(3) Not later than one year after the date of the enactment of this Act, after allowing ninety days for public meetings and congressional oversight on the preliminary plan and after taking into consideration comments received after publication of the preliminary plan, the Office shall publish a final plan for the Program during its first five years, including the information specified in paragraph (2) of this subsection.

(4) The Office is authorized to set up ad hoc advisory bodies for the purpose of developing the initial program plan provided for in this subsection. These advisory bodies (A) shall be composed of persons who are not full-time employees of the Fed-

eral Government; (B) shall be broadly representative of diverse interests relating to the Program; (C) shall be compensated for services and expenses in the same way as the Advisory Council; and (D) shall cease to exist one year after the date of the enactment of this Act.

(5) In consultation with the Management Council, the Office shall update the plan annually.

(b)(1) The Program plan provided for in subsection (a) of this section shall include a specific Program budget plan. This comprehensive budget plan shall be submitted to the Office of Management and Budget for its consideration, in time to be considered along with the individual budgets of the Federal agencies. The comprehensive budget plan submitted shall be developed in consultation with the Management Council.

(2) The comprehensive budget plan of the Program shall encompass the elements of the budgets of Federal agencies which directly or indirectly support activities provided for in the Program and shall include a statement on how such elements relate to the plan of the Program developed under subsection (a).

(3) Section 304 of the Act of October 18, 1962 (31 U.S.C. 25) (relating to preparation of horizontal budgets for meteorology), is amended—

(A) by inserting "and of the national climate program established under the National Climate Program Act of 1977" after "meteorology", and

(B) by striking out "aspects of the program" and inserting in lieu thereof "aspects of the programs".

(4) The amendments made by paragraph (3) shall apply with respect to budgets submitted for fiscal years beginning six months or more after the date of the enactment of this Act.

(c)(1) The Office shall prepare and, after giving the Management Council at least thirty days to review, shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate; not later than January 30 of each year, an annual report on the activities of the Program. Such report shall include—

(A) a description of any changes in the Program plan (developed under subsection (a)) during the current fiscal year and a description of the annual update developed under such subsection;

(B) a summary of the comprehensive budget plan of the Program (submitted under subsection (b)) for the past and current fiscal years and proposed for the subsequent fiscal year;

(C) a summary of the recent findings of research conducted under the Program; and

(D) as far as practical, predictions as to changes in the climate in the current year and in the period of five years, more or less, beginning in such year, and a statement of the probable and potential impacts of any such predicted changes in the climate and of the uncertainties of the predictions.

The report shall also include (as an appendix) any statements of reasonable length relating to the Program submitted by a member, or group of members, of the Management Council.

(2) The Office may make such other reports at such times as it deems necessary to carry out the purposes of this Act.

CONTRACT AND GRANT AUTHORITY; RECORDS AND AUDITS; PATENTS

SEC. 13. (a) Functions vested in any Federal officer or agency by this Act or under the Program may be exercised through the facilities and personnel of the agency involved or, to the extent provided or approved in advance in appropriation Acts, by other persons or entities under contracts or grant arrangements entered into by such officer or agency.

(b) (1) Each person or entity to which Federal funds are made available under a contract or grant arrangement as authorized by subsection (a) of this section or by section 8 shall keep such records as the Director of the Office shall prescribe, including records which fully disclose the amount and disposition by such person or entity of such funds, the total cost of the activities for which such funds were so made available, the amount of that portion of such cost supplied from other sources, and such other records as will facilitate an effective audit.

(2) The Director of the Office and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of three years after the completion of the activities (referred to in paragraph (1)) of any person or entity pursuant to any contract or grant arrangement referred to in subsection (a), have access for the purpose of audit and examination to any books, documents, papers, and records of such person or entity which, in the judgment of the Director of the Comptroller General, may be related or pertinent to such contract or grant arrangement.

(c) Any invention made or conceived in the course of, or under, any contract or grant arrangement entered into under subsection (a) shall be subject to section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 to the same extent and in the same manner as inventions made or conceived in the course of contracts under such Act, except that in applying such section the National Climate Program Office shall be substituted for the Energy Research and Development Administration and the term "climate" shall be substituted for the term "energy" where appropriate.

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. In addition to any funds otherwise authorized to be appropriated for the purpose of conducting programs related to climate, there is hereby authorized $50,000,000 for appropriation to Federal departments and agencies for the fiscal year ending September 30, 1978, for the purpose of conducting the Program.

Mr. BROWN of California (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: 1. Beginning on page 14, line 2, strike the sentence "Members of the Advisory Council shall each be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Council."

2. On page 20, after line 3, add the following new section:

"TERMINATION"

"SEC. 15. Unless otherwise renewed, the authorities conferred in this Act terminate December 31, 1979."

3. (Technical and clarifying amendments). On page 19, line 12, strike "under subsection (a) shall be subject to section 9 of the" and add "under subsection (a) of this section or under section 8 of this Act, and with funds authorized under this Act, shall be subject to subsections 9(a) through 9(k) and 9(m) of the."

On page 19, line 20, strike "where appropriate." and add "and the term 'head of the lead agency' shall be subscribed for the term 'Administrator' where appropriate."

The committee amendments were agreed to.

The CHAIRMAN. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. DANIELSON) having assumed the chair, Mr. DAN DANIEL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6669) to establish a national climate program, and for other purposes, pursuant to House Resolution 641, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ANNUNZIO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 282, nays 60, not voting 92, as follows:

[Roll No. 533]

The Clerk announced the following pairs:

Mr. Addabbo with Mr. Krueger.
Mr. Moakley with Mr. Johnson of California.
Mr. Thompson with Mr. Glickman.
Mr. Koch with Mr. Moss.
Mr. Hanley with Mr. Fascell.
Mr. Delaney with Mr. Skelton.
Mr. Richmond with Mr. Fountain.
Mr. Badillo with Mr. Conyers.
Mr. Mathis with Mr. Cederberg.
Mr. Metcalfe with Mr. Leggett.
Mr. Waggonner with Mr. Quie.
Mrs. Boggs with Mr. Cohen.
Mr. Horton with Mr. Dickinson.
Mr. Cotter with Mr. Cochran of Mississippi.
Ms. Mikulski with Mr. McCloskey.
Mr. AuCoin with Mr. Findley.
Mr. Aspin with Mr. Pritchard.
Mr. Beard of Rhode Island with Mr. Clay.
Mr. John L. Burton with Mr. Quillen.
Mr. Biaggi with Mr. Dornan.
Mr. Murphy of New York with Mr. Sarasin.
Mr. Chappell with Mr. Schulze.
Mr. Brooks with Mr. Stangeland.
Mr. Corman with Mr. Wampler.
Mrs. Chisholm with Mr. Moffett.
Mr. de la Garza with Mr. Steiger.
Mr. Rangel with Mr. Diggs.
Mr. Dicks with Mr. Young of Alaska.
Mr. Dingell with Mr. Wydler.
Mr. Foley with Mr. Winn.
Mr. Ford of Michigan with Mr. Symms.
Mr. Fuqua with Mr. Madigan.
Mr. Harrington with Mr. Lent.
Mr. Bedell with Mr. Howard.
Mr. Dent with Mr. Bonker.
Mr. Roe with Mr. Bonior.
Ms. Oakar with Mr. Patterson of California.
Mr. Risenhoover with Mr. Roncalio.
Mr. Rostenkowski with Mr. Roybal.
Mr. Ryan with Mr. Sikes.
Mr. Sisk with Mr. St Germain.
Mr. Teague with Mr. Vanik.
Mr. Volkmer with Mr. Charles Wilson of Texas.
Mr. Wirth with Mr. Zeferetti.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman of California?

There was no objection.

COMPETITION IN TELECOMMUNICATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 10 minutes.

Mr. WHALEN. Mr. Speaker, in January of this year I placed in the CONGRESSIONAL RECORD a lengthy analysis of the so-called Consumer Communication Reform Act. As you will recall, I used that opportunity to make a number of observations about the nature and future of competition in the telecommunications industry.

It is my belief that the issue of competition in telecommunications is one of the most significant questions of domestic commercial policy to come before the Congress in many years. Whatever public policy we finally arrive at, the consequences will be long-lasting and widely felt.

Therefore, I am pleased to note that later this month the Subcommittee on Communications, of the House Committee on Interstate and Foreign Commerce, will hold several days of hearings on the subject of communications common carrier policies, including the competition isue. This is part of a continuing series of hearings to provide the Congress with the background information necessary to making informed decisions about a number of communications policy questions now pending before us.

During the recent recess, Mr. Speaker, the American Bar Association Journal published a very cogent article on this subject, entitled "What About Competition in Telecommunications?" The article provides a good, concise summary of the history of debate over competition, and it also gives a good description of the current controversy.

I believe we should pay special attention to this debate in light of the Attorney General's recent remarks. On August 29 the Wall Street Journal reported:

Attorney General Griffin Bell says Congress, rather than the courts, may be the appropriate body to decide the government's huge antitrust case against American Telephone and Telegraph Company.

Whether or not one agrees with Mr. Bell on this point, his statement certainly helps underscore our need to study this matter carefully and thoughtfully.

To aid my colleagues and the public in understanding the basic issues and what is at stake in the telecommunications competition debate, I wish to place in the Record at this point the full text of the article that appeared in the August issue of the American Bar Association Journal. The text follows:

WHAT ABOUT COMPETITION IN TELECOMMUNICATIONS?

(By Arthur John Keeffe, with Ellen Deutsch)

For the second time in two decades the Justice Department is involved in a massive antitrust initiative against the world's largest corporation: the American Telephone and Telegraph Company. While the relief sought in the current suit is essentially the same as that in the first litigation, the ramifications and implications of the new litigation on the structure of the domestic telecommunications industry are far more profound in view of the rapid technological advances and the introduction of limited competition by the Federal Communications Commission in certain A.T. & T. markets.

The gravity of the situation and the stakes involved are indicated by the fact that Bell is part of a legislative campaign in the form of the Consumer Communications Reform

Act, introduced in both the Ninety-fourth and Ninety-fifth congresses, which would reaffirm the Bell integrated network structure and provide a congressional mandate against outsiders' further entry into telecommunications markets. In order to contrast the impact of this legislation against the objectives of the antitrust suit and the consequences either might have for the telecommunications industry, it is necessary to look at the events of the past twenty years in telecommunications.

CONSENT DECREE COPOUT?

The first Justice Department suit against A.T. and T. began in 1949 and culminated in a consent decree judgment in 1956. In this suit the Justice Department sought, first, divestiture of Western Electric from A.T. and T.; second, competitive bidding by A.T. & T. and its operating companies in the purchase of telecommunications equipment; and third, patent licensing on a nondiscriminatory, reasonable royalty basis. Only the patent licensing provisions found their way into the consent decree. Western Electric was allowed to continue as a wholly owned subsidiary of Bell, and this obviated the competitive bidding relief.

The major provision of the 1956 consent decree prohibited Bell from engaging in nonregulated common carrier communications services. This was reasonably acceptable in 1956, but the provision now operates to keep A.T. and T. out of many markets that are developing as a result of the convergence of computers and telecommunications technology.

Many experts thought the final consent decree left Telephone's structure essentially unchanged and was an abandonment of the heart of the case—severance of Western Electric as the exclusive supplier of A.T. & T.

THEN CAME COMPETITION

In recent years A.T. and T. for the first time has experienced competition in a small corner of its vast empire, not as a result of antitrust litigation but because of a series of rulings by the Federal Communications Commission. A number of small companies have been permitted to provide private intercity business lines and to sell "terminal equipment" that can be attached at either end of a telephone line—for example, telephones, answering machines, and switchboards. In the limited areas where they are allowed to compete with established telephone companies, these new telecommunications firms have captured about 5 per cent of the market.

Competition in terminal equipment had its start with the Federal Communications Commission's Carterphone decision, 14 F.C.C. 2d 571 (1968), on which the commission later relied to end A.T. and T.'s exclusive right to provide all terminal equipment. The F.C.C. stated that telephone companies could not arbitrarily prevent customers from buying and connecting telephone equipment of their choice. A.T. and T. responded by soliciting state regulators to require installation of a connecting device (called an "authorized protective connecting module") between customer-owned equipment and telephone lines. The A.P.C.M. is intended to protect the telephone network from electrical damage that the phone companies contend can be caused by terminal equipment, but the F.C.C. has yet to document a case of system harm from customer-owned equipment.

The F.C.C. dealt with the locally approved requirement for an A.P.C.M. by establishing a registration program under which manufacturers or users could have the F.C.C. certify the electrical compatibility of their devices to assure they would not harm the telephone network, thus relieving customers of the need for A.P.C.M.'s for properly certified equipment. This registration program and the attendant F.C.C. rules were upheld this spring by the United States Court of Appeals for the Fourth Circuit, with one judge dissenting, in *North Carolina Utilities Commission* v. *F.C.C.*, 552 F. 2d 1036, which was stayed pending a petition for a writ of certiorari in the Supreme Court.

About the same time it opened up competition in terminal equipment, the F.C.C. approved the establishment of private line microwave services by carriers other than A.T. and T. (*Microwave Communications*, 18 F.C.C. 2d 953 (1969)). In 1971 the commission broadened the right of private microwave compaines to compete in the *Specialized Common Carrier* decision, 29 F.C.C. 2d 870 (1971), in order to provide an environment in which existing and new carriers would have an opportunity to compete fairly and fully. This decision was affirmed by the Ninth Circuit in *Washington Utilities and Transportation* v. *F.C.C.* 513 F. 2d 1142 (1975), and certiorari was denied, 423 U.S. 836 (1975).

Thus, in the two areas of terminal equipment and private line service. A.T. and T. has been subjected to a small degree of competition for the first time since the early 1920s.

ANOTHER CHALLENGE

In November of 1974 the Justice Department once again challenged Bell. The suit alleges that A.T. and T. and Western Electric, in violation of Section 2 of the Sherman Act, conspired to monopolize the telecommunications service and equipment markets. It is also alleged that A.T. and T. attempted to monopolize a large number of submarkets that were not in existence during the prior litigation. Bell is charged with restricting trade in private telecommunications and obstructing connection of (1) specialized common carriers, (2) common carriers, (3) radio common carriers, (4) domestic satellite carriers, and (5) terminal equipment suppliers. The major item of relief sought by the government, as in the previous suit, is the divestiture of Western Electric.

In February, 1975, A.T. and T. filed its answer, contending, first, that the question of allowing new entrants into the telecommunications industry is within the primary jurisdiction of the F.C.C. and, second, that the present litigation alleges the same cause of action as the first suit, which ended in the consent decree, and that that judgment is *res judicata* and a bar to the present action.

The district court then requested both parties to submit memoranda of law on the issues raised by the defendants:

1. Does the unlitigated 1956 consent judgment immunize A.T. and T. in perpetuity from the antitrust laws regardless of subsequent anticompetitive behavior?

2. Does federal or state regulation deprive the court of jurisdiction over violations of the Sherman Act involving telecommunications service and equipment?

The Justice Department contended in its memorandum that since the consent judgment did not adjudicate any points of fact or law, it should not be *res judicata* against future litigation. It argued further that neither the language nor the legislative history of the Communications Act indicates any congressional intention to give the F.C.C. complete authority to regulate all aspects of telecommunications.

The F.C.C. filed an *amicus* memorandum arguing that since it did not have expertise in antitrust matters the court should clarify and frame the issues and refer to the commission subissues that were within its area of expertise. In other words, the F.C.C. did not want exclusive jurisdiction of the case.

Last November Judge Joseph C. Waddy of the District Court for the District of Columbia issued an opinion (427 F. Supp. 57) that made the following points:

Nothing in the history of the federal regulation of the telecommunications industry compels the conclusion that Congress was granting immunity from antitrust liability.

The district court has antitrust jurisdiction of at least some aspects of the case. However, some of the conduct and practices of A.T. and T. on which the Justice Department based its charges of conspiracy to monopolize may be subject to the doctrine of primary jurisdiction. The court, therefore, will refer these particular issues to the F.C.C.

Judge Waddy in essence determined that the Justice Department had jurisdiction to continue prosecuting the suit, while reserving some issues for the primary jurisdiction of the F.C.C.

A.T. and T. appealed Judge Waddy's decision to the Court of Appeals for the District of Columbia Circuit. The company argued in its brief that it did not claim blanket immunity from the antitrust laws; antitrust immunity arises from the nature of the specific matters that are the subject of the complaint in this particular case. But Bell contends that pervasively regulated industries "are entitled to know whether they should be adhering to the public interest standard of the statutes under which they are regulated or the competition standard of the antitrust laws." There has been no ruling yet on the appeal.

In the meantime, prosecution of the suit is continuing at a slow pace. The Justice Department recently submitted more than five hundred pages of answers to A.T. and T.'s interrogatories. There is no firm estimate of when the case might go to trial, and the Justice Department's antitrust direction is still in flux during the transition period of the new administration.

At the same time, there has been another development that is as yet unrelated to the antitrust action but may have some impact on the eventual outcome of the litigation. F.C.C. Administrative Law Judge David Kraushaar determined in an opinion on the A.T. and T. rate structure that Western Electric should not be severed from the Bell System. This recommendation was the result of a long-standing F.C.C. docket on nonrate of return regulation. He decided that the structure of the Bell System and its rates and rate structure should remain unchanged. Whether any of the information gathered for this investigation shall become part of the record in the antitrust litigation is unknown. The subject before the F.C.C. for decision was rates and rate structure and not Bell System organization, so its relevance to the litigation is uncertain. It is unlikely, however, that the conclusions of the F.C.C. can be ignored by a court.

SEEKING LEGISLATION

With competition arising in limited markets and with antitrust litigation pending, A.T. and T., joined by the independent telephone company industry, is confronting the developments by seeking a congressional mandate for the integrated network system. The legislation, known as the "Bell Bill," declares that Congress finds it "contrary to the public interest" for regulators to authorize "lines, facilities, or services of specialized carriers which duplicate the lines, facilities, or services of other telecommunications common carriers." It would require those who would provide private phone service to businesses to prove that their services do not duplicate services that the telephone companies already provide or could provide in the future. The bill shifts from the F.C.C. to the states the powers to decide what may or may not be connected to telephone lines. In addition, the bill would grant antitrust immunity to existing telephone companies so that they might buy competitors that go out of business.

In effect, the bill guarantees to existing phone companies the monopoly that already exists and ensures them a monopoly in future telecommunications technology.

Although competition for terminal equipment and private lines is small at present, A.T. and T. is concerned about the future. It

claims that its profits in those markets subsidize residential telephone service, thereby keeping the rates to consumers low. Bell asserts that the competitors will skim the profits from high-density, commercial traffic and force telephone companies to raise phone rates to low-density, residential customers by as much as 75 per cent.

The F.C.C. challenges these assertions, claiming that the telephone companies' supporting data and studies show that established telephone companies will not only hold their own against new competitors but in fact will also gain a greater share of dollar volume in the future. The data on what services are cross-subsidizing other services are inadequate at present, however, and this issue remains the subject of continuing debate.

THE CLOUDED FUTURE

The Bell Bill can serve a useful purpose if it focuses public attention on important but neglected and little understood telecommunications issues. If the bill were to pass it would in effect end the antitrust litigation by providing a congressional mandate for the continuation of the current Bell system structure. It also would place the impossible burden on new entrants to telecommunications markets of proving that their service is one that telephone companies do not or cannot provide. The chances for passage of the bill are slim, but the questions raised by it, the antitrust litigation, and the introduction of limited competition into telecommunications by the F.C.C. remain unanswered.

At stake is the future structure of the telecommunications industry. It is estimated that more than 50 per cent of the labor force and more than 50 per cent of the gross national product are devoted to producing, processing, or distributing information. Further growth is expected as more computers are tied to telecommunications circuits. The resolution of the antitrust suit and the legislative efforts will determine how future markets shall be divided. The question remains what combination of monopoly and competition shall best meet the diverse needs of the economy.

PROPOSED GI BILL TUITION SUPPLEMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. QUIE) is recognized for 10 minutes.

Mr. QUIE. Mr. Speaker, yesterday I introduced a bill to provide tuition allowances under the GI bill to certain veterans. The current GI bill has evolved in such a way that we are discriminating against several thousand veterans by paying everyone the same monthly subsidy when, through no fault of their own, many veterans face tuition charges that far exceed rates in another State or different type of institution.

The current education benefits program might be acceptable if our country had one system of higher education with centralized control over tuition rates. We do not have such a system, nor do we desire one. What we have is many systems of higher education—State controlled, city controlled, independent nonprofit, church-related, private-for-profit, et cetera. And even within one State system of public higher education, there are different types of institutions with different tuition charges.

All of these differences are out of the control of a veteran or the Veterans' Administration. Oftentimes, one Vietnam veteran can attend college in his home area for a couple hundred dollars. His bunk mate in the Army might go to a similar type college in his home area and pay a couple thousand dollars.

We have learned to cope with this diversity in higher education through most of our Federal student aid programs. In virtually every grant, work-study or loan program, we have allowed the costs to the student to be an important variable in determining how much assistance is allowed. The major exception is the GI bill. This program still treats veterans as if every one wants and needs the same kind of education and faces the same tuition charges in each instance. Either the program must change or 5,000-plus institutions must change. And it would take a very heavy Federal hand and billions of dollars to do the latter. My bill is designed to give a fairer shake to the veteran by adding new provisions to the program.

Briefly, this bill would not touch the current monthly subsidies. They would continue and they are more than adequate for thousands of veterans who are lucky enough to have low-tuition schools available to them. But the monthly stipend falls far short of gaining access to an appropriate college for thousands of other veterans. The result is a tremendous disparity in the rate of veterans' attendance among the States. For example, over half of the eligible veterans in California attend a 2- or 4-year college under the GI bill, but less than 20 percent in Vermont and Pennsylvania.

My bill would require that each veteran pay the first $400 of tuition per year. The Veterans Administration would then help out by reimbursing the veteran 75 percent of the next $1,200 paid in tuition. The reimbursement would come only after the veterans completed successfully a course of study. This feature will prevent abuse and be an incentive for higher retention rates. The bill further prevents the temptation of institutions to increase their tuition unreasonably just to take advantage of the supplements.

Joining me yesterday in introducing this bill were Mr. FRASER, Mr. HAGEDORN, and Mr. OBERSTAR of Minnesota and Mr. ZEFERETTI of New York.

Joining me on two earlier occasions as cosponsors on this bill were Mr. FORD of Michigan, Mr. BUCHANAN, Mr. BIAGGI, Mr. PRESSLER, Mr. SIMON, Mr. HEFTEL, and Mr. GOODLING (H.R. 8419 and H.R. 8666).

Next week I will reintroduce the bill again and so far have Mr. BRADEMAS and Mr. FRENZEL as cosponsors. I would welcome others to join me as well.

On September 15, the Subcommittee on Education and Training of the House Veterans' Affairs Committee is holding a hearing to discuss the problem and possible solutions. I plan to testify on behalf of my bill at that hearing.

Recent news articles have supported the efforts many Members are making to improve the current GI bill. I would like to share just a couple of them here:

[From the Boston Sunday Globe, July 31, 1977]

MAKING BENEFITS BENEFICIAL

While some government policies, decisions on military procurement for instance, can be skewed by undue attention to geographic interests, other policies can be as badly warped by a failure to consider legitimate regional interests. This is nowhere better illustrated than in the matter of veterans' benefits.

The heart of the problem is that since the Korean War, veterans across the country have received the same flat monthly sum—currently $292—regardless of the cost of living where they reside or the tuition at the educational institution they attend.

The result, according to two recent studies, is that veterans in the Northeast and Midwest—where college tuitions of inexpensive junior colleges and technical schools lags behind the Southwest and West—have been unable to take advantage of the veterans' benefit program.

A recent study by Susan Unterberger of the Northeast-Midwest Research Institute in Washington reported: "Although the Southern and Western states have almost the same number of eligible veterans as the Northeastern and Midwestern states, veterans in Sunbelt states received $3.7 billion more in federally financed GI Bill scholarships than did veterans in the Northeast and Midwest between 1968 and 1976."

The Senate Veterans Committee has approved a proposal that would allow veterans, whose annual tuition bills exceed $1000, to accelerate use of their 45 months of benefits, thereby granting them larger (but fewer) benefit payments. The committee has also approved a 6.6 percent increase in overall benefits.

The Senate committee has taken a step in the right direction with approval of the accelerated-benefits plan; a House subcommittee, on the other hand, has done nothing to ease the regional inequities, satisfying itself with an across-the-board 6 percent increase. And to date, the Carter Administration has also failed to address the issue, advocating simply a 5 percent increase in benefits.

The most meaningful reform proposal, sponsored by Pittsfield Rep. Silvio O. Conte, among others, would authorize a supplemental educational benefit with the government paying 80 percent of tuition bills between $400 and $1400 annually.

The across-the-board increase will do nothing to lessen the regional disparities. What is needed is a strong statement now from President Carter and leadership from Speaker O'Neill to limit at least the general increase and to use the money instead to improve the accelerated benefits plan or to adopt outright an equalization formula. Only such a substantial restructuring of the program will assure that the young and often troubled veterans of Vietnam, no matter where they reside, will be able to secure the benefits they are due.

[From the Washington Post, May 30, 1977]

THOSE WHO SERVED

Among those reflecting upon the meaning of Memorial Day, we would assume, are approximately eight million veterans of the Vietnam years. For many of them, it comes as one more painful reminder that this country still lacks a comprehensive program to deal with their needs and entitlements. It cannot have escaped their notice that a nation capable of prolonged discussion and strong emotion on the merits of amnesty for no more than 10,000 young men who did not serve—by evading the draft—is strangely in-

capable of dealing equitably with those who served, including two and a half million who actually went to Vietnam and 400,000 who suffered wounds. To examine some of the current attitudes about Vietnam-era veterans is to see graphically why so many of them feel ignored or frustrated. It is also to understand why those who are trying to help them are finding it so difficult.

There is, to begin with, the GI Bill itself. At the moment, many of the most needy veterans are denied meaningful access to educational assistance. The GI bill was inadvertently structured to provide benefits to veterans with access to low-cost public institutions. The problem is that many states and cities have few, if any, of these institutions. Sen. Alan Cranston, chairman of the Veterans Affairs Committee, has spoken of this unfairness and has pledged to "explore the matter and to come up with a remedy." Unfortunately, the leadership of the House Veterans Committee and, surprisingly, the new administrator of the Veterans Administration, Max Cleland, have not made a similar commitment. Another group with limited access includes some veterans who are married and have children; for them, the GI Bill's allowances are too low to be meaninful. Veterans with less than high-school educations are often left out also. Still another group is the one comprised of veterans who fought during the years 1966 to 1972; they were discharged at a time when benefits in many states were effectively so low that the most needy could not afford to go to school.

A second problem is the lack of attention given to the personal adjustment problems of Vietnam veterans, especially the disabled. Many came home unthanked and unnoticed for their sacrifice. Being forgotten became one of the heaviest emotional burdens particularly as South Vietnam collapsed and the country's leaders were content, as President Ford urged, to put Vietnam behind us. One of the government's failures is that it hasn't conducted the research to learn how widespread the emotional problems may be. One unofficial VA estimate holds that one out of five new veterans suffers serious and prolonged readajustment problems.

From these examples alone—and there are others—it is clear that, despite the efforts of a few public officials as well as some of the more alert veterans groups, there is no coherent national policy for dealing with the problems of returned service personnel. It is not as though solutions are unknown, or that teachers, counselors and others are unwilling to work individually with the veterans. An article on the opposite page today tells the story of a few people involved in programs that are as worthwhile on the local level as they are deserving of support from higher levels.

In other words, it can be done—it just isn't being done enough.

At the moment, Congress is considering an across-the-board increase in GI benefits. This approach, as a recent report to the National League of Cities and the U.S. Conference of Mayors notes, is far from ideal: It may overcompensate those veterans who already are receiving too much, while others will remain without access to schooling. Rep. Lester Wolff (D-N.Y.), along with 75 cosponsors, has introduced legislation that would accelerate the availability of GI Bill benefits. This bill and another—providing tuition equalization—deserve immediate attention.

Evidence suggests that the veterans have a number of supporters scattered throughout Congress. But it is the responsibility of the President to pull together that support, as well as coordinate the energies of his own administration. In January, the Secretary of Labor, with considerable fanfare, announced a $1.3 billion program to provide more jobs for veterans. Four months later, unemployment among veterans remains high with veterans groups still awaiting signs of effective followup. One issue that has aroused the anxiety of these groups is that the mandatory veterans quotas—ones assuring that the jobs go to veterans rather than others—have been dropped from the administration's bill now on its way through Congress.

The President has spoken movingly of the plight of the Vietnam veterans. But his actions—the efforts to provide a form of amnesty for deserters and veterans with "bad paper" discharges, the hastily assembled jobs program—fall short of the sort of comprehensive, high-priority approach that is needed. Today, as always, we salute those who served and suffered in all wars—and, above all, those who gave their lives. But our urgent concern is with the veterans of the Vietnam years—and with the unfinished business of that war.

[From the San Francisco Examiner, Dec. 19, 1976]

GI BILL WORKS BEST IN THE SUN

(By Tom Eastham)

WASHINGTON.—A new analysis of how veterans are using the GI Bill finds that the bill favors California vets and those in some other "sunbelt" states.

The report also unearths some little-realized facts and figures of significance to California's higher education system.

California has many more Vietnam vets than any other state, and more who have gone to college. The findings:

The state has 911,000 vets; New York, with roughly equal population, has only 570,000.

In California, 52.5 percent of the veterans use the GI Bill; in New York, it's 30 percent and in Pennsylvania 19 percent.

California vets have received $3,173,600,000 since 1968, New York's only $1,124,300,000.

This year alone, California vets have received $789,250,000.

That kind of money makes the GI Bill the largest single education or training program—paying out over $5 billion this year.

The new analysis complains of a vital difference between the way benefits were paid World War II vets and the way they're paid Vietnam's veterans.

Twenty years ago, GI Bill benefits went to the schools for tuition, books, expenses—with the veteran getting a $75-month subsistence. The Vietnam vets get a flat $295 a month to pay school and personal bills, with schools getting no direct money.

That arrangement works fine for individual California veterans, attending low-cost public colleges. But for vets in states where tuitions are high it may mean no college, or at least a lot less money to spend.

In California, it means that veterans trying to live on their $295 can't go to the expensive private schools. They go almost exclusively to public colleges where tuition pays only a small percentage of the education dollars, and the state's taxpayers pay the rest.

Example: In 1947–48, Stanford University had 7,011 veterans, 44 percent of its enrollment; in 1971–72 it had dropped to just 291 veterans, a mere 1.6 percent of its enrollment.

Example: In 1947–48, University of San Francisco had 1,496 veterans, 66 percent of its enrollment. By 1971 enrollment had doubled but USF had only 375 veterans, just 8 percent of its enrollment.

Many financially hard-pressed private schools can easily point to the major role loss of veterans and GI Bill money has played.

The analysis, called "Sunbelt States Reap GI Bill Bonanza," was done by Stuart F. Feldman, consultant for the U.S. Conference of Mayors and the National League of Cities.

It concludes that the GI Bill favors the South and West while it discriminates against Northeast and Midwest veterans, where college costs are generally higher—both public and private.

The grievance is that the GI Bill is structured wrong in not recognizing college cost differences and thereby penalizing both veterans and their states.

Citing reasons 52 percent of California vets used the GI benefits while those in Pennsylvania used them at only 19 percent, the report gives this example:

A veteran can attend San Francisco State University and spend only 15 percent of his GI Bill for education, leaving him with $248 a month for subsistence. A veteran who returned to Philadelphia must spend $1,130 a year for education—57 percent of his GI benefits—leaving him with only $126 a month for personal use.

The result has been that, with roughly equal numbers of veterans, sunbelt vets have collected $11.6 billion since 1968, while their frostbitten ex-comrades got only $8 billion.

FINANCIAL BLEEDING OF SUGAR INDUSTRY MUST STOP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. SEBELIUS) is recognized for 5 minutes.

Mr. SEBELIUS. Mr. Speaker, domestic producers of sugar still have a problem. I join in support of my colleague from Texas, Mr. DE LA GARZA, for his forthright statement on sugar. He is correct that the bleeding is still progressing. It has gone on too long—all too long.

Let us review some history on sugar:

On September 14, 1976, the chairman of the Senate Finance Committee sent a resolution from the committee directing the U.S. International Trade Commission to investigate whether sugar imports were harming the domestic industry. The fundamental reason for that was the low price of raw sugar—9.29 cents per pound. Sugar producers were bleeding financially.

On September 21, 1976, the President increased the duty by 1¼ cents per pound. Raw sugar prices rose to 10.78 cents per pound. At the same time the President requested the USITC to expedite its investigation.

After an intensive 6-month investigation, on March 7, 1977, the USITC reported to the President that the domestic industry is being threatened with serious injury by increased imports. It recommended an annual import quota of 4.275 million tons. On that date the price was 11.7 cents per pound. Sugar producers were still bleeding financially.

The administration response to the sugar industry problems was contained in a press release of May 4, 1977. The President "determined that import relief, in the form of import quotas recently recommended on March 17 by the U.S. International Trade Commission (USITC), would not be in the overall national economic interest."

The President notified the Secretary of Agriculture to institute an "income

support" program of up to 2 cents per pound for sales of raw sugar at market prices below 13.5 cents per pound. The President said that 13.5 cents is the estimated breakeven point for domestic sugar growers. This was to be an interim measure pending the negotiation and implementation of a new International Sugar Agreement, and was to cover the 1977 crop only.

The price on that date was 9.4 cents per pound. The bleeding continued.

The Comptroller General has ruled that that program lacked legal authorization. On July 20, the Secretary of Agriculture issued a press release announcing that the 13.5 cent per pound was a firm commitment. However, the press release was so vague as to defy analysis. Also, the Secretary of Agriculture has appealed to the Deputy Attorney General for a new ruling. The bleeding continued.

The Secretary of Agriculture was notified on August 19 that his sugar proposal was unauthorized. The bleeding continues.

It is now time to restore the sugar industry to health. It is now time to do what this legislation states unequivocally. There must be an announced price support of not less than 13.5 cents per pound plus an import duty and import fee at such legally authorized levels as to permit the U.S. market price to be at or above 13.5 cents per pound. Only if necessary should any other authority under section 22 of the Agricultural Act of 1933 be used to attain the support level in the market.

The Congress has acted. The financial bleeding must and will stop.

RELIEF TO ELDERLY VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. McDADE) is recognized for 5 minutes.

Mr. McDADE. Mr. Speaker, today I am introducing two measures which are intended to offer relief to our very elderly veterans, who so often are forced to make ends meet on extremely limited incomes.

I am especially troubled by the present rule which penalizes the individual receiving a veterans' pension by reducing his payments each time he is granted an increase in social security, railroad retirement, or other pension benefits. Under present law, any increases in income, including social security or railroad retirement, are accounted for by the Veterans' Administration in its annual assessment of a beneficiary's income. Therefore, when an eligible individual's social security check goes up, his VA pension is reduced accordingly. In my view, it is simply unjust to expect these individuals, over 80 percent of whom exist solely on their social security and veterans checks, to ignore the effects of increases in the cost of living. And yet this is exactly what we demand when we maintain a policy of providing a raise in one type of Government-supported pension and of accounting for this increase in the determination of another. Even though this group is especially susceptible to the impact of inflation, through continuation of this procedure, we are not offering the elderly veteran with the measure of protection he so acutely needs. Understandably so, the Government is accused of giving with one hand but taking with another—a practice which only serves to reinforce the disillusionment many of the elderly embrace with respect to our Government today.

It is imperative, therefore, that we assist the very needy, aged veteran by passing legislation which would disregard increases in social security, railroad retirement, and other pension payments in the determination of veterans' old age and disability benefits. By remedying this harsh, unfair restriction, we can guarantee that persons receiving veterans' pension benefits are accorded some insurance against the ravages of inflation.

Additionally, I am proposing adoption of a special pension program for World War I veterans. The measure I am introducing would provide a veteran or his widow with a flat $150 monthly, without regard to any other income, including any VA payments to which he may otherwise be entitled. Based on service rather than need, this program would benefit all veterans who served in the First World War; if the veteran is deceased, the pension would pass on to his widow. This is a plan favored by the vast majority of these individuals and I agree with their sentiments in this regard. After completing his tour of duty, the World War I veteran did not have available to him the wide array of programs benefiting veterans of later conflicts, including education, employment, housing, and medical assistance.

I believe it is time to repay these individuals for the exemplary service they performed during a period of great crisis. Clearly, passage of both of these proposals would indicate to these individuals our deep gratitude for their serving this country so valiantly. I urge early consideration of these measures.

HIGH HOLIDAYS 5738

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, September 12 and 13, 1977, mark the festival of the New Year in the Jewish religious calendar, Rosh Hashanah, the opening of the year 5738, and the commencement of the 10-day period called the high holidays. This period concludes with Yom Kippur, the Day of Atonement, which this year falls on September 22.

This is, for the Jewish people, a time for solemnity, joy, and hope. It is a time for spiritual renewal, of repentance, of affirmation, and a time of hope and joy in the future.

Rosh Hashanah and Yom Kippur evoke in the Jewish people a sense of awe, high seriousness, and especially obedience to God's law. The meaningful practice of the Jewish faith, I believe, has influenced Jewish moral law far beyond the confines of practicing Judaism.

The historic concepts of social justice and individual human dignity have done much to guide the course of Western democracy and, in particular, to shape the philosophical system of government created by the American Founding Fathers. It is perhaps not too much to hope that in time the conduct of international affairs will be influenced, in spirit, by the principles of common concern which have molded the destiny of world Judaism.

I should like, on this occasion, to extend my greetings and best wishes for the holiday season to my many friends of the Jewish faith and to express my appreciation for the great contributions the Jewish people have made to the advancement of Western civilization.

In the coming year, may the Jewish people know freedom from persecution, from which they have particularly suffered, and may they experience peace and well-being, and prosperity and spiritual enlightenment.

At this point in the RECORD, I would like to include a listing of the 16 Jewish holidays, the days on which they fall in the new year 5738, and their significance.

The list follows:

HIGH HOLIDAYS, 5738

ROSH HASHANAH 5738

September 12 and 13, 1977: This is the Jewish New Year; Jews assemble in the synagogue to reaffirm their faith, examine their past conduct and pray for forgiveness. The Shofar (ram's horn) is blown to reawaken their responsibility to the Lord and call them to repentance.

TZOM G'DALYAH

September 15, 1977: On this fast day, Jews mourn for G'dalyah, a Jew whom the conquering Babylonians unexpectedly appointed Governor of Palestine. The Jews saw in this a sign that their nation would rise again, but G'dalyah was ruthlessly assassinated.

YOM KIPPUR

September 22, 1977: On this Day of Atonement, the holiest day of the year, the Lord judges each individual. Jews fast all day, confess and repent, and ask pardon from the Lord and from their fellow men. In turn, they freely forgive their neighbors. At night, with a cleansed heart, they look forward to a good new life.

SUKKOT

September 27–October 3, 1977: The Feast of Tabernacles celebrates the ancient fruit harvest in the Holy Land. Jews everywhere build Sukkot (temporary booths) hung with fruits and flowers, remembering that the Israelites lived in flimsy booths during their desert wanderings—yet felt secure in the Lord's protection.

SH'MINI ATZERET

October 4, 1977: This day is designated in the Bible as a day of Holy Assembly. Jews gather in the synagogue to celebrate this last festival of ths harvest season, and to offer a fervent prayer for rain to bring full crops in the coming year.

SIMCHAT TORAH

October 5, 1977: The Torah (Five Books of Moses) is read in its entirety each year. On this happy day, the reading is completed and begun anew. The sacred scrolls are carried around the synagogue in procession. The children participate and receive gifts of sweets.

CHANUKAH

December 5–12, 1977: On Chanukah the Maccabees freed the Temple from the Syrian conquerors. At its rededication only enough pure oil was found to light the Holy Lamp for one day. Miraculously it burned eight days. Thus, on the first day of Chanukah, Jews light one candle on the Menorah, adding another each day.

ASARAH B'TEVET

December 20, 1977: This is the anniversary of the day the Babylonians began their siege of Jerusalem. Soon after, the city was taken, the Temple destroyed, and the first Hebrew Commonwealth was no more. Thus, Asarah B'tevet is a day of fasting and mourning.

CUAMISHA ASAR BISH'VAT

January 23, 1978: On this Arbor Day Jews observe the Bible's commandment: "When ye shall come into the land ye shall plant all manner of trees." In Israel, children spend the day joyfully planting young trees. And because this is the 15th day of the Jewish month Sh'vat, Jews everywhere eat fifteen kinds of fruit.

TAANIT ESTHER

March 22, 1978: The Megillah (Book of Esther) tells how the scheming Haman persuaded King Ahasuerus to destroy the Jews, and how Jewish Queen Esther and her people fasted three days before she dared to plead with the King to save them. This fast day, known as the Fast of Esther, commemorates her heroism.

PURIM

March 24, 1978: This gayest of all Jewish holidays celebrates King Ahasuerus' decision to save the Jews and destroy their enemy Haman, instead. During the synagogue service the Book of Esther is read, and children twirl their gragers (noisemakers) every time Haman is mentioned, to drown out his name.

PESACH

April 22 through 29, 1978: Pesach (Passover) recalls the deliverance of the Jews from Egyptian slavery. At the traditional Seder meal, Jewish families read the Haggadah (a book containing the story of the liberation) and eat Matzoh (unleavened bread) and other symbolic foods—thereby reliving their ancestors' experiences.

LAG B'OMER

May 25, 1978: A plague among Rabbi Akiba's students ended on the 33rd day of "Counting the Omer," i.e., bringing an omer (measure) of new grain to the Temple. Jews happily recall this event, and honor the efforts of Rabbis Akiba and Bar Yochai and the brave Bar Kochba to re-establish the Jewish nation.

SHAVUOT

June 11–12, 1978: This holiday commemorates the sacred moment at Mount Sinai when Moses received from the Lord the Torah with its Ten Commandments. Shavuot also celebrates the early wheat harvest in Palestine. Jews throughout the world decorate their homes and synagogues with greens and flowers.

SHIV'AH ASAR B'TAMMUZ

July 23, 1978: On this day the Babylonian army made the first breach in the wall of Jerusalem. This led to the tragic end of the Jewish homeland and to exile for its people. Shiv'ah Asar B'tammuz is a fast day, followed by three weeks of mourning.

TISH'AH B'AV

August 13, 1978: On this fast day, Jews grieve for the destruction of the first and second Temples. They mourn at the Wailing Wall in Jerusalem and in synagogues all over the world. Tish'ah B'av climaxes a nine-day period in which no meat may be eaten.

LEGISLATION TO AMEND TARIFF ACT OF 1930

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. LEDERER) is recognized for 5 minutes.

Mr. LEDERER. Mr. Speaker, today I am introducing a bill to amend the Tariff Act of 1930 with respect to wearing apparel assembled abroad from the U.S. products exported for purposes of assembly and then reimported into the United States and sold in the United States with labeling which indicates that the entire product was produced in this country.

Over recent years much concern over section 807 TSUA has been expressed by organized labor and American manufacturers especially in the apparel industry. I, too, share that concern.

This interest has found expression in the introduction of a number of bills calling for the repeal of this section of the tariff schedule. The issue of 807 TSUS and its complexity requires that all interested Representatives take some action to prevent the demise of our domestic apparel industry.

There can be no doubt that the level of imports under item 807 has increased steadily through 1974 and decreased some in 1975. Nevertheless, the level of imports under this section is much too high and some action must be taken. In many cases the source of the increasing imports has been the less-developed countries. For example, such imports increased from $368 million to $1,928 million in 1974 and by 1975 accounted for nearly 40 percent of all imports under item 807 TSUS. The major source of imports from the less developed countries were Mexico, Taiwan, Singapore, and Hong Kong.

Under title I of the customs Simplification Act of 1954, a comprehensive and lengthy study was undertaken and the Customs Court decided on a somewhat broader and less precisely defined provision of the tariff law—paragraph 1615 (a) of the TSUS—which allowed duty-free importation of "articles, the growth produce, or manufacture of the United States, when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means."

In effect, the court held, that assembly alone did not constitute an act resulting in an advancement of value or an improvement in condition as envisaged by the tariff law. The 1949 ruling by the Commissioner of Customs was held "to be contrary to the provisions of the Tariff Act of 1930, as amended, as interpreted by the courts."

The broader provision allowing duty-free reimportation of American products first appeared in the Tariff Act of 1790 and applied to "generally, all articles of the growth, product or manufactures of the United States." (1 Stat. 181). In the Tariff Act of 1846, the requirement that the articles not be changed in any way while abroad was added, and the duty-free status applied to "goods, wares, and merchandise, the growth, produce, or manufacture, of the United States, exported to a foreign country, and brought back to the United States in the same condition as when exported." (9 Stat. 49). In the Tariff Act of 1890, the wording was made somewhat more specific and was identical to the above cited version of the Tariff Act of 1930, as amended. An additional requirement limiting the duty-free status to articles "if imported by or for the account of the person who exported them from the United States," was added by the Tariff Act of 1922 (42 Stat. 923–924) and retained in the Tariff Act of 1930, but deleted by the Customs Administrative Act of 1938 (52 Stat. 1092). The reorganization of the tariff schedules resulting from the tariff classification study and its enactment in 1963 brought into existence item 800 of the TSUS, granting duty-free entry to "products of the United States when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means while abroad." This wording, for all practical purposes identical to the one that had prevailed during most of the period since 1890, is presently still in effect.

The Tariff Classification Act of 1962 also put into effect item 807. That item was formulated by the U.S. Tariff Commission which in its tariff classification study had concluded that "there is no logic" in the Customs Court's decisions of 1954 holding that the act of assembly does not advance the American component in value, and that the situation resulting from the court's interpretation of what in the proposed new schedules would be item 800, was anomalous. In the Commission's opinion, assembling did advance the value of or improve an American-made component, and the new tariff item was consequently included in the proposed tariff schedules among "articles advanced or improved abroad."

Congress passed item 807 as worded by the Commission, exempting from customs duty the value of U.S.-made components of "articles assembled abroad in whole or in part of products of the United States which were exported for such purpose and which have not been advanced in value or improved in condition abroad by any means other than by the act of assembly."

In 1965, section 85 of Public Law 89–241 changed the wording to read:

> Articles assembled abroad in whole or in part of fabricated components, the product of the United States, which (a) were exported, in condition, ready for assembly without further fabrication, for the purpose of such assembly and return to the United States, (b) have not lost their physical identity in such articles by change in form, shape, or otherwise, and (c) have not been advanced in value or improved in condition abroad except by being assembled and except by operations incidental to the assembly process such as cleaning, lubricating, and painting. (79 Stat. 949).

The following year, section 1 of Public Law 89–806 dropped the requirement that the U.S.-made components be exported "for the purpose of such assembly and return to the United States." (80 Stat. 1523).

The enactment of item 807, in effect, legislatively reversed the 1954 decision of the Customs Court and established that the act of assembly is, in fact, an operation resulting in advancement of value or improvement in condition—but primarily the former which had been the subject of the 1954 court decision. It did, on the other hand, specifically exempt such advanced or improved U.S.-made components under certain conditions from the payment of the customs duty. Thereby, it may have also expanded the range of articles qualifying for such exemption.

It is, therefore, my intention under this proposed legislation to require that manufacturers who, produce wearing apparel in the United States and who export this apparel for assembly abroad and then reimport the product back into the United States under item 807, indicate the country or countries where such apparel was assembled on the appropriate labels.

In addition, it is my intention, along with other Members, to continue to search for legislative or administrative relief for our domestic apparel industry. This industry has served our country well over the last decades and I believe it is time our Government take the initiative to protect the very survival of this industry.

H.R. 9016

A bill to amend the Tariff Act of 1930 with respect to the marking of wearing apparel assembled abroad from United States products exported for purposes of such assembly

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 304(a) of the Tariff Act of 1930 (19 U.S.C. 1304(a)) is amended by adding immediately after the first sentence thereof the following new sentence: "For purposes of this section, any article of wearing apparel imported under item 807 of section 1202 of this Act shall be deemed to be an article of foreign origin and shall be marked in the manner required under the preceding sentence to indicate to an ultimate purchaser in the United States the English name of the country where such article was assembled."

PERSONAL STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

Mr. BRADEMAS. Mr. Speaker, because I was participating in a joint House-Senate leadership meeting on the other side of the Capitol on September 9, 1977, I unavoidably missed the vote on rollcall No. 529, approval of House Resolution 738, to provide for the consideration of H.R. 5383, Age Discrimination in Employment Act Amendments of 1977.

The resolution was approved by a vote of 362 to 0.

Had I been present, I would have voted in favor of the resolution.

FINDINGS AND RECOMMENDATIONS FOR CHANGE IN PRESENT SECURITY CLASSIFICATION SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina, (Mr. PREYER) is recognized for 15 minutes.

Mr. PREYER. Mr. Speaker, I placed in yesterday's RECORD a portion of a memorandum prepared at my request by the staff of the Government Information and Individual Rights Subcommittee. That memorandum explained the provisions of the current Executive order on security classification, and summarized the experience of the executive branch under such order since 1973.

Today I wish to place in the RECORD the remainder of the memorandum which sets forth the staff's findings and recommendations for change in the present system. In view of the Carter administration's current efforts to draft a new Executive order in this area, I think these recommendations are especially timely.

The memorandum follows:

MEMORANDUM

FINDINGS AND RECOMMENDATIONS

Preliminary comments: Limitations of a statistical analysis

The Subcommittee staff concedes at the outset that a statistical evaluation of the classification system has inherent limitations. Whether the classification system, created by Executive Order 11652, has "worked", or accomplished its stated objectives, is difficult to measure simply on the basis of statistics. It is impossible to know, for instance, if a reduction in the number of classification actions taken by the government is due to the requirements of the order, or whether it is simply a function of reduced government involvement in projects of a "sensitive" nature. Conversely, the fact that classification actions have increased is not proof, in and of itself, that the order is not achieving its objectives.

With this analytical limitation in mind, the staff has attempted to draw conclusions from the statistics it has been provided by the ICRC, and, to the extent possible, has made its recommendations based upon such conclusions. The staff must readily concede, however, that certain of its recommendations are neither proved nor disproved by the statistics which are cited herein. These figures simply do not always lend themselves to the analysis undertaken.

Classification authority

Currently, 28 departments and agencies in the Executive Branch, including the Executive Office of the President, have been granted classification authority. The statistics furnished the subcommittee do not themselves prove that this number is too few or too many. The statistics do indicate, however, that many of the agencies with classification authority seldom, if ever, exercise this authority. Fifteen of the 28 agencies with classification authority took fewer than 100 classification actions in 1976. These were agencies which did not ordinarily deal in matters which, if revealed, could damage the national security of the United States, but which were presumably granted such authority on the grounds that certain of their activities could qualify for such protection. Examples include the Federal Communication Commission, the Department of Agriculture, the Civil Aeronautics Board, the Federal Power Commission, the Department of Health, Education and Welfare, the Civil Service Commission, and the Interstate Commerce Commission.

The staff would suggest that this justification is not sufficient to continue to grant such authority to these agencies. The present order already provides that any agency which does not have classification authority but generates material deserving of protection should treat such material as being protected by the order, and seek a determination of its classified status by the agency or department, which already has classified authority, to which the sensitive material relates. The staff feels that it would be preferable to apply this approach to those agencies whose affairs do not ordinarily generate information deserving of protection. We take this position for several reasons: (1) The existence of such authority, even if rarely used, provides an opportunity for misuse; (2) Reducing the number of agencies with classification authority to those whose ordinary affairs deserve classification protection will make operation and oversight of the classification system more manageable; and (3) by requiring an agency with routine experience in classification to determine the sensitive nature of another agency's documents will ensure the information is actually deserving of classification protection.

Within the 28 agencies whose heads have been granted classification authority, 13,997 "senior principle deputies and assistants" have been delegated classification authority. Again, while statistics themselves do not indicate whether or not this is an excessive number (and, indeed, they indicate that the number of authorized classifiers has been substantially reduced since the new order is in effect), the staff finds that 14,000 individuals is, on its face, an excessive number of officials with classification authority, going far beyond what the Executive order seems to suggest should be a limited authority. The staff would suggest that only the senior officials with responsibility for approving plans, procedures, methods, or projects should have the authority to classify such plans, procedures, etc. A decision as to classification should be made at the time such projects are approved by the official granting such approval. Documents which are then generated in the course of implementing such project should receive the same classification based upon the original classification decision.

The staff takes this position because it finds that the extremely large number of officials with classification authority makes oversight and management of the classification system a virtual impossibility, and vastly increases the likelihood that classification authority will be abused. We recognize that a mere reduction in the number of officials with classification authority does not necesarily mean that fewer documents will be classified. Indeed, this is amply demonstrated by the figures reported to the subcommittee. We feel, however, that restricting the number of officials with classification authority to senior officials at the policy-making levels of Executive agencies would serve to ensure that classification actions are necessary and proper, and that classification actions are subject to a greater degree of accountability than under the present system.

Frequency of classification actions

The Executive Branch classified approximately 4.5 million documents in 1976. This represented a small increase over the previous three years, but it is clear, nonetheless, that even in peacetime, the government, in its present posture, can be expected to classify in the neighborhood of 4 million documents per year in the interests of national security.

And even this figure only suggests the magnitude of information actually shrouded in official secrecy. It does not tell us how many pages are classified annually nor how many copies there are of the documents which are classified. The number of classified documents produced annually by the Executive Branch could easily be 10 times this number.

Mere figures do not in themselves indicate whether such vociferous classification is

warranted or unwarranted, but rather only the scale upon which it is performed. Moreover, neither the agencies themselves nor the ICRC seem capable of evaluating or policing this most crucial aspect of the system—the decision to classify. Out of 16,421,650 classification actions reported to the ICRC from 1973–1976, only 131 instances of unnecessary classification were discovered and reported by the 28 Executive agencies during this period. The staff can only surmise from this small figure that the agencies involved cannot or do not wish to devote resources to "second-guessing" their classifiers. The ICRC, for its part, has neither the staff nor the inclination to question classification decisions within the agencies to any meaningful degree. (See discussion of Classification Abuses, infra.)

Declassification policies

Although one of the express objectives of the Executive order is to ensure that information be declassified as soon as it is consistent with national security interests, the subcommittee staff has found that the order falls far short in accomplishing this objective.

The order provides that a person exercising classification authority may specify any date for declassification that he chooses, including a date in advance of the General Declassification Schedule. Classifiers, however, appear to resist making this sort of decision themselves, and rather prefer to err on the side of caution and non-disclosure. Less than 1 percent of the classification actions taken in 1976 were assigned a declassification date in advance of the General Declassification Schedule.

Moreover, classifiers which have the authority to exempt classified information from declassification are similarly inclined to do so, rather than risk the information becoming declassified while still having national security sensitivity.

The staff feels, however, that this perhaps understandable reluctance on the part of classifiers has the effect of keeping too much information secret after its sensitivity as national security information has long since passed. In this regard, it is interesting to note that of the 5,477 requests for declassification of exempted documents from 1973–76, 53 percent were granted in full and 35 percent were granted in part. Moreover, it has been the experience of agencies which have undertaken internal declassification reviews, that a large majority of such records reviewed are found to no longer require national security protection.

The staff recommends that, in view of this experience, the authority to exempt documents from declassification be eliminated from the Executive order, and be replaced with a provision which would simply allow the classifier who reasonably expects a document to have continued sensitivity beyond the declassification schedule, to mandate a review of the document at the end of the period prescribed by the General Declassification Schedule. This would mean that instead of continuing the classification of a document indefinitely (up to thirty years). a classifier would only be able to call for a review of the document after the period called for in the general schedules. The provision should include a prohibition on the use or transmittal of such a document after the original classification had expired until a determination as to its continued security status had been made.

The order should also encourage greater use of advance declassification assignments. Where classified documents are prepared in advance of an event, it may be entirely consistent with national security to remove such classification after such event has transpired. At present, however, the system provides no effective incentive or mechanism to encourage such disclosure.

Handling declassification requests

Given the voluminous amounts of classified materials held by Executive agencies (and by presidential libraries), the number of requests for declassification review of documents must be considered relatively small.

Such requests apparently have been handled expeditiously, however, by the agencies concerned, and have resulted in most requests being honored in full or in part.

Seeking declassification under the Executive order, however, has limited utility since declassification requests are accepted only for documents which are ten years of old more. This limits drastically the use of the order for the purpose of gaining access to information bearing on contemporary problems. (The staff recognizes that such access may be sought under the Freedom of Information Act at any time and that the agency concerned must determine whether the information sought is "properly classified" under the order.)

The staff feels that classified information should be declassified at the earliest time such action is consistent with national security interest. Accordingly, the Executive order should permit request for declassification to be made at any time, so long as the requestor could reasonably identify the document he is seeking.

The staff also feels that the ICRC's policy of hearing FOIA appeals from the agencies for documents over 10 years old should be retained, but its availability should be formalized, and its relation to the FOIA appeals process should be clarified. Presently, FOIA requestors who are denied access to requested documents under the b(1) exemption may or may not be told that declassification review can be obtained through the ICRC prior to going to court. None of the Executive agencies with classification authority presently has a formal procedure requiring such notification. This alternative form of declassification review is thus only haphazardly made available. The staff feels that, since this review mechanism would involve no expense to the requestor, many would seek such review before filing suit under the FOIA, if its availability were only made known to them.

The staff would recommend, on the other hand, that this alternative remedy, which would be available only to a small percentage of FOIA requestors (i.e., those requesting documents over 10 years old who were denied access under the b(1) exemption), should not be considered as an administrative remedy required to be exhausted prior to bringing suit under the FOIA. The FOIA appeals procedures, set out in that statute, should be the only administrative steps required prior to bringing suit under that Act. It should be left to the requestor, whose appeal has been denied by an agency, to determine whether he wishes to seek review by the courts or further administrative review by the ICRC.

Declassification programs

The staff recognizes that several agencies have undertaken internal declassification programs to reduce their classified inventories. We note, nonetheless, that such programs are not required by the Executive order, but are only encouraged. The staff would recommend that the Executive order mandate such internal review by every agency with classification authority.

Preventing classification abuses

Although the Excutive Order prohibits officials with classification authority from misusing or abusing their authority, and it establishes an oversight body charged with ferreting out such abuses, in practice the order falls woefully short in detecting and correcting abuses of the system.

As alluded to above, the principal reason for this failure is the inability of those agencies with a substantial volume of classification actions to monitor and evaluate decisions to classify. Since decisions to classify information can depend upon an infinite number of circumstances, and are ultimately judgmental, both the agencies concerned and the ICRC take the position that any systematic attempt to evaluate classification decisions would be extremely costly and ultimately unproductive. They opt for the "review-upon-request" method of evaluating classification decisions, as embodied in the Executive order and the FOIA.

The subcommittee staff is not inclined—given the enormous number of classification actions and the inherent difficulty in objective evaluation of such decisions—to recommend systematic evaluation of every classification decision. The staff does not believe, however, that the "throw-up-your-hands" attitude of the agencies and the ICRC is warranted, either. There are intermediate steps, we believe, which would have the effect of reducing instances of unnecessary classification and over-classification.

First, it may be no administrative burden at all—either in terms of cost or personnel—for some of the Executive agencies with classification authority to have classification decisions reviewed by a committee or at least a second official prior to their being made. In 1976, 15 of the 28 Executive agencies with classification authority took less than 100 classification actions during the year. It would seem to impose a minimal burden on these agencies to require that classification decisions be passed upon by someone other than one person with classification authority.

Second, there should be some incentive in the order for Executive employees to challenge security classifications which they feel are unnecessary or improper. At present, such employees are simply implored by the order to raise such matters with the original classifying authority. The order fails to take into account, however, the inhibitions most government employees must feel in challenging the decisions of their superiors. In terms of their careers, these individuals have little to gain in raising such challenges, and much to lose. The staff would recommend the implementation of a system where challenges could be made by employees in confidence to an internal committee, whose responsibility it would be to evaluate and assert such challenges to the original classifying authority, would be a more productive method of encouraging challenges to improperly classified documents.

Third, in a related vein, the ICRC should take a much more active role in monitoring an internal challenge system, and encouraging such challenges by federal employees.

Fourth, the ICRC should itself actively assert challenges to documents which it randomly inspects on its on-site visitations on the grounds that such documents are unnecessarily classified or over-classified. Agencies should then be made to defend their classifications to the satisfaction of the ICRC, if such classifications are allowed to remain. At present, officials with classification authority must realize that the likelihood of their ever having to defend a classification decision is extremely remote. The possibility that the ICRC might challenge such a decision during one of its random file searches should encourage greater consideration of such decisions.

Fifth, the order should contain some requirement that the decision to classify be weighed not only in terms of the danger which disclosure is likely to have, but also in terms of the public's need for such information. There may well be cases where public awareness of government activities is so crucial, e.g., the introduction of military forces into foreign countries, that it may override the need for secrecy. At present, the

order forces no consideration of this sort on the part of classifiers.

Finally, the order should provide that decisions to impose a classification unnecessarily or improperly will result in the loss of classification authority, even if the loss of such authority renders such person unable to perform his present duties. This sanction should be more effective than a mere reprimand in obtaining adequate consideration of classification decisions.

Unauthorized disclosures

The staff is unable to ascertain from the relatively small number of unauthorized disclosures reported to the ICRC whether the order succeeds in safeguarding national security information. Although only 47 such disclosures were reported in a four-year period, it is impossible to evaluate the success of the security classification system unless one knows the nature of the information leaked, the sensitivity of such information, or the damage which resulted from it. At present, the ICRC does not seek this information from the agencies involved.

The staff feels, more importantly, that the "success" of the order lies not so much in how well it protects information from disclosure, but in how well it balances nondisclosure with the people's right to know.

CONCLUSION

Congress has heretofore on several occasions considered legislating a statutory classification system binding on the Executive Branch but no legislation has resulted from these deliberations.

The subcommittee staff feels that Executive Order 11652, while an improvement over its predecessor, does not adequately balance the competing interests in this area—in practice, it is weighted too heavily in favor of secrecy, allowing information to be withheld from the public long after its sensitivity as national security information has passed.

In the absence of an Executive order which restores the appropriate balance, the subcommittee should consider further legislative action to correct this imbalance, and provide a security classification system by statute which more adequately preserves the public's right to know.

IMPROVING SAFETY STANDARDS IN THE RAILROAD INDUSTRY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. STAGGERS) is recognized for 5 minutes.

Mr. STAGGERS. Mr. Speaker, this bill is being introduced for the purpose of improving the safety standards in the railroad industry. The proposed legislation provides that the length of a freight train shall not exceed 4,300 feet, exclusive of caboose. For years the Interstate and Foreign Commerce Committee, of which I am chairman, has been concerned about the poor safety conditions on our Nation's railroads. In 1970, Congress gave broad railroad safety powers to the Department of Transportation, but, in my opinion, DOT has not fulfilled its responsibilities under the law. Accidents, injuries, and deaths continue at an unacceptable level; and the physical conditions of the tracks and equipment continue to deteriorate, even though Congress has provided millions of dollars to upgrade the railroad industry. I do not intend to sit by and allow the inaction of the DOT and the railroads to further delay safety improvement.

With respect to the safe length of a train, there is little dispute in the industry that trains in excess of 75 cars have a greater chance of derailment and other safety problems, than shorter trains. In my opinion, this alone is sufficient to require shorter trains. Additionally, railroad efficiency will be enhanced by shorter trains. The longer the length of a train, the more frequent the delays and, also, the longer the delays. This, in turn, contributes to additional delays in terminals. For example, a study conducted in 1970 by the Massachusetts Institute of Technology concluded that trains with more than 75 cars encounter many more delays due to equipment failure than did trains with fewer than 75 cars. Burst air hoses occurred three times more frequently on trains with 75 or more cars, and the frequency of sticking brakes was 8.5 times greater. For trains with 75 cars, the incidence of coupler failure was low. For trains having over 75 cars, the incidence was 7.4 times greater. Coupled with the greater incidence of delays in trains of more than 75 cars, the length of such delays lasted 1½ times longer.

The relative safety of a shorter train is striking. Studies show that, for nontrack causes of derailments, the longer the train, the greater the probability of a derailment. Furthermore, in trains with 100 cars or less, one study by an eastern railroad has shown that an average of 4.6 cars derailed, whereas a train with 250 cars averaged 7.1 cars per derailment.

Concerning the integrity of a train, one with 100 cars or less can expect fewer broken knuckles and drawbars than longer trains. The chances of breaking a knuckle or drawbar on a trip with a train of 100 cars or less is 23 times smaller than a train twice the length. For a very long train, a separation can be expected in one out of six trains but, in shorter trains, the results are 1 in 135 trips. The probability of uncoupling for a train with 100 cars or less is 1 in 500, but the probability of a 200-car train is 1 in 33.

I recognize the fact that we live in an era of fuel crisis and that the use of more trains may require more fuel. However, compared to the motor carriers, the fuel requirement for a 75-car train is still greatly lower per net ton of freight handled. Railroads use much less fuel than trucks for the same amount of freight hauled. One 75-car freight train can relieve the highways of 150 to 200 trucks.

This bill limits the freight train to 4,300 feet which is approximately 75 cars. I am advised that the average length of a freight car is approximately 56½ feet. There are seven basic types of freight cars in use on the railroads which comprise 97.8 percent of the total car fleet of 1,686,390. The average length of a box car is 57 feet, 5 inches, and covers 29.4 percent of all cars. The hopper car is 50 feet long, comprising 21.5 percent of the total.

I am convinced that the bill will help reduce derailments and component failures. Of course, flowing from safer operations will be the reduction of loss and damages and greatly improve reliability of delivery of goods on time. The net effect should be a safer and more reliable railroad system which will attract new business.

A MORE CONSIDERED LOOK AT THE NEUTRON WARHEAD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 10 minutes.

Mr. DODD. Mr. Speaker, next week the House is scheduled to consider the fiscal 1978 authorization act for the national security programs conducted by the Energy Research and Development Administration (ERDA).

That measure, H.R. 6566, contains ERDA's nuclear weapons programs, and it has been the source of much controversy because one of these programs is the production of an enhanced radiation tactical nuclear warhead for the Lance missile.

I, myself, intend to offer an amendment to H.R. 6566 to stimulate discussion of relative merits and disadvantages and to provide Congress with greater oversight of their development and production.

Unfortunately, enhanced radiation warheads, also known as neutron warheads, have been the subject of much misinformation and misunderstanding by the public, by the news media, and I venture to say, by some of our colleagues as well.

Reasoned debate about the pros and cons of enhanced radiation warheads, and there are cogent arguments which must be considered on both sides of the question, has at times given way to hyperbolic, misleading editorials in the press, for example.

Because public opinion should be considered by Congress and the President as we try to decide whether to produce these nuclear warheads, these uninformed editorials, which do so much to shape that opinion, are particularly distressing.

The issues surrounding neutron warheads are quite serious, Mr. Speaker, for they involve whether these weapons contribute to deterrence or lower the threshold against nuclear war.

They further involve a discussion of the concepts of limited and unlimited nuclear war, whether the former is possible without the latter, and whether neutron warheads might enable NATO to fight a restricted nuclear campaign or lead us to an all out conflict of mass destruction.

In considering enhanced radiation tactical warheads, we also should discuss, among other concerns, how they relate to our policy of the necessity to strengthen the conventional military capabilities of NATO.

To lay the groundwork for Congress' own debate next week, and perhaps to contribute to eliminating the misimpressions in the minds of some of our constituents and colleagues, I would like to insert in the RECORD some enlightened editorials.

I hope these editorials will serve to

place the neutron warhead in the proper serious perspective in which it must be considered, and I commend them to my colleagues. The editorials follow:

[From the Baltimore Sun, July 10, 1977]

WEAPONS, CLEAN AND DIRTY

Onrushing nuclear technology just will not let the politicians alone. No sooner do they devise a rationale to support or oppose the latest wonder weapon than a new weapon comes along to test their logic. The latest controversy over neutron warheads is a case in point.

This "enhanced radiation device" is designed for a whole new generation of tactical nuclear weapons, chiefly for the NATO command in Europe. Its appeal is that its heat, blast and radioactive fallout radius is far smaller than the cruder tactical nukes now in place. Thus it is described, often ironically, as a "cleaner" bomb, for its purpose is to immobilize and kill enemy soldiers through high-energy neutron rays that do relatively less damage to highways, buildings and civilians outside battle zones.

The neutron warhead's danger is that it blurs the distinction between conventional and nuclear warfare, and thus would be more tempting to use. Once it is used, escalation to strategic holocaust becomes more possible.

In deciding what course to take on neutron bombs, the White House and Congress are confronted with the dilemmas that bedevil the nuclear era. "Is deterrence better achieved if the other side thinks we're *more* likely to go to war but with *less* destructive weapons" Senator Heinz of Pennsylvania asked the other day, "or if it thinks we are *less* likely to go to war but with *more* destructive weapons.?"

The SALT I agreement was based on the theory of "mutual assured destruction." Washington and Moscow agreed that war could best be deterred if both were vulnerable to city-killing weapons. No sooner had SALT I been signed, however, than the Russians began concentrating on huge bombs that seemed designed to be used against land-based U.S. Minuteman ICBMs instead of populations. Former Defense Secretary Schlesinger responded by pushing his "counterforce" theory. He envisaged a Soviet first strike that would cripple the Minutemen and leave the United States only the appalling choice of hitting back at Soviet cities—while knowing that American population centers would be devastated in return.

Mr. Schlesinger's answer was to develop sophisticated guidance systems that would give the United States the option of eliminating the Soviet land-based missile force. Essential to this concept was the notion of a "limited" strategic war, an idea the current Defense Secretary, Harold Brown, has rejected in theory even while giving the go-ahead to advanced cruise missiles programmed, figuratively, to thread a needle.

The current argument over the neutron bomb raises similar problems, though on a tactical rather than strategic level. Since the late 1960s, the Soviet Union has built up Warsaw Pact forces, gaining clear superiority in tanks and conventional armor and deploying tactical nuclear weapons to offset NATO nukes. The decision that now must be made is whether the present "dirty" tactical nukes are a credible deterrent or whether the Alliance has to go for "clean" neutron warheads.

The "dirty" nukes are certainly powerful weapons; indeed they are so destructive that the West German people blanch at the thought of their being detonated on any German soil, East or West, for any purpose. But what of the "clean" bombs? If they are used to thwart an overwhelming Soviet conventional attack, is it not likely that the Soviets would hit back with the "dirty" tactical nukes in their arsenal? Will potential mayhem really be reduced?

Until a more compelling case is made for deployment of the neutron warhead, it should be resisted. The idea that the distinction between conventional and tactical nuclear warfare can be blurred with endangering mankind remains highly suspect.

[From the Washington Star, July 8, 1977]

THE NEUTRON WARHEAD

Warfare, for all its horrors, strives to keep a shaky toehold within civilized limits. Poison gas and dum-dum bullets, for example, are not in legal arsenals today.

The steady march of modern weapons technology makes it increasingly difficult to maintain these fragile standards. But the so-called neutron or "enhanced radiation" warhead which suddenly came to the nation's attention last week would seem at first glance an unmistakable candidate for proscription.

But moreso at first glance than at a second or third. The ostensible purpose of the neutron warhead is to render "tactical" or battlefield nuclear warfare more controllable. It would be developed for anti-tank warfare with Lance missiles and artillery. "Tactical" nuclear warheads now available (and deployed with NATO forces in Europe) pack, at 50 kilotons, about three times the "blast" and fallout effects of the atomic bomb used at Hiroshima. The far smaller blast of the neutron warhead, at one kiloton, could be surgically confined, it is claimed, to a radius of some hundreds of yards; it would rely for primary impact on the lethal bombardment of human beings by neutrons, while at the same time mimizing destruction and fallout beyond the target area.

When the Senate, just before its July 4 recess, discovered a small appropriation for continued research on the neutron weapon in a routine public works money bill, the discovery touched off an intense and fascinating debate. Some senators find the weapon reassuring; others find it scandalous, dwelling with special horror on the news that the neutron warhead kills people but spares property.

This debate, together with a rather overexcited journalistic fallout, rather puts us in mind of Robert Frost's poem, "Fire and Ice" (*Some say the world will end in fire/Some say in ice*). One is tempted to ask, what difference does it really make, given that there is a kind of madness about all nuclear devices? Neither comfort nor kindness in the manner of killing is the signal feature of *any* nuclear device—neither the "dirty" old bombs that kill indiscriminately over a wide area by blast and fallout nor a "clean" new bomb that poisons the human system on the battlefield with "enhanced radiation." At one level, it is all madness.

Most of us hope not to have to choose, as it were, between fire and ice.

Yet there is, in this complicated world, no luxury of escape from hard choices. We do not suppose merely as a matter of course that there is any great difference in the moral sensitivity of those who, like Senator Stennis, found the neutron bomb "the best news . . . in years," and those who, like Senator Hatfield, found themselves indignant at the idea of a device that kills people while minimizing property damage.

The moral calculus of nuclear warfare is to be found at a more complicated level. It may lie less in the *way* weapons kill than in their probable effect on the nuclear balance and on the prospective nature of nuclear warfare. Does a weapon make nuclear warfare more likely? Does it minimize deadly effects on civilian populations? If we accept that both aims are "moral," it is nonetheless true that they must sometimes conflict; and that seems, alas, to be the case with the neutron bomb.

On the one hand, a "tactical" nuclear weapon whose blast and fallout effects are minimal, and whose deadly radius may be confined to a small quarter of a limited battlefield, offers the hope that civilian populations might be spared, along with shelter, food and water supplies.

Yet the more "discriminating" a "tactical" nuclear device might be, the larger the presumptive temptation to use it readily, hence the lower the "nuclear threshhold."

The Senate, as we say, almost stumbled onto its great debate about the neutron warhead, which, we gather, has been in the works for 20 years. The political issue the Senate will take up when it reconvenes is whether research and development should continue without a presidential certification of need and without an "impact statement" about its conceivable effect on the nuclear balance.

Certainly there is, at the moment, very little but sketchy information and indignation to go on. President Carter would like another month or so to think about the neutron warhead. The Arms Control and Disarmament Agency is worried about its impact on arms-reduction talks. Beyond that we know too little.

If the neutron warhead is thought to be a genuinely "tactical," or battlefield-scale, nuclear weapon it will be the first such weapon to qualify unambiguously. No strategist that we know of, from Dr. Kissinger on, has convincingly shown that a reliable distinction is to be drawn between "tactical" and "strategic" nuclear warfare Any weapon that promotes the illusion short of absolute certainty is to be viewed with the utmost suspicion—even if it does promise to spare civilians and their life-support systems the side-effects of the big bombs.

[From the Washington Post, July 13, 1977]

THE NEUTRON BOMB

President Carter, responding to questions about the neutron bomb at his news conference yesterday, more or less said this: He would take the money for production of the weapon but reserve his decision on whether to deploy it. So we still don't know exactly what the President intends. But we do know he has a very careful, restrained, sophisticated approach to the questions raised by the weapon itself. For he made this abundantly clear in his adroit handling of the issue yesterday.

The neutron bomb presents as good a case study as you are likely to get of the central tension in our nuclear-weapons policy. It is between 1) the need for weapons sufficiently practical and manageable to persuade an enemy that we might use them and 2) the danger that weapons with this degree of practicality and manageability might invite the very kind of war they are meant to deter, since they could create the illusion that they could be used without provoking general nuclear war or some other disastrous result.

If you keep this tension in mind, you will understand the neutron-bomb argument. Those who favor proceeding with the weapon point out its clinical, surgical advantage over the less-controllable and more widely destructive tactical nuclear weapons deployed at the moment; they argue that these virtues (it is practical, manageable) would make it a plausible threat; i.e., an adversary would have no trouble believing NATO forces might use it. Those who oppose proceeding with the weapon argue that there is no such thing as a containable nuclear weapon; that the seductive notion that there are nuclear weapons of any kind that could be used without leading to a larger nuclear exchange is foolish and wrong and that the battlefield advantages of the neutron bomb if war came, would not outweigh the perilous temptation to use it well before other tactical nuclear weapons might be employed.

We are of the second persuasion ourselves

and hope that Mr. Carter will yet come to it when he gets down to making the actual decision about proceeding with the neutron bomb. We note with interest that although the President was well aware of the technical and military advantages of the proposed weapon, he also showed himself properly skeptical of the idea that warfare could be confined to the use of certain minimally destructive nuclear weapons. Thus: ". . . my guess is . . . that the first use of atomic weapons might very well quickly lead to a rapid and uncontrolled escalation in the use of even more powerful weapons with possibly a worldwide holocaust resulting."

The President threaded his way with considerable skill through the political minefield that discussion of such a weapon necessarily entails. He managed to express revulsion at the idea of first-use of nuclear weapons without committing himself to some ironclad protocal forswearing their use. He insisted that current NATO strength did not require the automatic use of tactical nuclear weapons to defend against a Warsaw Pact invasion. He took the occasion to restate the need for a bolstering of NATO's conventional forces. He promised to provide Congress with a "complete impact-statement analysis" on the deployment before he makes a final decision on it. It was, in other words, a responsible, cautious enunciation of position, leaving open the possibility that the deployment of this new weapon may yet be rejected. We hope it will be.

[From the Milwaukee Journal, July 9, 1977]

THE REAL FLAWS IN NEUTRON WEAPONRY

The Pentagon deserves rebuke for trying to quietly slip past Congress the funding for "neutron" tactical nuclear warheads. However, Pentagon deviousness does not excuse the sometimes irrational criticism that angry congressional critics direct at the weapon itself. While the warhead has drawbacks, they cannot be properly examined amid emotionalism.

What seems to upset some critics the most is that the weapon is designed to kill people while minimizing physical damage to the surrounding area. It does this by releasing great amounts of lethal radiation. Blast, heat and fallout—the other lethal effects of "ordinary" nuclear weapons—are reduced to about one-tenth of normal. Intense radiation would occur in a burst, would be localized and short-lived. The target area could be entered within a day. Damage outside the area would be sharply reduced.

To some critics, a clean, more precisely targetable nuclear weapon is somehow less moral than a dirty, indiscriminate one. In other words, it's better to be burned and buried in rubble than just dead with the surroundings relatively unscathed. That strikes us as nonsense.

For military planners, the weapon's attraction is obvious. Enemy troop concentrations could be destroyed with less risk to surrounding civilian population and property. This has special meaning in Central and Western Europe. It is assumed that fighting initially would be concentrated there if Russia, with its greater conventional military strength, ever attacked. The aim: stop those troops without laying waste to friendly cities and towns.

Indeed, some NATO strategists worry that the alliance's present tactical nuclear deterrent is not credible because the weapons are too indiscriminate. Russia might doubt that they would be used because they would destroy what the West is trying to save. Such deterrence then becomes a bluff asking to be called. The argument for the neutron weapon is that it would strengthen deterrence because it is discriminate and would be more readily used.

This does not mean that the neutron warhead is beyond legitimate question. On the contrary, greater presumption of use—while a theoretical strong point in deterrence theory—is also worrisome. The weapon's very attractiveness could tempt commanders to employ it sooner than they would other, less discriminate tactical nuclear weapons. The nuclear threshold would be crossed sooner. In short, the weapons would blur the crucial distinction between conventional and nuclear war.

Furthermore, the whole idea of tactical nuclear deterrence is dubious. It assumes that, if deterrence fails, these weapons would be used in a controllable, limited nuclear war. That is an extremely risky assumption. More likely, the use of any nuclear weapon would trigger an escalation to Armaggedon. If so, the neutron warhead has a marginal, if not negative, value.

A prime objective in Europe today should be to lessen reliance on tactical nuclear weapons as a deterrent. The logical answer is to bolster NATO's conventional forces. That is something for the Senate to think about when it resumes debate on the neutron warhead. It is also something for our allies to ponder since many of NATO's weaknesses are due to European complacency and unwillingness to spend more for conventional defense.

In the end, the chief lure of the neutron warhead is its cheapness as a technological substitute for an expensive, politically unpopular conventional military buildup. But does the warhead really provide comparable security? Given the risks of nuclear war, the answer is no.

[From the Los Angeles Times, July 11, 1977]

DR. STRANGELOVE IS NOT LOOSE

The White House says President Carter will decide next month whether to approve the Pentagon's plans for deployment of the so-called neutron bomb. Unfortunately, there is a clear danger that he will make the decision against a background of public confusion and misunderstanding as to what the controversy is all about.

The basic responsibility for this confusion lies at the door of the press and the broadcast media.

The Defense Department hopes to begin deploying the neutron bomb—which scientists and military men prefer to call the enhanced-radiation warhead—with NATO forces in West Germany within 18 months.

Since considerable secrecy traditionally surrounds such budget items, specific plans for the deployment of the neutron bomb had escaped notice until a Washington newspaper broke the story last month. But Pentagon interest in the weapon has been a matter of public knowledge for many years.

For the past month, stories discussing neutron bomb have almost universally described it as a weapon that will kill people through enhanced radiation while doing the least-possible damage to surrounding real estate.

This is the truth, but not the whole truth. It is misleading unless accompanied by the additional information that the new weapon would kill fewer people than would existing nuclear warheads, which it would replace in NATO's defensive arsenal.

As a result of carelessness or inadequate knowledge, that important detail has been left out or submerged in most media discussions of the neutron bomb. As a result, there is a widespread public impression that the weapon is the brainchild of coldblooded Pentagon planners who value the preservation of property above human life.

As The Times explained in an earlier editorial, the truth is very different.

The neutron bomb is not a long-range strategic weapon that would be used against Soviet population centers in the event of an attack on the United States. It is designed to make it possible for NATO forces to defend Western Europe against a Soviet invasion without destroying Europe in the process. Specifically, its main purpose would be to destroy the Russian tank armies that would spearhead any such attack without killing nearby West German civilians.

The neutron warhead required for this purpose would be smaller than the conventional nuclear warhead that would otherwise be required for the same mission. Thus, the affected area would be smaller.

Blast damage to nearby houses and other structures would be minimized, and the lethal radiation even in the target zone would dissipate much more rapidly than the radiation from nuclear weapons now in the active arsenal.

For the West Germans, the difference between the neutron bomb and the larger, dirtier bombs in the existing NATO arsenal might thus be the difference between survival and death.

There is considerable expert opposition to the neutron bomb—but not on grounds that it would represent an escalation of nuclear horror. On the contrary, dovish experts fear that it would not be horrible enough and would, accordingly, be more likely to be used.

Proponents of the new warhead strongly dispute this point.

The arguments on both sides are complex, and the President has an unenviable job in trying to sort it all out.

It is appropriate that public opinion should be a factor in his deliberation. But the debate should center on the real issue—whether less-deadly nuclear weapons might make nuclear war more likely—and not on the erroneous notion that Dr. Strangelove is loose in the Pentagon.

[From the New York Times, July 12, 1977]

THE NEUTRON WEAPON

All nuclear weapons can kill. That ugly fact should be kept in mind in evaluations of the current argument over deployment of the so-called neutron warhead—the "enhanced radiation weapon," in Pentagon parlance. An eminent Soviet physicist charges that "the development of neutron weapons in the U.S.A. has exposed the true policy of the American Administration as antihumane and directed on a worldwide scale against the main human right, the right to life." The allegation, if seriously meant, applies with equal force to Soviet nuclear weapons, or those of any other country.

As the two articles on the page opposite explain in some detail, neutron warheads—for short-range ground missiles and artillery shells—differ from existing nuclear weapons in that they would inflict far less extensive damage from blast and heat; they depend for their lethal effect on intense but short-lived radiation. In addition, the radius over which they kill is fairly sharply defined. This makes them well-suited for attacking concentrations of soldiers in the field while minimizing damage to territory and to neighboring civilians. Moreover, the type of radiation they emit does not linger. Whereas standard nuclear weapons may render a piece of territory uninhabitable for months afterward, the harmful radiation from a neutron warhead would dissipate in a matter of hours. These qualities are of critical importance to our NATO allies, particularly the West Germans, who have long dreaded having to face the awful dilemma of yielding to a Soviet invasion or else inflicting terrible damage on themselves by attacking the invaders with nuclear weapons.

The very qualities that make neutron warheads attractive to our allies and to the Pentagon cause others to argue against them. Existing tactical nuclear weapons are so destructive, they say, as to be virtually unusable. They inhibit military commanders and political leaders from crossing the threshold that since Hiroshima and Nagasaki has kept nuclear weapons from being used in anger. Opponents of the neutron weapon argue also that despite years of planning, NATO has

never come forward with a plausible scenario for repelling an invasion with nuclear weapons and then going on to "win" the nuclear war that would likely ensue.

Both these arguments have force, but they are not persuasive. The Administration should proceed with the planned deployment. NATO is now in the worst possible position with respect to tactical nuclear weapons. For years it has claimed that those weapons would deter an invasion by numerically superior Warsaw Pact forces, and many NATO member governments have thus justified not spending more on conventional forces. Yet NATO's present tactical nuclear weapons may, because of the dangers implicit in using them, offer little deterrence. Of them it can be said, as the Duke of Wellington reportedly once said of some new recruits, "I don't know whether they will frighten the enemy, but they certainly frighten me."

Because neutron warheads are less frightful in their effects they might indeed be more easily used, with the risk of further escalation. But they would also make more credible NATO's threat to use tactical nuclear weapons, and in so doing make less likely the need ever to use them. Yet the neutron weapon is only a short-term solution to the problem of the imbalance of forces in Europe. The long-term solution, and greater safety, lies in reviving the nearly moribund East-West talks on Mutual and Balanced Force Reductions (MBFR) and negotiating troop levels that are low enough, with safeguards against surprise attack that are sound enough, to do away with the need for tactical nuclear weapons altogether.

THE HIDDEN ISSUES BEHIND A NUCLEAR TEST BAN

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PRICE. Mr. Speaker, a serious problem frequently confronting the American citizen today is the inability to learn both sides of the many important and contentious issues involving our national interests.

An example is the problem of the continuing modernization of the U.S. nuclear weapons forces. One issue is whether modernization should apply to the new explosives as well as to the delivery vehicles. Proponents of modernization insist that qualitative improvements can benefit national security more than stockpiling large quantities of weapons of unknown reliability. They further insist that the largest contribution to nuclear explosive reliability and improvement is a comprehensive test program.

On the other side, test ban advocates vociferously insist that continued testing by the United States and U.S.S.R. will induce additional nations to become members of the nuclear weapons club. They present no rationale for this conclusion. However, they believe that a complete test ban or a unilateral moratorium on nuclear weapons testing by the United States will have no effect on U.S. nuclear forces. They believe that the weapons in stockpile today will perform satisfactorily without additional testing. They believe new weapons can be designed and fabricated using current weapons testing data.

Does the United States need to conduct tests of new and existing weapons systems? Will a test ban adversely affect our national security? Unless you are fully and currently informed on the United States and U.S.S.R. nuclear weapons programs, I urge you to read the following article by Ralph Bennett, "The Hidden Issues Behind a Nuclear-Test Ban," which is in the September 1977 issue of the Reader's Digest, before you decide on the question of nuclear testing.

The magazine article referred to follows:

THE HIDDEN ISSUES BEHIND A NUCLEAR-TEST BAN—WOULD A MORATORIUM REALLY IMPROVE OUR CHANCES FOR PEACE? OR WOULD IT IN FACT TIP THE BALANCE OF POWER TOWARD THE SOVIETS?

(By Ralph Kinney Bennett)

President Jimmy Carter has set a "total cessation of nuclear testing" as a major goal of his Administration. In 1963, the United States and the Soviet Union agreed to stop testing in the atmosphere, in outer space and underwater; the President has urged that the two nuclear super-powers prohibit all underground tests as well, in the hope that other members of the nuclear club—China, Great Britain and France—will follow. A joint Soviet-American study group, later joined by the British, has met on the proposal, but concern is growing as to whether such an agreement is in the long-term interests of the United States.

Advocates of a comprehensive test ban (CTB) argue that such a treaty might be a brake on the momentum of the arms race and the alarming prospect that as many as 20 nations will have nuclear weapons within a few years. They contend that because the United States and the Soviet Union have reached a state of rough "parity" in strategic weapons the time is ripe for negotiating a CTB without fear of a built-in disadvantage to either country.

Before the public can make an informed judgment on this highly charged issue, it must have a clearer understanding of the how and why of nuclear-weapons testing.

The test firing of U.S. nuclear weapons takes place at vast and desolate site about 75 miles northwest of Las Vegas, Nev. It is done on direct orders of the President, who approves a test schedule six months at a time. Each year, there are generally between 10 and 20 detonations at varying depths, depending on the yield of the weapon. A 100-kiloton-yield weapon (the bomb dropped on Hiroshima was only 14 kilotons) would be detonated about 2000 feet below ground. An oil-well drill-rig is used to bore a hole about four feet in diameter. (Some weapons used on missiles and artillery shells may be no larger than an office wastebasket.) A steel canister, lowered into the hole, contains the weapon. Above it are racks of sensors and instruments. In the millionths of a second before these instruments are vaporized by the blast, data on gamma rays, neutrons, radiation, heat, shock and other effects are pulsed over cables to monitoring equipment, which may be nearby or as much as 30 miles away.

The only significant sound associated with the blast is that made by tons of rocks and soil bounced into the air in a wide circle as the earth directly above the blast heaves momentarily. Technicians at the monitoring station will feel a distinct tremor a few seconds after the detonation.

TEST CASES

There is a common impression that testing is carried out merely "to build bigger and better bombs." The truth is that American (and Soviet) scientists learned the essentials of large super-destructive nuclear weapons long ago. Today, American testing addresses itself to special problems—making nuclear weapons smaller, safer to handle and transport, more precisely tailored to a variety of missions.

One intensive program of underground testing now under way is aimed at final development of a new super-accurate warhead for MX, the newest generation of intercontinental ballistic missiles (ICBMs), designed to replace our present Minuteman III in the 1980s. The MX is needed because of the Soviet SS–18, a massive ICBM that can destroy even the most hardened U.S. missile-launching silo. The MX may be deployed in a variety of ways aboard large aircraft or perhaps on underground railroad tracks, and would thus be extremely difficult to target. The problem: to perfect a warhead so small that the MX can carry as many as ten (all targeted for separate sites), yet so powerful that it will have three times the yield of present ICBM warheads.

Testing is also proceeding on an "enhanced radiation" weapon for battlefield use. Most strategists believe the West would have to use tactical nuclear weapons at the outset of a war in Europe to blunt the overwhelming conventional-force advantage of the Warsaw Pact countries. But many of the nuclear weapons now stockpiled in Europe are based on 10- and 20-year-old designs and are so indiscriminately destructive that they would carry blast; heat and radiation effects to a wide area around a target. Thus, ironically, the sheer power of the weapons might make the United States hesitant to use them in defense of thickly populated Western Europe.

A new generation of precise, "low-yield" nuclear weapons now being tested could be detonated in the air (at 3500 to 5000 feet) with virtually no blast effect or fire-causing thermal radiation. These weapons would focus neutron and gamma-ray radiation on an enemy target, say a regiment of troops, with such lethal effect that the men would be literally stopped in their tracks—even those in tanks, bunkers or buildings. The buildings, however, would be left intact, and there would be no long-term contamination from residual radiation.

Weapons developments like these demand testing—they cannot be based on old test data alone. A nuclear warhead is a complex combination of conventional explosives, fusing devices, nuclear material, batteries, circuits and in some cases guidance equipment. Each new demand upon it requires readjustment of these components. Past experience has shown that even seemingly trivial changes in existing designs may cause a weapon to fizzle in a test shot. Indeed, in some instances, 10 to 12 detonations have been required to solve a problem or bring a weapon up to specifications.

"BROKEN ARROWS"

The built-in safety features demanded for our nuclear weapons have placed a further burden upon testing. Since 1945, for instance, there have been at least 11 "Broken Arrows"—the Defense Department code for accidents involving nuclear weapons. Luckily, there has never been a nuclear explosion as a result. But in some instances, as when a B–52 carrying four large nuclear bombs collided with a fuel tanker over Palomares, Spain, in 1966, conventional explosives used to set off the chain reaction in the weapon's materials have detonated.

To deal with that particular problem, a new, insensitive high explosive (IHE) was developed—one that could withstand tremendous shocks (even bullets fired into it) without detonating. Proved workable only after lengthy underground testing, IHE was a major advance in weapon safety.

There have been numerous instances of problems in the nuclear-weapons program in which speedy testing of a weapon was vital, since it was already actively deployed somewhere in the world. Indeed, most "stockpiled" weapons are actually in service aboard B–52 and FB–111 bombers, in ICBM silos, in our Polaris/Poseidon submarines and in Army and Navy tactical missiles—the whole variety of delivery systems that prevent our

deterrent from being wiped out in a single strike.

The juxtaposition of ordinary and exotic materials inside the smaller of these complex warheads causes strange things to happen, giving each a maximum estimated "shelf life." Radioactivity from materials like uranium and plutonium has increased the possibility of malfunctions by making metals and rubber brittle; various metals have been found to corrode more quickly than predicted. Inside a warhead even gold has been known to corrode, something thought to be impossible. If the correction of such conditions involves substituting new materials or a new design, the only assurance that the weapon will function is a test shot.

An eloquent example of the risk involved in not testing showed up during the moratorium declared by President Eisenhower in 1958. The powerful, precise explosion necessary to start a chain reaction in the core of a nuclear weapon requires plastic-like explosives formed and shaped to surround the fissionable material like the snugly fitting parts of a Chinese puzzle. On February 24, 1959, two men at Los Alamos Scientific Laboratory in northern New Mexico were forming a section of PBX 9404 (plastic-bonded explosive) when it went off, killing them instantly. Eight months later, two men at a Los Alamos disposal site dropped a 180-pound piece of PBX 9404 and blew themselves and two other men to bits.

Because of the accidents, it was decided that PBX 9404, then being used in the U.S. Army "Sergeant" nuclear missile, should be reformulated to be more shock-resistant. But because of the moratorium, the modified PBX 9404 was substituted in Sergeant purely on the basis of theoretical laboratory calculations. Then, in August 1961, the Soviet Union broke the moratorium. The United States resumed testing, but scientists were so "sure" of the Sergeant warheads that it wasn't until 1963 that this new explosive was tested. All the Sergeants, deployed around the world, had to be called back and fitted with an improved warhead after additional tests located and corrected the problem.

Harsh Truths. Today, some disarmament advocates believe that, under a test ban, warhead updating could be done relying on past experience with already tested weapons. But Robert Thorn, associate director of weapons development at Los Alamos, answers: "It's virtually impossible to make carbon copies of past weapons. In some cases the same materials are no longer available. In others, new safety and environmental rules prevent duplicating past processes. Experience has shown that such changes can result in a weapon that just doesn't work."

Most experts agree with Thorn that, in the absence of testing, the American weapons stockpile might remain at least partially effective for ten years at the most. Many believe it would significantly deteriorate within three years. Another problem is that, during the inactivity of a test ban, highly motivated and skilled scientists and technicians will move to other jobs. In contrast, the Soviet government can, by mere fiat, maintain an extensive testing apparatus during such a ban.

Not the least of reasons to pause in considering a comprehensive test ban is our past experinece with the Soviets. They violated the Anti-Ballistic Missile Treaty by secretly testing the radars on one of their anti-aircraft missile systems in an ABM mode, and stopped such testing only after protests by the United States. Although Strategic Arms Limitations (SALT) I agreements limited the number of ICBM launchers, not missiles themselves, the Soviets strained the intent of the agreement by providing many of their launchers with a reload capacity as great as four or five missiles per launcher.

CTB advocates argue the Soviets could not cheat because advances in long-range seismic detection enable us to distinguish a covert underground test from an earthquake. But many seismological experts disagree, pointing out that low-yield nuclear explosions, below ten kilotons, are extremely difficult to detect by seismological means. Yet such low-yield tests are militarily significant. By carrying on such tests, the Soviets could solve problems that arise from stockpile "aging," deveop significant new battlefield weapons, make nuclear weapons less vulnerable and safer to handle, and develop new trigger devices.

A CTB must also be considered in relation to the ongoing SALT talks. The whole logic of our agreements with the Soviets is based on our supposedly having qualitative (i.e., technological) superiority. Therefore, we have allowed Moscow quantitative superiority (more and bigger delivery vehicles). Yet by definition a test ban degrades quality while not affecting quantity. Thus our crucial technological advantage—particularly smaller warhead size—would be jeopardized in a test ban.

Finally, since a CTB is not likely to be linked to significant or equitable reductions in conventional arms, the United States must confront the problem articulated by Prof. William R. Van Cleave, former delegate to the SALT I talks, now director of Defense and Strategic Studies at the University of Southern California: "We cannot hope to maintain reliable nuclear weapons for more than a few years without a test program. Thus we will eventually come to a state of ineffective and inferior nuclear forces. Even if the Russians comply strictly with a ban and their nuclear weapons deteriorate, too, they emerge on top by virtue of sheer preponderance of forces."

This is a harsh truth. And it is one that has to be weighed not only by the arms-control negotiators but by the American people themselves. For it is their elected representatives who must ratify any agreement in the U.S. Senate.

(About The Author: Ralph Kinney Bennett, a Senior Editor in the Reader's Digests' Washington Bureau wrote "The Hidden Issues Behind a Nuclear-Test Ban" (page 124), which probes in remarkable detail the realities of atomic-weapons testing. Says Bennett: "When I first got on to this story, there was nothing in the newspapers, and only the faintest tremors were passing through this rumor mill of a city. One of our most reliable people on Capitol Hill had met with some scientists from Los Alamos who were concerned about the evident desire within the Carter Administration to try for a comprehensive test ban. I met with these scientists in late March. After the first interview, and in some followup work I did during the next few days, I became convinced of their sincere concern. In a reserved but articulate way they opened up the coldly eerie world of atomic weapons to me. It quickly became apparent that we had an important story to tell.

("What followed for me was a crash course in nuclear weapons. Within a two-week period I consulted experts on Capitol Hill, in the nuclear laboratories, at several universities, and in the State Department, the Pentagon, think tanks and several private defense consulting firms. I spoke, too, with a number of retired military and civilian personnel who had been in the nuclear-weapons program from the beginning. The real problem was *secrecy*. Not only the justifiable secrecy surrounding our weapons program, but the secretive tendency of those who had worked in this atmosphere so long that they were by nature or training reluctant to impart even the most basic information.

("My sessions with scientists in Los Alamos were long and many. They consisted of extracting bit after bit of information, teetering on the brink of classified material. I came away impressed with their dedication and professionalism, impressed with the general atmosphere of the place, its cluttered offices and math-festooned blackboards. It reminded me a little of a science department of a large university.

("The circumstances under which I researched the piece were fascinating; the material was, too. And the implications of the story are, I think, very important. But it could not have been written without our contacts—which in some cases were made years ago and carefully maintained. It's that sort of preparation that makes these stories possible.")

INTRODUCTION OF PACIFIC NORTHWEST ELECTRIC POWER SUPPLY AND CONSERVATION ACT

(Mr. MEEDS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MEEDS. Mr. Speaker, I am introducing today at the request of the Pacific Northwest Utilities Conference Committee for appropriate reference the Pacific Northwest Electric Power Supply and Conservation Act. This legislation has been developed by the Pacific Northwest Utilities Conference Committee, citizens representing every sector of the electric energy industry in the Pacific northwest.

The subject matter of this bill is a matter of transcending importance to the continuing economic welfare of the four-State area of Washington, Oregon, Idaho, and Montana and represents the first time, as far as I can learn, that such a far-reaching attempt has been made cooperatively to solve the problems of future electric power supply for everyone within the entire region.

In introducing the measure today, it is not my intent to imply that there is unanimous agreement on all aspects of the measure within the region. There is not. I do feel, however, that its introduction will serve to foster a continuing dialogue on the salient issues to the end that they are resolved satisfactorily in a minimum period of time. Moreover I am aware that there is the need to consider a number of refinements and technical changes in the text of the measure as Committee consideration progresses in the House and in the U.S. Senate.

Among the significant participants in the development of this legislation who retain some reservations about certain aspects of the bill is the Snohomish County Public Utility District, a major consumer-owned utility in my district. In this interest of affording an early opportunity for expression of all viewpoints on the issues, I ask unanimous consent to include as an attachment to these remarks a statement and proposed amendment prepared by Snohomish County PUD. Similarly, I also ask unanimous consent to include a copy of the proposed bill and a legislative proposal fact sheet prepared by the Pacific Northwest Utilities Conference Committee.

Lastly, for the information of all my colleagues the major objectives of the legislative proposal are as follows:

First. Establish the Nation's first regionwide conservation program;

Second. Grant Bonneville Power Administration the authority to purchase power;

Third. Establish rate groups for BPA's sale of power to different classes of bulk power purchasers;

Fourth. Recognize the role of a regional utility planning body controlled equally by consumer-owned and investor-owned systems; and

Fifth. Help reduce the costs of new power resources when such resources are needed.

H.R. 9020

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, To make the Federal Columbia River Power System available for maximum electric efficiency for future essential power supply, to promote conservation,

SHORT TITLE

SECTION 1. This Act may be cited as the Pacific Northwest Electric Power Supply and Conservation Act.

FINDINGS

SEC. 2. Congress finds that:

(a) The Hydro Thermal Power Program for providing future power supplies was developed in the late 1960's by the utility systems of the Pacific Northwest and BPA to meet future energy needs through bulk power supply facilities to be constructed and operated by the utility systems of the region in coordination with the hydroelectric generating resources of the Federal Columbia River Power System.

(b) Congress approved certain agreements implementing the Hydro Thermal Power Program, but radical increases in costs of new thermal generation and unexpected delays in licensing and authorization of new thermal generation have imposed major anticipated difficulties in achieving the objectives of such program.

(c) Regional development of hydroelectric resources, particularly additional capacity on the Federal Columbia River Power System, will be essential to an economic power supply with minimum environmental impacts.

(d) The Federal Columbia River Power System, operating in coordination with electric generation resources of utility systems of the region, provides a basic means for storing, regulating, and interchanging power supplies which, if fully utilized together with the further ability to provide for spreading planning burdens and costs of future power supply facilities, can support the effort of the region to cover costs of future bulk power supply.

(e) BPA purchase authority will facilitate regional pooling which will strengthen the financial ability of the utility systems to construct new resources. The regional pool so formed can also provide important financial support for effective conservation of energy through increases in efficiency of use.

(f) BPA has notified its public body and cooperative customers that BPA does not have sufficient firm power to meet their anticipated load growth after July 1, 1983. BPA has notified its direct-service industrial customers that it will not be able to renew existing contracts after their expiration.

(g) It is in the public interest that essential future power supplies be available on a sound economic basis and that public bodies and cooperatives have available to them a future power supply from BPA.

(h) The inability of BPA to renew contracts with existing direct-service industrial customers threatens the Pacific Northwest with loss of employment vital to the region's economy and its workers, and threatens the production of 30 percent of the nation's primary aluminum, all of its ferro-nickel production, and substantial portions of its production of carbide, chlorine, ferro-alloys, and other materials vital to the national economy, the national energy-conservation effort, and the national defense. It is in the public interest that a power supply be continued to be made available to such customers as provided in this Act.

(i) It is in the public interest that existing regional cooperation and coordination among the utility systems and BPA be continued, and it is in the public interest that public and private utility systems jointly participate in the planning and designation of future power supplies through the Pacific Northwest Electric Planning and Conservation Organization.

(j) In order to carry out its functions and to implement the objectives of this Act it is necessary that PNEPCO prepare and publish forecasts of Pacific Northwest Power loads and resources; conduct programs to promote efficiency in power consumption in the Pacific Northwest; conduct studies and analyses of alternative sources of energy, including costs, timing, and availability; review long-range bulk power supply planning of utility systems; provide oversight services as specified in contracts with BPA; conduct or participate in plant siting studies and determinations; and take such other actions, consistent with the Act, as may be necessary or advisable in the performance of the foregoing functions.

(k) To provide for more efficient planning and utilization of generating resources, to minimize demands on capital and scarce fuel supplies and to promote conservation and efficient use of electrical energy, it is in the public interest that agreements, action or conduct be undertaken by persons or entities, acting alone or together, for the purpose of complying with or implementing the provisions or objectives of this Act.

(l) The Pacific Northwest has the unique opportunity to combine the ability of the coordinated hydroelectric resources of the region systems to store and manage power supplies, the ability to achieve, on a regional basis, reduced usage of fuels and investment capital and the ability to jointly support other power-related programs. This potential will be more fully utilized for the public benefit by a limited authorization to BPA to make long-term power purchases as provided in this Act.

DEFINITIONS

SEC. 3. As used in this Act:

(a) "Average megawatts" (avg. mw) means average annual firm energy (expressed in thousands of kilowatts).

(b) "BPA" means the Bonneville Power Administration, and the Administrator of the Bonneville Power Administration.

(c) "Contract demand contract" means a contract for a sale of power in specified amounts for specified years.

(d) "Customer" means a public body, cooperative, private utility, Federal agency, or direct-service industrial, purchaser of power from BPA for use within the Pacific Northwest.

(e) "Date of continuous operation" means the date certain determined by the owner(s) of a designated plant as the point in time when the plant is ready to be operated and the output scheduled on a continuous basis.

(f) "Designated plant" means all or any part of a generating facility to the extent designated by PNEPCO for the purpose of this Act.

(g) "Load growth" means increase of power requirements of a BPA customer due to increase in consumption within the Pacific Northwest.

(h) "Net billing agreements" means agreements existing as of the date of this Act between certain public bodies and cooperatives and BPA under which Participant's Shares and/or Owner's Shares of certain thermal generating plants have been assigned to BPA, compensation for such assignment being made by crediting the annual costs of each such share against the cost of power purchased by such Participant or Owner from BPA.

(i) "Pacific Northwest" means (i) the region consisting of the States of Oregon, Washington, and Idaho, the State of Montana west of the Continental Divide, and such portions of the States of Nevada, Utah, and Wyoming as are within the Columbia areas, not in excess of seventy-five airline miles from said region, which are a part of the service area of a distribution cooperative which has a distribution system from which it serves both within and without said region, and (iii) the service area in California on the effective date of this Act of a utility system which serves a contiguous area both within and without said region.

(j) "PNEPCO" means Pacific Northwest Electric Planning and Conservation Organization, the nonprofit corporation described in section 17.

(k) "Power" means electric capacity or electric energy, or both, including the electric generating capability of a plant whether or not such plant is operable or the operation thereof is suspended, interrupted, interfered with, reduced or curtailed, in each case in whole or in part for any reason whatsoever.

(l) "Private utilities" means publicly held stock corporations organized under general business laws operating utility systems within the Pacific Northwest.

(m) "Public bodies and cooperatives" means public bodies and cooperatives as those terms are defined in P.L. 75–329, as amended, which sell power within or purchase power for direct consumption within the Pacific Northwest.

(n) "Requirements contract" means a contract for sale of power to meet a customer's varying power requirements in excess of the purchasers' own resources, if any.

(o) "Utility system" means a system operated by a public body, cooperative, or private utility which sells power to ultimate consumers.

CONSERVATION

SEC. 4. (a) BPA shall, in consultation with the states of Washington, Oregon, Montana, and Idaho (hereinafter called "the states"), PNEPCO, and other interested parties, develop programs and methods by which BPA customers and ultimate consumers may conserve and efficiently use power. In each budget submitted following the effective date of this Act, BPA shall include proposed expenditures for conservation programs; provided that expenditures under this Section 4(a) shall take into account the amount of each utility system's purchases of power under this act. Such programs may provide for grants or loans, including interest-free loans, to ultimate consumers served by utility systems. Funds for grants or loans may, and funds for loans to the ultimate consumers shall, be administered through utility systems. Total funds shall not at any given time exceed $300,000,000 total commitment for, and balance of, loans outstanding.

(b) BPA shall include in an annual report a description of regional conservation activity, conservation standards established and implemented, and estimated costs and savings therefrom. The report also shall compare, on a regional basis, the cost, amount, and timing of power available from conventional electric generation technologies with the cost, amount and timing of power available from alternative technologies, and power

savings which will result from potential conservation programs.

(c) BPA customers within a state specified in subsection (a) shall be subject to the surcharge provided for in this section if such state has failed to enact legislation or take other appropriate action consistent with the uniform regional standards for efficient use of power (hereinafter "Standards") within two years after the initial establishment of Standards or, if Standards are amended requiring additional state action, two years after the date of amendment, the surcharge to continue until the state adopts legislation or takes other appropriate action.

(d) Standards under subsection (e) may be adopted by the states in consultation with BPA, acting through such officers or agents as may be determined by each state; or if the states do not act within two years of the effective date of this Act, BPA shall establish such Standards within one year thereafter. The states may adopt Standards or amended Standards established by BPA. Standards shall be periodically reviewed and amended as necessary.

(e) Standards shall be set as appropriate for the categories (including appropriate subcategories) including but not limited to the following:

(1) New residential, commercial, industrial and agricultural structures.

(2) Existing residential, commercial, industrial and agricultural structures.

(f) The states shall review new and existing industrial, commercial and agricultural processes to determine whether state-adopted standards would be appropriate for any such process. If the states determine such state standards should be adopted, they shall proceed as appropriate. Unless and until the states adopt such standards, any applicable mandatory federal energy conservation standard shall become a Standard for the purposes of this section.

(g) For the purpose of achieving optimum conservation levels, Standards established under this section shall, in order to meet the requirements of this section, be at least equal to any mandatory federal energy conservation standards, shall be practicable and reasonable, and shall be based on all the following:

(1) Demonstrable cost-effectiveness of power savings to the region upon implementation. Except for cause shown, the level of conservation to be derived from Standards shall be that which yields the highest net benefit (savings less cost). The power savings shall be valued at the delivered cost of new sources of power.

(2) Geographic, climatic, and other differences within the region.

(3) Social and environmental impacts.

(h) In the absence of certification by the states that a state has enacted legislation or taken other appropriate action consistent with the Standards, power sold for use in such state pursuant to Sections 7 and 8 will be sold subject to a surcharge. BPA shall waive the surcharge with respect to any political subdivision which the states determine has substantially complied with the Standards. If the states have failed to establish Standards and BPA has acted in their absence, BPA shall determine substantial compliance. The surcharge to any one customer shall be the greater of (i) an amount equal to 50 percent of the total cost of power purchased by such customer under this Act and subject to surcharge, or (ii) an amount calculated by applying to such power purchased a rate determined by taking the difference between the basic rate based on Rate Group A and the basic rate based on Rate Group C and dividing by two. Revenues from the surcharge shall be used to defray the costs of conservation programs under subsection (a). Revenues in excess of these requirements shall be distributed annually, through billing credits, to each customer not subject to such surcharge and shall be allocated in the proportion that the cost of power sold to such customer bears to the total cost of power sold to all such customers.

(i) The states may allow exceptions for good cause from standards and thereupon BPA may waive the surcharge provided for in this section.

(j) Provisions implementing the surcharge and other features of this section, as appropriate, shall be included in BPA's power sales contracts.

(k) No action by the states to (i) establish, adopt, or amend Standards, (ii) certify that a state or political subdivision thereof has acted consistently with Standards, or (iii) allow exceptions shall be effective except upon unanimous agreement of the states of Oregon, Washington, Idaho and Montana.

AUTHORITY TO PURCHASE

SEC. 5. In addition to authority under existing law, BPA may purchase power, provided that power purchased for a term in excess of five years shall be purchased only as provided in Section 6. BPA may sell such purchased power together with or separately from power from the Federal Columbia River Power System. Power sold for a term in excess of two years shall be sold at rates no less than the rates applicable to other sales under this Act. Sales for a term longer than five years are to be made only to entities and under terms and conditions provided in this Act.

PURCHASES FOR TERM LONGER THAN FIVE YEARS

SEC. 6. (a) BPA may purchase power (i) from a designated plant from the Owner of such plant or any other person having an interest in such power or (ii) from a system designated by PNEPCO.

(b) In addition to purchases under subsection (a), BPA shall, and is directed to, purchase at system cost (as defined in Section 10) power offered for sale by private utilities but not to exceed 4000 avg. mw.

BASIC ENTITLEMENTS TO POWER

SEC. 7. Section 10 assigns costs of power to three groups—A, B and C—as the basis for schedules of rates and charges for sale of power. Each class of sale in this section and Section 8 is classified to its Rate Group at the beginning of each paragraph.

(a) BPA shall, and is directed to, sell power as provided in this section.

(b) RATE GROUP A.—Actual power requirements (not more than 5700 avg. mw, such limit increasing beginning July 1, 1984 in 10 equal annual increments to a total of 6090 avg. mw), to public bodies and cooperatives that are obligated, as of the effective date of this Act, to make payments under net billing agreements. There will be allocated in each contract year to each such public body and cooperative executing a contract referred to in Section 7(g), an amount of power determined by multiplying the firm energy requirements for such year of such public body or cooperative by a fraction whose numerator is the total power available in that contract year under this subsection, and whose denominator is the estimated total firm energy requirements of all such public bodies and cooperatives. Such estimates will be made annually for the ensuing 10 years. Firm energy requirements as used in this subsection has the same meaning as "Sum Energy Requirements" as the latter term is defined in contracts referred to in Section 7(g).

(c) RATE GROUP B (adjusted).—2800 avg. mw in the year ending June 30, 1979, increasing in equal annual increments to 4000 avg. mw in the year ending June 30, 1985, or such lesser amount of power equal to that offered for sale for such years to BPA under Section 6(b), to private utilities.

(d) RATE GROUP B.—Actual requirements as of June 30, 1983, but not more than 260 avg. mw, to Federal agencies.

(e) RATE GROUP B.—Not more than 3,000 avg. mw to direct-service industrial customers with power sales contracts with BPA as of the effective date of this Act.

(f) RATE GROUP C.—Not more than 1,000 avg. mw as determined by BPA to be available from new resources, to direct-service industrial customers identified in subsection (e) to be used for production purposes specified in existing power sales contracts. If BPA makes non-firm power available to such customers in lieu of all or a portion of sales under this subsection, the total in any year of sales under this subsection and of such sales of non-firm power so made available shall not exceed 1,000 avg. mw.

(g) Contracts for sale of power under this section and for purchase of power under Section 6(b) shall be in substantially the form of the several draft contracts appropriate for each transaction included in the committee report, Report . Promptly after the effective date of this Act, BPA shall execute and tender contracts for execution to all entities entitled to purchase power under this section or to sell power under Section 6(b). No such contract may be executed by a purchaser or seller on a date more than six months after the date of tender.

(h) Sales under this section shall include during the term of the contract the amount of capacity as provided in such contract.

ADDITIONAL POWER SALES

SEC. 8. (a) BPA, subject to the availability of power, is authorized to sell power as provided in this section in addition to the power which BPA is directed to sell under Section 7.

(b) RATE GROUP B (adjusted).—Not more than one-half of actual load growth, to each utility system. Load growth of public bodies and cooperatives shall be the load growth commencing in the first year during which the total load of each public body or cooperative, respectively, equals or exceeds the power made available under Section 7(b) and non-federal hydro resources utilized to meet such loads in 1975–76. Load growth of public bodies and cooperatives may be determined collectively. Load growth of private utilities shall be the load growth occurring after June 30, 1983.

(c) RATE GROUP B (adjusted).—Not more than one-half of total load as of the date of initial service by BPA under a contract entered into under this Act, other than under Section 7, and not more than one-half of load growth thereafter, to public bodies and cooperatives which do not receive service under a contract authorized in Section 7; provided, that prior to June 30, 1983, total load of such a customer shall be at Rate Group B.

(d) RATE GROUP B.—Increased requirements of customers described in Section 7(e) due to technological reasons, at the annual rate of 0.5 percent, cumulative to the extent not used, of the total contract demand for all such customers as a group during the preceding contract year beginning July 1, 1978.

(e) RATE GROUP B.—One-half of load growth after June 30, 1983, to Federal agencies.

(f) RATE GROUP C. (Adjusted).—All other sales of firm power, to utility systems and other customers.

(g) Utility systems purchasing power at the same Rate Group may interchange entitlements under such Rate Group so long as the total purchased power that BPA is obligated to sell under any Rate Group is not increased.

INSUFFICIENCY OF SUPPLY

SEC. 9. (a) BPA's obligation to deliver in any period power sold under Section 8 shall be subject to limitation as provided in this section to the extent that BPA finds that it shall have an insufficiency of supply, provided that deliveries to any customer which

has sold, or which has arranged for the sale of, power to BPA for such period shall not be reduced below the amount of power so sold.

(b) BPA shall give notice ten years in advance of such limitation, or such shorter period not less than seven years if BPA determines adequate alternate generating facilities can be secured in such period. No such notice may be given prior to July 1, 1982.

(c) "The amount of power so sold" shall be based upon the designated plant's estimated actual capability in the eleventh year following such notice of insufficiency. Each year thereafter such "amount of power so sold" shall be revised as necessary to take into account any changes in the estimated actual capability. Such revision shall be effective ten years from the date of the revision.

RESOURCE COST BASES OF RATE SCHEDULES

SEC. 10. (a) BPA resources shall be classified, for cost purposes, in the following resource cost groups:

(1) "Federal Base System Cost" (FBS cost) means cost (including repayment and interest) of the Federal Columbia River Power System hydrogenerating projects allocated to power (including irrigation costs assigned for repayment out of power revenues) in operation on or before June 30, 1983 (including facilities initially scheduled for service by June 30, 1983, but delayed beyond that date), and costs of power acquired from projects under net billing agreements, all as adjusted for replacement resources. BPA shall acquire resources to replace the capability of resources included in FBS cost to the extent of any reduction of such capability.

(2) "System cost" means the full cost to a private utility of acquiring, owning and operating the power facilities used or to be used to supply power purchased under Section 6(b) and shall be the sum of the following: (i) fixed costs, (ii) operating expenses, including fuel, depreciation, taxes other than Federal income taxes, Federal and state income taxes, purchased and interchanged power costs, and wheeling costs, and (iii) any other expenses related to the purchase of power, the construction, ownership, operation and maintenance of generating plants to the extent not included in (i) and (ii) above.

(3) "New resource costs" means cost of all power purchased or otherwise acquired by BPA less costs included in FBS cost and system cost of power, provided that, the cost of power purchased for a term of five years or less shall not be a new resource cost except to the extent such power is used to meet obligations of BPA incurred pursuant to Sections 7 and 8. Cost of power purchased from public bodies and cooperatives shall be separately determined from cost of power purchased from private utilities.

(4) Cost of transmission to be paid by BPA customers shall be determined in accordance with P.L. 93-454 and allocated by BPA among Rate Groups A, B and C.

(5) All other cost, including administrative and general shall be appropriately allocated by BPA.

(b) Resource costs shall be allocated by BPA between capacity and energy. Whenever a single capacity rate is in effect, capacity costs shall be totaled and allocated to rate Groups in proportion to capacity sales of each Rate Group.

(c) Rate Group A shall recover the allocated cost of capacity, and that portion of the FBS cost allocated to energy, that is related to power sold in each year under Section 7(b) and Setcion 11(b), plus the portions of transmission cost allocated under subsection (a)(4), and other cost allocated under subsection (a)(5).

(d) Rate Group B shall recover the allocated cost of capacity, and the balance of FBS cost allocated to energy, system cost allocated to energy (including annual charges for the portion of system cost treated by BPA as capital), and the proportion of new resource cost allocate to energy that the amount of power from such resources to be sold under section 8 (b) through (e) in each year bears to the total amount of power to be sold from such resources in such year, less estimated revenues for sales of nonfirm power as provided in subsection (n), plus the portions of transmission cost allocated under subsection (a)(4) and other cost under subsection (a)(5). Adjustment in Rate Group B shall be made as provided in subsection (j).

(e) Rate Group C shall recover the allocated cost of capacity, and the proportion of new resource cost allocated to energy that the amount of power from such resources to be sold under sections 7(f) and 8(f) in each year bears to the total amount of power to be sold from such resources in such year, plus the portions of transmission cost allocated under subsection (a)(4) and other cost under subsection (a)(5). Adjustment in Rate Group C shall be made as provided in subsection (j).

(f) In establishing rate schedules, BPA shall establish a single rate for sale of capacity common to Rate Groups A, B and C. If, thereafter, BPA determines that costs associated with supplying capacity make such single rate inequitable, as compared with separate capacity rates for each rate group, it shall establish separate capacity rates for each Rate Group. Cost of capacity reserves and surplus capacity shall be included in the capacity shall be included in the capacity rate, appropriately allocated in case of multiple rates.

(g) Revenues from sales of firm power under existing contracts which continue in effect, and net revenues from wheeling on the Pacific Northwest-Pacific Southwest Intertie shall be credited against FBS cost.

(h) BPA shall allocate among Rate Groups A, B and C in proportion to the avg. mw purchased under each group (i) the fixed cost of any plant that is abandoned or terminated other than for obsolescence, (ii) the fixed cost of a plant which is inoperable, or a porton of fixed cost of any plant to the extent its operation is substantially limited, and (iii) to the extent determined by PNEPCO, that portion of fixed cost related to a reasonably unforeseen replacement or addition of a major plant component.

(i) Any cost and any revenue, the allocation of which is not specifically provided for in this Act, may be allocated by BPA among Rate Groups A, B or C as appropriate.

(j) For the purpose of this subsection, Public Bodies and Cooperatives are one customer class, and private utilities are another customer class. Rate schedules established for sales under Rate Groups B and C to such classes shall provde for annual adjustment in the component of such rate schedule that is based on new resource cost. If the estimated average cost of power of all new resources purchased from a customer class is more than 1 percent in a year less than the estimated average cost of power of all new resources, in all cases excluding plants designated under Section 17(c), the estimated average cost of power of new resources purchased from such class shall be used instead of the estimated average cost of power of all new resources in determining the rate applicable to such class in such year, and the rates to the other class shall be increased to not more than the estimated average cost of power sold by such class to recover any resulting loss in revenue, with any remaining deficit from estimated average cost of power from all new resources allocated among all customers purchasing power under rate schedules pursuant to Rate Group B or C.

(k) BPA may change rates for the sale of electric power and for the transmission of non-Federal electric power over the Federal transmisson system not more frequently than annually upon not less than 12 months' notice, or such lesser time agreed to by the affected customers, except that such notice shall not be required for interim rates under Section 18(a) which are to be effective not later than October 1, 1978.

(l) Schedules of rates and charges shall be established by BPA in conformity with this Act and P.L. 93-454 having regard, in addition to the provisions of Section 9 of P.L. 93-454, to the recovery of the costs of purchased power under Sections 5 and 6, the costs of conservation programs under Section 4, and other costs authorized to be incurred by this Act.

(m) All costs shall be recovered and cost of service computed, without any annual requirement, within the repayment period or periods provided by law. The existng method of determining repayment obligation of costs of the Federal Columbia River Power System allocated to power (including irrigation costs assigned for repayment out of power revenues) and of determining applicable interest cost shall not be changed because of this Act.

(n) Estimated revenues from sales of nonfirm power shall be credited to FBS costs through June 30, 1980. Thereafter, allocation of such estimated revenues shall be made in equal annual increments so that in the year ending June 30, 1985, and thereafter all such estimated revenues are allocated as provided in subsection (d).

CONTRACT TERM

SEC. 11. (a) Sales under Section 7 shall be for a term of 35 years from the effective date of the contract or such lesser period that the purchaser may desire. Sales under Section 8 may be for a term ending not later than 35 years after the first delivery under the contract or, where a sale is related to a designated plant, for the useful life of the plant, whichever is longer. Subject to the provisions of Section 9, contracts providing for sales under Sections 7 and 8 shall not be subject to cancellation in whole or in part to satisfy the requirements of any other customers.

(b) BPA power sales contracts existing on the date of this Act with customers which do not elect to execute contracts tendered under Section 7(g) shall not be extended or renewed. The basis of the rate applicable to such existing contracts with public bodies and ccoperatives shall be Rate Group A, and the amount of power shall be deducted from the limits in Section 7(b), during the remaining term of the contract, and the basis of the rate applicable to such existing contracts with Federal agencies and direct-service industrial customers shall be Rate Group B.

(c) Agreements executed by BPA as an implementation of the Treaty between Canada and the United States of America Relating to the Cooperative Development of the Water Resources of the Columbia River Basin, and the Pacific Northwest Coordination Agreement shall continue in force in accordance with their terms.

ASSIGNMENTS

SEC. 12. (a) A contract for the sale of power uner Section 7 or 8 shall not be assigned without the consent of BPA if BPA determines such assignment will (i) require additional BPA facilities to enable BPA to deliver power pursuant to such contract, or (ii) make unusable existing BPA facilities, or (iii) increase the total amount of power BPA is obligated to deliver.

(b) A contract for sale of power under Section 7 (b), (e), or (f) shall not be assigned to any other entity, except (i) in the case of a sale under Section 7(b), to another purchaser under such section, or to a successor-in-interest to the utility system or to the facilities being served, or (ii) in case of a sale under Section 7 (e) or (f), to a successor-in-interest to the business, or (iii) as a pledge of a security interest.

LARGE LOAD LIMITATION

SEC. 13. BPA shall not increase the contract demand established pursuant to a contract demand contract and shall not supply power to a requirements contract customer for that part of load growth which is created by a new single load of such customer in excess of 35 avg. mw in any 12 months, or 100 avg. mw in any 60 month period, if BPA had not previously determined that firm power would be available for such load, provided that power may be made available on the condition that it be interruptible for a period measured by the time required to acquire the necessary resources but not exceeding ten years or until the scheduled date of continuous operation of resources to be available to supply such load, whichever is earlier. If interruption is required for several such loads, each load will be curtailed in its entirety in inverse order in which the commitment to customers was made. Interruption of all such loads shall be made prior to restriction of power sold under Sections 7 (e) and (f) and Sections 8 (d) and (f).

CONTINUATION OF SERVICES

SEC. 14. BPA shall continue to make available to its customers those services necessary to enable BPA to carry out its statutory responsibilities. Such services shall include, but not be limited to, load forecasting, load factoring, storage, dispatching, scheduling, transmission, coordination, emergency and breakdown relief, and conservation programs. BPA shall make such services available in a fair and equitable manner among all its customers.

BPA FUNDING

SEC. 15. (a) In addition to the purposes for which BPA is authorized to expend funds from the Bonneville Power Administration Fund as enumerated in Section 11(b) of P.L. 93-454, BPA is authorized to expend from such Fund such amounts as may be required to pay: (i) the costs associated with purchases under Sections 5 and 6 of this Act, including advance payments for power on account of costs of acquisition of fuels for plants the output of which is purchased in whole or in part by BPA under Sections 5 and 6 and (ii) costs associated with the conservation programs referred to in Section 4 of this Act.

(b) In addition to the purposes for which BPA is authorized to issue and sell bonds under Section 13(a) of P.L. 93-454, BPA is authorized to issue and sell bonds, subject to the conditions in P.L. 93-454, (i) to provide loan funds under Section 4(a) of this Act, provided that bonds outstanding for such purpose shall not at any time exceed the sum set forth in Section 4(a), and (ii) to pay that portion of costs of acquisition of power which may be treated as capital cost under generally accepted utility accounting practice, exclusive of such costs for fuel.

CONSTRUCTION

SEC. 16. (a) This Act shall be liberally construed to preserve and encourage regional initiative, flexibility, and cooperation in dealing with the subject matter of this Act, and to realize and effectuate the purposes and objects of the Act as found and declared by Congress.

(b) No agreement, action, or course of conduct by any person or entity which is undertaken for the purpose of complying with or implementing the provisions or objectives of this Act shall be deemed to be a violation of the Act of July 2, 1890, as amended, (the Sherman Antitrust Act), the Act of October 15, 1914, as amended, (the Clayton Act), the Act of September 26, 1914, as amended, (the Federal Trade Commission Act), the Act of May 26, 1938, as amended, (the Robinson-Patman Antidiscrimination Act), or any other similar Federal or state laws.

(c) PNEPCO shall promptly transmit to BPA and the Attorney General a written notice, by registered mail, return receipt requested, of any designation or refusal to designate under Section 17(b) or (c). No action or proceeding brought under the laws referred to in subsection (b) arising out of such PNEPCO action shall be commenced after the expiration of six months from the latest date either such agency received such written record of PNEPCO action.

REGIONAL ORGANIZATION

SEC. 17. A valid designation can be made by PNEPCO only so long as it has the characteristics, and its Articles of Incorporation require or authorize functions, as set forth in this section.

(a) PNEPCO is organized and existing as a nonprofit corporation under the laws of the State of Washington and its Articles of Incorporation provide that each utility system in the Pacific Northwest has the right at all times to name a natural person to be a member of PNEPCO.

(b) PNEPCO shall designate a plant or system for purchase of all or part of the power therefrom by BPA on such conditions and for such terms as are consistent with this Act and if such purchase meets the following standards:

(1) Such purchase shall be consistent with provision of an adequate power supply for the Pacific Northwest in light of forecasted power loads and resources, taking into account programs developed under Section 4 for the efficient use and conservation of electric energy;

(2) Each utility system has been or will be given reasonable opportunity for participation in the proposed facility or other resources purchased by BPA sufficient to meet its forecasted resource deficiencies;

(3) Such purchase would be consistent with providing economic and reliable service to the customers of the utility systems and BPA.

(c) PNEPCO may designate a plant for purchase of all or part of the power therefrom which plant does not meet the criteria of subsection (b)(3) but is an experimental, developmental, or pilot plant intended to develop new technologies of generating economic and reliable electric service.

(d) All meetings for the purpose of designating plants or adopting regional forecasts of loads and resources shall be open to the public.

(e) BPA and the Governors of Oregon, Washington, Idaho, and Montana may designate representatives to participate as members in all PNEPCO committees and task forces and to attend, observe, and engage in discussions at all meetings of the Board of Directors of PNEPCO or its members. Invitations may be extended to other civil authorities of the Pacific Northwest to participate as appropriate in PNEPCO committees and task forces.

MISCELLANEOUS

SEC. 18. (a) BPA may, without approval of the Federal Power Commission, apply its existing rates to, and thereafter establish interim rates under Rate Groups A and B for, contracts under Section 7(g) during the period from the effective date of the Act to the date when rate schedules prepared pursuant to this Act are first filed with and approved by the Federal Power Commission pursuant to P.L. 93-454, which date of filing shall be no later than 18 months after the effective date of this Act, provided that no such interim rates may be established after such filing.

(b) A copy of each purchase contract under Section 6(a) substantially in the form proposed for signature, shall be transmitted by BPA to Congress, and thereafter BPA shall publish notice thereof in the Federal Register not less than 60 days prior to the proposed date of execution of such contract. Any such contract executed more than 60 days after the date of such publication shall be valid for all purposes under this Act and the statutes and laws of the United States, and its validity shall not be questioned in any court of the United States unless, prior to the execution thereof, suit has been filed in a court of the United States challenging the validity of such contract.

(c) The Secretary of PNEPCO shall certify to BPA the designation of a plant or system under Section 17 together with any conditions of such designation. Thirty days after the date of such certification, such certification shall be conclusive for all purposes that a valid designation of a plant or system under Section 17 has been made in accordance with the requirements of this Act and with the Articles and Bylaws of PNEPCO, and after such certification such designation may not be withdrawn, modified, or revoked without consent of the owner or owners of the plant or system.

(d) No provision of Chapter 2C, Title 15, U.S.C., shall apply to or be deemed to include: (i) PNEPCO; or (ii) any "person" or "company" (as defined in 15 U.S.C., Section 79b (a)(1) and (2)) organized and operated primarily for the purpose of financing, leasing, constructing, owning, managing, or operating part of, an interest in, or all of, facilities used for the generation of electricity (together with associated transmission and other facilities), 50 percent or more of the power from which, or from the part or interest so financed, leased, constructed, owned, managed, or operated, is or will be sold to BPA under Section 5 or 6.

(e) If after July 1, 1982, and prior to June 30, 1988, BPA gives a notice of insufficiency to all its requirements customers and, prior to June 30, 1968, BPA either has refused to purchase power from designated plants or is legally disabled from purchasing power adequate to cover such insufficiency, then during the period of insufficiency estimated revenues from sales of nonfirm power shall, in lieu of the provisions of section 10(d), be credited one-half to Rate Group A and one-half to Rate Group B if the insufficiency is caused by a BPA refusal to purchase, and shall be credited entirely to Rate Group A if the insufficiency is caused by such legal disability.

SEVERABILITY AND CONTINUATION OF RIGHTS

SEC. 19. If any part of this Act is declared unlawful, then all remaining parts shall remain in full force and effect, provided that, if any part either section 5 or section 6 is declared unlawful, any obligations entered into pursuant to section 5 or 6 shall remain in full force and effect in accordance with their terms, and provided further that, if the provisions of section 7(b) are declared unlawful, then section 10(c) and that portion of section 10(d) relating to FBS cost shall be void.

TAX-EXEMPT BONDS IN THE CASE OF CERTAIN REGIONAL ELECTRIC ENERGY PROGRAM

SEC. 20. (a) Subsection (b) of section 103 of the Internal Revenue Code of 1954 (relating to industrial development bonds) is amended by inserting after paragraph (3)(B) the following new paragraph:

"(C) An agency of the United States administering a program approved by an Act of Congress for purposes of meeting the electric energy needs of one or more regions of the United States (but only with respect

to the agency's acquisition of electric energy from a facility therefor if the agency determines, prior to contracting for the acquisition, that such electric energy is not being acquired for the purposes of furnishing a major portion thereof to persons who are not exempt persons (within the meaning of paragraphs A and B), each of which is expected to be furnished more than 3 percent of the electric energy; provided that in computing the portion of the proceeds of an issue of obligations to be used in any trade or business by persons who are not exempt persons, the amount of electric energy the agency determines will be furnished by it to such persons shall be treated as sold to such persons by the issuer of the obligations)."

(b) Effective Date. The amendments made by this section shall apply to acquisitions of electric energy after .

STATEMENT OF PUBLIC UTILITY DISTRICT NO. 1 OF SNOHOMISH COUNTY IN SUPPORT OF ITS REQUESTED AMENDMENTS TO PACIFIC NORTHWEST UTILITIES CONFERENCE COMMITTEE (PNUCC) REGIONAL POWER LEGISLATION

A group consisting of representatives of public and private power and aluminum industries of the Northwest, known as the Pacific Northwest Utilities Conference Committee (PNUCC), has drafted regional power legislation and requested its introduction in Congress. Although the Public Utility District No. 1 of Snohomish County, Washington, (the "District") strongly supports the concept of a regional power program for the Pacific Northwest and participated in the PNUCC, the District early announced its reservations concerning certain aspects of the proposed legislation, stating it would withhold approval until the complicated plan documents were completed. Upon reviewing the final draft, the District determined that it could not support the PNUCC legislative proposal in its entirety, although many aspects merited the District's support. Generally, the District concluded the final draft overall was not fair and equitable to public power in the Northwest, requiring public power to concede too much for the benefit of private power and the aluminum industry. At the same time, the District was also concerned about the PNUCC bill's effect upon the preference rights of public agencies and cooperatives to power generated by Federal hydroelectric facilities. The District's concern over the PNUCC bill's effect upon the preference clause was subsequently shared by public power throughout the nation as they become familiar with the details of the PNUCC proposal.

Clearly, many aspects of the PNUCC proposal have merit. For example, the proposed legislation includes a strong regional conservation program, will result in regional power planning for the Pacific Northwest, will minimize the environmental impacts through more efficient operation of existing generating facilities and better planning for new generating facilities, and will establish a framework for Federal, state and local cooperation which could serve as a model for other regions of the country. Accordingly, the District has anayized the PNUCC proposal carefully with a view towards developing amendments which would preserve the many advantages of the proposed legislation, yet resolve the national concern over preference power and, also, provide a more fair and equitable allocation of the costs and benefits from a regional power program between public and private power interests in the Pacific Northwest.

The District has drafted amendments to the PNUCC legislation which it believes satisfy those objectives. The purpose of this Statement is to explain in some detail the nature of the amendments, provide some additional background, and explain the impact of the District's amendments upon the PNUCC legislation. Preliminarily, it should also be observed that the PNUCC group has been pushing for prompt introduction of its bill in Congress which has restricted the scope of the District's ability to develop amendments. As a result, the District has tried to keep its amendments simple and within the framework of the existing PNUCC legislation. Also, the District has not attempted to amend the numerous proposed contracts and other plan documents prepared by the PNUCC group to implement the proposed legislation. Those documents, of course, must be modified in accordance with any amendments to the PNUCC bill.

Generally, the District's amendments simply change certain sections of the PNUCC bill to alter the flow of Federally generated hydro power (preference power), resulting in the existing public agencies of the Pacific Northwest receiving their preference rights to hydro power at the hydro cost. This amendment satisfies the primary objectives of the District. First, by increasing the amount of lower cost hydroelectric power available to the public agencies over the duration of the regional power proposal, the District shifts the balance of benefits and costs under the PNUCC bill to achieve a more fair and equitable accommodation of the interests and rights of public power vis-a-vis those of private power and the aluminum industry. From an economic standpoint, the practical effect of the District's amendments is to lower the bulk power costs of the public agencies and increase the amount of such low-cost power available. Correlatively, the power costs of private power in the Pacific Northwest is increased slightly and the power costs of the aluminum industries are increased slightly more.

But the District does not believe that this shifting of benefits alters the feasibility of the regional power program. Clearly, the aluminum industry and private power will not get as good a deal as they would under the PNUCC proposal. But there are still substantial benefits for private power and the aluminum industry. For example, the District believes that the primary need of the aluminum industry in the Pacific Northwest is an assurance of a future power supply. The District's proposed amendments do not alter the amount of power made available to the aluminum industry under the PNUCC bill; instead, the District's amendments merely increase slightly the cost of such power without reducing the amount of power available. Likewise, although the District's amendments will increase slightly the power costs of private power as compared to private power costs under the PNUCC bill, there still remain the benefits to private power including Federally backed financing of new generating facilities. The overall effect of the District's amendments merely adjusts the benefits from a regional power program which the District believes is more fair and equitable to public power in the region, while still preserving the basic overall benefits to the region.

Secondly, by reserving the low-cost hydroelectric power for the existing public agencies of the Northwest, the District's amendments preserve public power's preference rights and therefore satisfy the national concern of public power to the PNUCC bill. In that regard, we would be remiss if we did not comment upon the strong opposition to the PNUCC proposal manifested by public power across the nation because of the preference problem. Indeed, the District became concerned that the PNUCC proposal could not be passed in Congress with the national public power opposition which was developing.

The District's awareness of the preference problem led to a detailed study of the entire concept of preference power. Our research disclosed that more than 30 pieces of national legislation establish the preference concept.

By way of background, the Bonneville Project Act includes a most explicit and clear statement of the preference clause. In directing the BPA Administrator to give preference to public bodies and cooperatives for electric energy generated by the Federal hydroelectric facilities of the Bonneville Project, Congress specifically stated:

"In order to insure that the facilities for the generation of electric energy at the Bonneville Project shall be operated for the benefit of the general public, and particularly domestic and rural consumers, the Administrator shall at all times in disposing of electric energy generated at the Project give preference and priorities to the public bodies and cooperatives."

Thus, Congress has made clear its intent that public bodies and cooperatives shall have preference rights to Federally generated hydro power. The District and national public power representatives became concerned that the PNUCC bill, by authorizing private power and the aluminum industry to obtain Federally generated hydroelectric power at the expense of public power, constituted an erosion of the preference rights of public agencies to Federally generated hydroelectric power.

Perhaps a brief comment on the historical origin of the preference concept is in order. Similar preference clauses appear in numerous Federal power marketing acts. Generally, the preference concept is based upon the long-standing philosophy that the benefits derived from Federal investment on the free-flowing rivers of the United States must be reserved for the public; such benefits should not enure to the stockholders of private companies. This concept, of course, applies to the PNUCC bill which, as presently drafted, would permit the stockholders of the private power companies and aluminum companies of the Pacific Northwest to share in the benefits of the Federally generated hydroelectric power.

With this background, let's take a closer look at the District's amendments. The District proposes to amend the PNUCC legislation to redefine Federal Base System cost as being the cost associated with the Federal hydroelectric system on the Columbia River. Thus, Rate Group A of the PNUCC bill would consist entirely of Federal hydro power at the Federal hydro cost and the entire capability of the Federal hydro system would be available as needed by the existing preference agencies of the Northwest.

We would be remiss if we did not acknowledge that the District's amendments do raise additional questions. For example, questions have been asked concerning the impact of our amendments upon the tax-exempt status of previously issued bonds. To those questions, we have received informal opinions from competent attorneys that our proposed amendments would have no greater effect upon the tax-exempt status of such bonds than the "gating" operation or other aspects of the PNUCC proposal. To the questions of the status of existing net billing contracts, it is our opinion that such contracts can remain in effect and operable under our amendments. It is probable that payments will have to be made by the BPA Administrator in accordance with Section 7 of the net billing agreement, but that is not a detriment. We are also convinced that the BPA payout schedule is not affected by our amendments because BPA will recover its costs associated with the net billed plants from Rate Group B as part of the overall revenue income.

Moreover, there may be additional questions raised by our amendments. But the PNUCC proposal itself raises many questions.

By proposing these amendments, the District does not purport to have answers to all of the questions asked or likely to be asked in the future, nor to suggest that its amendments answer all of the questions. Instead, it is our hope and belief that our proposed amendments will lead to a fair and equitable balancing of the costs and benefits of a regional power program throughout the Pacific Northwest and, most importantly, result in a regional plan which can be supported by public power nationally and gain approval of Congress.

PROPOSED AMENDMENT OF PUBLIC UTILITY DISTRICT NO. 1 OF SNOHOMISH COUNTY TO THE PACIFIC NORTHWEST UTILITIES CONFERENCE COMMITTEE REGIONAL POWER BILL

(New material in italics; canceled material in brackets.)

1. Page , section 5, to read as follows:

AUTHORITY TO PURCHASE

SEC. 5. In addition to authority under existing law, BPA may purchase power, provided that power purchased *under new contracts* for a term in excess of five years shall be purchased only as provided in Section 6. BPA may sell such purchased power together with or separately from power from the Federal Columbia River Power System. Power sold for a term in excess of two years shall be sold at rates no less than the rates applicable to other sales under this Act. Sales for a term longer than five years are to be made only to entities and under terms and conditions provided in this Act.

2. Page , section 7(b), amended as follow:

(b) RATE GROUP A.—Actual requirements [not more than 5700 avg mw such limit increasing beginning July 1, 1984 in 10 equal annual increments to a total of 6000 avg. mw,] *up to the firm energy capability of the hydroelectric generating resources of the Federal Columbia River Power System,* to public bodies and cooperatives that are obligated, as of the effective date of this Act, to make payments under net billing agreements. There will be allocated in each contract year to each such public body and cooperative executing a contract referred to in Section 7(g), an amount of power determined by multiplying the firm energy requirements for such year of such public body or cooperative by a fraction whose numerator is the total power available in that contract year under this subsection, and whose denominator is the estimated total firm energy requirements of all such public bodies and cooperatives. Such estimates will be made annually for the ensuing 10 years. Firm energy requirements as used in this subsection has the same meaning as "Sum Energy Requirements" as the latter term is defined in contracts referred to in Section 7(g).

3. Page , section 9(a), to read as follows:

(a) BPA's obligation to deliver in any period power sold under Section 8 shall be subject to limitation as provided in this section to the extent that BPA finds that it shall have an insufficiency of supply, provided that deliveries to any customer which has sold, or which has arranged for the sale of, power to BPA for such period *from a designated plant* shall not be reduced below the amount of power so sold.

4. Page , section 10(a)(1), to read as follows:

(1) "Federal Base System Costs" (FBS cost) means cost (including repayment and interest) of the Federal Columbia River Power System hydrogenerating projects allocated to power (including irrigation costs assigned for repayment out of power revenues) *less estimated revenues from the sale of nonfirm power.* [in operation on or before June 30, 1983 (including facilities initially scheduled for service by June 30, 1983, but delayed beyond that date), and costs of power acquired from projects under net billing agreements, all as adjusted for replacement resources. BPA shall acquire resources to replace the capability of resources included in FBS cost to the extent of any reduction for such capability.]

5. Page , section 10(a)(3), to read as follows:

(3) "New resource cost" means cost of all power purchased or otherwise acquired by BPA less *FBS cost, net billed thermal costs* [costs included in FBS cost] and system cost of power provided that, the cost of power purchased for a term of five years or less shall not be a new resource cost except to the extent such power is used to meet obligations of BPA incurred pursuant to Sections 7 and 8. Costs of power purchased from public bodies and cooperatives shall be separately determined from cost and power purchased from private utilities.

6. Page , new section 10(a)(4), to read as follows:

(4) *"Net billed thermal costs" means costs of power acquired by FPA under net billing agreements.*

7. Page , former Section 10(a)(4) to be new Section 10(a)(*5*).

8. Page , former Section 10(a)(5) to be new Section 10(a)(*6*).

9. Page , Section 10(c), all references to Section (a)(4) will be changed to Section (a)(*5*); and all references to Section (a)(5) will be changed to Section (a)(*6*).

10. Page , section 10(d), to read as follows:

(d) Rate Group B shall recover the allocated cost of capacity, and the balance of FBS cost allocated to energy, system cost allocated to energy (including annual charges for the portion of systems costs treated by BPA as capital), *net billed thermal costs allocated to energy* and the proportion of new resource cost allocated to energy that the amount of power from such resources to be sold under Section 8(b) through (3) in each year bears to the total amount of power to be sold from such resources in such year, [less estimated revenues for sales of non-firm power as provided in subsection (n),] plus the portions of transmission cost allocated under subsection (a)[4](*5*) and other cost under subsection (a)[5](*6*). Adjustment in Rate Group B shall be made as provided in subsection (j).

11. Page , sections 10(d) and 10(e), references to Section (a)(4) shall be changed to (a)(*5*); and references to Section (a)(5) shall be changed to (a)(*6*).

12. Page , section 10(n), will be completely deleted. Section 10(n) previously read as follows:

[(n) Estimated revenues from sales of nonfirm power shall be credited to FBS costs through June 30, 1980. Thereafter, allocation of such estimated revenues shall be made in equal annual increments so that in the year ending June 30, 1985, and thereafter all such estimated revenues are allocated as provided in subsection (d).]

13. Page , section 18(e), will be completely deleted. Section 18(e) previously read as follows:

[(e) If after July 1, 1982, and prior to June 30, 1988, BPA gives a notice of insufficiency to all its requirements customers, and prior to June 30, 1988, BPA either has refused to purchase power from designed plants or is legally disabled from purchasing power adequate to cover such insufficiency, then during the period of insufficiency estimated revenues from sales of non-firm power shall, in lieu of the provisions of Section 10(d), be credited one-half to Rate Group A and one-half to Rate Group B if the insufficiency is caused by a BPA refusal to purchase, and shall be credited entirely to Rate Group A if the insufficiency is caused by such legal disability.]

PACIFIC NORTHWEST UTILITIES CONFERENCE COMMITTEE,
September 9, 1977.

PNUCC LEGISLATIVE PROPOSAL FACT SHEET

A. TRADITIONAL BULK POWER SUPPLIES AND SALES POLICIES

For forty years, the Bonneville Power Administration (BPA) has been the major supplier of bulk power in the Pacific Northwest. BPA does not own any generating facilities, has no authority to construct such facilities, and only limited authority to purchase the output of generating facilities constructed by others. Its principal role is to market the power produced at hydroelectric dams constructed by other federal agencies, and to operate a regional transmission system capable of accommodating both federal and non-federal power deliveries.

The chief purchasers of bulk power in the Northwest fall into three categories: consumer-owned utilities (including municipal systems, public utility districts, and cooperatives), investor-owned utilities, and certain industries that purchase power directly from BPA. The consumer-owned utilities ("publics") have a statutory preference to purchase federal power sold by BPA; neither the investor-owned utilities ("privates") nor the direct-service industries have such rights.

The distribution of public and private utilities is not uniform throughout the Pacific Northwest. Washington State consumers are served mostly by publics, while Oregon consumers are served mostly by privates. Historically, disparities in bulk power costs as between publics and privates were substantially less than those that exist today, partly because BPA had sufficient federal power to permit some sales to private as well as publics, and partly because the cost of constructing non-federal generating resources was relatively low, compared with the cost of constructing new generating resources today.

The direct-service industries play an important—and frequently misunderstood—role in the BPA bulk power marketing program. Their relatively large and constant power demand made construction of large federal facilities more economically feasible at an early date. The industries purchased large amounts of federal power not suitable for utility use that otherwise would have been wasted in years of abnormally high streamflows. These purchases contributed revenues to the federal system that reduced costs for other bulk power purchasers.

Most important, perhaps, the industrial contracts have also provided substantial reserves for the entire region, since certain power sales to these industries can be interrupted when necessary to meet the requirements of utilities that purchase federal power and for system emergencies. Without their presence the full cost of maintaining adequate reserves would be borne by the utilities and their consumers.

B. WHY NEW FEDERAL LEGISLATION IS NEEDED

Two basic facts underlie all the major power problems in the Pacific Northwest today: the firm energy generating potential of the Columbia River and its tributaries has been largely developed and the cost of building new generating facilities to meet the region's needs is astronomical. The day of cheap and abundant power is over. Today there is an urgent need for conservation programs, for efficient management of the region's generating resources, and for planning mechanisms that insure the availability of the power we do need at the lowest attainable costs.

The following problems are very serious, and will rapidly become acute if the present regional power supply framework remains unchanged:

1. *Uncertain Supply of Federal Power.* For the first time in history, BPA has been forced

to notify its preference customers (the publics) that it will be unable to supply their requirements for more power after 1983. This is serious news for the publics, most of whom have depended principally on BPA for power supply.

Since BPA cannot increase the amount of power available to the publics, it must soon reallocate the limited amount available. To the extent new publics may be created (see below), the BPA "pie" would be cut into smaller and smaller pieces. The reallocation process would take years to complete, and competing claims would likely have to be resolved in the courts. Utility managers would not know how much power they might have when the process ends, so they would be unable to plan on a firm basis for additional sources of supply they will need.

2. *Termination of Supply to Direct-Service-Industries.* BPA has informed its direct-service industrial customers that it cannot renew their power contracts when those contracts expire, beginning in 1981, since BPA does not have sufficient power to meet the needs of its preference customers. These industries—which produce 30% of the nation's aluminum, 100% of its nickel, and other products—need a source of power at a price they can afford. They must know very soon whether that power will be available to them in order to plan future investments in the Northwest, or the possible relocation of their plants elsewhere.

3. *Large Cost Disparities Within the Region.* Until 1973, a substantial part of private utility requirements was supplied by BPA. But since then, they have been unable to purchase any firm power from BPA. Their necessary investment in new and higher-cost generating facilities translates into higher costs for bulk power, especially in comparison with public systems that still obtain bulk power from BPA. Bulk costs for the privates are several times those for public agencies. This growing disparity affects the entire region, but its impact is spread very unevenly, particularly as between Washington and Oregon. Disparities in bulk power costs convert into disparities in consumer rates. As a result, in any Pacific Northwest state, a given community may have electric rates that are more than twice as high as rates in a neighboring community. This disparity will increase and the resulting political stresses will probably become unbearable in the absence of new legislation.

4. *Creation of New Preference Customers.* As a result of the higher rates of private utilities and the fact that private utilities predominate in the State of Oregon, Oregon's Governor has proposed, and its legislature has passed, a bill creating a new public agency to purchase power directly from BPA and sell it to those domestic and rural consumers in Oregon who now receive their electricity from private utilities. (Nearly 80% of Oregon's domestic and rural customers are served by privates.) This new agency, the Domestic Rural and Power Authority ("DRPA"), would complicate the legal fight over reallocation, but it would not solve other serious problems. The legal battles over reallocation itself would raise issues of national significance likely to be carried to the U.S. Supreme Court. If DRPA is activated—which will not occur if the regional bill is adopted—Washington, Idaho and Montana could decide to create DRPAs of their own to protect their citizen's rights to a proportionate share of BPA's power.

The City of Portland has applied to BPA for a power supply as a preference customer of BPA, and has threatened to bring suit against BPA for signing contracts with certain preference customers, many of them in Washington.

These actions would each complicate and prolong the uncertainties of the reallocation process, without creating any additional power supplies and without producing lower costs for the region as a whole.

5. *Limitations on BPA's Ability to Play a Constructive Role.* Despite the severity of the problems outlined above, BPA—the region's major bulk power supplier, and the sole supplier to a majority of the region's public utilities—is statutorily precluded from resolving differences within the region or even from playing an effective role in finding the needed solutions.

Meanwhile, the historic cooperation within the region threatens to break down entirely, just when the need for cooperation is greatest. Not only is coherent planning becoming impossible, but the very ability of the system to finance essential generation may become seriously impaired. The opportunity still exists to develop reasonable and regional solutions by building constructively on existing planning and facilities, but that opportunity is rapidly diminishing.

C. HOW THE PNUCC LEGISLATIVE PROPOSAL WAS DEVELOPED

Many different groups recognized these problems and, several years ago, started examining potential solutions. The private utilities looked at pooling. Various bodies examined new BPA authority, and the direct service industries formulated a legislative proposal. The Governor of Oregon began work on his DRPA legislation. The City of Portland explored the prospects of becoming a preference agency.

These various activities were not coordinated, however, and their many technical and economic impacts presented formidable problems. Last fall, in response to requests from public officials and a variety of BPA customers, BPA prepared a study paper analyzing power costs resulting from many concepts that had been discussed earlier, but the study paper did not describe any alternative that produced agreement. In late 1976, the effort came under the auspices of PNUCC and has resulted in the draft legislation called Pacific Northwest Electric Power Supply and Conservation Act.

The fact that individuals representing a large number of divergent and competing interests were able to cooperate in creating a single legislative proposal indicates how serious the Pacific Northwest's power problems have become. The same fact necessarily means that the consensus embodied in the PNUCC proposal does not—and cannot—fully satisfy any particular group, including the groups that came together to draft it. It should be emphasized, however, that the proposal was conceived and written within the PNUCC, and that PNUCC members believe it to be the best attainable solution that is in the interests of the region as a whole. Whether governing councils and boards of individual utilities can support it will have to await their decision.

D. WHAT THE PNUCC LEGISLATIVE PROPOSAL CONTAINS

The legislation would:

Establish the nation's first region-wide conservation program;

Create a much earlier and much enlarged role in the electric energy planning process for state and local governments and public groups;

Grant BPA limited authority to purchase power;

Establish rate groups for BPA's sale of power to different classes of bulk power purchasers;

Recognize the role of a regional utility planning body controlled equally by consumer-owned and investor-owned systems;

Reduce the costs of essential new power resources; and

Maintain a balanced decision-making process among federal, state and local governments, public agencies, private utilities and other responsible bodies.

Some of these elements would combine to remove supply uncertainties facing public agencies and direct service industries and reduce the intolerable rate disparities that would otherwise prevail within the region.

The bill would *not:*

Authorize the construction of generating plants, or of any type of generating plants;

Foreclose development of other effective methods of participation in planning by state or local governments;

Establish either the need or the lack of need for additional generating plants; or

Eliminate any presently required federal, state, or local permits, licenses, consents or other authorizations.

1. *The Conservation Program.* Conservation standards for efficiency in energy use must be promptly adopted and implemented. Standards would be established for a broad range of uses—residential, commercial, industrial and agricultural. The four Northwest States are to agree on regional standards, but if they fail, BPA would establish them. If any state or political subdivision failed to adopt the standards after they had been established, utility systems within that state or subdivision would be able to purchase power from BPA only at a minimum surcharge of 50 percent. Proceeds of the surcharge would finance conservation programs and reduce power rates in complying areas.

The bill sets up a $300 million revolving loan fund for conservation loans, permitting such programs as interest-free insulation loans to consumers. Grants could also be made and BPA could fund conservation investments that promise significant gains in efficiencies.

2. *Pooling—Allocation of Costs.* The bill authorizes BPA to purchase the output of new plants when designated by PNEPCO, the regional planning body; to acquire up to 4,000 mw of capacity from the private companies at average system cost; and to sell such power under three Rate Groups, A, B and C.

a. Rate Group A would be an existing preference agency pool and would be the lowest cost pool. It would recover costs of up to 6090 mw of the Federal Base System—about two-thirds of present BPA capacity, including Federal hydro and thermal capacity previously acquired from public agencies under a limited hydro-thermal program developed earlier.

b. Rate Group B would be a blended pool of the costs of existing Federal hydro, public thermal, private hydro and thermal, and new resources sufficient for one-half of post-1983 load growth. It would carry higher costs than Rate Group A. Rate Group B would recover:

(i) The remaining Federal system costs (net—over a period of time—of secondary revenues);

(ii) The cost of up to 4000 mw of relatively inexpensive private utility power to be sold to BPA; and

(iii) The portion of costs of new resources related to one-half of the load growth of all utilities.

c. Rate Group C would recover costs not included in Rate Groups A and B and would be the highest cost pool.

d. Subsection 10(j) of the legislation provides that public bodies and cooperatives and/or private utilities—each as a class—would be ensured of whatever advantages might accrue to them from the costs of their own new resources, when the difference between the costs of all new resources, as a whole, was one percent or more greater than costs from their new resources as a class.

3. *PNEPCO—The Regional Planning Organization.* The legislation recognizes a new regional planning body, the Pacific Northwest Electric Planning and Conservation Or-

ganization ("PNEPCO"). PNEPCO would be a non-profit corporation with membership open to all utilities in the region. Under PNEPCO, power planning would be more regional and more open than ever before. The PNEPCO board of directors would be evenly divided between public and private utility representatives. BPA and the Governors of each Northwest state could designate representatives to attend and participate in all PNEPCO meetings. PNEPCO's most important responsibilities would include preparation of regional load forecasts (taking into account the effects of conservation) and designation of the generating facilities or systems from which BPA may make long-term power purchases. All PNEPCO board meetings at which load forecasts or resource designation decisions are considered would be open to the public. Standards are included in the legislation to insure that no unnecessary new plants are built, that necessary plants are built without unnecessary costs, and that promising new technologies can be developed.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. CORMAN (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. DORNAN (at the request of Mr. RHODES), for today, on account of the death of a close, personal friend.

Mr. GILMAN (at the request of Mr. RHODES), for today, on account of official business.

Mr. ZEFERETTI (at the request of Mr. BRINKLEY), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EVANS of Delaware) to revise and extend their remarks and include extraneous material:)

Mr. QUIE, for 10 minutes, today.

Mr. SEBELIUS, for 5 minutes, today.

Mr. KEMP, for 10 minutes, today.

Mr. MCDADE, for 5 minutes, today.

(The following Members (at the request of Mr. BEILENSON) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LEDERER, for 5 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

Mr. PREYER, for 15 minutes, today.

Mr. STAGGERS, for 5 minutes, today.

Mr. DODD, for 10 minutes, today.

Mr. MCHUGH, for 5 minutes, on September 12.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MEEDS, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $2,495.50.

(The following Members (at the request of Mr. EVANS of Delaware) and to include extraneous matter:)

Mr. BAUMAN.

Mr. LATTA.

Mr. JOHNSON of Colorado in two instances.

Mr. BOB WILSON.

Mr. ABDNOR in two instances.

Mr. HILLIS.

Mr. RUDD.

Mr. MARKS in 10 instances.

Mr. MICHEL.

Mr. CRANE.

Mr. FINDLEY in two instances.

Mr. BUCHANAN.

Mr. KEMP in two instances.

Mr. WALSH.

Mr. ASHBROOK in three instances.

Mr. DERWINSKI in two instances.

Mr. MILLER of Ohio in four instances.

Mr. HAGEDORN.

Mr. WHALEN.

Mr. SHUSTER.

Mr. BURGENER.

Mr. COUGHLIN.

Mr. BURKE of Florida.

(The following Members (at the request of Mr. BEILENSON), and to include extraneous matter:)

Mr. FRASER.

Mr. EILBERG.

Mr. MURPHY of Illinois.

Mr. RUSSO in two instances.

Mr. HAMILTON.

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. LEDERER.

Mr. JACOBS in two instances.

Mr. WOLFF.

Mr. HAWKINS.

Mr. REUSS.

Mr. PHILLIP BURTON.

Mr. FORD of Tennessee.

Mr. STAGGERS.

Mr. CARNEY.

Mr. EDGAR.

Mr. ULLMAN in six instances.

Mr. MCDONALD in three instances.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1560. An act to restore the Confederated Tribes of Siletz Indians of Oregon as a federally recognized sovereign Indian tribe, to restore to the Confederated Tribes of Siletz Indians of Oregon and its members those Federal services and benefits furnished to federally recognized American Indian tribes and their members, and for other purposes; to the Committee on Interior and Insular Affairs.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 5294. An act to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors; and

H.R. 7933. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes.

ADJOURNMENT

Mr. BEILENSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 41 minutes p.m.), under its previous order, the House adjourned until Monday, September 12, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2285. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken for the Naval and Marine Corps Reserve, pursuant to 10 U.S.C. 2233a(1), to the Committee on Armed Services.

2286. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the proposed sale by the Air Force of certain defense articles and services to Iran (transmittal No. 77-46A), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2287. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the proposed sale by the Army of certain defense articles to Switzerland (transmittal No. 77-51), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2288. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2-62, "To amend the Rental Accommodations Act of 1975," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2289. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2-68, "To amend the District of Columbia Health Care Facilities Regulation (Reg. No. 74-15) to provide for licensing community residence facilities, and for related purposes," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2290. A letter from the Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2291. A letter from the Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2292. A letter from the Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2293. A letter from the Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2294. A letter from the Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2295. A letter from the Assistant Secretary of Commerce for Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Commerce on Government Operations.

2296. A letter from the Assistant Secretary of State for Congressional Relations, transmittting a report on political contributions

by Paul H. Boeker, Ambassador-designate to Bolivia, and members of his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

2297. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intent to offer to sell certain defense articles to the United Kingdom (transmittal No. 77–68), pursuant to section 36(b) of the Arms Export Control Act to the Committee on International Relations.

2298. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intent to offer to sell certain defense articles to Iran (transmittal No. 77–69), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2299. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intent to offer to sell certain defense services to Iran (transmittal No. 77–70), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2300. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intent to offer to sell certain defense equipment to Spain (transmittal No. 77–71), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2301. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intent to offer to sell certain defense articles and services to Thailand (transmittal No. 77–72), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2302. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intent to offer to sell certain defense articles to the Republic of China (transmittal No. 77–73), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2303. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intent to offer to sell certain defense articles to Thailand (transmittal No. 77–74), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2304. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intent to offer to sell certain defense articles to Israel (transmittal No. 77–75), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2305. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intent to offer to sell certain defense articles to Pakistan (transmittal No. 77–81), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2306. A letter from the Secretary of Health, Education, and Welfare, transmitting a report on his determination specifying the conditions of persons which should be included in the definition of developmental disabilities, together with the report on the first annual review of such determination, pursuant to section 301(a) of Public Law 94–103; to the Committee on Interstate and Foreign Commerce.

2307. A letter from the Executive Director, Federal Communications Commission, transmitting a report on the backlog of pending applications and hearing cases in the Commission as of May 31, 1977, pursuant to section 5(e) of the Communications Act, as amended; to the Committee on Interstate and Foreign Commerce.

2308. A letter from the Chairman, Federal Power Commission, transmitting a report by the National Gas Survey Advisory Committee's Transmission, Distribution and Storage Technical Advisory Task Force on rate design; to the Committee on Interstate and Foreign Commerce.

2309. A letter from the Acting Secretary, Interstate Commerce Commission, transmitting notice of the Commission's determination to extend the time period for acting upon the appeal pending in *Ex Parte No. 331, Expeditious Procedures for Permitting Publication of Separate Rates for Distinct Rail Services*, pursuant to section 17(9)(e) of the Interstate Commerce Act, as amended (90 Stat. 49); to the Committee on Interstate and Foreign Commerce.

2310. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act (66 Stat. 182); to the Committee on the Judiciary.

2311. A letter from the Chairman, U.S. Commission on Civil Rights, transmitting a report on women and minorities in television, pursuant to section 104(b) of Public Law 85–315; to the Committee on the Judiciary.

2312. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(c) of the act (66 Stat. 214; 76 Stat. 1247); to the Committee on the Judiciary.

2313. A letter from the Comptroller General of the United States, transmitting a report on shortcomings in HUD's efforts to collect delinquent mortgage insurance premiums (FGMSD–77–33, September 8, 1977); jointly, to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

2314. A letter from the Comptroller General of the United States, transmitting a report on problems and needed improvements in the Office of Education's evaluations of its programs (HRD–76–165, September 8, 1977); jointly, to the Committees on Government Operations, and Education and Labor.

2315. A letter from the Comptroller General of the United States, transmitting a report on the objectives, direction, and pace of the equal employment opportunity program for Federal employees and job applicants (FPCD–76–85, September 9, 1977); jointly, to the Committees on Government Operations, Education and Labor, and Post Office and Civil Service.

2316. A letter from the Comptroller General of the United States, transmitting a report on stopping unnecessary and harmful levels of domestic sewage chlorination (CED–77–108, August 30, 1977); jointly to the Committees on Government Operations, Interstate and Foreign Commerce, and Public Works and Transportation.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 9006. A bill to amend the Age Discrimination in Employment Act of 1967 to provide that Federal employees who are 40 years of age or older shall be protected by the provisions of section 15 of such act, and for other purposes; jointly, to the Committees on Education and Labor, and Post Office and Civil Service.

By Mr. BRINKLEY (for himself and Mr. Davis):

H.R. 9007. A bill to amend title 10 of the United States Code to provide essential medical and dental care to members or former members of a uniformed service and their dependents where the member is entitled to retired or retainer pay or equivalent pay; to the Committee on Armed Services.

By Mr. CORRADA:

H.R. 9008. A bill to amend title 38 of the United States Code so as to protect and preserve determinations by the Veterans' Administration with regard to service connection and disability ratings; to the Committee on Veterans' Affairs.

By Mr. DUNCAN of Tennessee:

H.R. 9009. A bill to amend the National Labor Relations Act to provide that any employee who is a member of a religion or sect historically holding conscientious objection to joining or financially supporting a labor organization shall not be required to do so; to the Committee on Education and Labor.

By Mr. HAGEDORN:

H.R. 9010. A bill to amend the Congressional Budget Act of 1974 to limit increases in levels of total budget outlays and total new budget authority established in concurrent budget resolutions; to the Committee on Rules.

By Mr. HAMMERSCHMIDT:

H.R. 9011. A bill to amend sections 1662 and 1663 of title 38, United States Code, in order to provide for a conditional extension of the delimiting period for receiving educational assistance in the case of certain Vietnam era veterans, and to improve counseling for certain veterans; to the Committee on Veterans' Affairs.

By Mr. HOLLENBECK (for himself, Mr. CONTE, and Mr. MINISH):

H.R. 9012. A bill to amend the Internal Revenue Code of 1954 to permit individuals to deduct qualified smoke detector expenses; to the Committee on Ways and Means.

By Mr. JACOBS:

H.R. 9013. A bill to amend the Internal Revenue Code of 1954 to provide for the nonrecognition of gain from the sale of stock in a domestic corporation engaged in a trade or business related to energy if within 90 days after the sale the proceeds are invested in stock of another such corporation; to the Committee on Ways and Means.

By Mr. LAGOMARSINO:

H.R. 9014. A bill to amend title II of the Social Security Act to provide that child's insurance benefits shall not be payable to an insured individual's stepchild, after such child's natural parent and the insured individual are divorced, for any period during which such child is receiving support from another source; to the Committee on Ways and Means.

By Mr. LATTA:

H.R. 9015. A bill to amend the Regional Rail Reorganization Act of 1973 to authorize the Secretary of Transportation to guarantee notes issued to State and local taxing authorities to secure payment of real property tax obligations owed by a railroad in reorganization; to the Committee on Interstate and Foreign Commerce.

By Mr. LEDERER:

H.R. 9016. A bill to amend the Tariff Act of 1930 with respect to the marking of wearing apparel assembled abroad from U.S. products exported for purposes of such assembly; to the Committee on Ways and Means.

By Mr. McDADE:

H.R. 9017. A bill to amend title 38, United States Code, to provide that the recipient of a veterans' pension or dependency and indemnity compensation will not have the amount of such pension or compensation reduced because of cost-of-living increases in social security benefits, railroad retirement annuities, or other retirement benefits; to the Committee on Veterans' Affairs.

H.R. 9018. A bill to amend title 38, United States Code, to provide for the payment of

service pensions to veterans of World War I and the surviving spouses and children of such veterans; to the Committee on Veterans' Affairs.

By Mr. MAHON:

H.R. 9019. A bill to rescind certain budget authority continued in the message of the President of July 19, 1977 (H. Doc. 95–188), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

By Mr. MEEDS (by request):

H.R. 9020. A bill to make the Federal Columbia River Power System available for future essential power supply, to promote conservation, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, Interstate and Foreign Commerce, and Ways and Means.

By Mr. MINETA (for himself, Ms. HOLTZMAN, Mr. RONCALIO, Mr. NEAL, Mr. ALEXANDER, and Mr. UDALL):

H.R. 9021. A bill to amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps; to the Committee on Post Office and Civil Service.

By Mr. GARY A. MYERS:

H.R. 9022. A bill to amend the Trade Act of 1974 to provide that the President may not reduce or terminate import relief if the Congress disapproves such action; to the Committee on Ways and Means.

By Ms. OAKAR (for herself, Mr. RODINO, Mr. WHALEN, Mr. MILLER of Ohio, Mr. NIX, Mr. BROWN of Ohio, Mr. MICHAEL O. MYERS, Mr. GUYER, Mr. LEDERER, Mr. EILBERG, Mr. EDGAR, Mr. KOSTMAYER, Mr. FLOOD, Mr. ERTEL, Mr. AMMERMAN, Mr. WALGREN, Mr. HOLLENBECK, Mr. MARKEY, Mr. LUNDINE, Mrs. HECKLER, Ms. MIKULSKI, Mrs. SPELLMAN, Mr. MCDADE, Mr. MITCHELL of Maryland, and Mr. BEARD of Rhode Island):

H.R. 9023. A bill to amend the Regional Rail Reorganization Act of 1973 to authorize the Secretary of Transportation to guarantee notes issued to State and local taxing authorities to secure payment of real property tax obligations owed by a railroad in reorganization; to the Committee on Interstate and Foreign Commerce.

By Ms. OAKAR (for herself, Mr. GILMAN, Mr. FISH, Mr. LE FANTE, Mr. NOWAK, Mr. ST GERMAIN, Mr. DRINAN, Mr. FORSYTHE, Mr. STRATTON, Mr. HARSHA, and Mr. YATRON):

H.R. 9024. A bill to amend the Regional Rail Reorganization Act of 1973 to authorize the Secretary of Transportation to guarantee notes issued to State and local taxing authorities to secure payment of real property tax obligations owned by a railroad in reorganization; to the Committee on Interstate and Foreign Commerce.

By Mr. OBERSTAR (for himself and Mr. BLANCHARD):

H.R. 9025. A bill to provide for unbiased consideration of applicants to medical schools; to the Committee on Interstate and Foreign Commerce.

By Mr. PERKINS:

H.R. 9026. A bill to provide for orderly trade in iron and steel products; to the Committee on Ways and Means.

By Mr. STAGGERS:

H.R. 9027. A bill to amend the Federal Railroad Safety Act of 1970 to require certain minimum safety standards, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WHITEHURST:

H.R. 9028. A bill to revive the provisions of section 514 of the Public Works and Economic Development Act of 1965; to the Committee on Public Works and Transportation.

By Mr. MINETA (for himself, Mr. PHILLIP BURTON, Mr. HEFTEL, Mr. AKAKA, Mr. BRADEMAS, Mr. HANNAFORD, Mr. RANGEL, Mr. ANDERSON of California, Mrs. BURKE of California, Ms. HOLTZMAN, Mrs. COLLINS of Illinois, Mr. WAXMAN, Mr. SIMON, Mr. WON PAT, Mr. ROE, Mr. ROYBAL, Mr. EDWARDS of California, Mr. HUGHES, Ms. MIKULSKI, Mr. LLOYD of California, and Mr. HARRINGTON):

H.J. Res. 588. Joint resolution relating to the publication of economic and social statistics for Americans of East Asian or Pacific Island origin or descent; jointly, to the Committees on Education and Labor and Post Office and Civil Service.

By Mr. CORRADA:

H. Con. Res. 345. Concurrent resolution expressing the sense of Congress that the value of military exchange and commissary privileges should not be considered by any Federal agency in determining the entitlement of any retired or former member of the Armed Forces to any other Federal benefit or in determining the amount of any other Federal benefit; to the Committee on Post Office and Civil Service.

By Mr. DON H. CLAUSEN:

H. Con. Res. 346. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. HANSEN (for himself, Mr. KEMP, Mr. KINDNESS, Mr. KETCHUM, Mr. CRANE, Mr. DORNAN, Mr. ZEFERETTI, Mr. EDWARDS of Oklahoma, Mr. FLOOD, Mr. STUMP, Mr. SYMMS, Mr. LIVINGSTON, Mr. GOLDWATER, Mr. MARRIOTT, Mr. EVANS of Delaware, Mr. MCDONALD, Mr. ABDNOR, Mr. DUNCAN of Tennessee, Mr. QUAYLE, Mr. SNYDER, Mr. COLLINS of Texas, Mr. WINN, Mr. SCHULZE, Mr. RINALDO, and Mr. ROUSSELOT):

H. Con. Res. 347. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. HANSEN (for himself, Mr. ASHBROOK, Mrs. HOLT, Mr. BAUMAN, Mr. LOTT, Mr. LAGOMARSINO, Mr. DEL CLAWSON, Mrs. SMITH of Nebraska, Mr. LUJAN, Mr. WAGGONNER, Mr. ICHORD, Mr. WHITE, Mr. SHUSTER, Mr. LATTA, Mr. RUDD, Mr. JOHN T. MYERS, Mr. GRASSLEY, Mr. HILLIS, Mr. YOUNG of Florida, Mr. HAGEDORN, Mr. MONTGOMERY, Mr. THONE, Mr. GUYER, Mr. SAWYER, and Mr. DEVINE):

H. Con. Res. 348. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. LEHMAN:

H. Con. Res. 349. Concurrent resolution disapproving the proposed sales to Egypt of 14 C–130 aircraft and 12 "Firebee" remotely piloted vehicles; to the Committee on International Relations.

By Mr. HAGEDORN:

H. Res. 755. Resolution to amend the Rules of the House of Representatives to require that each introduced bill and resolution contain a statement of the constitutional basis of authority for the bill; to the Committee on Rules.

By Mr. HANNAFORD:

H. Res. 756. Resolution designating the second Sunday of each April as Grandparents' Day; to the Committee on Post Office and Civil Service.

SENATE—*Friday, September 9, 1977*

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Wait on the Lord; be of good courage and He shall strengthen thine heart: Wait, I say, on the Lord.—Psalm 27: 14.

Our Father-God Thou art never far from any of us; but often we seem to be far from Thee. Yet as we open the door of our hearts Thy spirit meets us to quicken and renew our bodies, our minds, and our hearts. May Thy sustaining grace which has brought us to this hour undergird our thoughts, our words, our action, until evening comes and our work is done. Then in Thy mercy grant us souls at peace with Thee and with all men.

Through Him whose name is above every name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 9, 1977.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, September 8, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be permitted to meet during the session of the Senate today to consider air bag legislation on which there is a time limitation within which the Congress must act; the time expires October 19, depending upon recesses of Congress.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. JACKSON's Committee on Energy and Natural Resources, or any subcommittee thereof, may meet during the session of the Senate today until 3 p.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

[Later the following occurred:]

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs have an additional 45 minutes to meet today, making the hour until 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

[Later the following occurred:]

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Research and Development Subcommittee of the Armed Services Committee be permitted to meet during the session of the Senate today to consider a piece of "must" legislation, S. 1863, supplemental authorization for the cruise missile.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVER

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 375, Senate Resolution 240.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object. I might say to my friend, the assistant majority leader, that there is no objection to proceeding to the consideration of this calendar order item, which is a resolution waiving the requirements of section 402(a) of the Budget Act, and also there is no objection, if the majority wishes, to proceed to the consideration of Calendar Order No. 377, which is a similar budget waiver.

SENATE RESOLUTION 240

Mr. CRANSTON. Mr. President, I ask unanimous consent that we proceed also to the consideration of that resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 240) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5027 as reported.

There being no objection, the Senate proceeded to consider the resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 240) was agreed to, as follows:

Resolved, That, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 5027 as reported. Such waiver is necessary because section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

Failure to grant the waiver would impair the ability of the Veterans' Administration to provide necessary medical services to veterans.

The major provisions of H.R. 5027 as reported (1) make clarifying amendments in title 38, United States Code, provisions under which the Veterans' Administration may furnish contract health care services through private facilities, (2) extend and improve the Veterans' Administration's authority to enter into new, or extend certain expiring, special-pay agreements with eligible physicians and dentists in order to overcome difficulties in recruiting and retaining highly qualified health care professionals; and (3) establish new health-care programs for eligible veterans in the areas of readjustment, professional counseling, drug and alcohol disabilities, and preventive health care for veterans with service-connected disabilities.

Enactment of the provisions regarding the Veterans' Administration contract health care authority (sections 101–103) are urgently needed to resolve satisfactorily substantial problems which have arisen in the implementation of Public Law 94–581, the Veterans Omnibus Health Care Act of 1976, enacted on October 21, 1976, which restricted the Veterans' Administration's authority to provide contract health care services through private facilities. The major difficulty in this connection pertains to the revocation under Public Law 94–581 of the VA's authority to furnish contract outpatient services to approximately 90,000 severely disabled veterans whose eligibility for such services was based on their entitlement to regular aid and attendance or a "housebound" allowance.

A subcommittee of the Veterans' Affairs Committee held a hearing on these provisions on April 27, 1977. During this hearing, however, the subcommittee determined that certain information—such as the numbers of veterans affected by the various restrictions on contract health care imposed by Public Law 94–581, the number of such veterans who could be provided contract care under other provisions of title 38, and data regarding the provision of contract care in Alaska, Hawaii, and Puerto Rico—not then available, and requiring difficult and extensive research by the Veterans' Administration, was necessary before the final form of the measure could be determined. That information was not finally received by the Committee until June 21, 1977, after the May 15 reporting deadline had passed.

The Congressional Budget Office has advised that no fiscal year 1978 costs will be incurred under the contract health care provisions of the bill.

The provisions extending and improving the Veterans' Administration's physician and dentist special-pay authority (sections 201 and 202) derive from Administration-requested legislation which, despite numerous Committee requests to the new Administration, was not submitted to the Congress until June 27, 1977. A subcommittee hearing was promptly held on this legislation on July 1. Failure to grant this waiver would impair the Veterans' Administration's ability to overcome problems in the recruitment and retention of highly skilled professionals during fiscal year 1978, at great detriment to the quality of health care required to be provided to veterans under existing law.

All provisions of this bill which, according to the Congressional Budget Office estimates, involve any costs in fiscal year 1978 were specially described in the Veterans' Affairs Committee's March 15, 1977, report to the Budget Committee. The total estimated costs of the bill as reported in fiscal year 1978 is $26.97 million, an amount within and consistent with the functional allocation to the Veterans' Affairs Committee under the First Concurrent Resolution on the Budget for Fiscal Year 1978 (S. Con. Res. 19). Moreover, the bill as reported will not significantly affect the Congressional Budget nor delay the appropriations process.

This waiver of section 402(a) of the Congressional Budget Act of 1974 is only the second such waiver which has been requested by the Committee on Veterans' Affairs during the past two years.

For the foregoing reasons, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to H.R. 5027 as reported by the Committee on Veterans' Affairs.

S. RES. 257

The ACTING PRESIDENT pro tempore. The clerk will state the next resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 257) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2057.

There being no objection, the Senate proceeded to consider the resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 257) was agreed to, as follows:

S. RES. 257

Resolved, That, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2057. Such waiver is necessary because S. 2057, containing parts A, B, and G, as amended, of title I of S. 1469, the National Energy Act, authorizes the Administrator of the Federal Energy Administration to expend funds and to guarantee loans for certain energy conservation programs in fiscal year 1978.

The authorizations contained in S. 2057, are consistent with the Energy and Natural Resources Committee's March 15, 1977, report to the Committee on the Budget. However, compliance with section 402(a) of the Congressional Budget Act of 1974 with respect to these authorizations was not possible because of—

(1) the extensive hearings and markups necessary for the full consideration of the President's national energy plan proposals submitted to the Congress on April 20, 1977, and

(2) the large number of other matters considered and reported by the Committee on Energy and Natural Resources during the past three months.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to reconsider en bloc the vote by which both resolutions were adopted.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make such a motion.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS CONSENT CALENDAR

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the following items, all of which are on the Unanimous Consent Calendar: Calendar No. 356, No. 366, No. 370, and No. 372.

Mr. BAKER. Mr. President, reserving the right to object, these matters are on the Unanimous Consent Calendar and I believe were transferred there on yesterday. We have no indication of any objection on this side. I do not object to their consideration and passage.

Mr. CRANSTON. I thank the Senator.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TRANSFER OF FRANCHISE FEES

The bill (S. 2002) to authorize the Secretary of the Interior to transfer franchise fees received from certain concession operations at Grand Canyon to Unified School District, Ariz., and for other purposes, was considered.

Mr. CRANSTON. Mr. President, in regard to S. 2002, because of a reporting error, Senator PELL was mistakenly listed as the sponsor of that measure. It is a bill to authorize the Secretary of the Interior to transfer franchise fees received from certain concession operators at Grand Canyon to Unified School District, Ariz., and for other purposes. I ask unanimous consent that Senator DECONCINI, the Acting President pro tempore of the Senate of the United States, be listed as the original sponsor of the bill and that Senators GOLDWATER and HANSEN be listed as cosponsors.

I also ask unanimous consent, in his behalf, that Mr. PELL's name be removed as original sponsor of the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, S. 778, now S. 2002, a bill I introduced with Senators GOLDWATER and HANSEN to alleviate the serious financial difficulties of the Grand Canyon School District, is before us today for consideration.

This bill authorizes the Secretary of the Treasury to create a special fund with money coming from the annual concessioner franchise fees paid to the Grand Canyon National Park. The Secretary of the Interior is authorized to make payments from this special fund to the Grand Canyon School District for pupils in attendance who are dependents of persons employed by the Grand Canyon National Park for the purpose of assuring the continuance of educational services. Further, the Secretary of the Interior is authorized to make payments from this special fund to the State or school district to aid with construction costs incurred by the District.

As introduced, the bill required the funds paid to the District be taken from the gate receipts of Grand Canyon National Park. The Department of the Interior found this specific provision objectionable. The Department suggested an amendment to the bill which provides funds paid to the District be taken from the annual franchise fees received by the Secretary of the Interior from concessioner-operated facilities at the Grand Canyon National Park. During markup the Committee on Human Resources adopted the Department's proposed amendment. The Department now supports the bill as amended.

The necessity of this legislation is evidenced by the district's deteriorating financial situation. The property tax rate in the district is $8.77, reflecting an increase of more than $1.20 per $100 of assessed valuation over the last school year. To underscore the severity of the situation, a $9.92 tax rate is projected for the 1977–78 school year.

Presently, the tax base is $4,596,461, a decrease of almost $60,000 from the 1975–76 school year. The tax base consists to a large extent of railroad rights-of-way held by the Atchison, Topeka, and Santa Fe Railroads.

The Santa Fe has not run a train to the Grand Canyon for several years and recently removed some of its spur tracks. If the company should decide to withdraw entirely, its rights-of-way would revert to the status of untaxable Federal land, dealing a crushing blow to the remaining taxpayers who would have to make up for the loss.

A letter I recently received from Carolyn Warner, Arizona State Superintendent of Public Instruction, further emphasizes the urgency for enactment of S. 2202:

> The inevitability of the Santa Fe withdrawing from the Grand Canyon National Park is very evident; however, there is an immediate financial crisis faced by the Grand Canyon Schools due to the fact that in FY 78 railroads will be assessed at 40% of their actual value instead of the present 60 percent. Therefore, the Grand Canyon Schools will see a substantial rise in the tax rate during the FY 78 year. Due to the fact that Grand Canyon Unified Schools is located wholly within a National Park, the Arizona Department of Education feels that there is a Federal obligation to meet the educational needs of the youngsters at Grand Canyon. This is also indicated by the fact that approximately 50 percent of the youngsters attending Grand Canyon Schools have parents who are employed by the National Park Service; however, Impacted Aid and other Federal sources of revenue amount to approximately one-seventh (1/7) of the total budget expenditure for the Grand Canyon Unified Schools.

I take this opportunity to thank Senator PELL, chairman of the Education, Arts and Humanities Subcommittee; Senator WILLIAMS, chairman of the Human Resources Committee, and the members of the subcommittee and the full committee. Their prompt and positive attention to this legislation is appreciated—not only by me, but by the parents and children attending the Grand Canyon School District.

In conclusion, Mr. President, I urge my colleagues to support S. 2002, which will resolve the serious fiscal emergency of this school district.

Mr. PELL. Mr. President, I am glad to support this bill before the Members of the Senate.

I had the opportunity to meet Tom Caldwell, the superintendent of the school district in the Grand Canyon National Park, during a visit to the park last May. I also saw the condition of the school buildings, which was not good, and I learned about the financial situation which faced the school administration, which was worse.

There are many schools in the United States which face financial difficulties; however, this case is special in a number of ways, and if we do not act upon this bill then this district will simply not be able to serve the students in that area. This would happen in spite of the fact that the parents of those children already pay some of the highest school taxes in the Nation.

I am not advocating that we support this legislation because of the sacrifices of those parents, though; rather it is the special nature of this case that has convinced me and which should convince all the Members of this body. I am only glad to say that this is also a deserving case because of the fine people who will be able to continue their work because of this bill, and that makes this work very pleasant indeed.

Finally, thanks are due to Senator DECONCINI. The technical work that stands behind this bill is his, and that support has been invaluable.

More important, this has been his idea and his inspiration from the first, and without that initiative this bill would never have come to the attention of Congress at all.

Mr. GOLDWATER. Mr. President, the bill now before us. S. 2002—The Grand Canyon National Park School Aid Act—will provide vitally needed funds for the education of children of Federal employees located in an area where no feasible alternative facilities are available.

The economic impact will be nil. Since the required money will come from fees collected by the National Park Service from commercial concessionaires there will be no need for any congressional appropriations.

This legislation was presented to the 94th Congress by Senator PAUL FANNIN and approved by the Senate. It died at the end of that Congress when the House adjourned before the measure could be considered in conference. It was reintroduced at the beginning of this Congress by Senator DECONCINI and me as S. 788. The Department of the Interior raised a technical objection which

has now been resolved and the bill comes before the Senate as S. 2002. I ask for your support.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–388), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

I. BACKGROUND OF THE COMMITTEE BILL

S. 2002 was introduced on February 24, 1977 as S. 778. It followed two precedents being: (1) a law, Public Law 604, enacted in 1949 to establish a similar program for the relief of the schools serving the Yellowstone National Park; and (2) a Senate amendment to H.R. 9719, during the 94th Congress, which died at the end of that Congress when the House adjourned before the measure could be considered in conference.

BRIEF SUMMARY AND PURPOSE OF THE COMMITTEE BILL

S. 202 (a) Authorizes the Secretary of the Treasury to establish a special fund to hold a portion of the annual concessionaires fees from the Grand Canyon National Park; (b) Authorizes the Secretary of the Interior to draw from that fund for the purpose of providing educational services to dependents of persons working in the Grand Canyon National Park.

The following letters show the particular need faced by the Grand Canyon School District and show why there is a need for a Federal program to provide relief in this particular instance.

LETTER TO ARIZONA LEGISLATIVE DELEGATION ATTEMPTING TO EXPLAIN FINANCIAL DIFFICULTIES FACING GRAND CANYON SCHOOL DISTRICT

GRAND CANYON UNIFIED SCHOOLS,
Grand Canyon, Ariz., January 19, 1977.

We would like to take this opportunity to ask for your assistance concerning a very important matter for the Grand Canyon Community. There is the distinct possibility that the Grand Canyon School District faces extinction due to a very low assessed valuation, the high tax rate coupled with a declining enrollment, which puts the district in financial jeopardy.

We had worked very closely with Senator Fannin to get legislation passed that would relieve the situation, however, it is regrettable that the Congress in its haste to adjourn this last Fall did not enact the legislation. However, the legislation did pass the Senate Interior Committee with a unanimous vote. You will find enclosed a great deal of supportive material for our case here at the Grand Canyon. The following is an outline of the financial stress that the Grand Canyon Unified School District No. 4 is presently facing.

During the past few years the school district has found itself with a steadily declining enrollment; with a greater number of its students coming from families employed by the Grand Canyon National Park or being housed by the National Park Service. Since Arizona's funding formula is based on student enrollment and the fact that costs have accelerated, the financial pinch has become critical.

This is indicated by the fact that the fiscal year 1976 tax rate for Grand Canyon was $7.5021 based on an assessed valuation of $4,656,202.00. Today, fiscal year 1977, the tax rate has jumped to $8.7729 with a decrease in the assessed valuation to $4,596,461. We anticipate an increase in the 1977–78 school year tax rate (approximately $9.92) with a probable decrease in the assessed valuation. At present, the State average tax rate for school districts in Arizona is $4.40, which is less than half Grand Canyon's tax rate. Due to the fact that our assessed valuation is very low and tax rate very high, puts Grand Canyon in a financial situation which limits our instructional program and which has allowed our buildings to become dilapidated. Therefore, with such a high enrollment of students from Park Service employees living in Park Service housing, we feel it only right that the Federal Government assume some additional responsibility for these students. Our budget level for fiscal year 1977, Public Law 874 funds, impacted aid, was $53,000; however, this was a mistake and we have now been informed that our level will be approximately $118,000. When looking at a total budget expenditure of $722,967.98, this is only approximately one-seventh of the total budget, while 92 percent of our student population have parents who are directly connected to the Grand Canyon National Park as Federal employees or concessionaire employees within a Federal reservation.

Some other alternatives to going to the U.S. Congress for financial assistance have been explored: Consolidation with the Williams School District, approximately 65 miles to the south of Grand Canyon, however, the Williams Board of Education is not receptive to this concept because the Grand Canyon School District's burden would increase the Williams district's tax rate substantially. Another alternative considered would be to dissolve the Grand Canyon School District and bus students to either Flagstaff (approximately 80 miles), or Williams which would be very hazardous in the winter months due to the nothern Arizona climate. Another alternative would be to have Park Service employees send their youngsters to boarding schools or private institutions which would be financially impossible and unacceptable for the maiority of the families now residing at Grand Canyon.

We have explored the problem with the Arizona Department of Education and we have made application (without success) for Public Works funds.

As you see, our problem is not easily solved without intervention by the Federal Government. Any help that you can give us to alleviate the financial pressures on this school district will be greatly appreciated.

Thank you for your concern, time and assistance with this matter. If you need any additional information, please do not hesitate to call.

Sincerely,
THOMAS P. CALDWELL, PH. D.,
Superintendent of Schools.

COCONINO, COUNTY BOARD OF SUPERVISORS,
Flagstaff, Ariz., May 9, 1977.

HON. CECIL ANDRUS,
Secretary of the Interior, Capitol Building, Washington, D.C.

DEAR SECRETARY ANDRUS: The Coconino County Board of Supervisors are aware of the financial straits of the Grand Canyon Unified School Districts. S. 778 and H. 4050 would provide much needed assistance to this school district which has a low assessed value.

In reviewing a memo by Acting Director William Briggle of the National Park Service to the Legislative Counsel dated April 29, 1977, there appears to be some misinterpretation or misunderstanding. Reference is made to the payment in lieu, legislation which was passed last year. In the memo, it was estimated that Coconino County will receive approximately $1 million. In fact, it will be about half of that amount or only $500,000. This money comes to Coconino County and not to the Grand Canyon School District. Nothing in the legislation requires the county to help the schools with this money, nor is it the intention of the board of supervisors to provide any of the In Lieu money that will be received, to any of the school districts within the county.

In Mr. Briggle's memo, he points out that there is an unknown factor of economic benefit because of the large number of out of State travelers that are attracted to the national park. This is true, and it is difficult to measure what our economic gain in sales tax, gas tax, and other benefits really are, but there are also costs involved such as law enforcement, courts, medical care for indigents, which also use up this economic gain. In no way does the Grand Canyon School District derive benefit from the money spent by tourists. Arizona laws may be unique in this respect, but the school obtains their financing from the State and from their property taxing ability.

Taking a percentage of the money collected from entrance fees to the Grand Canyon Park and then giving it to the school district would appear to be an equitable method. The more visitors that come into the park, the more employees that will be required; consequently, more children, so this is one way to tie the operation of the school district to the varying impact of the park. The Coconino County Board of Supervisors have been told that using a percentage of the entrance fees is already being done in Yellowstone National Park successfully, and would like to see this method used at the Grand Canyon National Park.

We solicit your support for S. 778 and H. 4060.

Sincerely,
PETER J. LINDEMANN,
District L.

ARIZONA DEPARTMENT OF EDUCATION,
Phoenix, Ariz., June 13, 1977.

HON. CLAIBORNE PELL,
Chairman, Senate Education Subcommittee, Washington, D.C.

(Attention of Carey Peck, Legislative Aide.)

DEAR SENATOR PELL: It has been brought to my attention by Dr. Thomas Caldwell, superintendent of Grand Canyon Unified School District, that there are some concerns relating to the responsibility of the State of Arizona to the Grand Canyon Schools in the event that the Santa Fe Railway relinquishes its property holdings within the Grand Canyon National Park.

The State of Arizona is providing support to the Grand Canyon School District in the way of State aid, special program support, and technical assistance. At the request of the Grand Canyon School District, the Arizona Department of Education will assess the elementary program and expenditures and make recommendations to aid this district in meeting its obligations to the children of Grand Canyon.

The inevitability of the Santa Fe withdrawing from the Grand Canyon National Park is very evident; however, there is an immediate financial crisis faced by the Grand Canyon schools due to the fact that in fiscal year 1978 railroads will be assessed at 40 percent of their actual value instead of the present 60 percent. Therefore, the Grand Canyon schools will see a substantial rise in the tax rate during the fiscal year 1978 year. Due to the fact that Grand Canyon Unified Schools is located wholly within a national park, the Arizona Department of Education feels that there is a Federal obligation to meet the educational needs of the youngsters at Grand Canyon. This is also indicated by the fact that approximately 50 percent of the youngsters attending Grand Canyon schools have parents who are employed by the National Park Service; however, impacted aid and other Federal sources of revenue amount to approximately one-seventh of the total budget expenditure for the Grand Canyon Unified Schools.

If there is any way that the Arizona Department of Education can be of assistance in helping the Congress in answering ques-

tions concerning this most serious problem, our services are at your disposal.

Sincerely,

Mrs. RONALD H. WARNER,
Superintendent.

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C. July 12, 1977.

Hon. CLAIBORNE PELL,
Chairman, Subcommittee on Education, Arts, and Humanities, Committee on Human Resources, U.S. Senate, Washington, D.C.

DEAR CLAI: The Education, Arts, and Humanities Subcommittee will soon consider S. 778, a bill I introduced which would alleviate the serious financial difficulties the Grand Canyon School District is experiencing. The bill provides for the Federal Government to reimburse the District for pupils in attendance who are dependents of persons employed by the Grand Canyon National Park. Further, it would permit the Federal Government to aid with construction costs incured by the district.

The District's deteriorating financial situation is evidenced by the present tax base of $4,596,461, a decrease of almost $60,000 from the 1975–76 school year. The tax base consists to a large extent of railroad rights-of-way held by the Atchison, Topeka & Santa Fe Railroads.

The Santa Fe has not run a train to the Grand Canyon for several years and recently removed some of its spur tracks. If the company should decide to withdraw entirely, its rights-of-way would revert to the status of untaxable Federal land, dealing a crushing blow to the remaining taxpayers who would have to make up for the loss.

A letter I recently received from Carolyn Warner, State superintendent of public instruction, further underscores the necessity for enactment of S. 778:

"The inevitability of the Santa Fe withdrawing from the Grand Canyon National Park is very evident; however, there is an immediate financial crisis faced by the Grand Canyon schools due to the fact that in fiscal year 1978 railroads will be assessed at 40 percent of their actual value instead of the present 60 percent. Therefore, the Grand Canyon Schools will see a substantial rise in the tax rate during the fiscal year 1978 year. Due to the fact that Grand Canyon Unified Schools is located wholly within a National Park, the Arizona Department of Education feels that there is a Federal obligation to meet the educational needs of the youngsters at Grand Canyon. This is also indicated by the fact that approximately 50 percent of the youngsters attending Grand Canyon schools have parents who are employed by the National Park Service; however, Impacted Aid and other Federal sources of revenue amount to approximately one-seventh of the total budget expenditure for the Grand Canyon Unified Schools."

S. 778 as introduced requires the funds paid to the District be taken from the gate receipts of Grand Canyon National Park. The Department of the Interior found this specific provision objectionable. The Department has suggested an amendment to the bill which provides funds paid to the District be taken from the annual franchise fees received by the Secretary of the Interior from concessioner-operated facilities at Grand Canyon National Park. With the adoption of this amendment the Department has indicated approval of S. 778. I agree with the Department's proposed amendment.

I urge the members of the subcommittee to approve S. 778, as amended, thereby resolving the serious fiscal emergency of the Grand Canyon School District.

With best wishes, I remain,

Sincerely,

DENNIS DECONCINI,
U.S. Senator.

The members of the committee wish to stress the unique and exclusive nature of this bill. The members have only recognized the need for this particular piece of legislation in response to some severely limited and highly specific circumstances.

Those instances are: (a) the precedent set in 1949 for the Yellowstone School District; (b) the action taken on this bill by Senate action during the 94th Congress on H.R. 9719; (c) the support of the Interior Committee of the House of Representatives and the Energy and Natural Resources Committee in the Senate in drafting the bill; and (d) the support of the Department of the Interior for this legislation. All of these instances evidence a widespread support for this bill, specifically for the language of S. 2002 upon which all the parties have agreed. Without their agreement and counsel the Committee on Human Resources would not have acted upon this bill, and their continued counsel and agreement was necessary for the bill's passage and recommendation to the Senate.

In summary then, this legislation should be regarded as a much needed but particular exception to the general array of Federal educational programs. It is not intended to establish a precedent for a generic set of programs and the members of the committee disclaim any intention of doing so.

III. COST ESTIMATE ON S. 2002

Submitted to the Committee on Human Resources by the Congressional Budget Office.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., August 1, 1977.

Hon. HARRISON A. WILLIAMS,
Chairman, Human Resources Committee, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 2002, Payments to the Grand Canyon National Park School.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

Enclosure.

CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE

1. Bill number: S. 2002.

2. Bill title: Payments to the Grand Canyon National Park School.

3. Purpose of bill: The purpose of this bill is to authorize the Secretary of Interior to make payments from revenues received by the United States from concessionaire fees at Grand Canyon National Park to the Grand Canyon school district serving the park. These payments will be reimbursements for educational facilities furnished by the district to pupils who are dependents of park employees residing at the park upon real property not subject to taxation by the state or local agencies. This bill would create new, permanent budget authority and, therefore, would not be subject to appropriation action.

4. Cost estimate:

[In thousands of dollars]

	Fiscal year—				
	1978	1979	1980	1981	1982
Projected authorization levels:					
Operation and maintenance of park schools	714	770	828	895	975
Anticipated capital improvements	3,000	----	----	----	----
Total	3,714	770	828	895	975
Projected total outlays:					
Operation and maintenance of park schools	714	770	828	895	975
Anticipated capital improvements	500	1,875	625	----	----
Total	1,214	2,645	1,453	895	975

5. Basis for estimate: The estimate for operation and maintenance of the park school facilities is based on the 1977–78 school year budget for the Grand Canyon Park School, which serves all the children of resident park employees. This estimate has been inflated for 5 years based on the CBO economic projection of the increases in the elementary and secondary education price deflator. Outlays reflect 100 percent spendout. Officials for the Grand Canyon school district anticipate a need for capital improvements to the school buildings totaling $3 million. The spendout of these funds are similar to other short term construction projects.

6. Estimate comparison: None.

7. Previous CBO estimate: None.

8. Estimate prepared by: Deborah Kalcevic.

9. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

IV. REGULATORY IMPACT

In accordance with paragraph V of rule XXIX of the Standing Rules of the Senate, the following statement of the regulatory impact of the bill is made.

The basic purpose of the bill is to aid the provision of educational services to dependents of employees of the Grand Canyon National Park.

This bill does not require the regulation of any person, business, or institution. Since the purpose of the bill is to provide direct compensation for the provision of educational services, the paperwork required will be the minimal amount necessary to handle the financial transaction. No regulatory paperwork of any type is required.

The economic impact of this marginal increase in paperwork will be entirely compensated by the financial payments which the institutions involved will receive.

No personal information of any kind is required in the paperwork or regulatory provisions of this bill. Therefore, the bill has no impact on the personal privacy of any individuals involved with these projects.

The number of institutions involved is extremely small, being the school district in the Grand Canyon National Park, the State educational agency, and the school districts adjacent to the Grand Canyon Unified School District.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

[Later the following occurred:]

Mr. ROBERT C. BYRD. Mr. President, I have cleared this matter with the distinguished minority leader. I ask unanimous consent that this morning's action on S. 2002 be vitiated and that the bill which I send to the desk be passed in lieu thereof.

The ACTING PRESIDENT pro tempore. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 2076) which was introduced by Mr. DECONCINI, for himself, Mr. GOLDWATER and Mr. HANSEN, to authorize the Secretary of the Interior to transfer franchise fees received from certain concession operations at Grand Canyon National Park, Arizona, to the Grand Canyon Unified School District, Arizona, and for other purposes.

The Senate proceeded to consider the bill, S. 2076, which was read twice, ordered to be engrossed for a third reading, read the third time, and passed as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law requiring such fees to be credited to miscellaneous receipts in the Treasury of the United States, under such regulations as may be

prescribed by the Secretary of the Interior (hereinafter referred to as the "Secretary"), payments may be made, as provided herein, in advance or otherwise, from the annual franchise fees received by the Secretary from concession-operated facilities at Grand Canyon National Park, Arizona, to the appropriate school district or districts serving that park, as reimbursement for educational facilities (including, where appropriate, transportation to and from school) furnished by said district or districts to pupils who are dependents of persons engaged in the administration, operation, and maintenance of the park and living at or near the park upon real property of the United States not subject to taxation by the State or local agencies; except that the payments for any school year for the aforesaid purpose shall not exceed that part of the cost of operating and maintaining such facilities which the number of pupils who are dependents of such persons, in average daily attendance during that year, bears to the whole number of pupils in average daily attendance at those schools for that year.

(b) If in the opinion of the Secretary of the Interior, the aforesaid educational facilities cannot be provided adequately and payment made therefor on a pro rata basis, as prescribed in subsection (a), the Secretary of the Interior may enter into cooperative agreements with States or local agencies for (1) the operation of school facilities, (2) for the construction and expansion of local facilities at Federal expense, and (3) for contribution by the Federal Government, on an equitable basis satisfactory to the Secretary, to cover the increased cost to local agencies for providing the educational services required for the purposes of this section.

(c) For the purposes of this section, the Secretary of the Treasury is authorized to maintain hereafter in a special fund a sufficient portion of the annual franchise fees from concessioner-operated facilities at Grand Canyon National Park, Arizona, based upon estimates to be submitted by the Secretary of the Interior, and to expend the same upon certification by the Secretary of the Interior.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that S. 2002 be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CLARIFICATION OF STATUS OF THE LIBRARIAN OF CONGRESS

The Senate proceeded to consider the bill (S. 1626) to amend title 5, United States Code, which had been reported from the Committee on Governmental Affairs with an amendment to strike all after the enacting clause and insert the following:

That section 6301(2)(B) of title 5, United States Code, is amended—

(1) by striking out "or" at the end of clause (xi);

(2) by striking out the period at the end of clause (xii) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new clause:

"(xiii) the Librarian of Congress.".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to clarify the status of the Librarian of Congress under subchapter I of chapter 63 of title 5, United States Code, relating to annual and sick leave.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–403), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 1626 is to correct a technical defect in existing law by amending the provisions of the Annual and Sick Leave Act of 1951, as amended (5 U.S.C. 6301), so as to exclude the Librarian of Congress from the provisions of the act. The effect will be to treat the Librarian of Congress as the head of an agency for both pay administration and leave purposes.

BACKGROUND

A decision of the Comptroller General, issued at the request of the Assistant Librarian of Congress, involving a related personnel matter, held that the Librarian of Congress is the head of an agency for purposes of pay administration. (B–120604, Aug. 30, 1976).

Under existing law, heads of agencies and departments of the executive branch, and employees of the Congress, are excluded from the provisions of the Leave Act, either by specific statute, or Presidential designation by Executive order. Since the Librarian of Congress is the head of an agency in the legislative branch, and not an employee thereof, the present statutory exclusion does not apply to him, and he is not subject to exclusion by Executive order.

S. 1626 is a technical amendment to existing law which would amend the Leave Act by adding the Librarian of Congress to the list of those positions which are excluded from the provisions of the act. The Library of Congress has requested enactment in order to clarify the position of the Librarian of Congress to conform to the decision of the Comptroller General.

COST ESTIMATE

Enactment of this legislation will not involve additional expenditures.

NEIGHBORHOOD REINVESTMENT CORPORATION ACT

The Senate proceeded to consider the bill (S. 1724) to establish a Neighborhood Reinvestment Corporation, which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment to strike all after the enacting clause and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Neighborhood Reinvestment Corporation Act".

FINDINGS AND PURPOSE

SEC. 2. (a) Congress finds and declares that—

(1) the neighborhood housing services demonstration of the urban reinvestment task force has proven its worth as a successful program to revitalize older urban neighborhoods by mobilizing public, private, and community resources at the neighborhood level; and

(2) the demand for neighborhood housing services programs in cities throughout the United States warrants the creation of a public corporation to institutionalize and expand the neighborhood housing services program and other programs of the present urban reinvestment task force.

(b) The purpose of this Act is to establish a public corporation which will continue the joint efforts of the Federal financial supervisory agencies and the Department of Housing and Urban Development to promote reinvestment in older neighborhoods by local financial institutions working cooperatively with community people and local government, and which will continue the nonbureaucratic approach of the Urban Reinvestment Task Force, relying largely on local initiative for the specific design of local programs.

ESTABLISHMENT OF A CORPORATION

SEC. 3. (a) There is established a National Neighborhood Reinvestment Corporation (hereinafter referred to as the "corporation") which shall be a body corporate and shall possess the powers, and shall be subject to the direction and limitations specified herein.

(b) The corporation shall implement and expand the demonstration activities carried out by the urban reinvestment task force.

(c) The corporation shall maintain its principal office in the District of Columbia or at such other place the corporation may from time to time prescribe.

(d) The corporation, including its franchise, activities, assets, and income, shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority; except that any real property of the corporation shall be subject to State, territorial, county, municipal, or local taxation to the same extent according to its value as other real property is taxed.

BOARD OF DIRECTORS; ESTABLISHMENT

SEC. 4. (a) The corporation shall be under the direction of a board of directors made up of the following members:

(1) the Chairman of the Federal Home Loan Bank Board who shall be the chairman of the board of directors;

(2) the Secretary of Housing and Urban Development;

(3) a member of the Board of Governors of the Federal Reserve System, to be designated by the Chairman of the Board of Governors of the Federal Reserve System;

(4) the Chairman of the Federal Deposit Insurance Corporation;

(5) the Comptroller of the Currency; and

(6) the Administrator of the National Credit Union Administration.

(b) Each director of the corporation shall serve ex officio during the period he holds the office to which he is appointed by the President.

(c) The directors of the corporation, as full-time officers of the United States, shall serve without additional compensation but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of their duties as directors of the corporation.

(d) The directors of the corporation shall adopt such bylaws, policies, and administrative provisions as are necessary to the functioning of the corporation.

(e) The presence of a majority of the board members shall constitute a quorum.

(f) The corporation shall be subject to the provisions of section 552 of title 5, United States Code.

(g) All meetings of the board of directors will be open to public observation unless a majority of the board of directors votes to close a specific meeting.

OFFICERS AND EMPLOYEES

SEC. 5. (a) The board shall have power to select, employ, and fix the compensation and benefits of such officers, employees, attorneys, and agents as shall be necessary for the performance of its duties under this Act, without regard to the provisions of title 5, United States Code, governing appoint-

ments in the competitive service, classification, and General Schedule pay rates, except that no officer, employee, attorney, or agent of the corporation may be paid compensation at a rate in excess of the highest rate provided for GS–18 of the General Schedule under section 5332 of title 5, United States Code.

(b) The directors of the corporation shall appoint an executive director, who shall serve as chief executive officer of the corporation.

(c) The executive director of the corporation, subject to general policies established by the board, may appoint and remove such employees of the corporation as he determines necessary to carry out the purposes of the corporation.

(d) No political test or political qualification shall be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, agent, or employee of the corporation or of any recipient, or in selecting or monitoring any grantee, contractor, or person or entity receiving financial assistance under this Act.

(e) Officers and employees of the corporation shall not be considered officers or employees of the United States, and the corporation shall not be considered a department, agency, or instrumentality of the Federal Government.

POWERS AND DUTIES

SEC. 6. (a)(1) The corporation shall continue the work of the urban reinvestment task force in establishing neighborhood housing services programs in neighborhoods throughout the United States, supervising their progress, and providing them with grants and technical assistance. For the purpose of this paragraph, a neighborhood housing services program may involve a partnership of neighborhood residents and representatives of local governmental and financial institutions, organized as a State-chartered nonprofit corporation, working to bring about reinvestment in one or more neighborhoods through a program of systematic housing inspections, increased public investment, increased private lending, increased resident investment, and a revolving loan fund to make loans available at flexible rates and terms to homeowners not meeting private lending criteria.

(2) The corporation shall continue the work of the urban reinvestment task force in identifying, monitoring, evaluating, and providing grants and technical assistance to selected neighborhood preservation projects which show promise as mechanisms for reversing neighborhood decline and improving the quality of neighborhood life.

(3) The corporation shall experimentally replicate neighborhood preservation projects which have demonstrated success, and after creating reliable development processes, bring the new programs to neighborhoods throughout the United States which in the judgment of the corporation can benefit therefrom, by providing assistance in organizing programs, providing grants in partial support of program costs, and providing technical assistance to ongoing programs.

(4) The corporation shall continue the work of the urban reinvestment task force in supporting Neighborhood Housing Services of America, a nonprofit corporation established to provide service to local neighborhood housing services programs, with grants to expand its national loan purchase pool and may contract with it for services which it can perform more efficiently or effectively than the corporation.

(5) Notwithstanding any other provision of law, the corporation shall, in making and providing the foregoing grants and technical and other assistance, determine the reporting and management restrictions or requirements with which the recipients of such grants or other assistance must comply. In making such determinations, the corporation shall assure that recipients of grants and other assistance make available to the corporation such information as may be necessary to determine compliance with applicable Federal laws. Nothing in this subsection exempts the corporation from compliance with applicable Federal laws.

(b) To carry out the foregoing purposes and engage in the foregoing activities, the corporation shall have the following powers:

(1) to adopt, alter, and use a corporate seal;

(2) to have succession until dissolved by Act of Congress;

(3) to make and perform contracts, agreements, and commitments;

(4) to sue and be sued, complain and defend, in any State, Federal, or other court;

(5) to determine its necessary expenditures and the manner in which the same shall be incurred, allowed, and paid, and appoint, employ, and fix and provide for the compensation of consultants, without regard to any other law, except as provided in section 8(d);

(6) to settle, adjust, and compromise, and with or without compensation or benefit to the corporation to release or waive in whole or in part, in advance or otherwise, any claim, demand, or right of, by, or against the corporation;

(7) to invest such funds of the corporation in such investments as the board of directors may prescribe;

(8) to acquire, take, hold, and own, and to deal with and dispose of any property; and

(9) to exercise all other powers that are necessary and proper to carry out the purposes of this Act.

(c)(1) The corporation may contract with the Office of Neighborhood Reinvestment of the Federal home loan banks for all staff, services, facilities, and equipment now or in the future furnished by the Office of Neighborhood Reinvestment to the urban reinvestment task force, including receiving the services of the Director of the Office of Neighborhood Reinvestment as the corporation's executive director.

(2) The corporation shall have the power to award contracts and grants to—

(A) neighborhood housing services corporations and other nonprofit corporations engaged in neighborhood preservation activities; and

(B) local governmental bodies.

(3) The Secretary of Housing and Urban Development, the Federal Home Loan Bank Board and the Federal home loan banks, the Board of Governors of the Federal Reserve System and the Federal Reserve banks, the Federal Deposit Insurance Corporation, and the Comptroller of the Currency, the National Credit Union Administration or any other department, agency, or other instrumentality of the Federal Government are authorized to provide services and facilities, with or without reimbursement, necessary to achieve the objectives and to carry out the purposes of this Act.

(d)(1) The corporation shall have no power to issue any shares of stocks, or to declare or pay any dividends.

(2) No part of the income or assets of the corporation shall inure to the benefit of any director, officer, or employee, except as reasonable compensation for services or reimbursement for expenses.

(3) The corporation may not contribute to or otherwise support any political party or candidate for elective public office.

REPORTS AND AUDITS

SEC. 7. (a) The corporation shall publish an annual report which shall be transmitted by the corporation to the President and the Congress.

(b) The accounts of the corporation shall be audited annually. Such audits shall be conducted in accordance with generally accepted auditing standards by independent certified public accountants who are certified by a regulatory authority of the jurisdiction in which the audit is undertaken.

(c) In addition to the annual audit, the financial transactions of the corporation for any fiscal year during which Federal funds are available to finance any portion of its operations may be audited by the General Accounting Office in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States.

(d) For any fiscal year during which Federal funds are available to finance any portion of the corporation's grants or contracts, the General Accounting Office, in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States, may audit the grantees or contractors of the corporation.

(e) The corporation shall conduct or require each grantee or contractor to provide for an annual financial audit. The report of each such audit shall be maintained for a period of at least five years at the principal office of the corporation.

AUTHORIZATION

SEC. 8. (a) There are authorized to be appropriated to the corporation to carry out this Act not to exceed $15,000,000 for fiscal year 1979, $20,000,000 for fiscal year 1980, and $30,000,000 for fiscal year 1981.

(b) Funds appropriated pursuant to this section shall remain available until expended.

(c) Non-Federal funds received by the corporation, and funds received by any recipient from a source other than the corporation, shall be accounted for and reported as receipts and disbursements separate and distinct from Federal funds.

(d) The corporation shall prepare annually a business-type budget which shall be submitted to the Office of Management and Budget, under such rules and regulations as the President may establish as to the date of submission, the form and content, the classification of data, and the manner in which such budget program shall be prepared and presented. The budget of the corporation as modified, amended, or revised by the President shall be transmitted to the Congress as a part of the annual budget required by the Budget and Accounting Act, 1921. Amendments to the annual budget program may be submitted from time to time.

Mr. PROXMIRE. This bill, which the Senator from Utah and I cosponsored would provide long-term funding and statutory authority for the highly successful neighborhood, housing services program and other innovative neighborhood preservation programs of the urban reinvestment task force.

The present task force is an interagency body made up of the Secretary of HUD, the Chairman of the Federal Home Loan Bank Board, the Chairman of the Federal Deposit Insurance Corporation, the Comptroller of the Currency, and a Governor of the Federal Reserve Board. It sponsors neighborhood housing services programs in 33 cities. It operates with some contributions from the participating regulatory services, a small amount of private foundation support, local contributions by participating lenders and municipalities, and a 5-year research and demonstration grant from HUD that is due to phase out beginning in fiscal year 1979.

The legislation would convert the ad hoc task force into a public corporation with direct funding from appropriated moneys. It would assure continuation of the successful neighborhood preserva-

tion programs sponsored to date, and permit gradual expansion into about 500 neighborhoods by 1981.

The bill funds the Corporation at $15 million for fiscal year 1979, $20 million for fiscal year 1980, and $30 million for fiscal year 1981.

The original neighborhood housing services program was devised locally in a "declining" Pittsburgh neighborhood in 1968. The goal was to reverse neighborhood decline, restore neighborhood self-confidence, and promote reinvestment by local lending institutions and local residents, with the cooperation of the city. To this end, neighborhood residents, city officials, and cooperating lending institutions obtained foundation grants to capitalize a high risk revolving loan fund, and established a small neighborhood-based nonprofit organization to provide counseling and technical assistance. Lenders agreed to promote conventional loans in the area where bankable. The city agreed to begin a concentrated code enforcement program.

By 1974, more than 300 households in the target area had received home improvement loans. The percentage of home purchases in the area financed by lending institutions rose from 39 percent to 63 percent. The number of owner occuplied homes in the area increased significantly. More than a million dollars has been lent to date from the high risk revolving loan fund, and a much higher dollar amount of conventional loans have been made by participating lenders, in large part because of their cooperation with the NHS program and their renewed confidence in the community. As a result of the concentrated code enforcement program undertaken by the city in cooperation with the city, 1,261 separate violations were abated by the end of 1974, and the quality of housing stock in the area improved dramatically.

The Pittsburgh NHS became the model for NHS projects in 33 cities. As of July 1977, according to testimony received by the Banking Committee, 35 neighborhood housing services programs are currently in operation, and 18 others are in development. According to the executive director of the task force, each NHS has the following common elements: First a group of residents who want to preserve their neighborhood, improve their homes, and who are willing to put in the necessary effort to establish and operate a NHS program. Second, local government which is willing to improve the neighborhood by making the necessary improvements in public amenities and public services and by conducting a sensitive housing inspection program coordinated with NHS activities. Third, a group of financial institutions which agree to reinvest in the neighborhood by making normal market rate loans to homeowners meeting their credit standards which will make tax deductible contributions to the NHS to support its operating cost. Fourth, a high risk revolving loan fund to make loans at flexible rates and terms to residents not meeting commercial credit standards. And fifth, a NHS organization, which is a private, nonprofit corporation having a board of directors of which a majority are community residents, along with significant representation from financial institutions, and normally a three-member staff.

This structure, with its reliance on local initiative and minimal public funding, has been the key to the program's success. After 9 years of experience with local NHS programs, it is time to move beyond the demonstration phase and make the NHS model available to other communities that can benefit. In doing so, however, this innovative, flexible program should not be encumbered with redtape. If this effort is ever seen as just another Federal program, it will lose its unique qualities of local voluntary self-help, which have been basic to its success. In the past, the main contributions of the task force have been to help identify neighborhoods that can benefit from the NHS approach, and to bring together local residents, lenders, and local government. The main financial contribution of the task force has been the initial capitalization of the high risk revolving fund. But typically, operating funds are raised locally and most loans are made as conventional financing by participating lenders. The Federal funding is only the catalyst. The new Corporation will continue to require its local grantees to leverage the Corporation's contribution with support from local lenders and local government. The corporation's own staff will be expanded only to the degree necessary to supervise and provide technical assistance for the expanded number of local programs.

There is no doubt that the NHS program has been a remarkable success. Far beyond the number of loans that have been provided by each high-risk, revolving loan fund, each local NHS seems to engender confidence that declining neighborhoods can be turned around. We have had testimony from lenders on how the NHS experience brought them into closer contact with their local communities and changed their lending attitudes. Since private lenders are the key to urban reinvestment, these changes alone are probably worth the approximately $10 million in Federal funds expended to date.

Further, the NHS approach has been able to bring together lenders and community activists hereto noted mostly for their mutual suspicion. Gale Cincotta, a well-known Chicago become the board chairman of the Chicago NHS, working closely with prominent lenders on a neighborhood based program to reclaim and restore HUD-abandoned properties.

The NHS approach makes it possible for community groups and lending institutions to work cooperatively. Instead of wasting precious energy debating the definition and the extent of redlining, it provides a vehicle to work together to promote reinvestment and neighborhood improvement.

Mr. President, this bill has the support of a wide range of groups including the major financial industry trade associations, as well as the major neighborhood and urban organizations. It is supported strongly by the Federal Home Loan Bank Board, which has provided the administrative and staff support of the present ad hoc task force. It was unanimously reported by the Senate Banking Committee. The only reservations were expressed by the Department of Housing and Urban Development which has recently begun a formal evaluation of the NHS approach. HUD recommended that we delay a year.

However, in view of the widespread acclaim for NHS and its generally acknowledged success in transforming declining neighborhoods, the committee unanimously recommended their neighborhood housing services and other programs of the task force be assured long term funding without further delay. That is what S. 1724 would do.

I urge its speedy enactment.

Mr. GARN. Mr. President, I am very pleased with the strong support expressed for the Neighborhood Reinvestment Corporation Act. The Banking, Housing, and Urban Affairs Committee hearing on this legislation demonstrated the fundamental reasons for the broad success and popularity of the neighborhood housing services, NHS, concept, which functions under the Urban Reinvestment Task Force. The committee found that NHS programs receive strong support from local financial institutions because they are brought into the program by the roles their respective regulatory agencies play as members of the Reinvestment Task Force.

As you know, Mr. President, the NHS program attributes its success and popularity to the unique relationship it spawns between local financial institutions, local government, and the affected residents. It is a local program which functions cooperatively with the three groups establishing and implementing their own local priorities and programs. This delicate structure is very carefully developed and maintained for each NHS locality.

Unlike most Federal assistance programs, NHS is not a federally stigmatized, Washington-patterned program. In order to achieve a successful NHS program, great skill and patience are required to implement it in a neighborhood. It takes time. No two programs are alike for they are all adapted to the specific and peculiar needs of each neighborhood. For this reason, NHS activity must not be expanded too quickly. The funding levels authorized in the committee report were carefully calibrated to optimize NHS expansion across the country. While expansion more rapid than those levels would be harmful to NHS, something below them would likewise be less than optimal.

Mr. President, I strongly urge that the Neighborhood Reinvestment Corporation Act be given full support and approval.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–410), explaining the purposes of the measure.

There being no objection, the excerpt

was ordered to be printed in the RECORD, as follows:

HISTORY OF THE LEGISLATION

S. 1724 was introduced June 21, 1977 by Senator Proxmire and Senator Garn. Senators Brooke, Morgan, Williams and Lugar joined as co-sponsors. A hearing was held July 15 to receive testimony from the Honorable Garth Marston, Chairman of the Federal Home Loan Bank Board; William Whiteside, Director of the Urban Reinvestment Task Force, the Honorable Donna Shalala, Assistant Secretary of Housing and Urban Development, and several public witnesses familiar with the Neighborhood Housing Services program and other neighborhood preservation programs sponsored by the task force.

The committee met in open markup session August 4, 1977, and unanimously approved S. 1724 with amendments, which is herewith reported.

NATURE AND PURPOSE OF THE BILL

S. 1724 would institutionalize the present neighborhood preservation programs sponsored by the ad hoc Urban Reinvestment Task Force. The task force, which is an interagency body made up of the Secretary of HUD, the Chairman of the Federal Home Loan Bank Board, the Chairman of the Federal Deposit Insurance Corporation, the Comptroller of the Currency, and a Governor of the Federal Reserve Board, now sponsors Neighborhood Housing Service programs in 33 cities. It operates with some contributions from the participating regulatory agencies, a small amount of private foundation support, local contributions by participating lenders and municipalities, and a 5-year research and demonstration grant from HUD that is due to phase out beginning in fiscal year 1979.

The legislation would convert the ad hoc task force into a public corporation with direct funding from appropriated moneys. It would assure continuation of the successful neighborhood preservation programs sponsored to date, and permit gradual expansion of Neighborhood Housing Services programs into about 500 neighborhoods by 1981.

HISTORY OF THE PROGRAM

The original Neighborhood Housing Service program was devised locally in a "declining" Pittsburgh neighborhood in 1968 on the city's Central North Side. The goal was to reverse neighborhood decline, restore neighborhood self-confidence and promote reinvestment by local lending institutions and local residents, with the cooperation of the city. To this end, neighborhood residents, city officials and cooperating lending institutions obtained foundation grants to capitalize a high risk revolving loan fund, and established a small neighborhood-based nonprofit organization to provide counseling and technical assistance. Lenders agreed to promote conventional loans in the area where bankable. The city agreed to begin a concentrated code enforcement program.

By 1974, more than 300 households in the target area had received home improvement loans. The percentage of home purchases in the area financed by lending institutions rose from 39 percent to 63 percent. The number of owner occupied homes in the area increased significantly. More than a million dollars has been lent to date from the high risk revolving loan fund, and a much higher dollar amount of conventional loans have been made by participating lenders, in large part because of their cooperation with the NHS program and their renewed confidence in the community. As a result of the concentrated code enforcement program undertaken by the city in cooperation with the city, 1,261 separate violations were abated by the end of 1974, and the quality of housing stock in the area improved dramatically.

The Federal Home Loan Bank Board, through its Center for Executive Development became aware of the Pittsburgh NHS program in 1971. The Director of that Office, Mr. William Whiteside, arranged for foundation funding to establish similar programs in five other cities. Subsequently, the Home Loan Bank Board commenced negotiations with HUD for a 5-year $12 million demonstration grant to expand the NHS model and experiment with other approaches to neighborhood preservation working cooperatively with local lending institutions.

In 1974, the bank board invited the other Federal financial supervisory agencies to join in an ad hoc task force as a means of encouraging commercial banks and mutual savings banks, as well as savings and loan associations, to participate in the task force's local neighborhood reinvestment programs. In November 1974, this interagency agreement was formalized as the Urban Reinvestment Task Force, composed of HUD, the Bank Board, the Federal Reserve Board, the FDIC, and the Comptroller of the Currency. This body currently administers the HUD demonstration grant, which provides most of the funds for the program. The staff for the task force's national office is provided by the Federal Home Loan Bank System's office of Neighborhood Reinvestment.

As of July 1977, according to testimony received by the committee, 35 Neighborhood Housing Services programs are currently in operation, and 18 others are in development. According to the executive director of the task force, each NHS has the following common elements: First a group of residents who want to preserve their neighborhood, improve their homes, and who are willing to put in the necessary effort to establish and operate a NHS program. Second, local government which is willing to improve the neighborhood by making the necessary improvements in public amenities and public services and by conducting a sensitive housing inspection program coordinated with NHS activities. Third, a group of financial institutions which agree to reinvest in the neighborhood by making normal market rate loans to homeowners meeting their credit standards which will make tax deductible contributions to the NHS to support its operating cost. Fourth, a high risk revolving loan fund to make loans at flexible rates and terms to residents not meeting commercial credit standards. And fifth, a NHS organization, which is a private, nonprofit corporation having a board of directors of which a majority are community residents, along with significant representation from financial institutions, and normally a three-member staff.

Neighborhood Housing Services programs represent a working partnership of community residents, lenders and local government with each group strongly represented and respectful of the other's position. This partnership must be constructed with the greatest care.

Key features of the NHS model are: Neighborhood Housing Services is a local program. The program is nongovernmental. The program is nonbureaucratic. The program is a self-help effort. The program is not a giveaway and the program is concentrated in specific neighborhoods.

Anita Miller of the Ford Foundation, which has given the task force approximately $1 million in grants, described NHS as an entity that "relates well to government but is able to operate just outside of it."

The committee believes that this structure, with its reliance on local initiative and minimal public funding, has been the key to the program's success. The committee believes that after 9 years of experience with local NHS programs, it is time to move beyond the demonstration phase and make the NHS model available to other communities that can benefit. In doing so, however, it is not our intent to see this innovative, flexible program encumbered with redtape. We are convinced that if this effort is ever seen as just another Federal program, it will lose its unique qualities of local voluntary self help, which have been basic to its success. In the past, the main contributions of the task force have been to help identify neighborhoods that can benefit from the NHS approach, and to bring together local residents, lenders, and local government. The main financial contribution of the task force has been the initial capitalization of the high risk revolving fund. But typically, operating funds are raised locally and most loans are made as conventional financing by participating lenders. The Federal funding is only the catalyst. The committee expects that this approach will continue. We expect the new corporation to continue to require its local grantees to leverage the corporation's contribution with support from local lenders and local government. We anticipate that the corporation's own staff will be expanded only to the degree necessary to supervise and provide technical assistance for the expanded number of local NHS and NPP programs.

NEED FOR THE LEGISLATION

There is no doubt that the NHS program has been a remarkable success. Far beyond the number of loans that have been provided by each high risk revolving loan fund, each local NHS seems to engender confidence that declining neighborhoods can be turned around. We have had testimony from lenders on how the NHS experience brought them into closer contact with their local communities and changed their lending attitudes. Since private lenders are the key to urban reinvestment, these changes alone are probably worth the approximately $10 million in Federal funds expended to date.

Further, the NHS approach has been able to bring together lenders and community activists hereto noted mostly for their mutual suspicion. Gale Cincotta, a well-known Chicago community leader and antiredlining crusader has recently become the board chairman of the Chicago NHS, working closely with prominent lenders on a neighborhood based program to reclaim and restore HUD-abandoned properties. Seated between two savings and loan trade association representatives, Ms. Cincotta told the committee:

"Throughout the many local and national battles on the issues of redlining and reinvestment, one bright spot in an otherwise dim picture has been the reinvestment successes of the Neighborhood Housing Services. As far as we know, it is the one program that is working. A fundamental part of the NHS design embodies a concept that neighborhood people should be in control of their community's destiny, and, further, if given a chance to work together in a partnership with (lending) institutions and city officials, not only give creative direction to community programs, but are essential to their success."

There followed this colloquy:

The CHAIRMAN. Gale, how does it feel to be on the same side as the American Bankers Association?

Ms. CINCOTTA. I think that is the way they should always be, on our side.

The committee observes that the NHS approach makes it possible for community groups and lending institutions to work cooperatively "on the same side". Instead of wasting precious energy debating the definition and the extent of redlining, it provides a vehicle to work together to promote reinvestment and neighborhood improvement.

The breadth of support for S. 1724 ranges from the major financial trade associations to the U.S. Conference of Mayors to militant community groups such as Ms. Cincotta's National Peoples Action.

The main dissenter is the U.S. Department of Housing and Urban Development.

HUD COMMENTS

Assistant Secretary Shalala, while expressing enthusiasm for the success of task force programs, recommended that the committee delay action for 1 year, to permit greater evaluation of the NHS experiment. Ms. Shalala also indicated that the new administration is still in the process of developing an urban neighborhood policy, and that HUD would be better able to comment on the proposed legislation once the directions of the new policy are clear. Although she testified that HUD would be unlikely to want to have the task force's programs subsumed within HUD, she indicated that this was one possible option. She also suggested that if the committee's intent was to increase the scope of task force programs, this could be done within the framework of the present task force.

The committee, while sympathetic to HUD's desire to assure that all programs involving neighborhood revitalization are compatible with HUD's own efforts, rejects HUD's position.

First, HUD will of course continue to be represented on the Board of the new corporation. Second, HUD will continue to work closely with NHS and other programs of the corporation since these typically depend heavily on community development block grant moneys to leverage their funds. Finally, without intending to disparage HUD, we would observe that the great strength of NHS and other initiatives of the task force have been their flexibility and their independence from any Federal agency. They have been able to draw upon their ties with the Federal financial supervisory agencies and with HUD without being encumbered or bureaucratized. The committee believes that the success of the NHS experiment is apparent, and that long term funding should be assured. It is no longer practical to continue funding NHS as a HUD assisted demonstration, since it has passed the demonstration stage. As the scale of NHS and NPP programs expands, it will not be practical to administer them through an ad hoc task force. Given these needs, the committee believes that the public corporation is the best available form of organization to continue and expand NHS and NPP programs. We intend that under this form of organization, this will continue to be a flexible, innovative program, locally, designed and controlled, and unencumbered with redtape.

EXPLANATION OF THE LEGISLATION

The bill establishes a National Neighborhood Reinvestment Corporation to carry on the work of the Urban Reinvestment Task Force. The Corporation is to be a nonprofit, tax exempt body, with its principal office in the District of Columbia. Its Board of Directors, as noted, shall be the members of the present Urban Reinvestment Task Force, with the addition of the National Credit Union Administrator, whom the committee added at the suggestion of the Federal Home Loan Bank Board.

The corporation is not to be a Federal instrumentality, and its employees shall not be civil servants, however their pay is limited to the maximum permitted for Federal employees under civil service, and the corporation is subjected to the Freedom of Information Act, to a 'sunshine' provision, and to review by the Office of Management and Budget as well as an audit by the General Accounting Office.

The committee also included an amendment (Sec. 6(a)5) to shield grantees from excessive reporting requirements by other Federal agencies. The amendment makes the corporation primarily responsible for satisfying itself that its grantees are in compliance with applicable provisions of substantive law and places reporting burdens on the corporation itself rather than its grantees, many of which are two or three person store front offices, which simply do not have the capacity to designate compliance officers. It is anticipated that the corporation will devise its own reporting system, with a minimum of paperwork.

In addition to several technical amendments requested by the Bank Board, the committee accepted an amendment by Senator Garn designating the Chairman of the Federal Home Loan Bank Board as Chairman of the Board of the Corporation. The committee felt that S. 1724 as introduced was deficient because it did not indicate whether the Board would have a Chairman. We believe that the Chairman of the Bank Board is the logical Chairman for the Corporation, since this program was largely devised by the Bank Board, and the Home Loan Bank System will continue to provide staff support to the Corporation. We do believe, however, that participation in local neighborhood reinvestment programs by commercial and mutual savings banks is essential and this amendment is in no way intended to minimize the participation by Board members representing other agencies. The committee also accepted Senator Garn's amendment advancing the funding by 1 fiscal year, so that the Corporation can be at the $15 million level in fiscal year 1979, and $20 in fiscal year 1980. The amendment provides for an authorization of $30 million in fiscal year 1981. These were the levels recommended by the Bank Board as necessary to bring the program to the target level of serving 500 neighborhoods by 1981.

These funding levels are optimal and reflect the maximum rate of expansion desirable for the Corporation. Funding at a lesser rate on the other hand would thwart the carefully calibrated projections for NHS program expansion and would cause the Corporation to fall short of the express desire of the committee to implement 500 NHS programs by 1981.

COST OF THE LEGISLATION

Pursuant to section 252(a) of the Legislative Reorganization Act of 1970, as amended, the committee accepts as its own estimate of the cost of carrying out the legislation the following cost estimates as prepared by the Congressional Budget Office.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., August 16, 1977.

Hon. WILLIAM PROXMIRE,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 1724, the Neighborhood Reinvestment Corporation Act.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE

Cost estimate

August 16, 1977.

1. Bill No. S. 1724.

2. Bill title: Neighborhood Reinvestment Corporation Act.

3. Bill status: As ordered reported by the Senate Committee on Banking, Housing, and Urban Affairs, August 4, 1977.

4. Bill purpose: The purpose of this bill is to establish a public corporation to continue the joint efforts of the Federal financial supervisory agencies and HUD in promoting reinvestment in older neighborhoods by local financial institutions and local government. The corporation will continue the work of the urban reinvestment task force in establishing neighborhood housing service programs. This is authorizing legislation which requires subsequent appropriation legislation.

5. Cost estimate:

	Millions
Authorization level:	
Fiscal year:	
1979	$15
1980	20
1981	30
1982	---
1983	---
Estimated cost:	
Fiscal year:	
1979	13
1980	17
1981	28
1982	7
1983	---

These costs would fall in budget function 450.

6. Basis for Estimate: The authorization levels are those stated in the bill. For the purpose of this estimate, it is assumed that this legislation and the equivalent appropriation action be enacted prior to fiscal year 1979.

The legislation leaves the distribution of funds authorized to the discretion of the corporation, but does direct that the activities of the urban reinvestment task force be continued. Therefore, after informal discussion with staff of the task force, a likely budget for the new corporation was estimated based on the present activities of the task force. The funds are estimated to be 44 percent for corporation operating activities and 56 percent for grants. Technical assistance and Neighborhood Housing Service Development activities are estimated to require 87 percent of the operating budget while 66 percent of grants are estimated to be for neighborhood housing services (both new programs and additions to existing programs). Funds for operations are primarily for salaries and would spendout almost entirely in the year for which they were appropriated. Funds for grants would likely be committed in the year for which they were appropriated, but are estimated to require 2 years for disbursement. The spendout rates used in this estimate are as follows: fiscal year 1979—87 percent and 13 percent in years 1 and 2 respectively; fiscal year 1980—75 percent and 25 percent in year 1 and year 2 respectively; fiscal year 1981—77 percent and 23 percent in years 1 and 2 respectively.

7. Estimate comparison: none.

8. Previous CBO estimate: none.

9. Estimate prepared by: Terry Nelson.

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Aanalysis.

VETERANS DISABILITY COMPENSATION AND SURVIVOR BENEFITS ACT OF 1977

The Senate proceeded to consider the bill (H.R. 1862) to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their survivors; and for other purposes, which had been reported from the Committee on Veterans' Affairs with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Veterans Disability Compensation and Survivor Benefits Act of 1977".

TITLE I—VETERANS DISABILITY COMPENSATION

SEC. 101. (a) Section 314 of title 38, United States Code, is amended by—

(1) striking out subsection (a) "$38" and inserting in lieu thereof "$41";

(2) striking out in subsection (b) "$70" and inserting in lieu thereof "$75";

(3) striking out in subsection (c) "$106" and inserting in lieu thereof "$113";

(4) striking out in subsection (d) "$145" and inserting in lieu thereof "$155";

(5) striking out in subsection (e) "$203" and inserting in lieu thereof "$216";

(6) striking out in subsection (f) "$255" and inserting in lieu thereof "$272";

(7) striking out in subsection (g) "$302" and inserting in lieu thereof "$322";

(8) striking out in subsection (h) "350" and inserting in lieu thereof "$373";

(9) striking out in subsection (i) "$393" and inserting in lieu thereof "$419";

(10) striking out in subsection (j) "$707" and inserting in lieu thereof "$754";

(11) striking out in subsection (k) "$879" and "$1,231" and inserting in lieu thereof "$937" and "$1,312", respectively;

(12) striking out in subsection (l) "$879" and inserting in lieu thereof "$937";

(13) striking out in subsection (m) "$968" and inserting in lieu thereof "$1,032";

(14) striking out in subsection (n) "$1,099" and inserting in lieu thereof "$1,172";

(15) striking out in subsections (o) and (p) "$1,231" each time it appears and inserting in lieu thereof "$1,312";

(16) striking out in subsection (r) "$528" and inserting in lieu thereof "$563"; and

(17) striking out in subsection (s) "$791" and inserting in lieu thereof "$843".

(b) The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

SEC. 102. Section 315(1) of title 38, United States Code, is amended by—

(1) striking out in subparagraph (A) "$43" and inserting in lieu thereof "$46";

(2) striking out in subparagraph (B) "$72" and inserting in lieu thereof "$77";

(3) striking out in subparagraph (C) "$92" and inserting in lieu thereof "$98";

(4) striking out in subparagraph (D) "$113" and "$21" and inserting in lieu thereof "$120" and "$22", respectively;

(5) striking out in subparagraph (E) "$28" and inserting in lieu thereof "30";

(6) striking out in subparagraph (F) "$49" and inserting in lieu thereof "$52";

(7) striking out in subparagraph (G) "$72" and "$21" and inserting in lieu thereof "$77" and "$22", respectively;

(8) striking out in subparagraph (H) "$35" and inserting in lieu thereof "$37";

(9) striking out in subparagraph (I) "$78" and inserting in lieu thereof "$83"; and

(10) striking out in subparagraph (J) "$66" and inserting in lieu thereof "$70".

TITLE II—SURVIVORS DEPENDENCY AND INDEMNITY COMPENSATION

SEC. 201. Section 411 of title 38, United States Code, is amended to read as follows:

"§ 411. Dependency and indemnity compensation to a surviving spouse

"(a) Dependency and indemnity compensation shall be paid to a surviving spouse, based on the pay grade of the person upon whose death entitlement is predicated, at monthly rates set forth in the following table:

"Pay grade	Monthly rate
E-1	$277
E-2	286
E-3	293
E-4	311
E-5	320
E-6	327
E-7	343
E-8	362
E-9	[1] 378
W-1	350
W-2	364
W-3	375
W-4	397
O-1	350
O-2	362
O-3	388
O-4	409
O-5	451
O-6	507
O-7	550
O-8	602
O-9	647
O-10	[2] 708

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by Sec. 402 of this title, the surviving spouse's rate shall be $407.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commandant of the Marine Corps, at the applicable time designated by Sec. 402 of this title, the surviving spouse's rate shall be $759.

"(b) If there is a surviving spouse with one or more children below the age of eighteen of a deceased veteran, the dependency and indemnity compensation paid monthly to the surviving spouse shall be increasd by $33 for each such child.

"(c) The monthly rate of dependency and indemnity compensation payable to a surviving spouse shall be increased by $83 if the spouse is (1) a patient in a nursing home or (2) helpless or blind, or so nearly helpless or blind as to need or require the regular aid and attendance of another person.".

Sec. 202. Section 413 of title 38, United States Code, is amended to read as follows:

"Whenever there is no surviving spouse of a deceased veteran entitled to dependency and indemnity compensation, dependency and indemnity compensation shall be paid in equal shares to the children of the deceased veteran at the following monthly rates:

"(1) one child, $140;

"(2) two children, $201;

"(3) three children, $259; and

"(4) more than three children, $259, plus $52 for each child in excess of three.".

Sec. 203. Section 414 of title 38, United States Code, is amended by—

(1) striking out in subsection (a) "$78" and inserting in lieu thereof "$83";

(2) striking out in subsection (b) "$131" and inserting in lieu thereof "$140"; and

(3) striking out in subsection (c) "$67" and inserting in lieu thereof "$71".

TITLE III—CLOTHING ALLOWANCE

SEC. 301. Section 362 of title 38, United States Code, is amended by striking out "$190" and inserting in lieu thereof "$203".

TITLE IV—MISCELLANEOUS PROVISIONS

SEC 401. Section 403 of Public Law 94-433 is amended by—

(1) striking out "nonamputee veterans," in clause (2) of subsection (b) and inserting in lieu thereof "such claims of veterans having nonamputation service-connected disabilities."; and

(2)(A) inserting "(1)" immediately after "(c)", and striking out in subsection (c)(1) (as so redesignated) "June 30, 1977." and inserting in lieu thereof "February 28, 1979."; and

(B) inserting immediately below subsection (c)(1) (as redesignated by subclause (A) of this clause) the following new paragraph:

"(2) If the Administrator enters into a contract for the conduct of the statistical analysis required by subsection (b)(2) of this section, (A) such contract shall specify that (i) the results of such analysis shall be submitted to the Administrator not later than December 31, 1978, and (ii) the statistical analysis and the contractor's findings and conclusions arising therefrom shall remain the exclusive property of the Administrator and may not be disclosed by the contractor until after the submission of the report required by paragraph (1) of this subsection to the Speaker of the House and the President of the Senate, and (B) the Administrator shall facilitate, to the maximum extent feasible, the conduct of such statistical analysis by the contractor.".

SEC. 402. Clause (3) of section 801 of title 38, United States Code, is amended to read as follows:

"(3) due to the loss or loss of use of one lower extremity together with (A) residuals of organic disease or injury, or (B) the loss or loss of use of one upper extremity, which so affect the functions of balance or propulsion as to preclude, or render medically inadvisable, locomotion without resort to crutches or a wheelchair,".

SEC. 403. (a) Section 3020 of title 38, United States Code, is amended by adding at the end thereof the following new subsections:

"(d) Notwithstanding subsection (a) of this section, pursuant to an agreement with the Department of the Treasury under which the Administrator certifies such benefits for payment, monetary benefits under laws administered by the Veterans' Administration may be paid other than by check upon the written request of the person to whom such benefits are to be paid, if such noncheck payment is determined by the Administrator to be in the best interest of such payees and the management of monetary benefits programs by the Veterans' Administration.

"(e) Whenever the first day of any calendar month falls on a Saturday, Sunday, or legal public holiday (as defined in section 6103 of title 5), the Administrator shall, to the maximum extent practicable, certify benefit payments for such month in such a way that such payments will be delivered by mail, or transmitted for credit to the payee's account pursuant to subsection (d) of this section, on the Friday immediately preceding such Saturday or Sunday, or in the case of a legal holiday, the weekday (other than Saturday) immediately preceding such legal public holiday, notwithstanding that such delivery or transmission of such payments is made in the same calendar month for which such payments are issued.".

(b) Not later than sixty days after the effective date of this section, the Administrator of Veterans' Affairs shall submit to the appropriate committees of the Congress a report on the actions taken to implement the new subsection (e) added to section 3020 of such title by the amendment made by subsection (a) of this section.

(c)(1) The catchline of section 3020 of such title is amended to read as follows:

"§ 3020. Payment of benefits; delivery".

(2) The table of sections at the beginning of such chapter is amended by striking out

"3020. Payment of benefits by check; delivery."

and inserting in lieu thereof

"3020. Payment of benefits; delivery.".

(d) The amendments made by this action shall be effective on the date of enactment of this Act.

SEC. 404. (a) Section 1820 of title 38, United States Code, is amended by inserting before the semicolon in clause (1) of subsection (a) a comma and "but nothing in this clause shall be construed as authorizing garnishment or attachment against the Administrator, the Veterans' Administration, or any of its employees".

(b) The amendment made by subsection (a) of this section shall be effective on the date of enactment of this Act.

TITLE V—EFFECTIVE DATE PROVISIONS

SEC. 501. Except as otherwise provided in this Act, the amendments made by this Act to title 38, United States Code, shall become effective on October 1, 1977.

Mr. CRANSTON. Mr. President, on June 17, 1977, the Senator from Georgia (Mr. TALMADGE) introduced, on behalf of himself and all other members of the Committee on Veterans' Affairs, which I am privileged to chair, S. 1703, a bill to provide a 6.3 percent cost-of-living increase for the more than 2.2 million veterans receiving disability compensation for service-connected disabilities, and for surviving spouses receiving dependency and indemnity compensation.

The Subcommittee on Compensation and Pension, chaired by the distinguished Senator from Georgia (Mr. TALMADGE), conducted a hearing on June 21, 1977, to review the Veterans' Administration's service-connected disability and dependency and indemnity compensation program and to consider pending legislation, including S. 1703 and H.R. 1862, a measure providing for a 6-percent increase in the disability compensation and dependency and indemnity compensation rates which had passed the House of Representatives on May 23, 1977.

The subcommittee received testimony in person or by submission from representatives of the Veterans' Administration, the American Legion, the Disabled American Veterans, the Veterans of Foreign Wars, AMVETS, the Veterans of World War I, the Paralyzed Veterans of America, the Blinded Veterans Association, the Society of Military Widows, and the Non Commissioned Officers Association.

By agreement of the Subcommittee on Compensation and Pension, H.R. 1862 was sent to the full committee for consideration. The full Committee on Veterans' Affairs met on July 15, 1977, amended, unanimously approved, and ordered favorably reported to the Senate H.R. 1862 with an amendment in the nature of a substitute.

Subsequently, on July 22, 1977, the committee, based on revised Consumer Price Index estimates received in a letter dated July 20, 1977, from the Director of the Congressional Budget Office, revised the rate increase upward from 6.3 percent to 6.6 percent. At that time and subsequently by poll, the committee made further modifications in the text of the bill as ordered to be reported.

The cost-of-living increase provided in this measure will protect the purchasing power of disabled veterans and eligible survivors who have been hit by continuing increases in the cost of living since the time the last such increase became effective, October 1, 1976, under Public Law 94-433.

SUMMARY OF H.R. 1862 AS REPORTED

Mr. President, the basic provisions of H.R. 1862 as reported would:

First, provide a 6.6 percent cost-of-living increase in basic compensation rates and those payable for more serious disabilities in the additional allowances for spouses, children, and dependent parents paid to veterans rated 50-percent disabled or more; in dependency and indemnity compensation benefits payable to surviving spouses of veterans whose deaths were service connected, including the additional allowances payable for dependent children and to those in need of aid and attendance; in benefits payable to the children of veterans whose deaths were service connected, when there is no surviving spouse; in benefits payable to surviving children who have become permanently incapable of self-support prior to the age of 18; and in the annual clothing allowance paid to certain seriously disabled veterans whose disability tends to tear or wear out their clothing;

Second, extend to February 28, 1979, the date for submission to Congress of the study mandated by Public Law 94-433 on the relationship between amputation and cardiovascular disorders, and clarify other provisions of the study;

Third, in a provision derived from S. 1141, introduced by the Senator from Florida (Mr. STONE), extend eligibility for specially adapted housing grants to permanently and totally service-connected disabled veterans with certain severe disabilities, including those who have suffered the service-connected loss of one upper and one lower extremity;

Fourth, in response to a request from the Veterans' Administration, authorize the VA to cooperate with the Department of the Treasury's electronic fund transfer system so that benefit payments could be automatically deposited in a recipient's account if the recipient elects payment in this manner;

Fifth, in a provision based on S. 543, cosponsored by the Senator from Rhode Island (Mr. PELL) and the Senator from Maine (Mr. HATHAWAY), require, for any month in which the first of the month falls on a Saturday, Sunday, or legal public holiday, the Veterans' Administration to mail or otherwise transmit benefit payments so that they arrive, to the maximum extent practicable, on the Friday immediately preceding such Saturday or Sunday, or in the case of a legal public holiday, on the weekday—other than Saturday—immediately preceding the holiday; and

Sixth, reaffirm by a clarifying amendment the intent of the Congress not to permit garnishment or attachment of VA employees' salaries except as authorized in section 659 of title 42, United States Code, which permits garnishment for alimony and child support.

Mr. President, the cost-of-living rate increases provided for in this legislation will provide additional compensation benefits estimated at $344.5 million in fiscal year 1978, $15.3 million for specially adapted housing in that year. The total additional expenditures resulting from this bill in fiscal year 1978 are estimated to be $359.2 million.

Mr. President, in order that all Senators and the public may have a full understanding of the various provisions of this measure, I ask unanimous consent that there be printed in the RECORD at this point pertinent excerpts from the committee report (No. 95-412) accompanying this bill.

The PRESIDING OFFICER. Without objection it is so ordered:

BACKGROUND AND DISCUSSION

INCREASES IN DISABILITY COMPENSATION (TITLE I)

Background

The Veterans' Administration disability compensation program provides income for 2,245,116 veterans who have service-connected disabilities. This number is composed of disabled veterans with the following periods of service: 46,200 are disabled World War I veterans; 1,272,200 World War II veterans; 239,500 Korean-conflict veterans; and 488,700 Vietnam-era veterans. Compensation is paid according to the degree of disability. Section 355 of title 38, United States Code, provides that the ratings for disability, which range from 10 to 100 percent, shall be based "as far as practical on the average impairment of earning capacity resulting from such injury for civilian occupation." Other less tangible factors have also been traditionally considered by Congress in establishing compensation rates for those who sustained disabilities in the service of their country.

The following table reveals average costs and caseloads for veterans and survivors:

TABLE 1.—AVERAGE COST AND CASELOAD OF VETERANS DISABILITY AND SURVIVOR COMPENSATION CASES

Total costs	Fiscal year 1976			Fiscal year 1977			Fiscal year 1978		
	Average cases	Average cost	Total cost	Average cases	Average cost	Total cost	Average cases	Average cost	Total cost
Compensation (total)	2,593,508	$2,002	$8,238,831 5,192,555	2,613,015	$2,189	$9,046,803 5,719,228	2,619,238	$2,195	$9,116,801 5,748,519
Veterans (total)	2,225,135	1,904	4,236,598	2,245,116	2,085	4,681,601	2,251,714	2,090	4,706,172

Peacetime service	48,147	3,122	150,337	47,700	3,390	161,715	47,300	3,398	160,736

The Committee periodically reviews the service-connected disability compensation program to ensure that the benefits authorized provide reasonable and adequate compensation for disabled veterans and survivors.

Traditionally, review by Congress occurred biennially, but continuing inflation has led to review on an annual basis. Rates were adjusted in the 93d Congress (Public Law 93–295), in the first session of the 94th Congress (Public Law 94–71), and in the second session of the 94th Congress with the enactment of the Veterans Disability Compensation and Survivor Benefits Act of 1976 (Public Law 94–433). That Act provided an 8-percent increase in the rates for disability compensation, dependency and indemnity compensation, and the annual clothing allowance. It became effective October 1, 1976.

Increases in Disability Compensation Rates

Based on the change in the Consumer Price Index to date, together with projected increases to October 1, 1977, as estimated by the Congressional Budget Office and the Office of Management and Budget, a 6.6-percent increase in benefits will be required to protect the purchasing power of benefits paid to disabled veterans and their survivors.

Disabled veterans and their survivors during the past year have continued to experience an increase in the cost of living, particularly in the first quarter of 1977. The Veterans' Administration originally proposed an increase of 4.9 percent in the applicable rates, but subsequently advised the Committee that a 6.3-percent increase was warranted. By letter to the Committee dated July 20, 1977, the Director of the Congressional Budget Office advised the Committee that CBO's estimate of the increase in the Consumer Price Index for the period from October 1976, to October 1977, was 6.6 percent. The following table shows changes in the Consumer Price Index from January 1, 1975, to July 1, 1977:

TABLE 2.—U.S. DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS CONSUMER PRICE INDEX

[1967=100]

	1975	1976	1977
January	156.1	166.7	175.3
February	157.2	167.1	177.1
March	157.8	167.5	178.2
April	158.6	168.2	179.6
May	159.3	169.2	180.6
June	160.6	170.1	181.8
July	162.3	171.1	182.6
August	162.8	171.9	
September	163.6	172.6	
October	164.6	173.3	
November	165.6	173.8	
December	166.3	174.3	

The following table shows the current rates for disability compensation and those proposed by H.R. 1862, as reported, together with the number of veterans receiving compensation in each category:

TABLE 3.—COMPARISON OF COMPENSATION RATES UNDER PRESENT LAW AND UNDER H.R. 1862 AS AMENDED

	Increases		Number of veterans
	From—	To—	
Percentage of disability or subsection under which payment is authorized:			
(a) 10 percent	$38	$41	870,404
(b) 20 percent	70	75	346,999
(c) 30 percent	106	113	315,762
(d) 40 percent	145	155	182,190

INCREASES IN MONTHLY DEPENDENTS' ALLOWANCES

Under existing law, additional allowances are provided for dependents of veterans who are rated 50-percent-or-more disabled, H.R. 1862, as reported, provides 6.6-percent increases in dependents' allowances to the veterans currently receiving these benefits. The following table shows the additional compensation rates payable for dependents under present law and the rates payable under the Committee bill:

TABLE 5.—ADDITIONAL DEPENDENTS ALLOWANCES PAID TO CERTAIN DISABLED VETERANS

	Increase	
	From—	To—
If and while veteran is rated totally disabled and—		
(a) has a wife but no child living	$43	$46
(b) has a wife and 1 child living	72	77
(c) has a wife and 2 children living	$92	$98
(d) has a wife and 3 or more children living	113	120
(plus for each living child in excess of three)	21	22
(e) has no wife but 1 child living	28	30
(f) has no wife but 2 children living	49	52
(g) has no wife but 3 or more children living	72	77
(plus for each living child in excess of 3)	21	22
(h) has a mother or father, either or both dependent upon him for support for each parent so dependent	35	37
(i) for a spouse who is a patient in a nursing home or who is so helpless as to require regular aid and attendance	78	83
(j) for each child who has attained age 18 and who is pursuing a course of instruction at an approved educational institution	66	70

In addition, the bill provides a 6.6-percent increase in the additional compensation payable to a veteran who is 50-percent-or-more disabled and who has a spouse who is a patient in a nursing home or who is so helpless as to require the aid and attendance of another person. This provision would increase the base rate from $78 to $83 for such a veteran who is 100-percent disabled, and proportionately less to the veterans rated from 50-percent to 90-percent disabled.

INCREASE IN SURVIVORS' DEPENDENCY AND INDEMNITY COMPENSATION RATES (TITLE II)

Background

The dependency and indemnity compensation (DIC) program was created in 1965 with the enactment of the Servicemen's and Veterans' Survivor Benefits Act (Public Law 84–881).

DIC payments are paid to surviving spouses, unmarried children under the age of 18 (as well as certain helpless children and those between the ages of 18 and 23 enrolled in school under chapter 35), and certain parents of servicemen or veterans who died on or after January 1, 1957, from (1) a disease or injury incurred or aggravated in line of duty while on active duty or active duty training; or (2) an injury incurred or aggravated in line of duty while on inactive duty training; or (3) a disability otherwise compensable under laws administered by VA.

Surviving spouses, children, and parents who are on the rolls, or found to be eligible, for death compensation by reason of a death occurring before January 1, 1957 may elect to receive DIC payments in lieu of death compensation. They cannot thereafter choose to receive death compensation.

Prior to enactment of the DIC programs, the survivors of military personnel whose deaths were due to service-connected causes might have been eligible for as many as five different survivor benefits.

In 1969, Public Law 91–96 was enacted replacing the original DIC formula with a table of specific dollar rates related to the pay grade of uniformed services. An effort was made at that time to increase all surviving spouses' payments by an amount equal to the increase in the cost of living since the effective date of the 1965 act. Subsequent adjustments occurred with: Public Law 92–197, which provided an additional 10-percent increase in benefits; Public Law 93–295, which provided a 17-percent increase; Public Law 94–71, enacted in 1975, which provided a 12-percent increase; and Public Law 94–433, enacted last year, which provided an 8-percent increase in benefits.

The current DIC program provides benefits to more than 367,800 beneficiaries. The following table shows the current and anticipated survivor caseloads and costs by fiscal years:

TABLE 6.—AVERAGE COST AND CASELOAD OF SURVIVOR COMPENSATION CASES

[Total costs in thousands of dollars]

Total costs	Fiscal year 1976			Fiscal year 1977			Fiscal year 1978		
	Average cases	Average cost	Total cost	Average cases	Average cost	Total cost	Average cases	Average cost	Total cost
Survivors (total)	368,373	2,595	955,957	367,889	2,820	1,037,627	367,524	2,836	1,042,347
Indian wars	1	2,320	2	1	2,229	2	1	2,229	2
Civil War	8	2,867	23	6	3,000	18	6	3,200	19
Spanish-American War	238	2,941	700	195	3,277	639	170	3,277	557
Mexican border period	3	4,866	15	2	2,500	5	2	2,500	5
World War I	34,699	3,066	106,371	34,100	3,304	112,660	33,500	3,112	110,942
World War II	190,099	2,212	420,409	187,000	2,394	447,702	184,000	2,401	441,732
Korean conflict	39,360	2,504	98,544	39,400	2,716	107,013	39,500	2,723	107,564
Vietnam era	55,818	3,217	179,556	59,495	3,494	207,873	63,045	3,502	220,790
Peacetime service	48,147	3,122	150,337	47,700	3,390	161,715	47,300	3,398	160,736

Title II of H.R. 1862, as reported, provides a uniform cost-of-living increase of 6.6 percent in DIC rates for surviving spouses and children effective October 1, 1977, the same rate of increase provided disabled veterans under title I. Additional allowances for surviving spouses in need of aid and attendance, helpless children, children between the ages of 18 and 23 attending schools, and surviving spouses and dependent parents in receipt of death compensation in need of aid and attendance are also increased by 6.6 percent.

Existing and proposed DIC rates are shown in the following table:

TABLE 7.—COMPARISON OF DIC RATES UNDER PRESENT LAW AND H.R. 1862 AS REPORTED

	From—	To—

O-9	607	647
O-10	664	708

INCREASE IN ANNUAL CLOTHING ALLOWANCE (TITLE III)

Title III of H.R. 1862, as reported, increases the annual clothing allowance by 6.6 percent from $190 to $203. Increasing the clothing allowance by the modest amount, $13, is justified by the changes in the Consumer Price Index and by the recognition which this allowance gives to the difficulties which these veterans endure daily because of the special nature of their service-connected disabilities.

Background

Under present law (section 362 of title 38), a special clothing allowance is provided to veterans whose service-connected disability requires them to wear or use a prosthetic or orthopedic appliance which tends to wear out or tear their clothing. In 1971, in Public Law 92–329, Congress first authorized an annual clothing allowance of $150 for these veterans. Prior to its enactment, the Administrator was authorized to furnish "special clothing" necessitated by the wearing of prosthetic appliances. However, the law did not authorize the replacement of conventional clothing subjected to extraordinary wear and tear. Congress subsequently increased the amount of the annual clothing allowance to $175 in 1975 (Public Law 94–71) and $190 in 1976 (Public Law 94–433).

In 1977, 56,057 veterans are receiving clothing allowances, an increase of 5.4 percent over the previous year. In the report accompanying the 1976 compensation legislation, the Committee expressed its approval of the VA's outreach efforts in 1975 and 1976 to contact potentially eligible veterans, and it intends that the Veterans' Administration continue its outreach efforts to identify and communicate with all those disabled veterans who are eligible for the allowance but who have not yet applied for it.

EXTENSION OF TIME FOR COMPLETION OF CARDIOVASCULAR-AMPUTATION STUDY (SECTION 401)

Background

Section 401 provides for an extension of the due date for the VA's submission of its report on the relationship between amputation and subsequent cardiovascular disease (from June 30, 1977, to February 28, 1979); specifies conditions under which the study may be contracted out; and makes a clarifying change in the scope of the study.

Section 403 of Public Law 94–433, enacted September 30, 1976, required the Veterans' Administration to conduct a scientific study in order to determine whether there is a causal relationship between service-connected amputation and the subsequent development of cardiovascular disease. This study was to have two components, and the Administrator's report on the study was to be submitted to the Congress by June 30, 1977. The first component, a comprehensive review and professional analysis of the literature covering other such studies, was submitted to the Congress on June 30, 1977.

The second component, an analysis of statistically valid samples of disability claims of veterans having service-connected extremity amputation matched by sex, age, and war period with non-amputee veterans, has not yet been submitted to the Congress.

On May 26, 1977, the Administrator of Veterans' Affairs advised the chairman by letter that the statistical analysis could not be completed by June 30, 1977, and that a 30-month extension was required in order to complete the research, obtain comments on it, and make recommendations. The Chairman responded on June 17, 1977, requesting a full explanation and pointing out that such an extension would, if warranted, require a statutory change.

As a result of discussions among the staff of the Senate Committee on Veterans' Affairs, the House Committee on Veterans' Affairs, the Veterans' Administration, and the proposed contractor, the estimated period of time required for completion of the statistical analysis has been reduced to 18 months. The report by the VA will be submitted 2 months later, on February 28, 1979.

In order to enhance the validity of the study and clarify its scope, the control group of veterans will be restricted to those who suffered a service-connected disability other than amputation, and the population to be studied will include below-the-knee as well as above-the-knee amputations and nonbattle as well as battle casualties. If the Administrator, in his discretion, contracts with an appropriate scientific investigatory body to accomplish the statistical analysis, the section requires that such contract contain a delivery date of December 31, 1978. Since the design of the study requires fairly extensive review of records available only in the Veterans' Administration Regional Offices, the Administrator, if he contracts for the study, is directed to facilitate access to VA records, in order to obviate delay to the maximum extent feasible. The section further requires that the contract provide that the scientific analysis will become the property of the Administrator until such time as he submits his report to the Congress.

The reduction in time has also resulted in a reduction of costs estimated by the proposed contractor from $221,735 (June 1, 1977 to September 30, 1979) to $177,700 for the reduced period of time agreed upon.

The amendment to section 403 of Public Law 94–433 will be effective upon enactment.

The May 26 and June 17 letters are as follows:

VETERANS' ADMINISTRATION, OFFICE OF THE ADMINISTRATOR OF VETERANS' AFFAIRS,
Washington, D.C., May 26, 1977.

Hon. ALAN CRANSTON,
Chairman, Committee on Veterans' Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The Veterans' Disability Compensation and Survivor Benefits Act of 1976 (Public Law 94–433) requires the Administrator of Veterans' Affairs to conduct a study to determine whether prior amputation of an extremity influences the subsequent development of cardiovascular disorders. The report is due to be submitted to Congress not later than June 30, 1977. [Sec. 403(c).]

The required review and analysis of the literature [sec. 403(b)(1)] is nearing completion but the statistical study of amputees [sec. 403(b)(2)] was delayed by complications arising from the Privacy Act of 1974. These difficulties have now been overcome, the protocol for the study has been designed, the project approved, and work initiated by the Medical Followup Agency of the National Research Council—National Academy of Sciences.

It is estimated that it will require an additional 2½ years to complete the research, obtain comments on it, and make recommendations. The Veterans' Administration therefore requests an extension of the date for the report to December 31, 1979.

Thanking you for your kind attention to this matter, I am

Sincerely,

MAX CLELAND,
Administrator.

U.S. SENATE,
COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., June 17, 1977.

Hon. MAX CLELAND,
Administrator of Veterans' Affairs, 810 Vermont Avenue N.W., Washington, D.C.

DEAR MAX: I have received your letter of May 26, 1977, requesting an extension of the due date for the Veterans' Administration report on its study to determine whether prior amputation of an extremity influences the subsequent development of cardiovascular disorders. As you state, Public Law 94–433, which mandated this study, required that it be submitted to Congress not later than June 30, 1977.

I know this is a matter of genuine concern to you and that your goal is to make the study as valuable as possible. However, your estimate of a 2½-year extension exceeds the full period originally allowed by Congress for completion of the study by 21 months. In order to evaluate your request, we will need a copy of the protocol as well as an outline of the anticipated schedule over the period of the extension.

Also, in your letter you state that "the statistical study of amputees . . . was delayed by complications arising from the Privacy Act of 1974." Please provide me with a description of the nature of Privacy Act problems to which you refer.

Finally, please provide a cost breakdown for the work to be performed by the Medical Followup Agency of the National Research Council—National Academy of Sciences.

In any event, I believe that such an extension of time would require a statutory change in Public Law 94–433. Therefore, I would appreciate your prompt response, not later than June 24, 1977, to the concerns I have expressed in this letter, and a statement whether you would support an amendment of the pending compensation increase legislation to extend the due date.

With warm regards,

Cordially,

ALAN CRANSTON,
Chairman.

EXTENSION OF SPECIALLY ADAPTED HOUSING ELIGIBILITY (SECTION 402)

Section 402 would extend eligibility for chapter 21 specially adapted housing grants to certain service-connected disabled veterans whose ambulation is impaired by the loss, or loss of use, of one lower extremity.

Background

Section 402 provides eligibility for two groups of veterans in the category of those who have lost or lost the use of one lower extremity: Those who have lost or lost the use of one lower extremity together with residuals of organic injury or disease, and those who have lost or lost the use of one upper and one lower extremity. In both cases, the disability must so affect the functions of balance and propulsion as to preclude or render medically inadvisable locomotion without resort to crutches or a wheelchair. This section would become effective on October 1, 1977.

Eligibility for specially adapted housing grants, consisting of 50 percent of the total cost to the veteran of a home with special adaptations, not to exceed $10,000, began in 1948 with the enactment of Public Law 80–702. The program was restricted to those whose need was most evident, veterans whose

permanent and total service-connected disability was the result of spinal cord disease or injury with paralysis of the legs and lower part of the body. Ramps, special bathroom equipment, wide hallways, exercising facilities, and other special adaptations were recognized as being essential to the health and safety of these veterans.

The specially adapted housing program was subsequently revised and extended by Public Law 81–286 in 1949 to include veterans who had lost or lost the use of both lower extremities by reason of certain disabilities other than spinal cord injury or disease. Public Law 86–239 in 1959 extended eligibility to blinded veterans who had only light perception and who had sustained the loss or loss of use of one lower extremity precluding locomotion without the use of a wheelchair, and all veterans who had lost or lost the use of both lower extremities, so as to preclude locomotion without the aid of braces, canes, crutches, or a wheelchair. In 1964, Public Law 88–401 deleted the requirement that the permanent and total disability of a blinded veteran who had lost or lost the use of one lower extremity be such as to require the use of a wheelchair. In 1969, Public Law 91–22 extended the program to permanently and totally disabled veterans who have lost or lost the use of one lower extremity together with residuals of organic disease or injury affecting the functions of balance and propulsion so as to preclude locomotion without the aid of a wheelchair.

In 1969, the maximum amount of the grant was increased to $12,500 (Public Law 91–22), in 1971 to $17,500 (Public Law 92–341) and in 1973 to the present maximum of $25,000 (Public Law 93–569). A veteran eligible for the grant may receive 50 percent of the cost to the veteran of a specially adapted home up to the maximum of $25,000. The purpose of the grant program is to compensate these severely disabled veterans desiring to acquire their own homes for the extra cost of a home with special adaptations rendered necessary to provide for the veteran's health and safety.

Thus, current law provides that three groups of veterans with permanent and total service-connected disabilities are eligible for specially adapted housing grants: First, a veteran who has lost or lost the use of both lower extremities so that he or she is precluded from locomotion without the aid of braces, canes, crutches, or a wheelchair; second, a veteran blind in both eyes, having only light perception, who has lost or lost the use of one lower extremity; and third, a veteran who has lost or lost the use of one lower extremity together with residuals of organic disease or injury affecting the function of balance and propulsion so that he or she is precluded from locomotion without the aid of a wheelchair.

This provision in the Committee bill will help those permanently and totally disabled veterans otherwise eligible who must wear a prosthesis or a brace but who periodically must remove it on the basis of medical advice, and who are then forced to move about in their homes on crutches or a wheelchair, to acquire specially adapted housing. It closely adheres to the spirit and intention of existing law to make specially adapted housing grants available to those veterans whose service-connected disability renders the special housing adaptations necessary for their health and safety.

PAYMENT OF VETERANS' ADMINISTRATION BENEFITS BY MEANS OTHER THAN CHECK (SECTION 403)

Section 403 authorizes the VA, in cooperation with the Treasury Department, to provide for monthly automatic deposits in the savings or checking accounts of recipients of VA benefit payments who request payment by such means rather than by individual checks mailed to them.

Background

Under current law, Veterans' Administration benefits are required to be paid by means of checks mailed to the recipients. In order to assist those recipients who would prefer to have their benefit payments automatically deposited in their financial institution checking or savings account, this provision would authorize the Administrator to cooperate with the Department of the Treasury in its electronic fund transfer system (EFTS), a system which has been extremely successful since its inception in 1976. Over 50,000,000 payments have been made to social security and railroad retirement recipients, and Federal annuitants under EFTS, and no valid claims of nonreceipt have been made. This provision requires that the intended recipient must request in writing that the benefit payment be credited to his or her checking or savings account, and would eliminate postal service delay and the problem of lost or stolen checks for those recipients who elect payment in this fashion.

Important notifications to beneficiaries by the VA are presently inserted when feasible in the check envelope. Recipients who elect payment under the means authorized by this amendment will continue to receive such notifications by mail.

The Veterans' Administration has advised that this provision would result in a savings to the Department of the Treasury of about $1,350,000 for fiscal year 1978, if 15 percent of the recipients participate, rising to $3,600,000 in 5 years as more persons elect payment by this means. The Veterans' Administration would experience a reduction in costs, attributable to savings of amounts currently expended in tracing and recovering lost and stolen checks, but would also expend additional funds for mailing notifications to recipients who participate, resulting in a net cost to the VA for the fiscal year 1978 of approximately $450,750. This cost of mailing would rise as more and more recipients elect to participate.

In view of the fact that this provision would result in considerable savings to the Treasury, the Committee recommends that the Administrator of Veterans' Affairs and the Director of the Office of Management and Budget work out a system whereby the VA general operating expenses account will be replenished—either by transfer of funds from the Department of the Treasury or by a supplemental appropriation—for this cost which was not anticipated when the Administration budget was submitted, and whereby the VA budget estimates for future fiscal years will include an additional amount to reflect this additional mailing cost.

PAYMENT OF BENEFITS ON PRECEDING WEEKDAY OTHER THAN SATURDAY FOR MONTHS IN WHICH THE FIRST DAY FALLS ON A SATURDAY, SUNDAY, OR A LEGAL PUBLIC HOLIDAY (SECTION 403)

Section 403 also generally requires benefit payments to be delivered to arrive on the preceding weekday other than Saturday in any month in which the first of the month is a Saturday, Sunday, or legal public holiday. This amendment generally derives from the provision pertaining to veterans' benefit payments contained in S. 543, introduced by Senators Pell and Hathaway on January 31, 1977.

This provision also requires the VA to report on its implementation to the appropriate congressional committees within 60 days after enactment and is effective upon enactment.

Background

Under current law as it is administered, benefit checks are mailed to arrive on the first of the month. If the first of the month falls on a Saturday, Sunday, or legal holiday, pensioners and other recipients of veterans' benefits who find it extremely difficult to cash their checks on Saturday, or who must wait until Tuesday (in case of a 3-day weekend) to cash their checks, often experience great hardship. This provision would alleviate that hardship by requiring the Veterans' Administration, to the maximum extent practicable, to mail the checks (or electronically transmit the payments) so that they arrive on the preceding Friday in any month in which the first of the month falls on Saturday or Sunday, and on the preceding weekday (other than Saturday) if the first falls on a legal public holiday.

Since the checks or electronic deposits will have to be dated with the date of the day of the intended delivery, there will be a small number of overpayments which might arise under the provisions of current law which provide that the VA benefits recipient who dies (or in some instances, who marries or remarries) in any month loses his or her entitlement for that month. The overpayments will occur in the very small number of situations in which such an event follows the negotiation of the check or a withdrawal from the account. However, most of the small number of overpayments which could then occur can be recouped by the VA.

The "practicable" qualification will permit the VA to avoid any appropriations difficulties which might arise when the first day of the fiscal year falls on a Saturday or Sunday by mailing or transmitting the benefit payments that month as usual, and also to implement this provision only to the extent that appreciable additional costs are avoided.

The VA has informally advised that the cost of this provision, attributable to the unrecouped overpayments, will be somewhat less than $1,000,000. The Committee believes this may be excessive and urges the VA to make a reestimate and to find ways to minimize the cost of implementation.

REAFFIRMATION OF CONGRESSIONAL INTENT WITH RESPECT TO LIMITED WAIVER OF SOVEREIGN IMMUNITY (SECTION 404)

Section 404 reaffirms the intent of the Congress with respect to the limited waiver of sovereign immunity provided by section 1820 of title 38, United States Code, which permits suits by and against the Administrator of Veterans' Affairs in, but specifically limits such suits to, home-loan guaranty matters. Despite the clear intent and statutory language of this section, in *Chicago Housing Authority* v. *Davis*, Civil No. 75 C 2133, November 20, 1975, the United States District Court for the Northern District of Illinois held that section 1820(a)(1), which provides that the Administrator, with respect to matters arising by reason of chapter 37 (relating to the VA's home-loan guaranty program), may "sue and be sued in the Administrator's official capacity," permitted garnishment of a VA employee's salary for the benefit of a creditor on the theory that this provision constituted a complete waiver of sovereign immunity. That decision clearly exceeded the scope of section 1820, as well as the scope of section 659 of title 42, United States Code (Public Law 93–647) which permits garnishment of Federal employees' salaries only for alimony and child support purposes. As a result, several hundred garnishment actions have been instituted by creditors against the VA in the Chicago area. On the basis of the *Davis* decision, the VA has had to honor the writs of garnishment which have been issued in that judicial district.

In a recent decision, *DePaul Community Health Center* v. *Campbell*, Civil No. 77–025 C (4) (March 29, 1977), the District Court for the Eastern District of Missouri refused to follow *Davis* and, in the Committee's view, correctly held that the waiver of sovereign immunity in section 1820 extends only to home-loan guaranty matters. Nevertheless, it is possible that other courts may follow the *Davis* rationale absent the clarification of congressional intent provided by this section.

The Committee emphasizes that nothing in this section should be construed as limit-

ing or nullifying the specific provisions of section 659 of title 42 and its accompanying provisions which permit garnishment of Federal employees' salaries (and other benefits based upon remuneration for employment) for alimony and child support purposes.

COST ESTIMATES

In accordance with section 252(a) of the Legislative Reorganization Act of 1970 (Public Law 91-510, 91st Congress), the Committee, based on information supplied by the Congressional Budget Office, estimates that the 5-year cost resulting from the enactment of the Committee bill would be $359.2 million in fiscal year 1978; $359.8 million in fiscal year 1979; $352.2 million in fiscal year 1980; $352.5 million in fiscal year 1981; and $350.4 million in fiscal year 1982.

A detailed breakdown of costs and cost-savings, as estimated by CBO, over the 5-year period follows:

CONGRESSIONAL BUDGET OFFICE
COST ESTIMATE

1. Bill number: H.R. 1862 (Senate version).

2. Bill title: Veterans Disability Compensation and Survivor Benefits Act of 1977.

3. Bill status: This bill has been ordered reported by the Senate Committee on Veterans' Affairs.

4. Bill purpose:

This bill would amend title 38, U.S.C. to accomplish the following:

A. To increase by 6.6 percent the rates of disability compensation for veterans, dependency and indemnity compensation (DIC) for survivors, and the clothing allowance for certain disabled veterans.

B. To modify the requirements of the Cardiovascular/Amputation Study.

C. To extend eligibility for specially adapted housing grants to veterans with service-connected loss or loss of use of one upper and one lower extremity who must periodically resort to the use of crutches or a wheelchair.

D. To authorize the payment of a benefit check directly to the bank of the payee upon the writtten request of the payee (electronic fund transfer).

E. Whenever the first day of any calendar month falls on a Saturday, Sunday, or legal public holiday, to authorize the mailing (or transmittal to payee's bank) of benefit payments in such a way as to insure that such payments will be received on the Friday immediately preceding such Saturday or Sunday, or on the weekday immediately preceding such legal holiday. This provision will be effective upon enactment.

F. To reaffirm the intent of Congress with respect to permissible garnishmnt of a VA employee's salary. This provision will be effective upon enactment.

Except where otherwise specified, all provisions will be effective October 1, 1977.

5. Cost estimate:

[In millions of dollars]

	Fiscal year—				
	1978	1979	1980	1981	1982
A. Rate increase	344.5	345.4	345.9	346.4	346.9
B. Cardiovascular—amputation study	[1].2				
C. Specially adapted housing	15.3	15.4	7.6	7.7	5.3
D. Electronic fund transfer:					
Cost to VA	.5	.7	.9	1.0	1.2
Savings to Treasury	−1.3	−1.7	−2.2	−2.6	−3.0
Net savings	−.8	−1.0	−1.3	−1.6	−1.8
E. Early check mailing	[2]	[2]	[2]	[2]	[2]
F. Garnishment	[2]	[2]	[2]	[2]	[2]
Total	359.2	359.8	352.2	352.5	350.4

[1] Costs quoted by contractor for study: Fiscal year 1977—$23,600; fiscal year 1978—$154,100.
[2] Less than $100,000.

6. Basis for estimate:

A. The cost of the increase for disability compensation is estimated by multiplying the number of veterans at each disability rating level by the increase in the payment rate for that level. The number of DIC recipients in each service grade category were multiplied by the increase in payment for the category to estimate the cost of the increase in DIC rates.

B. The figure shown for the Cardiovascular/Amputation Study is the cost estimate submitted by the contractor.

C. The cost estimate for the specially adapted housing provision is based on an interpretation by the VA that the only cases which would be affected by this provision would be those veterans with a service-connected loss or loss of use of one upper and one lower extremity. It is assumed that 85 percent of such veterans would be advised to remove their prostheses periodically and would, therefore, qualify for the grant.

D. The estimate of the costs and savings which would result from the electronic fund transfer of benefit payments is based on information obtained from the VA. The savings which will accrue to the Treasury Department are a result of decreased postage and handling costs. The cost to the VA is a result of having to mail separately certain notices to beneficiaries which are ordinarily mailed with the benefit check. A 15 percent participation rate is expected in the first year, gradually increasing to a maximum participation of 40 percent in 1982.

E. and F. There would be a minor cost associated with the early check mailing provision as a result of overtime pay. However, this should be offset by the savings which would result from the clarification of the garnishment provision.

7. Estimate comparison: Not available.

8. Previous CBO estimate: H.R. 1862 as passed by the House contained only a 6 percent rate increase for compensation. CBO submitted a cost estimate of $312.5 million in fiscal year 1978 for this amendment on May 12, 1977. The bill has been revised in its entirety by the Senate.

9. Estimate prepared by: K. W. Shepherd (225-7766).

10. Estimate approved by:

C. G. NUCKOLS,
(For James L. Blum, Assistant Director for Budget Analysis).

SECTION-BY-SECTION ANALYSIS OF H.R. 1862 AS REPORTED

Section 1

This section provides that the proposed act may be cited as the "Veterans Disability Compensation and Survivor Benefits Act of 1977".

TITLE I—VETERANS DISABILITY COMPENSATION

Section 101

Subsection (a) of section 101 provides a 6.6-percent increase in the basic rates of service-connected disability compensation payable under section 314 of title 38, United States Code. Currently, a veteran with a 10-percent disability receives $38 monthly; a veteran with a disability rated at 100 percent receives $707. These rates would be increased to $41 and $754, respectively, and the intermediate rates would be increased proportionately. An increase of 6.6 percent is also provided for all higher statutory awards involving combinations of severe disabilities, with the exception of the statutory award payable under section 314(k).

Subsection (b) of section 101 authorizes administrative adjustment, consistent with the rate increases specified in subsection (a), of the rates of disability compensation payable under section 10 of Public Law 85-857 to persons who are not in receipt of compensation under chapter 11 of title 38, United States Code.

Section 102

This section provides increases in the additional allowances payable under section 315 of title 38, United States Code, to service-connected disabled veterans with spouses, children, and dependent parents when the veteran is rated 50-percent-or-more disabled. These allowances are increased by 6.6 percent and will affect approximately 377,691 veterans. An increase of 6.6 percent and will affect approximately 377,691 veterans. An increase of 6.6 percent is also provided to veterans whose service-connected disability rating is 50 percent or greater and who receive an additional allowance for a spouse in need of aid and attendance.

TITLE II—SURVIVORS DEPENDENCY AND INDEMNITY COMPENSATION

Section 201

Subsection (a) of section 201 increases by 6.6 percent the rates of dependency and indemnity compensation (DIC) payable under section 411 to the surviving spouses and children of veterans who die of service-connected causes. Currently, the minimum amount of DIC payable to the surviving spouse of a veteran who attained the grade of E-1 is $269 monthly. This amount is increased according to the veteran's grade, rising to $664 per month for the surviving spouse of a veteran whose grade was O-10. These rates would be increased by 6.6 percent, so that the surviving spouse of a veteran who attained the grade of E-1 would receive $277 and the surviving spouse of a veteran who attained the grade of O-10 would receive $708, with intermediate rates rising proportionately.

Subsection (b) of section 201 increases by 6.6 percent the additional monthly allowances payable under section 411(b) to a surviving spouse receiving DIC for each child under 18, from $31 to $33.

Subsection (c) of section 201 provides a 6.6-percent increase in the additional allowance payable under section 411(c) to a surviving spouse in receipt of DIC who is in need of aid and attendance, from $78 per month to $83.

Section 202

This section provides a 6.6-percent increase in the rates of DIC payable under section 413 for children when there is no surviving spouse entitled. Currently, the rates range from $131 for one child to $243 for three children plus $49 per month for each additional child. The increases would provide rates of $140 to $259, respectively, with $52 for each additional child.

Section 203

Clause (1) of section 203 provides a 6.6-percent increase in the additional allowance payable under section 414(a) to a child eligible for DIC who has attained the age of 18 and who became permanently incapable of self-support before reaching the age of 18 from $78 to $83 per month.

Clause (2) of section 203 provides an increase of 6.6-percent in the additional allowance (from $131 to $140 per month) payable under section 414(b) to a surviving spouse receiving DIC when there is a child eligible who has attained the age of 18 and is permanently incapable of self-support.

Clause (3) of section 203 provides a 6.6-percent increase (from $67 per month to $71) in the additional allowance payable under section 414(c) to a surviving spouse in receipt of DIC when there is a child pursuing a course of educational approval under section 104.

TITLE III—CLOTHING ALLOWANCE

Section 301

This section increases by 6.6-percent, the clothing allowance payable under section 362 to any veteran who because of his compensable disability wears or uses a prosthetic or

orthopedic appliance, including a wheelchair, which tends to wear out or tear his or her clothing, from $190 to $203.

TITLE IV—MISCELLANEOUS PROVISIONS

Section 401

This section amends section 403 of Public Law 94-433, which requires the Veterans' Administration to conduct a study to determine whether there is a causal relationship between service-connected amputation and the later development of cardiovascular disorders. Section 402(b) requires that the report of the study includes an analysis of statistically valid samples of disability claims of veterans with service-connected amputations matched by age, sex, and war period with nonamputee veterans.

Clause (1) of section 401 clarifies that the control group in the statistical analysis should be composed of veterans who have service-connected disabilities other than amputations.

Clause (2)(A) of section 401 extends the date for the submission of the Administrator's report to the Congress from June 30, 1977, to February 28, 1979.

Clause (2)(B) of section 401 specifies that if the Administrator contracts for the statistical analysis required by section 403(b)(2) of Public Law 94-433, the contract must require that the results of the statistical analysis must be submitted to the Administrator by December 31, 1978, and that the statistical analysis and the contractor's findings and conclusions shall remain the exclusive property of the Administrator until after he submits his report to the Congress and cannot be disclosed by the contractor until after such time. In addition, the Administrator shall facilitate, to the maximum extent feasible, the contractor's conduct of the statistical analysis.

Section 402

This section amends clause (3) of section 801 of title 38, United States Code, relating to eligibility for specially adapted housing for service-connected permanently and totally disabled veterans. Clause (3) currently provides eligibility for such veterans who have lost or lost the use of one lower extremity together with residuals of organic disease or injury which so affect their functions of balance or propulsion as to preclude locomotion without resort to a wheelchair. Section 402 amends clause (3) to provide specially adapted housing eligibility for two groups of permanently and totally service-connected veterans who have lost or lost the use of one lower extremity; First, those veterans in this category with residuals or organic disease or injury, and second, those veterans in this category who have lost or lost the use of one upper extremity. Both groups of veterans would be eligible if their service-connected disability (or disabilities) so affects their functions of balance and propulsion as to preclude *or render medically inadvisable* locomotion without the aid of *crutches or* a wheelchair. (Italics indicate added language.)

Section 403

Subsection (a) of section 403 inserts at the end of the present language in section 3020, title 38, United States Code, two new subsections, designated as subsections (d) and (e), respectively, as follows:

New subsection (d): Authorizes the VA to enter into an agreement with the Department of the Treasury to certify the payment of monetary benefits by means other than check, if the person to whom the benefits are to be paid authorizes noncheck payment (by automatic deposits in the person's checking or savings account) in writing, and if the Administrator determines that such a noncheck payment system is in the best interest of the payees and the management of the Veterans' Administration benefits program.

New subsection (e): Requires the Veterans' Administration, to the maximum extent practicable, to mail or otherwise transmit benefit payments for any month in which the first of the month falls on a Saturday or Sunday so that they arrive, or are credited to the payee's account, on the Friday immediately preceding; in the case of a legal public holiday which falls on the first of the month, the benefit payments must be mailed or otherwise transmitted to arrive on the weekday other than Saturday which immediately precedes the holiday.

Subsection (b) of section 403 requires the VA to submit a report to the appropriate congressional committees on actions taken to implement new subsection (e) of section 3020, title 38, United States Code, 60 days after the enactment of section 403.

Subsection (c) of section 403 makes an appropriate change in the catchline of section 3020 and the table of sections at the beginning of chapter 51 to reflect the amendments made by section 403(a).

Subsection (d) of section 403 provides that this section shall be effective upon enactment.

Section 404

This section clarifies congressional intent with respect to section 1820, title 38, United States Code, by expressly stating that clause (1) of that section shall not be construed as permitting any suits against the Administrator, the Veterans' Administration, or a Veterans' Administration employee, for the purpose of garnishment or attachment of a Veterans' Administration employee's wages or salary.

CONCLUSION

Mr. CRANSTON. Mr. President, in closing, I want to express my appreciation to the chairman of the Subcommittee on Compensation and Pension, the Senator from Georgia (Mr. TALMADGE), for his excellent work in the development of this legislation and the conduct of hearings on the VA's compensation and DIC programs, and to pay tribute to all members of the Committee on Veterans' Affairs for their bipartisan support of this measure. I also wish to thank Senator TALMADGE's assistant, Bobby Avery, and the committee staff members Mary Sears, Jon Steinberg, Ed Scott, Jim MacRae, and Harold Carter for their hard and effective work.

Mr. STAFFORD. Mr. President, H.R. 1862 is similar to S. 1703, the Veterans Disability Compensation and Survivor Benefits Act of 1977, cosponsored by all the members of our Senate Committee on Veterans' Affairs. As cosponsors we strongly support the compensation bill before us today.

Our Subcommittee on Compensation and Pension conducted lengthy hearings, receiving testimony from representatives of the Veterans' Administration, the American Legion, the Disabled American Veterans, the Veterans of Foreign Wars, AMVETS, the Veterans of World War I, the Paralyzed Veterans of America, the Blinded Veterans Association, the Society of Military Widows, and the Non-Commissioned Officers Association.

The purpose of the disability compensation program now and throughout its history has been to provide relief for the impaired earning capacity of veterans disabled as a result of their military service. The amount payable varies according to the degree of disability. Additional compensation for dependents is payable to any veteran entitled to basic compensation for disability rated at not less than 50 percent.

The bill before us today would provide a 6.6-percent cost-of-living increase for disabled veterans in basic compensation rates and in the rates payable for more serious disabilities. The bill provides a 6.6-percent increase in the additional allowances for spouses, children, and dependent parents paid to veterans rated 50 percent disabled or more. It also provides a 6.6-percent increase in dependency and indemnity compensation, DIC, benefits payable to surviving spouses of veterans whose deaths were service connected. including the additional allowances payable for dependent children and to those in need of aid and attendance. The bill provides a 6.6-percent increase in benefits payable to the children of veterans whose deaths were service connected, when there is no surviving spouse.

The bill would provide a 6.6-percent increase in benefits payable to surviving children who have become permanently incapable of self-support prior to age 18. Also provided is a 6.6-percent increase in the annual clothing allowance paid to certain seriously disabled veterans whose disability tends to tear and wear out their clothing.

The 94th Congress required the Administration of Veterans' Affairs to conduct a study to determine whether prior amputation of an extremity influences the subsequent development of cardiovascular disorders. Provision is made in the bill before us for a needed extension of time for the proper completion of this study. The time such study will be due under our bill will be February 28, 1979.

I would specifically call to the attention of our colleagues another worthwhile extension of existing law in the eligibility for specifically adapted housing grants to permanently and totally service-connected veterans with certain severe disabilities. The general program began in 1948 when veterans whose permanent and total service-connected disability was the result of spinal cord disease or injury with paralysis of the legs and lower part of the body. Eligibility for specially adapted housing grants, consisting of 50 percent of the total cost to the veteran of a home with special adaptations not to exceed $10,000 was started in 1948. The present maximum is $25,000.

Provision is made in the bill before us to help those permanently and totally disabled veterans otherwise eligible who must wear a prosthesis or a brace but who periodically must remove it on the basis of medical advice, and who are then forced to move about in their homes on crutches or a wheelchair, to acquire specially adapted housing.

H.R. 1862 as amended by our committee authorizes the Veterans' Administration to cooperate with the Department of the Treasury so that benefit payments would be automatically deposited in a recipient's account if the recipient elects payment in this manner.

Our bill also would require for any month in which the first of the month falls on a Saturday, Sunday, or legal public holiday, the Veterans' Administration to mail or otherwise transmit benefit payments so that they arrive, to the maximum extent practicable, on the

weekday, other than Saturday, immediately preceding the holiday.

Your Committee on Veterans' Affairs, and this member in particular, believe all of the mentioned improvements for better service to veterans are important and should be enacted. The Veterans' Administration disability compensation program provides income for 2,245,116 veterans who have service-connected disabilities. This number is composed of disabled veterans of recent wars and conflicts as follows: 46,200 are disabled World War I veterans; 1,272,200 World War II veterans; 239,500 Korean conflict veterans; 448,700 Vietnam-era veterans.

It is important that the United States continue to provide an adequate compensation program for our veterans and their survivors. This has been the goal of our committee's considerations and recommendations. We urge your support of the bill now before this body.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–412), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT

INTRODUCTION

The Subcommittee on Compensation and Pension, chaired by Senator Herman E. Talmadge, conducted a hearing on June 21, 1977, to review the Veterans' Administration's service-connected disability compensation and dependency and indemnity compensation programs. The hearing also examined pending legislation, including Senator Talmadge's bill, S. 1703, the Veterans Disability Compensation and Survivor Benefits Act of 1977, cosponsored by all the Members of the Committee on Veterans' Affairs.

The Subcommittee received testimony in person or by submission from representatives of the Veterans' Administration, the American Legion, the Disabled American Veterans, the Veterans of Foreign Wars, AMVETS, the Veterans of World War I, the Paralyzed Veterans of America, the Blinded Veterans Association, the Society of Military Widows, and the Non Commissioned Officers Association.

By agreement of the Subcommittee on Compensation and Pension, H.R. 1862 was sent to the full Committee for consideration. The full Committee on Veterans' Affairs met on July 15, 1977, amended, unanimously approved, and ordered favorably reported to the Senate H.R. 1862 with an amendment in the nature of a substitute.

Subsequently, on July 22, 1977, the Committee, based on revised Consumer Price Index estimates received in a letter dated July 20, 1977, from the Director of the Congressional Budget Office, revised the rate increase upward from 6.3 percent to 6.6 percent; also, the Committee added two amendments, items (10) and (11) under "Summary of H.R. 1862 As Reported," immediately below. In addition, the Committee by poll subsequently made further modifications in the text of the bill as ordered to be reported.

SUMMARY OF H.R. 1862 AS REPORTED

The basic provisions of the Veterans Disability Compensation and Survivor Benefits Act of 1977 would:

(1) Provide a 6.6-percent cost-of-living increase for disabled veterans in basic compensation rates and in the rates payable for more serious disabilities;

(2) Provide a 6.6-percent increase in the additional allowances for spouses, children, and dependent parents paid to veterans rated 50-percent disabled or more;

(3) Provide a 6.6-percent increase in dependency and indemnity compensation (DIC) benefits payable to surviving spouses of veterans whose deaths were service-connected, including the additional allowances payable for dependent children and to those in need of aid and attendance;

(4) Provide a 6.6-percent increase in benefits payable to the children of veterans whose deaths were service-connected, when there is no surviving spouse;

(5) Provide a 6.6-percent increase in benefits payable to surviving children who have become permanently incapable of self-support prior to the age of 18;

(6) Increase (by 6.6 percent) from $190 to $203 the annual clothing allowance paid to certain seriously disabled veterans whose disability tends to tear or wear out their clothing;

(7) Extend to February 28, 1979, the date for submission to Congress of the study mandated by Public Law 94–433 on the relationship between amputation and cardiovascular disorders, and clarify other provisions of the study;

(8) Extend eligibility for specially adapted housing grants to permanently and totally service-connected veterans with certain severe disabilities;

(9) Authorize the Veterans' Administration to cooperate with the Department of the Treasury so that benefit payments would be automatically deposited in a recipient's account if the recipient elects payment in this manner;

(10) Require for any month in which the first of the month falls on a Saturday, Sunday, or legal public holiday, the Veterans' Adminstration to mail or otherwise transmit benefit payments so that they arrive, to the maximum extent practicable, on the Friday immediately preceding such Saturday or Sunday, or in the case of a legal public holiday, on the weekday (other than Saturday) immediately preceding the holiday; and

(11) Reaffirm by a clarifying amendment the intent of the Congress not to permit garnishment or attachment of VA employees' salaries except as authorized in § 42 U.S.C. 659 (permitting garnishment for alimony and child support).

COST ESTIMATES

In accordance with section 252(a) of the Legislative Reorganization Act of 1970 (Public Law 91–510, 91st Congress), the Committee, based on information supplied by the Congressional Budget Office, estimates that the 5-year cost resulting from the enactment of the Committee bill would be $359.2 million in fiscal year 1978; $359.8 million in fiscal year 1979; $352.2 million in fiscal year 1980; $352.5 million in fiscal year 1981; and $350.4 million in fiscal year 1982.

savings, as estimated by CBO, over the 5-year period follows:

Congressional Budget Office

Cost estimate

1. Bill number: H.R. 1862 (Senate version).

2. Bill title: Veterans Disability Compen-

A detailed breakdown of costs and cost-sation and Survivor Benefits Act of 1977.

3. Bill status: This bill has been ordered reported by the Senate Committee on Veterans' Affairs.

4. Bill purpose:

This bill would amend title 38, U.S.C. to accomplish the following:

A. To increase by 6.6 percent the rates of disability compensation for veterans, dependency and indemnity compensation (DIC) for survivors, and the clothing allowance for certain disabled veterans.

B. To modify the requirements of the Cardiovascular/Amputation Study.

C. To extend eligibility for specially adapted housing grants to veterans with service-connected loss or loss of use of one upper and one lower extremity who must periodically resort to the use of crutches or a wheelchair.

D. To authorize the payment of a benefit check directly to the bank of the payee upon the written request of the payee (electronic fund transfer).

E. Whenever, the first day of any calendar month falls on a Saturday, Sunday, or legal public holiday, to authorize the mailing (or transmittal to payee's bank) of benefit payments in such a way as to insure that such payments will be received on the Friday immediately preceding such Saturday or Sunday, or on the weekday immediately preceding such legal holiday. This provision will be effective upon enactment.

F. To reaffirm the intent of Congress with respect to permissible garnishment of a VA employee's salary. This provision will be effective upon enactment.

Except where otherwise specified, all provisions will be effective October 1, 1977.

5. Cost estimate:

[In millions of dollars]

	Fiscal year—				
	1978	1979	1980	1981	1982
A. Rate increase	344.5	345.4	345.9	346.4	346.9
B. Cardiovascular—amputation study	[1].2				
C. Specially adapted housing	15.3	15.4	7.6	7.7	5.3
D. Electronic fund transfer:					
Cost to VA	.5	.7	.9	1.0	1.2
Savings to Treasury	−1.3	−1.7	−2.2	−2.6	−3.0
Net savings	−.8	−1.0	−1.3	−1.6	−1.8
E. Early check mailing	[2]	[2]	[2]	[2]	[2]
F. Garnishment	[2]	[2]	[2]	[2]	[2]
Total	359.2	359.8	352.2	352.5	350.4

[1] Costs quoted by contractor for study: Fiscal year 1977—$23,600; fiscal year 1978—$154,100.
[2] Less than $100,000.

6. Basis for estimate:

A. The cost of the increase for disability compensation is estimated by multiplying the number of veterans at each disability rating level by the increase in the payment rate for that level. The number of DIC recipients in each service grade category were multiplied by the increase in payment for the category to estimate the cost of the increase in DIC rates.

B. The figure shown for the Cardiovascular/Amputation Study is the cost estimate submitted by the contractor.

C. The cost estimate for the specially adapted housing provision is based on an interpretation by the VA that the only cases which would be affected by this provision would be those veterans with a service-connected loss or loss of use of one upper and one lower extremity. It is assumed that 85 percent of such veterans would be advised to remove their prostheses periodically and would, therefore, qualify for the grant.

D. The estimate of the costs and savings which would result from the electronic fund transfer of benefit payments is based on information obtained from the VA. The savings which will accrue to the Treasury Department are a result of decreased postage and handling costs. The cost to the VA is a result of having to mail separately certain notices to beneficiaries which are ordinarily mailed with the benefit check. A 15 percent participation rate is expected in the first year, gradually increasing to a maximum participation of 40 percent in 1982.

E. and F. There would be a minor cost associated with the early check mailing provision as a result of overtime pay. However,

this should be offset by the savings which would result from the clarification of the garnishment provision.

7. Estimate comparison: Not available.

8. Previous CBO estimate: H.R. 1862 as passed by the House contained only a 6 percent rate increase for compensation. CBO submitted a cost estimate of $312.5 million in fiscal year 1978 for this amendment on May 12, 1977. The bill has been revised in its entirety by the Senate.

9. Estimate prepared by: K. W. Shepherd (225–7766).

10. Estimate approved by:

C. G. NUCKOLS,
(For James L. Blum, *Assistant Director for Budget Analysis*).

REGULATORY IMPACT STATEMENT

In compliance with paragraph 5 of rule XXIX of the Standing Rules of the Senate, the Committee on Veterans' Affairs has made an evaluation of the regulatory impact which would be incurred in carrying out the provisions of the bill as reported. The results of that evaluation are described below.

The basic provisions of the Veterans Disability Compensation and Survivor Benefits Act of 1977 would:

(1) Provide a 6.6-percent cost-of-living increase for disabled veterans in basic compensation rates and in the rates payable for more serious disabilities;

(2) Provide a 6.6-percent increase in the additional allowances for spouses, children, and dependent parents paid to veterans rated 50-percent disabled or more;

(3) Provide a 6.6-percent increase in dependency and indemnity compensation (DIC) benefits payable to surviving spouses of veterans whose deaths were service-connected, including the additional allowances payable for dependent children and to those in need of aid and attendance;

(4) Provide a 6.6-percent increase in benefits payable to the children of veterans whose deaths were service-connected, when there is no surviving spouse;

(5) Provide a 6.6-percent increase in benefits payable to surviving children who have become permanently incapable of self-support prior to the age of 18;

(6) Increase (by 6.6-percent) from $190 to $203 the annual clothing allowance paid to certain seriously disabled veterans whose disability tends to tear or wear out their clothing;

(7) Extend to February 28, 1979, the date for submission to Congress of the study mandated by Public Law 94–433 on the relationship between amputation and cardiovascular disorders, and clarify other provisions of the study;

(8) Extend eligibility for specially adapted housing grants to permanently and totally service-connected veterans with certain severe disabilities;

(9) Authorize the Veterans' Administration to cooperate with the Department of the Treasury so that benefit payments would be automatically deposited in a recipient's account if the recipient elects payment in this manner;

(10) Require, for any month in which the first of the month falls on a Saturday, Sunday, or legal public holiday, the Veterans' Administration to mail or otherwise transmit benefit payments so that they arrive, to the maximum extent practicable, on the Friday immediately preceding such Saturday or Sunday, or in the case of a legal public holiday, on the weekday (other than Saturday) immediately preceding the holiday; and

(11) Reaffirm by a clarifying amendment the intent of the Congress not to permit garnishment or attachment of VA employees' salaries except as authorized in § 42 U.S.C. 659 (permitting garnishment for alimony and child support).

In view of the nature of the provisions contained in the Committee bill, its regulatory impact may be expected to be minimal.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may move to reconsider en bloc the vote by which the four measures were passed.

The ACTING PRESIDENT pro tempore. Without objection, the motion is in order.

The question is on agreeing to the motion.

Mr. ROBERT C. BYRD. I make that motion.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have no further time.

FAREWELL TO "THE KING"

Mr. BAKER. Mr. President, when Elvis Presley died August 16, in Memphis, Tenn., at the age of 42, there was an outpouring of shock, grief, and sympathy from all over the world.

Thousands traveled to Tennessee to pay their respects in person to the man his fans called, simply, "the King." Hundreds of thousands more sent flowers, telegrams and letters to the family.

Mr. Presley's incredible career began in Memphis in 1953, when he made his first record, paying $4 to make a demonstration record for his beloved mother at Sun Record Co.'s studio.

He went on to record more than 100 songs, with 55 of them selling at least 1 million copies. It has been reported that more than 500 million Elvis Presley records have been sold.

He also made 31 movies, every one of them a success at the box office. His personal appearances brought his music to many. Variety magazine has recently estimated that Mr. Presley earned a gross income of $4.3 billion from recordings, movies and personal appearances during his lifetime. Of course, the worth of a man cannot be measured in money, but this phenomenal figure indicates the degree to which Mr. Presley engaged the emotions of the young during the 1950's, and kept their loyalty throughout his 23-year career.

Always, despite success and acclaim, Elvis Presley lived quietly at his home, Graceland, named for his mother, and was rarely seen in public. His generosity within his community is legend.

There were a number of beautifully written articles, published, of course, after the sudden passing of this remarkable young man. I have here a small sample of the editorial comment that appeared in Tennessee newspapers, and I ask unanimous consent, Mr. President, that they be printed in the RECORD at the conclusion of my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Commercial Appeal, Aug. 17, 1977]

ELVIS WENT FROM RAGS TO RICHES

(By William Thomas)

He was born in a two-room house in Tupelo, Miss., on Jan. 8, 1935, a nobody with a somebody destiny.

He was the twin who lived—the son of Vernon and Gladys Presley, who had been married two years earlier in Verona, Miss., amidst the Great Depression.

"We matched their names," his mother recalled later, "Jesse Garon and Elvis Aron, Jesse died at birth. Maybe that is why Elvis is so dear to us."

For the next 13 years, the Presleys struggled for survival in Mississippi. Vernon Presley farmed while his wife toiled in shirt and dress factories. They moved to Memphis in 1948, but things didn't get better—at least not right away.

Mrs. Presley worked as a nurses' aide at St. Joseph Hospital. Elvis enrolled in L.O. Humes High School and worked as an usher in a movie theater.

Briefly, he went out for the football team but had to quit in order to go to work.

Although the family was so poor that they had to accept a charity Christmas basket during the holidays, Presley managed to graduate from high school in 1953 and land a job as a truck driver at $35 a week.

By then, however, he had developed a solid if unorthodox musical background that was to take him from zero to infinity before he was 25.

"When Elvis was just a little fellow," Mrs. Presley once told an interviewer, "he would slide off my lap in church, run down the aisle, and scramble up to the platform. He would stand looking at the choir and try to sing with them. He was too little to know the words, but he could carry the tune."

Actually, all of the Presleys had a sense of music about them. Elvis and his parents appeared as a singing trio at camp meetings, revivals and church conventions. And it was Vernon Presley who purchased his son's first guitar for $12.95.

Elvis' incredible career began, slowly at first, in the summer of 1953 after he'd graduated from Humes. One day, he simply dropped into the recording studio of Sun Record Co. and paid $4 to cut a record. Afterward, he took the record home and played it again and again.

A year later, he went back to Sun and made another record, "That's All Right, Mama," which was cut for the company rather than himself. Although it wasn't a hit, it attracted a certain amount of attention from listeners who detected something new—a blend of hillbilly and rock and roll.

Then came a night in July, 1954, when Memphis disk jockeys began playing a new version of a bluegrass classic, "Blue Moon of Kentucky," which was the next record Elvis had recorded for Sun.

Elvis was 19. The record was going, locally, at least.

Sam Phillips, who'd also recorded such people as Jerry Lee Lewis, Charlie Rich, Johnny Cash and Carl Perkins, found himself scrambling to catch up with a 6,000 back order that hit him before the number was released outside Memphis.

Sun brought out two more Elvis numbers, "I Don't Care," and "Milk Cow Blues Boogie," before Phillips sold his contract to the star-makers.

At the time, Elvis was a surprisingly low-key musician who didn't smoke, didn't drink, and, because of the influence of his mother, possessed a strong religious streak that contrasted sharply later when he began to gyrate.

A strikingly handsome youth with blue-black hair, a sensuous smile and plenty of sex appeal, all of it in motion, he began to move when Col. Tom Parker took over his management.

Parker, a show business genius with all the subtlety of P. T. Barnum, put Presley on tour as "The Hillbilly Cat." He started out in the rural areas, but the territory got better and better.

The gyrations that earned him the name, "Elvis, the Pelvis," were so stout that when he appeared on the Ed Sullivan Show, the cameras never dropped below his waist. No matter. Everybody knew the movement by then, anyway, and it was a national debate.

Although there was never any doubt that sex had a great deal to do with Elvis' success, he often acted like he didn't know what everybody was so shook up about.

"Momma," he once asked his mother, "you think I'm vulgar on the stage?"

Said she, "You're not vulgar, but you're putting too much into your singing. Keep that up and you won't live to be 30."

Actually, Elvis seemed to have been in good shape up until recent years when he was plagued by a weight problem.

It was in 1957 that he went to Hollywood to make his first film, "Love Me Tender." The critics bombed it, but the girls lined up outside theaters all across the country and it grossed between five and six times what it cost to make.

He appeared in 25 films, none of them critical successes,

A year after he became a movie star, Elvis' mother, who had taught her son Bible lessons, died. Ironically, she was the same age Elvis was—42—when he died yesterday.

At the time of his mother's death, Elvis was in Fort Hood, Texas, where he was stationed as an Army private.

By then, he was such a national figure that the nation's bobby-soxers reacted to his entry into the Army (and out of circulation) as something close to a tragedy of earthquake proportions.

Incredibly, the Army didn't slow him down as a money-maker. Although his military pay was $99.37 a month, Parker managed his music and affairs so shrewdly that Elvis grossed about $2 million a year for the two years he was in the service.

Presley spent most of his hitch in West Germany, where he first met Priscilla Beaulieu, the daughter of an Air Force colonel. The courtship lasted seven or eight years. Elvis married her in Las Vegas in 1967 and their daughter, Lisa Marie, was born Feb 1, 1968, in Memphis.

The marriage lasted six years, during which few details of their lives together got out. The fan magazines, however, were full of reports of marital trouble. Finally, the couple separated in February, 1973, and were divorced in Santa Monica, Calif., later that year. As a settlement, Priscilla got more than $1.5 million.

A lot of Presley's comfort was enjoyed at Graceland, the 18-room mansion in Whitehaven that Elvis bought in 1957. Writers of the Elvis myth called it a million-dollar mansion, but, in reality, it cost the musician a mere $100,000 when he purchased it.

In the 20 years that Elvis has owned the house, it has become one of the city's biggest tourist attractions. At first, one used to see only young people gathered around the musical-note gates waiting for a glimpse of the man many of them called "the King."

Later, however, as Elvis and his fans aged together, the crowds grew older and it was not unusual for there to be two generations—mothers and daughters—talking to Vernon Presley, who often manned the guardhouse at the gate, or squinting through the trees, toward the house, straining for a sight of anything that might be the singer.

Although he rarely drove, Presley had a passion for automobiles. He collected Cadillacs like other people collect pieces of Scotch tape—they stuck to him in multiples.

And, one of the things he was famous for, was giving the things away to anyone who happened to be in the right place at the right time.

To thousands of Memphis residents, Elvis was a generous man who remembered his own hard years—especially the charity Christmas basket—and gave back much more than he ever took.

One thing there was never any doubt about—that Elvis was a Memphian and he continued to be one long after he could have settled down anywhere in the world.

However, he was rarely seen in the city where he chose to live when he wasn't off making movies, making music, or making money.

If Elvis was invisible in private life, then he was just the opposite when he was on stage.

But in the end it wasn't the dazzling success that moved people in his hometown.

As soon as she heard the news of his death, a fan rushed down to a record store to buy two Elvis albums and take them the home and play them.

"It's the only thing I could think of to do," she said. "And you know what? Nearly everyone in the store was crying."

And that's how you tell when nobody has become somebody.

[From the Memphis Press-Scimitar, Aug. 17, 1977]

ELVIS PRESLEY

Just a quarter-century ago, no one had ever heard of Elvis Presley, save his classmates at Humes High School. They knew him as an ordinary, awkward country boy, moved here recently with his parents from Tupelo, Miss.

Yesterday, when Presley died, he was probably the world's best known entertainer. His records sold in the millions. His motion pictures were shown in theaters all over the world. His public performances were always sell-outs.

It was a good life the country boy built for himself—a glamorous life. He had everything anyone could want. Money, friends, and legions of worshipful admirers.

Yet the Presley candle that had glowed so brilliantly burned out just 22 years after he made his first record in Memphis.

But the big question remains: What was the Presley secret, what ingredient of life did he possess that was denied to others?

For the answer, we turn to a *Press-Scimitar* clipping of 1957. It quotes a description of the Presley charm by a Pittsburgh, Pa., girl. It reads as follows:

"First of all, may I say that if I knew exactly what it is that Elvis has, I'd bottle it and make a million dollars. It isn't one thing, it's everything. There are many singers who have a good voice, a good personality and good looks, but none has that electricity about voice, looks and personality that Elvis has.

"So you take this electricity, combine it with sweetness, sideburns, a Southern accent, and a smile that is the most devastating thing since the atom bomb. You sprinkle all this liberally with musical and dramatic talent.

"You pour this mixture into a form capable of style, magnetism and excitement which is unbelievable. You bring this form to life with love—his love for his fans and theirs for him—and you have Elvis."

So much for Presley as one admirer saw him.

In Memphis, we saw him as a good, well-behaved citizen. He was known for his generosity, not only for the expensive cars he gave away to friends and sometimes strangers, but for his generous contributions to numerous charities.

Death struck unexpectedly yesterday. Thus ended a glamorous career underscored by the sustained admiration of fans throughout the world.

But in Presley's life his most abiding love was for his mother. She, too, died at age 42.

[From the Tennessean, Aug. 18, 1977]

ELVIS: THE KING IS DEAD

The death of Mr. Elvis Presley was a sudden and shocking event and it removed an entertainer who was exceptional and unique.

He had rocketed from driving a truck to being one of the world's best known entertainers. In the 1950s, he simply dominated the field and almost any record of his turned to gold.

It is difficult to gauge the musical influence that he had. He didn't invent rock and roll, but he made it roll with songs like "Heartbreak Hotel," recorded at the RCA studios here.

The Beatles were influenced by his style and so were any number of others, such as British singer Tom Jones, who at least picked up his gyrations for live performances. But until the Beatles came along with a new sound and created a new craze, Mr. Presley was king.

Whatever else may be said of his talent, timing had something to do with his success. He burst on the music scene when the big band sounds of the pre-war years were quietly fading away and when Mr. Frank Sinatra, the idol of the bobbysoxers of the war years, seemed to have lost his magic.

Something new and different was what the industry talked about and, suddenly, Elvis Presley was it. The gyrating, hard-driving trucker captivated the nation's young—at least the female portion—and pop music had a new king.

There were those who predicted that his vitality and reckless burning of energy would flame out early. But if the Beatles got the teenagers, Mr. Presley kept the audience and the fans of the '50s into the 1960s and the 1970s.

Thanks to the canny management of Col. Tom Parker, Mr. Presley was never "overexposed" even though he made movies by the dozen. He could still pack them in at age 42, although there were those who thought that age and success had taken something from him.

Perhaps they did. Those who knew him well talked of his restlessness, his poor health and his emotional insecurity. Perhaps only he knew the price he paid for fame and fortune, but he gave his fans their money's worth and a lot of happy memories—as Mr. Kris Kristofferson put it, "For the Good Times."

TRIBUTE TO GOV. ALF LANDON ON HIS 90TH BIRTHDAY

Mr. BAKER. Mr. President, I am pleased now to yield such of my remaining time under the standing order as he may require to the distinguished Senator from Kansas.

. Mr. DOLE. Mr. President, I send a resolution to the desk for myself and my distinguished colleague (Mr. PEARSON) and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 259) paying tribute to Governor Alf Landon on the occasion of his 90th birthday.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. ROBERT C. BYRD. Reserving the right to object, the distinguished Senator from Kansas has cleared this resolu-

tion on the majority side and there is no objection. We commend him for his thoughtfulness in offering the resolution. We are glad to support it and to add our commendations to the distinguished American whose birthday is recognized and commemorated by the contents of the resolution.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, the senior Senator from Kansas and I join in offering a resolution honoring Alf Landon, former Kansas Governor and 1936 Republican nominee for President, on the occasion of his 90 birthday.

Governor Landon occupies a fond place in the hearts of those of us who know him. Although he has a firm foothold in American political history of another period, he is ever ready to comment on current affairs with an expertise and sensibility that reveal his unique position as the grand old man of the GOP. His exuberance has led an army of politicians, labor leaders, reporters, and academicians seeking advice and counsel to his west Topeka home over the last 40 years.

AN AFFABLE OLD RADICAL

A Kansas newspaper editor once called him an "affable old radical," a description that is not disagreeable to a man who has always been ahead of his time. The Governor has always been a commonsense, yet unorthodox, sort of progressive. As early as 1936, Mr. Landon was reminding Americans of the evils of inflation and was pointing to the dangers of uncontrolled Government growth. In view of our present day concerns, it seems that he was ahead of his times. His own record of fiscal integrity and balanced budgets during his tenure as Governor of Kansas would be the envy of any contemporary President.

Indeed, it seems to have taken 40 years for many of his ideas to come into their own, but the issues he was addressing in the midthirties, and continues to address, are the issues which we are now hearing a great deal about. An advocate of détente in the 1950's, Governor Landon indicated that he was for it "as long as we are not foolish about it."

The Governor's 90th birthday finds him still active, still riding his horses, still making lively comments on issues and concerns of our day, and still tending to his business affairs.

THE 1936 REPUBLICAN NOMINEE

Governor Landon will always be remembered as the man who carried only Maine and Vermont in the 1936 Presidential election. No doubt, his good-natured reaction to his loss has endeared Alf to the hundreds of people who have sought his advice or his interview through the years. But after knowing the Governor, and listening to his views, you know that even if he had not been the 1936 nominee, he would still attract the attention of those who now revere him for his good advice and solid perspective of events both past and present.

The personal qualities of the affable old gentleman are readily apparent to all who visit with him. Like Truman of Independence and Eisenhower of Abilene, he radiates a plain-speaking Midwestern decency that is heartening these days.

Alf Landon has a number of other outstanding qualities that, due to the constraints here, we have not fully discussed. Over the years, he held the respect and the attention of his party and the American people as a source of wise and venerated political leadership. Before his involvement in politics and since, Alf Landon has been a successful businessman. He has contributed much to the development and education of young people. There is a great deal more we could talk about, as indeed there are many articles and publications about his achievements.

Mr. President, I ask unanimous consent that two articles, one from the Wichita Eagle of September 4, 1977, and one from yesterday's Topeka Capitol be printed in the RECORD.

I urge the adoption of our resolution.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

ALF AT 90, THE YEARS CAN'T SLOW KANSAS' LANDON

(By Al Polczinski)

Tall white columns on the portico of his Topeka home dwarfed Alfred M. Landon as he stood there waiting. Arms akimbo, smiling, he looked younger than the 90 years he will reach Friday.

If it's a formula for a long life you want, Landon said, his is keeping the mind and body exercised.

"Try to do something or learn something new and interesting every day."

Turning 90 is a milestone the Republican statesman says he might not have reached had he been elected president in 1936.

"There's no question but what four years as president takes something out of a man. Eight years takes even more."

Franklin Delano Roosevelt, the Democrat who beat him in that Depression-era election, served 12 years and three months before he died in office in 1945. He was 63.

Landon, a two-term governor of Kansas before he ran for president, still is an active independent oil producer and owns four radio stations.

Friends from across the state will help him celebrate his birthday Friday in Manhattan, where Agriculture Secretary Bob Bergland will join them as the 37th speaker in the Landon Lecture Series at Kansas State University.

Messages wishing him well are certain to come from widely scattered points on the globe.

After his devastating defeat in 1936—Landon won only the eight electoral votes of Maine and Vermont to Roosevelt's 523—no one would have given any but the longest odds on Landon's remaining a national figure.

But he did.

As national crises and elections came and went, Landon's views and analyses were sought by newsmen as far away as London and Bombay.

Candidates or their campaign leaders often included Topeka on their itineraries when they were near Kansas.

Landon's opinions have reached presidents of both parties through direct calls or through cabinet members or national party leaders.

To say that Landon has enjoyed his elder statesman role would be a great understatement.

His interest in politics, global as much as national, is one of the keys to his longevity. It is a major part of his daily diet.

It isn't easy to label Landon's political philosophy. He broke into politics as a Teddy Roosevelt Progressive.

In 1936, he was unknown to most Americans. Those who thought they did know something about the man mistakenly regarded him as another Herbert Hoover chip off the Old Guard Republican block.

His fiscal views tend to be conservative. The hallmark of his years as the state's chief executive was the cash basis law, a restriction that kept local governments from spending more than they had in the bank.

Landon applies the same principle to his personal finances. He doesn't own a single credit card.

"I've said before that credit cards are the worst thing that happened to our country," he said. "I still think so. They encourage people to spend money they don't have."

But he also has advocated such liberal causes as Social Security, Medicare, rent subsidies and welfare for the truly poor and needy.

Leave it to Landon and he will pick the label "Populist Republican." As such, he finds much common ground with the current White House resident, who was elected as a Populist Democrat.

"On the broad outline (a favorite expression), President Carter is following the domestic policies of President Ford and the foreign policies of Secretary (of State) Kissinger."

Here is where hardshelled conservatives part company with Landon.

Carter, like Presidents Ford and Nixon before him, is seeking to normalize relations with the People's Republic of China. Landon has advocated that approach for more than a decade.

In 1969, he nudged the Nixon administration closer to that decision, saying:

"Mere establishing of diplomatic relations with China is only the beginning of a realistic change in the American concept that Communists are straight from hell and that the Chinese are double-damned."

Carter, like Ford, is eager to have a new Panama Canal treaty ratified. The one recently negotiated relinquishes U.S. control of canal operations by the year 2000.

Landon's support for such a move goes back many years. He recalls Sen. Barry Goldwater, the GOP presidential nominee in 1964, asking his opinion on the treaty question two years ago.

"I told him then that it would be popular with all the countries of the western hemisphere, but how long it would be remembered is doubtful."

But long before that, in the 1940s, he supported a move to internationalize the Panama Canal and the Suez Canal.

Landon sees U.S. withdrawal from Panama as inevitable, based on the precedent he believes England set when it walked away from the Suez Canal.

That Americans in 1936 failed to get the true picture of Landon was relayed to him recently by Robert Hardesty, one of President Lyndon Johnson's speechwriters.

Hardesty told Landon of another White House staff member who remembered passing through Kansas one day with President Johnson. Naturally, Landon's name came up in their conversation.

Johnson was quoted as saying:

"I always thought very highly of Alf Landon. But he came along at the wrong time.

"Despite the popular image, he was a man of the people. Nobody knew that, however, because the Roosevelt people did a real haircut job on him."

Landon, in any event, survived. He didn't move into the White House, but he built his own. He probably could have gone to Washington a short time later as a U.S. senator.

But Landon and his wife, Theo, chose life in Kansas instead.

Landon's day generally begins at 6 a.m. give or take 15 minutes. After pulling on some old clothes, he will jog the 100 yards or so from his house to Westchester Road to pick up the morning paper at the road's edge.

Back at the house, he will retire to his favorite chair in the study for a thorough reading of the news. Once abreast of the latest occurrences, he is ready for a trail ride with Red, a Morgan horse he says "is as old, comparatively, as I am."

At his age, Landon admits he's no John Wayne when it comes to swinging into the saddle.

"Crawling into it is more like it."

But any time the weather and old Red cooperate, Landon will ride over the green hills on his 34-acre estate for an hour or more.

At times, Red will be less than cooperative. Apparently, a bit of Landon's independent streak has rubbed off.

This particular day, Red was waiting in the barn. For this he was rewarded with a small bucket of ripe crabapples Landon had gathered on the path to the barn.

As he gave the horse a quick once over with a currycomb, Landon explained that he had got the Morgan because the breed was "built lower to the ground . . . This way, if I fall. I won't have so far to fall."

Once Red is back in the barn and cared for, Landon will head for one of two favorite luncheon spots—either Tommy's, nearby on 6th Avenue, or a windowside table at the Topeka Club, across the street from the state capitol.

Or he may stop at his office at radio station WREN to check on business interests and any correspondence that needs his attention.

He also has radio stations in Liberal, Dodge City and Fort Collins, Colo., his newest acquisition.

And there are his 47 oil wells, "mostly old ones," in Greenwood County.

Returning home, he probably will take a nap before dinner. If there are no evening guests, he may spend much of the time reading in his study, where a large oil painting of him as governor dominates the room from above the fireplace.

This is where he leads an evening partner for one of his frequent political bull sessions. There is nothing Landon enjoys more than a lively discussion of current events—unless it might be the excitement of bringing in a new oil well or radio station.

But his visitor had better come prepared to contribute as much as he receives. Landon is full of questions and mental tests, and he rewards any guest by being as good a listener as he is a talker.

Sometimes, when trying to fashion a well-reasoned argument, a particular name, date or place resists recall. Then he will cock his head back and to one side and make a circle of his lips as he strains to retrieve the elusive fact from one of his cerebral filing cabinets.

When his cranial computer fixes on the truant information, he will lean forward in his chair, the corners of his mouth will turn up and the eyes in his pixie face will sparkle as he scores his point.

Only then will he notice that a pipe he tries to keep lit has grown cold again.

It takes but a few minutes to realize that Kansas has been good to the Landons. Kansas, in turn, has been enriched by the Landon presence.

Several years ago, when a sciatic nerve in his right leg flared up during a bout with the flu and restricted his activity, Landon said his goal was to live to be 90.

Landon, still hardy with 90 in sight, has set a higher goal. But this one illustrates his conservative side.

"I just hope we're both here on the front porch a year from now reviewing current events."

He still isn't willing to spend what he has no right to expect.

LANDON AT 90: STILL IN THE LIMELIGHT

(By Lew Ferguson)

Alf Landon warmly greeted the young man who had just stepped from his dented old car after pulling up the long driveway to Landon's big white house.

"Where are you from?" Landon asked.

"I'm from Virginia. I'm a history nut, and a good Republican," the visitor said.

"Well, I'm glad to see you. It was mighty nice of you to drop by."

The young man asked to pose with Landon for pictures, thanked him profusely and departed.

The scene, repeated several times a year with variations, perhaps best tells the story of Alfred Mossman Landon today.

"He'll stop anything and talk to a school youngster who wants to do a story on him," said Theo Cobb Landon, his wife for 47 years.

"I guess that's why he's lived to be 90, I think it's because he keeps busy and he's so interested in people."

Alf Landon is 90 on Friday, still active in business, still eager to discuss politics, the economy or sports, and still riding Red, his aging horse and companion, several miles up the Kansas River each day that weather and business permit.

He's still the confidante of presidents, too. He's proud of the fact he's received personal notes from every President since Franklin D. Roosevelt.

"There's been no slowdown for the last 10 years, that's for sure," said Mrs. Landon, who recently abandoned her year-long fight to get him to quit smoking cigarettes.

It became Landon's trademark, even before he ran for president in 1936 against Roosevelt, to bum cigarettes from those he met.

Mrs. Landon tolerated his mooching cigarettes, but she didn't want him smoking them.

Landon went to the doctor this summer at Mrs. Landon's insistence, preparatory to a vacation trip to Colorado.

"He came out of the doctor's office," and said, "The doctor said I'm fine, and I can do anything I want to do," Mrs. Landon related.

"I said, well, what else could he say? You'd do what you want to do anyway. So, I let up on the cigarettes. Why fuss with him when it doesn't do any good?

"He said the other day, you know, I think I'll live to be 100." I said, "Well, I never doubted that you probably would. But you're going to have to find somebody else to give you birthday parties."

Mrs. Landon is putting on a private party for about 20 family members Friday evening, after she and the one-time Kansas governor travel to Manhattan for an address by U.S. Agriculture Secretary Bob Bergland in the lecture series named for Landon at Kansas State University.

Kansas State officials are planning some extra special touches on the occasion of Landon's 90th birthday. And, Landon Junior High School here held a party for him.

Landon admits his goal was to reach 90. He professes no similar ambition to reach 100, however.

"Let's make it year by year now," he said.

But in the next breath, he added, "there are such exciting prospects ahead, in all aspects of life."

With his keen interest in everything from the state of the world to how the Kansas Jayhawks will do in the upcoming football season, few can doubt Landon's enthusiasm for life may well sustain him to the century mark.

Landon, who reached normal retirement age a quarter of a century ago, still is active in the oil business and is the final stages of launching a new FM radio station at Fort Collins, Colo. It is his fifth station, with others located in Topeka, Dodge City, and Liberal, and an AM station in Fort Collins.

"He's always pushing," Mrs. Landon said. "He stewed all evening whether the broadcast test on the new station would work. He's always worrying about solving everyone's problems."

Landon has always had a keen business eye, especially in oil exploration. Right now, he's closely watching efforts to recover natural gas from shale in central Kansas, a prospect heretofore considered unfeasible.

"They must know something we don't know", Landon said of a current effort to pipe gas out of the area.

Landon never has been short on political opinions, and he offered these during a wide-ranging interview:

Foreign policy: He supports President Carter on the proposed Panama Canal treaty and in pressuring Russia to observe human rights. "We're not giving the Panama Canal away; we're sharing it with Panama," he said. "The canal has limited value today in peace or war, compared to when it first was built. I may not agree with all the details, but so what? It's the goal that counts."

Imperialism: "Russia is making the same mistake as many nations before her, trying to maintain control over her satellites. They create an economic drain that can't be sustained forever."

Energy: He supports President Carter's conservation policy "to eliminate waste, because it's in the interest of the people of the world."

State of his Republican Party: Recent GOP triumphs in elections to fill congressional vacancies, and criticism of some of Carter's policies by Democrats indicates things are not as bleak as some Republicans think. And, he cautions, "When you get down to one-party government, you have a seedbed for a dictatorship."

1980 policies: It's too early to speculate whether former President Gerald Ford or Ronald Reagan might again be contenders for the GOP nomination. Others to watch, he said, are Sens. Bob Dole of Kansas, and John Danforth of Missouri, and Gov. James Thompson of Illinois.

Landon never sought the Republican nomination in 1936, nor has he ever looked back with bitterness upon his landslide loss to Roosevelt.

"I never went after the nomination as some have in history," he said. "It just built from the grassroots, mainly from some newspaper leaders who had observed what I did as governor of Kansas (1933–37)

Only Oscar Stauffer, chairman of Stauffer Communications Inc. who will be 91 in November, survives of those who first promoted Landon for the presidency more than 40 years ago.

Landon admits he knew well in advance of the 1936 election that Roosevelt could not be beaten, because the time wasn't right. Landon carried only two states, Maine and Vermont.

He feels the United States still is paying the price of Roosevelt's managed economy policy, which is seemingly never-ending inflation. Yet, he's never harbored any bitterness about the outcome in 1936.

Indeed, Landon has cherished his position of influence in public affairs, and the "elder statesman" status accorded him by the Republican Party, which went out of its way to recognize him at its 1972 Miami Beach and 1976 Kansas City conventions.

Landon retired from candidate politics, built the big white house he and Theo have occupied since 1937 on Topeka's northwest edge, and settled down to another 40 years of observing history.

"I was urged to run for the U.S. Senate in 1934, but declined," Landon said. "The truth is I just didn't want to be tied down. A man is tied down when he becomes a candidate whether he likes it or not.

"My whole record shows I was something of a maverick, if you want to call it that.

But I've always been free to act as I wanted. It was my own personal decision. I've never regretted it. I've rather relished my role."

Mr. BAKER. Mr. President, I express my appreciation to the distinguished Senator from Kansas for sponsoring this resolution and calling this important matter and anniversary to our attention. I want to take just a moment of the Senate's time to add a personal note of congratulations and reminiscence.

I have a special recollection of the Presidential campaign of 1936, when the Republican nominees were Landon and Knox, because that is the first one I can ever remember. I recall my father, when I was a very, very young child, taking me around Tennessee campaigning for the Republican ticket. I proudly wore the sunflower emblem of that candidacy.

I came to have a great respect for Alf Landon in the years that he devoted so much of his time, his efforts, his talent, and his sagacity to the furtherance of Republican efforts. He typifies the sort of statesmanship that American politics has not infrequently produced in this country. He is a living testimonial to and we rightly pay tribute to his contribution to the American political scene.

I am proud to join with the distinguished Senator from Kansas (Mr. DOLE) in wishing Alf Landon happy birthday and many more happy returns in the future.

Mr. PEARSON. Mr. President, it is a pleasure for me to join my colleague from Kansas in urging the adoption of a resolution honoring Alf Landon on his 90th birthday.

For over 40 years, Alf Landon has been one of our most respected and most inspiring citizens. Of course, as Governor of Kansas and as his party's nominee for President, he has earned a permanent niche in American history. But I think his talent and energy have shown through more as a private citizen than as a public official.

As a businessman, counselor, sportsman, and friend, he is a model for all who know him. His approach to public life has always been dignified. His approach to life in general is always spirited. He is among the very few who can blend morality, humanity and practical politics. Even those who occasionally disagree with him never doubt that fairness and honesty are Alf Landon's tools of leadership.

Mr. President, Alf Landon's reasoned activism in public affairs has spanned the heart of this century. Our country has weathered some heavy storms over those years, and Alf Landon has consistently demonstrated his desire and ability to quell the turbulence. His advice is sought by Presidents. His friendship is cherished by many. And his warm humor and disarming smile are enjoyed by all. Alf Landon is a man who at 90 years of age demonstrates more creative energy than most men ever possess.

Mr. President, on this day I would like to honor a great citizen. But beyond recognition, I would like to offer my thanks to a good friend—Alf Landon. I thank him for raising the level of American Government and politics. In his gentle, often understated, but always strong fashion, he has done just that. In my opinion, a man can make no greater contribution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 259) was agreed to as follows:

Resolved, That the Senate hereby extends to the Honorable Alf Landon its greetings and warm wishes on the occasion of his ninetieth birthday on September 9, 1977.

SEC. 2. The Senate expresses its admiration and gratitude to Governor Landon for his many years of distinguished service to the people of Kansas and the United States.

SEC. 3. The Senate expresses its appreciation to Governor Landon for his contributions as Governor of Kansas, presidential candidate, statesman, progressive and venerable leader of his political party, civic leader, humanitarian and successful businessman and for his interest in young people.

SEC. 4. The Secretary of the Senate shall transmit a copy of this resolution to the Honorable Alf Landon.

Mr. BAKER. Mr. President, I have no further requirements for my time.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1978—CONFERENCE REPORT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Mississippi (Mr. STENNIS) is recognized to call up the conference report on H.R. 7933.

Mr. STENNIS. Mr. President, I submit a report of the committee of conference on H.R. 7933 and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7933) making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of August 4, 1977.)

Mr. STENNIS. Mr. President, as I understand, the report has already been cleared and H.R. 7933 is the pending order.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. STENNIS. Mr. President, there has been an agreed time limitation on this report of 1 hour, but I do not know of anything connected with it that is going to require that much time. I do not know of any reason that we should have a rollcall vote, because all these matters have been gone over thoroughly by the Senate and there is no great substantial change on this bill in this conference report on the bill that passed the Senate.

I have some remarks pointing out the highlights of the conference report and comparing it with the bill as passed by the Senate, together with certain tables that are customarily placed in the RECORD on this bill's conference report. I hope the Senator from North Dakota, our very valuable ranking minority member of the subcommittee that handles this bill, will also have some remarks.

Mr. President, I point out that together, there were before this conference in the beginning 246 individual line item dollar or language differences. In other words, the conference had to consider that number of individual line item differences that were included in 82 amendments made by the Senate to the House bill.

I brought this out to show how thoroughly the Senator from Arkansas (Mr. MCCLELLAN), chairman of the committee, and the Senator from North Dakota (Mr. YOUNG), the ranking minority member, and other members of the subcommittee, went into this massive annual appropriation bill and how thoroughly they scoured it. A total of 82 amendments were added by the Senate to the House bill.

But in spite of those great proposed changes, there is no great difference in this conference report as filed.

One of the big money differences is the B–1 production money of $1.4 billion which was in the House bill. It had been passed before the President had made his decision with reference to the B–1 for fiscal year 1978 and the Senate took that money out of its bill after the President's recommendation was made. That item went back in disagreement to the House, the only item the conferees did not finally agree on, and was disposed of by the House yesterday by rollcall vote wherein the House acceded to the Senate amendment deleting those funds.

Mr. President, on Monday, August 1, 1977, the conferees on the Department of Defense appropriations bill for fiscal year 1978 reached agreement on the differences between the two Houses after 4 days of meetings and over 20 hours of deliberations.

The total amount of new budget authority in the conference report was $111,184,166,000. However, this amount included funding to initiate production of the B–1 strategic bomber. The House bill provided $1.4 billion for the B–1. The Senate bill included no funds for B–1 production. The conferees could not reach agreement on the matter and the item was reported in disagreement. The House has accepted the Senate amendment, and this bill no longer includes any funds to begin production of the B–1 bomber.

The total amount of new budget authority in this bill is $109,752,766,000. This is $4.1 billion, or 3.6 percent below the administration's amended budget request. It is $329.5 million below the House bill and $52.3 million below the Senate bill.

Mr. President, this was a very harmonious conference, conducted in the spirit of compromise. Altogether, there were 246 individual line item dollar or language differences to be resolved.

All in all, I think the conferees succeeded in fashioning a very reasonable compromise that funds the items needed for the security of this Nation. It is, I believe, a prudent bill when one considers both this country's international responsibilities and the external threats that we must guard against.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks, a comparative summary, by appropriation, of the conference committee's action.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

MAJOR ITEMS IN CONFERENCE

TITLE I—MILITARY PERSONNEL

Mr. STENNIS. Mr. President, the conferees agreed to reductions totaling $56.7 million for military strength reductions, primarily related to authorization adjustments. At the time the House bill was considered, authorization action had not been completed. Instead of the general strength reductions recommended in the House bill, the conferees made specific recommendations to bring strength levels in line with the authorization adjustments. The funding level provided in this bill will allow the services to meet their authorized end-strength in fiscal year 1978.

The conferees agreed not to transfer certain maintenance personnel from the active forces to the Reserve components during fiscal year 1978 as recommended by the Senate. On the question of transferring certain Reserve functions from pay categories A and B to pay category D, the conferees agreed that these skills should remain in the Selected Reserve as recommended by the Senate. The conferees agreed that undergraduate helicopter pilot training should not be consolidated in fiscal year 1978 as proposed in the budget request and the House bill.

TITLE III—OPERATION AND MAINTENANCE

The conferees restored $250.4 million of the $498.6 million Senate reduction for anticipated inflation in operation and maintenance accounts. The total amount provided for inflation was $992.2 million instead of the $1,240.8 million requested in the Department of Defense budget. The conferees further agreed that the amounts provide for inflation would be used, to the maximum extent possible, to sustain and enhance military readiness.

The conferees agreed to the House reduction of 12,100 civilian man-years to equate with the civilian strength reductions and ceilings specified in the 1978 Defense Authorization Act. The associated dollar reduction for civilian personnel was $170 million, to be applied by the military departments to the lowest priority programs, including, where feasible, reductions in base operating support civilian positions.

The conferees agreed to provide the full $45.5 million requested for the cost of the C–5A cabin load restriction, and restored the $16.2 million Senate reduction to the C–5A unloaded flying program. However, the conferees directed that the Air Force report to the committees on why the C–5A cannot be used in the continental United States for movement of military cargo and passengers, and on possible measures to reduce the peacetime use of the C–5A to an absolute minimum until the structural problems have been resolved. The conferees also accepted the House position that consolidation of the Navy airlift capability under the Military Airlift Command be deferred for 1 year while DOD prepares a report for submission with the fiscal year 1979 budget justifying whatever position the Department subsequently takes on this subject.

The conferees agreed to provide an additional $146.1 million above the budget request for depot maintenance programs and adopted the Senate restriction that none of the funds provided in the bill for depot maintenance could be reprogramed to other uses.

The conferees agreed to provide $100 million, rather than $300 million as proposed by the Senate, for establishment of a Secretary of Defense readiness fund for transfer to the services upon determination by the Secretary that funds are necessary for high priority items directly associated with military readiness.

TITLE IV—PROCUREMENT

AIRCRAFT PROGRAMS

The conference agreement funds 20 C–12A utility aircraft for the Army, the same number authorized. The conferees agreed to provide $107.4 million to procure 12 A–7E attack aircraft for the Navy and $5 million in advance procurement funds. The conference agreement provides the full authorization of $28.7 million to buy 34 T–34C Navy trainer aircraft. The conferees provided the full authorization of $741.8 million to procure 144 A–10 close air support aircraft for the Air Force and $48.7 million in advance procurement funds. The conference agreement funds a buy of 97 F–15 air superiority fighter aircraft and 105 F–16 air combat fighters for the Air Force in fiscal year 1978. The conferees provided $7.5 million for modification of one wide-bodied passenger aircraft owned by a commercial passenger air carrier to serve as a pilot model for the Civil Reserve Airlift Fleet modification program. The conference agreement does not provide funds to initiate production of the B–1 bomber.

MISSILE PROGRAMS

The conference agreement provides $77.7 million to procure 360 nonnuclear warheads and missiles for the Army Lance surface-to-surface missile system. The conferees provided the full authorization of $40.6 million to fund tooling startups and procurement of long lead-time material components for the Air Force AGM–86 air launched strategic cruise missile program. The conferees provided the full authorization of $61.9 million for the Air Force backup Titan IIIC booster.

COMMUNICATIONS PROGRAMS

The conference agreement provides the full authorization of $83.2 million for the Air Force satellite data system program. The Senate provided $25.6 million for the Air Force NAVSTAR global positioning system while the House provided no funds; the conferees agreed to the House position. The conferees agreed to $14.9 million as provided by the House for the Navy Fleet Satellite Communications System instead of the Senate amount, $62.3 million. The lower figure terminates the program after vehicle No. 3 in favor of converting to leasing of commercial satellite communications.

SHIPBUILDING PROGRAM

The conference agreement provides $1,490,300,000 to procure two Trident nuclear ballistic missile submarines in fiscal year 1978. The conferees agreed to delete the $81.6 million advance procurement funding provided by the Senate to buy additional long leadtime components for a CVN *Nimitz*-class nuclear-powered aircraft carrier. The Senate provided $614 million to buy two DD–963 air capable destroyers in fiscal year 1978. The conferees agreed to provide $310 million to fully fund the construction of one ship with design option to be determined by the Navy.

TANKS

The House provided $420.3 million to procure 759 M60A1 Army tanks with thermal night sights. The Senate provided $502.9 million to buy 800 M60A3 tanks with thermal night sights, ruby laser rangefinders, and solid state computers. The conferees agreed to $461.6 million which should buy 780 M60A3 tanks.

TITLE V—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

The conferees agreed to $11,098 million for research and development programs rather than $10,900 million as proposed by the House and $11,106 million as proposed by the Senate. The recommended appropriation of $2,418 million for the Army, $3,992 million for the Navy, $3,918 million for the Air Force, and $770 million for Defense agencies is approximately 5 percent below the budget request of $11,731 million.

AIRCRAFT PROGRAMS

The conferees agreed to delete all funds for the Aerial Scout Helicopter as proposed by the House, instead of providing $7.5 million as proposed by the Senate. The F–14 engine program was funded at $34.8 million as proposed by the House rather than $26 million as proposed by the Senate.

The Senate amount of $15.7 million for the NATO early warning aircraft was approved with the stipulation that DOD attempt to recover a portion of the U.S. expenditure for AWACS development from NATO.

MISSILE PROGRAMS

The conferees agreed to provide $3.8 million for the Shipboard Intermediate Range Combat System—SIRCS—if the Defense Department develops and procures the system in accordance with the latest Office of Management and Budget

procurement directives. The conferees agreed to $12.2 million for SRAM–B as proposed by the Senate, instead of $36.4 million as proposed by the House.

The conferees provided $39.6 million for strategic bomber penetration. Part of this funding will be used to accelerate ramjet propulsion.

OTHER MAJOR PROGRAMS

The Army Advanced Forward Area Air Defense System was approved at $24.2 million. Funding of $5 million added earlier by Congress for an advanced mechanized infantry combat vehicle was deleted by the conferees.

The conferees agreed to $43.9 million for the surface effects ship program as provided by the Senate, instead of $6 million as provided by the House. Funding was not approved for the Navy Tactical Airborne Signal Exploitation System—TASES. The Senate recommended $15.8 million and the House had deleted all funding.

The Navy extra low frequency communications program—SEAFARER—was approved by the conferees at the requested level of $20.4 million providing that certain restrictive provisions be adhered to by the Department.

The Air Force Strategic Air Command updated communication system was not funded by the conferees with the stipulation that a revised program would be considered in the future.

The conferees agreed to $60.6 million for the Defense Satellite Communications System—DSCS III—as proposed by the Senate, instead of no funding as proposed by the House.

GENERAL PROVISIONS

The conference reached agreement on a number of differences in the general provisions, providing as follows on the major items:

Deletes a Senate provision that would have allowed for the set-aside of Defense contracts to labor surplus areas.

Includes a modified version of a Senate amendment requiring the Department of Defense to collect reports of Defense contractors who have contracts in excess of $500,000.

Permits funds for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) to pay for psychiatric nursing and nurse-midwife services.

Deletes a Senate provision that restricted the rate at which physicians could be reimbursed by CHAMPUS, and that required the first $60 for hospital admissions under CHAMPUS must be paid by the beneficiary.

Deletes the House prohibition on construction of new Army ammunition plant facilities.

Limits to 300 the number of enlisted aides in the Department of Defense. The Senate had reduced this number to 150, while the House bill provided 300.

Includes a prohibition on future contracting out of base operating support functions. New support contracts may be entered into only if these contracts would not cause reductions in the number of Government employees.

Provides that no funds may be used for the support of ROTC units not meeting minimum enrollment criteria. State-operated maritime academies are exempted from these criteria for at least one year.

Deletes a provision in the House bill which prohibited the use of appropriated funds to plan or execute assassination plots against foreign officials. The provision was considered to be unnecessary since assassinations are already prohibited by law and by Executive Order.

Deletes a Senate provision that prohibited the use of appropriated funds for the subsidy for transportation of military exchange goods overseas.

Limits the number of military personnel assigned to Non-appropriated Fund activities.

Deletes a Senate amendment which would have precluded increasing the unit equipage of individual Air National Guard squadrons assigned the A–7 aircraft. A reasonable attempt should be made to increase the unit equipage of as many squadrons as possible assuming the locations have an adequate population base to support the increased numbers of aircraft.

TITLE IX—RELATED AGENCIES

The conferees agreed to provide $1 million for the Federal Procurement Institute.

Mr. President, in the course of this matter, I will be glad to try to answer any questions that may be asked, as well as other members of our subcommittee, of course.

I want to especially thank all the members of the conference, both Senate and House, for their fine work. We were in session 4 full days on this matter and finally wound up with a unanimous conference report signed by every member of the conference who was able to attend.

EXHIBIT 1

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY

[Fiscal year]

	New budget authority					Conference compared with—			
	Enacted, 1977	Estimates, 1978	House, 1978	Senate, 1978	Conference, 1978	1977 enacted	1978 estimate	House bill	Senate bill
TITLE I									
Military Personnel									
Military personnel:									
Army	$8,865,672,000	$8,790,943,000	$8,746,573,000	$8,704,733,000	$8,741,800,000	−$123,872,000	−$49,143,000	−$4,773,000	+$37,067,000

Mr. YOUNG. Mr. President, the conferees on the defense appropriations bill for fiscal year 1978 agreed to provide a total of $111,184,166,000 for defense which included $1.4 billion for the B–1. The Senate bill deleted the funds for B–1 production while the House bill included the $1.4 billion. This item was reported in disagreement, and yesterday, the House accepted the Senate position. Therefore, the bill does not include funds to initiate production of the B–1.

The distinguished Senator from Mississippi (Mr. STENNIS) who has so ably handled this bill in the absence of Chairman MCCLELLAN has provided an in-depth review of the actions taken in the conference. I would like to just briefly comment on a few items.

With the B–1 funds deleted, this defense appropriation bill of $109.7 billion is $4.6 billion more than was provided for fiscal year 1977 and is $4.1 billion below the budget estimate. The conferees worked hard to reach agreement on the 82 amendments in disagreement between the two Houses.

Mr. President, I have never known a time when both the House and Senate, especially the Senate, broke a bill down into literally hundreds of amendments, dealing with smaller amounts of money than ever before.

This required a great deal of work. I cannot help but believe it is a much better bill as a result of this more detailed consideration with greater savings than would otherwise have been possible.

Many of these disagreements were difficult to resolve. In most cases, the Senate position was strongly supported and in a large measure agreed to by the conferees.

When the defense appropriations bill was on the floor of the Senate, I made a strong point concerning the deletion of the funds for the B–1 bomber. I pointed out at that time that we have wasted billions of dollars on developing weapons systems and then decided to cancel or terminate them before they are to be used in our forces. The B–1 is certainly not only the latest example of such waste, but one that a large amount of money will be lost on because of termination costs. I am sure my colleagues are all aware that the B–1 amendment was taken back in disagreement and voted on the floor of the House. By the narrow margin of three votes, the President's position to cancel the production of the B–1 was sustained. Such a close vote convinces me that we may well either go back to production of the B–1 or something similar in the not-too-distant future. The B–1 is a plane we still need. A return to the production of the B–1 would be costly after it is once terminated. If this were to happen, it would be another demonstration of a waste of funds in the development of weapons systems and we should not have canceled it in the first place.

Mr. President, I am sure some of my colleagues will disagree with certain specific actions of the conferees, but on the whole, I believe that the conference has reached the best possible solution to the many amendments that had to be resolved. I urge adoption of the conference report as reported.

Mr. STENNIS. Mr. President, if anyone else wishes the floor, I will be glad to yield.

Mr. MAGNUSON. Will the Senator yield to me for a moment?

Mr. STENNIS. I am glad to yield, Mr. President, to the Senator from Washington. This involves a slight modification of our report.

Mr. MAGNUSON. Mr. President, this is a matter that we discussed in the Appropriation Committee in the last hurried days of the conference in which we were all very busy with many things.

Language was put in the report regarding a matter that I should like to clear up with the chairman and the ranking minority Member. I ask this question of the chairman: Was the $17.5 million reduction to the permanent change of station program made by the conference committee in any way related to expanding the international household goods competitive rate program?

Mr. STENNIS. No, it was not. The reduction to the permanent change of station program was based on the adjustments in end-strength made by the authorization bill, and on the recommendation that the Department of Defense make greater use of existing Government-owned warehouse facilities to store the household goods of military personnel stationed abroad. It was not related to any expansion of the competitive rate program.

Mr. MAGNUSON. The Senate Appropriations Committee report has a discussion of this competitive rate program and concludes by recommending that this program be expanded worldwide. This program is currently limited to a test program involving only household goods traffic between Okinawa and Germany and the United States. There has been a great deal of criticism of this program in the private sector as discriminating against small moving companies.

Does the Senator think we have adequate information now from this limited test—and I underline the words "limited test"—of this program to expand it as might be suggested by the report? I do not think the report intended to say that explicitly.

Mr. STENNIS. Mr. President, I thank the Senator for bringing up this matter. I have reviewed the matter in the light of the things he has said, and I agree that the committee may have been a little hasty in these recommendations.

This competitive rate program is a complicated issue that involves other committees besides the Appropriations Committee. Before this program is expanded, I believe it should be reviewed by the appropriate legislative committees with jurisdiction in this area.

After a full conference consideration and understanding of this matter, representing the Senate conferees on the bill, I think the Department of Defense should be notified; and to the extent that I can by this statement, notify them now that they should disregard the recommendation in the Senate report that the competitive rate program be expanded worldwide now.

Mr. MAGNUSON. That means, of course, that we want to take a look at it in depth.

Mr. STENNIS. That is exactly right. This is a matter that the committee of the Senator from Washington and other committees have jurisdiction of. It is a legislative matter, and we think that the purposes stated by the Senator from Washington are exactly right. I thank the Senator again for calling it to our attention. In the rush of matters, it just crept in.

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. YOUNG. Mr. President, my understanding and thinking on the subject are the same as that of the chairman. It is a complicated matter, one which I believe the legislative committee should have an opportunity to review. I agree that more weight should be given to the statements made on the floor than the language in the report.

Mr. MAGNUSON. I thank both Senators.

Mr. STENNIS. Mr. President, I do not know of anyone else who wishes to speak.

I point out, Mr. President, that in a substantial way, this concludes the appropriations for fiscal 1978 for the Department of Defense, but it does not totally conclude it, because we have now an additional request about the Cruise missile and related matters that came in following the President's decision on the B–1. The Armed Services Committees of the Senate and the House are considering authorizing legislation in that field. I think we will get a bill here soon, and that will involve appropriation of some kind, undoubtedly. We hope that will be taken up in the supplemental bill that is already on its way in the House of Representatives. Further than that, I would not indicate what the situation might be, but it is an open matter.

Mr. President, that concludes my remarks. So far as I know, no one else wishes to speak. There has been a request for a quorum call prior to a disposition of this matter, and after that, I will move that the conference report be adopted.

I suggest the absence of a quorum, with the consent of the Senator from California.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STENNIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. MAGNUSON. Mr. President, I am sure I speak for many people who were involved in the Appropriations Committee. I have served on many conference committees over the years, with many other Senators, the Appropriations Committee in particular, and I know of no conference that took more time, which involved more line items and more discussion and more work in and out of conference, or lasted longer, than this conference on the defense appropriation bill.

I want to pay my compliments to the Senator from North Dakota and the Senator from Mississippi—particularly the Senator from Mississippi, who took over the chairmanship on very short notice. These were highly complicated matters, and sometimes I wondered if we would ever get through, but we were over there morning, noon, and night almost, and I just wanted the record to show that despite the fact that we finally have got an agreement here, it did not come very easy. It was long, hard work. The staff worked all night in some cases going after things we would discuss during the conference and have to put over until we got more information here and there.

I wanted to pay my respects to both the Senator from North Dakota and the Senator from Mississippi in this regard.

Mr. ROBERT C. BYRD. Mr. President, I wish to associate myself with the remarks of the distinguished Senator from Washington. They are very appropriate, and I commend both the Senator from Mississippi and the Senator from North Dakota.

Mr. STENNIS. We naturally thank you both for those very kind and generous words.

I say with emphasis that the nitty gritty part of this huge bill, the work, a great part of it, was done over a period of months, almost a year, by the Senator from Arkansas (Mr. McCLELLAN) and the Senator from North Dakota (Mr. YOUNG).

Of course, they had help, including that of the Senator from Washington himself.

There was an amazing amount of staff work that was done, willingly done. They are masters in their field, the staff members. That certainly needs to be underscored, too.

I wish to express my gratitude, and that of the committee to our staff which consists of Guy McConnell, Dick Lieberman, Doug Allen, Jim Fellenbaum, David Lyles, Jane McMullan, Judy Spahr and Pete Bonner, the minority representative, for their fine assistance during the work on the defense appropriations bill this year.

Frankly, I think the matter the Senator from Washington referred to is rather the reverse of the conception that some people get that we are in vacation most of the time. We had 96-hour weeks on this bill in conference, and that especially illustrates my point.

I yield to the Senator from North Dakota.

Mr. YOUNG. I want to express my appreciation for the favorable comments made by the Senator from Washington. This committee did go into more detail and line items than any bill I have ever known of before. We went into smaller items and spent more time on them. We saved by doing it that way, and I want to share the chairman's views with respect to the staff. They worked very ably and worked day and night.

Mr. STENNIS. Mr. President, if no one wants the floor then I renew my motion for the adoption of the conference report on H.R. 7933.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STENNIS. I thank the Chair.

The PRESIDING OFFICER. The clerk will report the amendments in disagreement.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 20 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken by said amendment, insert:

Provided further, That $845,662,000 shall be available only for the Defense Logistics Agency and $614,583,000 shall be available only for the Civilian Health and Medical Program of the Uniformed Services: *Provided further*, That during fiscal year 1978 the Department of Defense may guarantee loans pursuant to Title III of the Defense Production Act of 1950 as amended (50 U.S.C., Appendix 2091, 64 Stat. 800) in an amount not to exceed $5,000,000: *Provided further*, That of this appropriation, not more than $350,000 may be obligated to support the personnel and activities of the Assistant Secretary of Defense for Health Affairs prior to February 1, 1978.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 30 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $100,000,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $2,176,410,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 41 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $6,262,000,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 46 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $2,417,882,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 47 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert:

$3,991,791,000: *Provided*, That none of the funds appropriated for the Shipboard Intermediate Range Combat System program shall be available unless expended in compliance with existing acquisition policies and procedures prescribed in Office of Management and Budget Circular A–109.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 54 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $500,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 63 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

changes; (f) reimbursement of any physician or other authorized individual provider of medical care in excess of the seventy-fifth percentile of the customary charges made for similar services in the same locality where the medical care was furnished; or (g) any service or supply which is not medically or psychologically necessary to diagnose and treat a mental or physical illness, injury, or bodily malfunction as diagnosed by a physician, dentist, or a clinical psychologist, as appropriate, except as authorized by section 1079(a)(4) of Title 10, United States Code.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 67 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken by said amendment, insert:

Sec. 852. (a) None of the funds appropriated by this Act may be used to (1) convert base operating support functions, excluding real property maintenance and repair, to commercial contract during the period October 1, 1977, through September 30, 1978, or (2) to fund continued performance during fiscal year 1978 of base operating support contracts, excluding real property maintenance and repair, awarded between the date of enactment of this Act and September 30, 1977, which convert base operating support activities performed by employees of the Government of the United States to commercial contract.

(b) None of the funds appropriated by this Act may be obligated for commercial contracts to be physically performed at an installation or facility including leased facilities for the following types of work: (1) weapons system engineering and logistical support; (2) ship, aircraft, missile, automotive and tracked vehicle intermediate level maintenance or depot maintenance; or (3) research, development, test, and evaluation, if the work to be physically performed at an installation or facility during fiscal year 1978 by commercial contracts would result in a reduction of employees of the Government of the United States at that installation or facility.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 71 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken, delete the period at the end of the section, and insert: and at each State-operated maritime academy: *Provided further*, That units under the consortium system shall be considered as a single unit for purposes of evaluation of productivity under this provision.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 76 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number proposed in said amendment, insert: 860.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 82 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $1,000,000.

Mr. STENNIS. I move that the Senate concur en bloc in the amendments of the House to the amendments of the Senate.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Mississippi.

The motion was agreed to.

Mr. STENNIS. I thank the Chair, and that disposes of the bill.

SECOND CONGRESSIONAL BUDGET RESOLUTION, 1978

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of Senate Concurrent Resolution 43, which the clerk will report.

The assistant legislative clerk read as follows:

Calendar No. 363, Senate Concurrent Resolution 43, revising the congressional budget for the United States Government for the fiscal year 1978.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum and I ask that the time be equally charged against both sides on the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

(Mr. ZORINSKY assumed the chair.)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I would urge that Senators on both sides of the aisle who have amendments to the concurrent resolution come to the floor and offer those amendments.

The time agreement on this resolution provided for an overall time limitation, out of which would come the time on any amendments, debatable motions, appeals, or points of order. At this point we have 209 minutes left overall. We understand that there are three amendments, one by Mr. HAYAKAWA, one by Mr. ROTH, and one by Mr. HATCH, on each of which there is 1-hour time limitation. So on those three amendments, that would mean that 180 minutes would be allotted if all time is taken on each of the amendments, and that would come out of the 209 minutes.

This means that there are 29 minutes left for any other Senator who wishes to call up an amendment. I urge that Senators come to the floor and call up their amendments.

Mr. MUSKIE is here. He is chairman of the Budget Committee. He has been here patiently waiting, and I know that the leadership on the other side has been attempting to get Senators to come to the floor to call up their amendments. I would hope that Mr. HAYAKAWA, Mr. ROTH, or Mr. HATCH would present themselves and call up their amendments, because time is running. We made special allowance of time for their amendments, but we have to protect other Senators who may also want to call up amendments, and by virtue of the fact that the three Senators whose amendments have been protected are not on the floor to call up their amendments, it is impinging upon the time of all other Senators, any one of whom may wish to call up more amendments. So in fairness to all Senators, I ask those Senators who are protected on their amendments to please get to the floor and call them up.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. MUSKIE. I know there is at least one other amendment under consideration that is of great interest to Senators in farm States, especially farm States that have suffered from the drought. That amendment is under consideration; it may or may not be offered. I do not know. I cannot speak for those Senators. I know there is at least one other Senator who may wish to take some time to express some views from the point of the Finance Committee on the second budget resolution. With this quorum call, we are squeezing those Senators out.

We went out of our way to insure the protection of these three Senators who have amendments. They did not want to bring them up yesterday, for reasons that they advance also today.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MUSKIE. Yes, I do.

Mr. ROBERT C. BYRD. The leadership on the majority side protected those Senators on yesterday. The leadership knew that those Senators would not be prepared to call up their amendments yesterday, and the leadership in presenting its request limiting time protected those Senators on yesterday. We just cannot go on and on waiting for Senators to come to the Chamber. I urge Senators to come to the Chamber.

I ask unanimous consent, Mr. President, that the time on the last quorum call not be charged to anybody.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, will the majority leader yield for another observation?

Mr. ROBERT C. BYRD. I yield.

Mr. MUSKIE. Under the law, action by the Congress on this budget resolution must be completed by September 15. The House completed action last night. The Senate Budget Committee is prepared to go to conference with the House. We cannot go to conference with the House. We had hoped to do so today, so that we might have ample time to do justice to the conference. The delay we have had makes it impossible to go to conference today. We will not be able to go until Monday. With that deadline, which is a statutory deadline, staring us in the face, I would join the majority leader in urging Senators to come to the floor to present their amendments.

Mr. ROBERT C. BYRD. May I say in justice to one or two of these Senators, I know they were in committee meetings and they considered those committee meetings important. I recognize that. But so was Mr. MUSKIE supposed to be in a committee meeting, which is being conducted by Mr. RIBICOFF at this time in connection with the Lance matter. The chairman of the Budget committee is here. He, too, should be in that committee meeting. The time is running. We have to call up some amendments.

I have noted the presence on the floor for quite some time of Mr. HAYAKAWA and I feel sure he is ready to go. For some reason, apparently, he is being inhibited by someone else from proceeding at this time. I am not sure of this.

I am not interested in arguing with anyone. I just want someone to call up an amendment. We cannot continue to fiddle-faddle and waste our time, the time agreement being as it is.

Mr. HATCH. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. HATCH. I am not quite sure what the Senator is talking about. I have been prepared to come here for 2 days.

Mr. ROBERT C. BYRD. What did the Senator say?

Mr. HATCH. I have been prepared to be here. I came over as soon as I was notified. As I understand, Senator ROTH is going to offer an amendment to this resolution. My amendment is third to his.

Mr. ROBERT C. BYRD. It is not third. The Senator can call up his amendment now. There is no sequence of amendments in the order.

Mr. HATCH. Senator ROTH wanted to present his amendment first.

Mr. ROBERT C. BYRD. I am very agreeable for him to do that, but why does he not come to the Chamber?

Mr. HATCH. He is in a committee hearing.

Mr. ROBERT C. BYRD. He is in the same committee hearing that the chairman of the Budget Committee is supposed to be attending also.

Mr. HATCH. I cannot speak for Senator ROTH. All I can do is speak for myself. I am honoring a commitment to him that he can go ahead with his amendment before I present mine. I think that is something that should be respected here in the Senate.

Mr. ROBERT C. BYRD. It is respected, but we have to respect the Senate.

Mr. HATCH. I respect the Senate. Nobody does more than I do, as the Senator knows. I have always been very courteous.

Mr. ROBERT C. BYRD. Is the Senator prepared to call up his amendment?

Mr. HATCH. As soon as Senator ROTH appears.

Mr. ROBERT C. BYRD. Is Senator HAYAKAWA prepared to call up his amendment?

Mr. HATCH. I would be happy to call up Senator ROTH's, if I had a copy of it and could speak for it. I do not know where he is. I cannot account for him.

Mr. ROBERT C. BYRD. Is his amendment next?

Mr. HATCH. I would be happy to call up the Roth amendment to accommodate the distinguished majority leader.

Mr. ROBERT C. BYRD. The Senator is not just accommodating the majority leader.

Mr. HATCH. To accommodate the Senate.

Mr. ROBERT C. BYRD. Time is running, the time allotted for the Senator's amendment, the Senator who is now on his feet.

Mr. HATCH. And prepared to go, except for my commitment.

Mr. ROBERT C. BYRD. And the time allotted for Mr. HAYAKAWA's amendment and Mr. ROTH's amendment is coming out of the overall time.

Mr. HATCH. I understand.

Mr. ROBERT C. BYRD. The more the Senate waits for certain Senators to call up their amendments, the more other Senators are shut out from offering their amendment.

Mr. HATCH. Will the distinguished Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. HATCH. I believe the Senator understands there are committee meetings. I believe he understands Senator ROTH is in one, the same one that Senator MUSKIE should be attending. I cannot understand why Senator ROTH is not here, or why Senator MUSKIE can be here and Senator ROTH cannot be here. The only point I am making is that I gave my word to Senator ROTH. I would be happy to call up my amendment after his. To accommodate anybody concerned, I would be happy to call up his amendment and speak for it, if I could get a copy of it, and do so to accommodate him.

Mr. ROBERT C. BYRD. I appreciate the Senator's willingness to do that. Will he get in touch with Senator ROTH and see if he can proceed?

Mr. HATCH. As I understand, efforts are being made to get in touch with Senator ROTH.

Mr. ROBERT C. BYRD. Very well.

Mr. MUSKIE. If the Senator will yield, may I point out that I have obligations on the committee concerning Mr. Lance. That committee is not going to take any action today. It is not going to vote today. I consider my first obligation on the floor when a matter of this importance is here. I did not attend yesterday's session of the Governmental Affairs Committee. I am not speaking to the Senator, but I am only speaking for the record. I simply want to make the point that I did not attend yesterday's meeting of the Governmental Affairs Committee because the Senate as a whole said I should be here managing the second budget resolution. I cannot attend the committee meeting today for the same reason.

It seems to me that Senators have that obligation.

What the Senate is confronting is the need for action on a budget resolution which the law says we must complete by the 15th of September. That is my only point. If the time runs out, the entire 209 minutes which remain, then no amendments will have been considered. We could run through that time very rapidly while the Governmental Affairs Committee finishes its session for the day.

Mr. ROBERT C. BYRD. What the distinguished Senator from Maine and I are both saying is for the protection of the Senator from Utah, for the protection of the Senator from California, and for the protection of the Senator from Delaware, because the 1 hour allotted to each amendment of those three Senators is coming out of the overall. When we get down to where we have less than 180 minutes, then each of those three Senators, on a proportionate basis, will have his own time reduced.

Mr. HATCH. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. HATCH. I cannot speak for Senator ROTH. I know Senator ROTH very well and there is no man with more integrity in this body, nor a man more desirous of fulfilling every obligation he has in this body, nor a man who cares more for the procedures and protocols of the Senate. I have to assume there is some valid reason why he is having difficulty getting here. I have been waiting for at least a day and a half and have been prepared at any time to come over here. I believe the same is true of Senator ROTH and Senator HAYAKAWA. All I can say is I would be willing to yield part of my time during the time we are waiting for Senator ROTH. That will decrease time available to me on this resolution, which would also save time on the overall resolution, and I will cut down any speeches or comments I have to make with regard to my amendment accordingly. However, I would have to have a minimum. We have 1 hour reserved, so I would have to have as a minimum, I would say, 15 minutes. That would give us 15 minutes. During that time, we will make every effort to have Senator ROTH come to the chamber. Is that a reasonable suggestion?

Mr. ROBERT C. BYRD. What will Senator MUSKIE and Senator BELLMON do in the meantime?

Mr. HATCH. I say to the distinguished majority leader and the distinguished Senator from Maine, I have just been handed the Roth amendment. I would be happy to speak for this amendment at this time and to utilize some of Mr. ROTH's time.

Mr. ROBERT C. BYRD. The Senator will call up the Roth amendment?

UP AMENDMENT NO. 784

Mr. HATCH. Mr. President, I will call up the Roth amendment at this time.

Mr. President, I call up an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Utah (Mr. HATCH), for the Senator from Delaware (Mr. ROTH), Mr. HAYAKAWA, Mr. HATCH, Mr. MCCLURE, and Mr. SCHMITT, proposes Unprinted Amendment No. 784.

Mr. HATCH. Mr. President, I ask unanimous consent to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 7, delete the numeral and insert in lieu thereof "$383,600,000,000".

On page 1, line 9, delete the numeral and insert in lieu thereof "$12,000,000,000".

On page 2, line 5 delete the numeral and insert in lieu thereof "$75,700,000,000".

On page 2, line 7, delete the numeral and insert in lieu thereof "$789,900,000,000".

On page 2, line 9, delete the numeral and insert in lieu thereof "$89,900,000,000".

Mr. ROBERT C. BYRD. Mr. President, I want to express appreciation to the distinguished Senator from Utah for his fine spirit of cooperation.

Mr. HATCH. I thank the distinguished majority leader.

I ask unanimous consent that Dr. Craig Roberts of my staff be accorded the privilege of the floor during the pendency of this measure and any votes thereon; also Brent Hatch of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, in calling up the Roth amendment, I am trying to do so in accommodation to the Senator. Knowing my distinguished friend from Delaware, to whom I want to give every accommodation, as I do, I know he has been very concerned and has led the battle in the U.S. Senate for a tax re-

duction across the board for all citizens in our society and for all businesses and corporations. The Roth amendment would reduce the recommended revenue level in the second budget resolution from $395 billion to $383.6 billion. This $11.4 billion reduction would allow Congress to enact a general tax reduction during fiscal year 1978.

The spending and revenue levels set forth in the second budget resolution are binding limits on Congress and no action may be taken during fiscal year 1978 which exceeds the spending level or reduces the revenue level.

No action may be taken during fiscal year 1978 which exceeds the spending level or reduces the revenue level. This means that, unless the Roth amendment is adopted, no tax reduction can be enacted in fiscal 1978 under the second budget resolution.

The U.S. economy right now is plagued with sluggish growth, rising prices, persistent unemployment, and indications are that the economy is entering a period of even slower growth. The heavy tax burden that is now imposed on the American people is primarily responsible for the sluggish economic growth. As an inevitable result of this heavy tax burden, we have an increased and momentous, monumental growth in our bureaucratic system, which is costing us untold billions of dollars which continually rise, every year, as we appropriate money in the U.S. Congress.

The adoption of this amendment will give Congress the flexibility to enact a tax cut quickly if the current economic slowdown continues or worsens. Rejection of this amendment would tie the hands of Congress and make it extremely difficult for Congress to enact tax reductions before October 1 of next year.

There are those of us who have been arguing since we have been in the Senate, with Senator ROTH certainly one of the leading proponents of this particular view, that what this country needs, really, is tax cuts across the board. Tax cuts would provide incentives to this economy, which is an economy maintained by incentives. In what we call our free market economy, we know that for that system to go and for it to grow, we have to provide incentives for people to save, for people to invest, for people to work harder, for people to be able to earn more money and be able to save more money and invest more money. It is a kind of eternal ring.

If we do that, if we provide tax cuts across the board, this means that every business in America, every wage earner in America, would have more incentives to work, because he would have an actual ability to save, an actual ability to provide for his future, an actual ability to provide for retirement, an actual ability to invest in the great free enterprise system.

If that occurs and we have a tax cut across the board and moneys are saved and people start investing in the economy, and the economy then starts emphasizing the free market aspects thereof, it is my sincere belief, and I believe I would be fair in saying that it is the belief of Senator ROTH, the sponsor of this amendent, that we would be decreasing unemployment, providing more jobs, having more people paying taxes. We would be producing more social security revenues to offset the current bankruptcy of the social security system, solving most of the problems that we have in our society, rather than continuing what seems to me the very deleterious approach that we have right now.

I might add that every time, except one, to my knowledge, that we have had a tax cut across the board in the last 30 years, we have had a tremendous increase in revenues rather than a decrease. I think the most notable tax cut that really meant something to this economy that most of us can remember is the John F. Kennedy tax cut that he had when he was President. We got it in 1964.

President Kennedy went against the advice of many of the Keynesian economists and gave a tax cut across the board. The advice of these people who were against the tax cut was that we could not stand the loss in revenues, that this country would be seriously damaged because of the loss of the Federal revenue, and that the loss in revenues that would be caused by the tax cut would put the Government in dire jeopardy, put the whole economy in dire jeopardy.

Exactly the opposite occurred.

President Kennedy had the guts, which I hope that the Senate will have and future leadership of this country will have, to go for a tax cut across the board. After it got through Congress, the exact opposite of the predicted revenue loss occurred. That exact opposite was that, instead of having a decrease in revenues that seriously hurt the country, we had an abundant increase in revenues which benefited the country and made that period of time fairly stable. As a matter of fact, it gave us some stability that we otherwise would not have had had we continued to spend and spend, right down the line.

I personally endorsed the Kennedy tax cut and, as a Republican, I commend that administration for what it did, because I think it proved something. That is that a Keynesian stimulus, or continuing to increase the money supply or continuing to stimulate the economy by spending more than we have, really does not work except when there is a decrease in the money supply.

As we all know, that is not our problem today. If anything, the reason we have so much rampant inflation, the reason we have so many difficulties today is that every time we have a difficulty in our economy, the Keynesian economists try to apply, improperly, an economic theory that is applicable in the case of a decrease in the money supply. To the extent that we increase further an already increasing money supply to stimulate the economy, spend more than we have coming in in revenues, we continue to build up the bureaucracy, continue to foment a bigger Government payroll and bigger Government costs and bigger Government bureaucratic domination of our lives. In the end, we wind up in worse shape than we were before.

As a matter of fact, it seems to me that one of the big arguments that the Keynesian economists have used in the past has been that, by deficit spending, we will increase the ability of this country to basically continue its forward momentum and its forward surge economically with consequent benefits to the stock market, consequent benefits to the private sector, and so forth.

In some ways, that has appeared to be so during the 1940's, 1950's, and even part of the 1960's. But what has really upset and unnerved everybody in our society is that during the 1970's the old modes of economics, this continual stimulation of our economy by deficit spending, and big deficit spending, has resulted not in an increase in stimulation of our economy, not in a strengthening of our economy, but in an economy that is wracked with indecision where nobody knows what is going to happen, where the stock market fluctuates almost uncontrollably without any definiteness, and where we have had an increase in inflation that looks like it is almost uncontrollable and is presently running somewhere beween 6 percent and 7 percent, as I understand it.

I notice that Senator ROTH is here. I am sure he can speak more favorably and more strongly for his amendment than I can. But I would just like to say this before I yield to Senator ROTH, that I, for one, have become totally convinced—and I had these feelings before I came here—that Senator ROTH's viewpoints are very accurate. They are sound. They are not new. It is basically the John F. Kennedy viewpoint that stimulated the economy in a proper way back in 1964. There are several other illustrations to show further for this particular economic theory and program.

I endorse this amendment. I give great commendation to Senator ROTH and Congressman KEMP in the House for their leadership in this great fight that I think ultimately America is going to have to agree with.

I believe that the administration is going to have to agree with this, whether we get these tax cuts through today or in the immediate future. I believe that within the next year this administration is going to have to turn to and accept this viewpoint in order to have stability in our economy.

When that happens, I, for one, will give credit to John F. Kennedy. But more importantly, it has been harder in the last 10 years as we have seen our economy jump almost double, or at least our budget jump almost double, from $232 billion since 1972 to almost $500 billion now.

I would like to give a great deal of the credit to people like the distinguished Senator from Delaware and the distinguished Congressman from New York, Senator ROTH and Congressman KEMP, for carrying the fight for a John Kennedy tax cut today.

At this point, I yield the remainder of the time to Senator ROTH on his amendment.

UP AMENDMENT NO. 784, AS MODIFIED

Mr. ROTH. Mr. President, I would like to express my great appreciation to the

Senator from Utah for pinch-hitting on my behalf.

As the distinguished Senator from Maine is well aware, we are faced with the very serious problem that the Committee on Governmental Affairs of which we are both members, is having the Comptroller of the Currency before us, and it makes it very difficult to try to follow what is on the Senate floor and discharge one's committee responsibilities.

I appreciate the fact that both the Senator from Maine and the Senator from Utah have protected my rights.

I would like to emphasize that the Senator from Utah himself as well as the Senator from California have been leaders in this proposal to try to provide some badly needed tax relief for the American taxpayer. I want to express my appreciation to both of them for what they have done.

Mr. President, I send to the desk a corrected version. Yesterday, there were modifications made that had to be reflected in my amendment and I send that to the desk.

The PRESIDING OFFICER (Mr. ALLEN). Without objection, the amendment will be so modified.

The amendment, as modified, is as follows:

On page 1, line 7, delete the numeral and insert in lieu thereof "$383,600,000,000".

On page 1, line 9, delete the numeral and insert in lieu thereof "$12,000,000,000".

On page 2, line 5, delete the numeral and insert in lieu thereof "$76,100,000,000".

On page 2, line 7, delete the numeral and insert in lieu thereof "$790,300,000.000".

On page 2, line 9, delete the numeral and insert in lieu thereof "$90,300,000,000".

Mr. ROTH. Mr. President, this amendment is a simple, straightforward measure to lower the second budget resolution's revenue level enough to accommodate a 10-percent across-the-board tax rate reduction. Under this amendment, the revenue level would be set at $383.6 billion, for a net revenue reduction of $11.4 billion.

The second budget resolution which we are considering today sets spending and revenue levels for the 12-month period beginning October 1, and unless this amendment is adopted, no action may be taken by Congress to reduce revenues below the level in the budget resolution. It is extremely important to realize that unless this amendment is adopted, no tax cuts can be enacted for the next year unless a third budget resolution is adopted.

The adoption of this amendment will give Congress the flexibility to enact a tax cut quickly if the current economic slowdown continues or worsens. Rejection of this amendment would tie the hands of Congress and make it extremely difficult for Congress to act quickly and enact tax reductions before October 1 of next year.

Mr. President, I believe it is vitally important to reduce the tax burden on the American economy. The heavy tax burden now imposed on the American people has slowed our economy down and caused high levels of unemployment, and unless tax reductions are enacted, I am fearful that economic conditions will worsen.

The U.S. economy is plagued with sluggish growth, rising prices, and persistent unemployment, and the indications are that the economy is entering a phase of even slower growth.

The Government's index of leading economic indicators, a key barometer of future economic activity, fell last month for the third consecutive month in a row. This was the first time the index of leading indicators has declined 3 months in a row since the 1974–75 recession.

Orders for durable goods fell 5.1 percent last month, the steepest drop since December of 1974, and new factory orders for manufactured products dropped 3 percent in July, also the largest decline since December 1974.

The Congressional Budget Office is also projecting an economic slowdown. A recent CBO report—"Recovery With Inflation, July 1977"—projects the growth in real output to slow to a range of 3.6 to 5.1 percent in 1978. According to CBO—

> Despite the gains in economic activity during the last half year, there is little doubt that the overall economic situation is worse than experienced at this stage in earlier recoveries. Total demand remains well below potential output, and the unemployment rate is still exceptionally high.

In spite of this sluggish growth, inflation continues to be a persistent problem. Although recent declines in food prices have moderated the inflation rate slightly, prices in general continue to climb. According to a recent U.S. News & World Report article, August 22, 1977, prices have risen in the past 6 months nearly as much as they rose in all of 1976. Since the end of last year, prices have increased at the following annual rate:

Food—up 13.6 percent,
Fuel oil and coal—up 19.2 percent,
Public Transportation—up 10 percent,
Medical care—up 10.1 percent,
Gas, electricity—up 11.4 percent,
Rent—up 6.3 percent,
New homes—up 14 percent.

The Budget Committee's recommended spending and revenue levels fail to address the clear signs of an economic slowdown and increasing inflation. The committee continues to rely on increased deficit spending to stimulate economy activity, and it refuses to recognize that the largest single barrier to expanded economic growth is the heavy drag of Federal income taxes now imposed on the American economy.

An across-the-board tax reduction will breathe life into our free enterprise system and assure the type of long-term economic growth needed to create meaningful jobs in the private economy.

By reducing the heavy tax burden now imposed on the economy, we will increase job-creating investments, stimulate consumer spending, and generate the economic growth needed to provide upward mobility for all Americans.

The heavy tax burden now imposed on the economy reduces the incentive to work, save, and produce. It reduces consumer purchasing power and retards savings and investments in new factories, homes, and equipment, resulting in slower economic growth and high levels of unemployment.

By reducing the tax burden on the economy, the cost of working and producing would be reduced and production, employment, investment, and wages would increase substantially.

According to one econometric projection, a 10-percent tax rate reduction would increase total GNP by $43 billion and result in the creation of 1.2 million jobs by the end of next year.

Substantial tax rate reductions will also help offset the impact of inflation and provide needed relief to the millions of hard-working middle-income taxpayers of this country.

Americans have traditionally anticipated that hard work and perseverance would produce a higher standard of living and upward mobility. But inflation and the crushing tax burden on working Americans have destroyed the hopes and dreams of millions of Americans and increased the prospects of downward mobility for too many Americans.

According to an article in this week's Newsweek, for many middle-income families "the staples of a middle-class American dream—a home, a new car, a vacation trip, a college education for their children—have become out-of-reach luxuries." Action must be taken to provide tax relief to these working Americans.

Mr. President, the Budget Committee will argue that a tax reduction is unacceptable because it would increase the budget deficit. I believe the best way to reduce the budget deficit is to reduce Federal spending, and it is distressing that the Budget Committee is concerned about budget deficits only when tax relief is proposed for the overburdened taxpayer.

In addition, the Budget Committee ignores the fact that history shows permanent tax reductions do not erode the revenue base or increase Federal budget deficits. In each of the 10 major tax cuts since 1946, Federal revenues have increased as a result of the tax cut. This is because permanent tax cuts create more taxpaying jobs, produce a greater increase in gross national product, and expand the economy to provide more, not less, Federal revenues.

The Budget Committee, on page 3 of its report, recognizes this, stating that "higher rates of growth would if realized, produce greater tax revenues from higher employment and profits in the private economy."

This is exactly what happened when the Kennedy tax cuts were enacted. Although the Treasury Department estimated a 6-year revenue loss of $89 billion, the increased economic growth caused by the tax cuts resulted in an actual revenue gain of $54 billion.

One of the reasons why we have such a large budget deficit is that we are spending billions of dollars a year on unemployment benefits, food stamps, and welfare programs for the unemployed. A 10-percent tax reduction will create more than 1 million jobs, and according to a Library of Congress study, the creation of 1 million jobs in the private sector would reduce the Federal budget deficit by an estimated $14 billion.

Permanent tax cuts will not increase the budget deficit and will not erode the Federal revenue base. Permanent tax cuts will expand the economy, create permanent taxpaying jobs, and increase Federal revenues and reduce Federal spending so much that the budget deficit will be reduced.

Mr. President, as I said earlier, the adoption of this amendment will give Congress the flexibility to enact a tax cut quickly if economic conditions worsen. Last week, House Ways and Means Committee Chairman ULLMAN said that a substantial tax cut would be needed if the slow economic recovery faltered. But unless this amendment is adopted, a tax reduction could not be enacted under this budget resolution.

Mr. President, under the current state of economy, we cannot afford to tie our hands. We must retain the flexibility to act quickly when and if action is needed to get the economy moving. A vote against this amendment is a vote for bigger deficits, higher taxes, more unemployment, and slower economic growth. A vote for this amendment is a vote for economic growth, jobs for the unemployed, and tax relief for every working American.

The PRESIDING OFFICER. Who yields time?

Mr. BELLMON. Mr. President, may I be recognized for 5 minutes?

The PRESIDING OFFICER. Only 3 minutes remain for the proponents of the amendment. Will the Senator from Maine yield time?

Mr. MUSKIE. Yes. I yield 5 minutes to my good friend.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. BELLMON. Mr. President, I reluctantly oppose the Roth amendment. I fully agree with much of the rationale which has been stated.

I believe that the budget process is serving a good purpose here, because it tends to emphasize the dilemma that is presently facing Congress. I think probably every Member of Congress desires relief for the American taxpayer. However, at the same time, we are equally desirous of balancing the budget and bringing our deficit under control and in this way helping to put an end to inflation.

I assure my colleagues from Delaware and from Utah that the Budget Committee has been striving to achieve a climate in which these objectives can be realized. But in my judgment, a quick fix approach is not going to work.

I also call attention to the fact that the minority had a tax package earlier this year which, in my judgment, was far more balanced than the one that has now been proposed. Their package included many points which would have provided incentive for capital formation. They also would have included an individual tax cut that provided incentives for greater stock ownerships by individuals. This plan would have included incentives to enhance employment of long-term unemployed Americans. They would have encouraged saving and investment on the part of individual Americans, which would help to add to capital formation, and there was corporate tax relief. I think all of these are desirable objectives.

There is always a tantalizing appeal for a tax cut. In fact, I believe that generally a tax cut rather than a spending increase is a better approach to stimulating the economy; but I doubt that an across-the-board tax cut, as has been proposed, relating only to individual taxes, will produce the results expected by the sponsors of this amendment.

Mr. President, I have before me an analysis of the Roth-Kemp individual tax rate cut proposal, which shows, according to the Congressional Budget Office, that the effect on GNP growth for calendar year 1978 would not be the $43.4 billion claimed by the sponsors of this amendment but, rather, an increase of $21 billion; that jobs created as a result of this amendment would not be 1.2 million, as claimed by the sponsors, but, rather, 0.4 million, according to the CBO estimates.

Also the revenue losses which, according to both sponsors and CBO would be $21.1 billion, the reflows show a great difference in the figures, the figures of the anticipated reflow. The sponsors project a reflow of $11.1 billion, but CBO reflects a reflow of only $4.6 billion, so that net cost of the amendment for calendar year 1978 is not the $10 billion which the sponsors project, but rather, according to CBO, $16.5 billion.

So we have a wide difference of opinion as to the effect of this amendment and, in my judgment, the Congress would be well-served to be guided by CBO on matters of this kind.

It is easy for those of us who sponsor an amendment to be carried away by our own arguments, but it is the responsibility of the CBO to look at this matter objectively.

There is general agreement that two problems exist in the economy today: First, general lack of confidence, particularly in the business sector; and second, lack of capital investment. The fiscal year 1978 cost of this amendment appears to be $11.4 billion, but in fact, the full year cost will likely be almost twice that large. Given the immediate impact on the deficit of such a revenue loss, I believe that this amendment would send the wrong signals to the business and investment community and thus would not solve either of the major problems in our economy today.

There are probably three problems with the timing of this amendment. First, given the fact that a major tax reform effort will be made by the Finance Committee in the immediate months ahead, I believe this is the wrong time to consider a cut in personal taxes. We all agree that personal taxes are too high and inflation each year adds to the burden. But, with major tax reform immediately ahead, we will not help confidence on the part of business or consumers by accepting the sweetness of a tax cut now since we all know the bitter pill of eliminating many tax preferences still lies ahead. Also we know that adding significantly to our deficit is going to increase the pressures of inflation and make the situation worse not better.

This may be the one time that a tax cut will not help since everyone will still be waiting for the other shoe of tax reform to fall sometime next year.

The second concern I have with this amendment involves the lack of capital investment. The missing runner in this relay race called economic recovery is capital investment. The consumer has carried the baton too long. The tax cut proposal before us now does nothing to remove the barriers to capital investment.

Finally, it should be noted that CBO has a significantly different analysis of the impact of a tax cut of this size and nature on GNP growth, jobs created and reflows. In general, CBO indicates the benefits are probably less than 50 percent of the level claimed by the sponsors.

Mr. President, I ask unanimous consent that a table showing the CBO calculations and the effect of this amendment be inserted in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ANALYSIS OF ROTH-KEMP INDIVIDUAL RATE CUT

Year	GNP growth (billion)		Jobs created (millions)	
	Roth	CBO	Roth	CBO
1978	$43.4	$21.0	1.2	0.4
1979	95.5	64.0	2.5	1.2
1980	157.4	114.0	4.0	1.9

REVENUE LOSS (CALENDAR YEAR BASIS)

Year	Gross cost		Reflows		Net cost	
	Roth	CBO	Roth	CBO	Roth	CBO
1978	21.1	21.1	11.1	4.6	10.0	16.5
1979	48.1	48.1	25.8	15.3	22.3	32.8
1980	81.8	81.8	45.8	27.9	36.0	53.9

REVENUE LOSS (FISCAL YEAR BASIS)

Year	Gross cost		Reflows		Net cost	
	Roth	CBO	Roth	CBO	Roth	CBO
1978	14.3	14.3	7.5	2.9	7.0	11.4
1979	39.2	39.2	21.0	11.5	18.2	27.7
1980	71.7	71.7	40.1	24.6	31.6	47.1

DISTRIBUTION OF REVENUE LOSS

[Percent of total cut]

AGI class	Fiscal year—		
	1978	1979	1890
0 to 5,000	0.7	0.7	0.7
5,000 to 10,000	7.6	7.6	7.6
10,000 to 15,000	14.0	14.8	14.7
15,000 to 20,000	17.4	17.4	17.5
20,000 to 30,000	25.2	24.7	24.3
30,000 to 50,000	16.1	16.1	16.0
50,000 to 100,000	11.2	11.4	11.4
100,000 plus	7.8	7.5	7.7

Mr. BELLMON. In summary, Mr. President, I am afraid this proposed tax cut would just send the wrong signal to the private sector and would simply jump the fiscal year 1978 deficit to a record-breaking $75 to $80 billion. I point out in 1976 we had a deficit of $66.4 billion. In 1977, this was down to $45.1 billion and now under the terms of this amendment we would be going to somewhere between $75 and $80 billion. This deficit burden

on an economy struggling to recover would surely be inflationary and would drive confidence down further. I say this despite my general approval of a tax cut which is carefully designed, thoroughly considered, and properly timed.

As a final note, Mr. President, I would add that Congress has already passed legislation which reduces fiscal year 1978 revenues by $17.8 billion when it completed work on the tax stimulus bill earlier this year.

Therefore, Mr. President, while I agree in theory with what the sponsor of this amendment tried to accomplish, I feel the amendment should be rejected because it is not timely; it is not, in my judgment, carefully designed. We will be having ample opportunity to consider this next year during the tax reform debates.

Mr. MUSKIE. Mr. President, how much time do I have?

The PRESIDING OFFICER. Twenty-two minutes.

Mr. MUSKIE. Mr. President, I yield myself 10 minutes.

May I say, first of all, to my good friend from Delaware that he has never voted for a budget resolution, I think the record discloses that, although he was a very important voice in trying to shape, he was involved in trying to shape, the Budget Reform Act.

Clearly then this amendment arises out of his own personal philosophical difference with every budget resolution enacted into law. He prefers his own economic policy to that adopted by the Congress as a whole, and it is out of that difference that this amendment arises, as I see it.

Second, the Senator said that the Budget Committee worries about deficits only when a tax cut is proposed. Well, I challenge that. Any examination of the record of Senate consideration of the budget resolutions in 1975, 1976, and 1977 indicates that this Senator, and a ma'ority of the Budget Committee, and the Senate as a whole, have rejected proposals to increase spending because of the impact on the deficit, and we have lost only three of those.

I have never supported a proposal to increase the budget resolutions by amendments on the floor even when some of those amendments were very attractive politically, including yesterday's agriculture amendment, including last spring's housing amendment, including last spring's veterans' amendment.

So when the Senator says the Budget Committee is concerned with deficits only when he proposes a tax cut I take sharp issue with him.

Second, the Senator argues that we ignore what he regards as an economic truism, that the tax cut of 1964 caused an increase in revenues of $54 billion.

May I say to the Senator there has been no testimony before the Budget Committee by economists of any point of view in the 3 years the Budget Committee has existed which supports what he regards an economic truism.

A great deal of the increase in revenues that has taken place has been the result of growth in the economy. Undoubtedly there was a stimulative effect to the tax cuts of 1963–64. But to argue that revenue increases that have taken place since then are wholly caused by that stimulus simply is not supported by any economic opinion to which I have had access.

With respect to the Senator's amendment, if we follow one of the growth paths suggested by CBO for analytical purposes, if the economy grows fast enough under this growth path, to reduce the unemployment rate to 4½ percent by 1981 without additional tax reduction, then individual income taxes under current policies will be $305 billion in fiscal year 1981.

Thus, a 10-percent permanent tax reduction would then result in a gross revenue loss of $30 billion by fiscal year 1981.

Mr. President, my opposition to the Roth amendment is not based upon any personal philosophical judgment that tax cuts are always inappropriate. As the distinguished Senator from Oklahoma has pointed out, the Budget Committee underwrote, approved and supported, tax cuts earlier this year amounting roughly to $18 billion in 1978. That is larger, incidentally, I might add, than the Kennedy tax cut of the early 1960's.

So if you want to use that misunderstood historical analysis, I mean we have already provided that kind of a tax cut. The question is do we want to do it now.

Let us look at the effect of the Roth amendment. These numbers are in the Roth amendment, as corrected. If the Roth amendment is adopted revenues for 1978 will be reduced from the $395 billion now provided in the budget resolution to $383.6 billion, a reduction of $11.4 billion.

That would result in an increase in the deficit for 1978, which is listed in the budget resolution at $64.7 billion after yesterday's action, to $76.1 billion in accordance with the Senator's own amendment.

It would result in an increase in our total national debt from the $778.9 billion now in the budget resolution to the $790.3 billion, which is the figure that would end up in the budget resolution according to the Roth amendment. Beyond that, the increase in the national debt this year would rise according to the Roth amendment from $78.9 billion to $90.3 billion.

Mr. President, the question of whether or not the economy requires this kind of stimulus at the present time is an important question. It is a question which has been before the Budget Committee since the first of the year, and we have proposed a mix of policies, tax reductions and spending policies designed to accommodate a stimulative policy.

It has been our view that our stimulative policy must be a moderate and steady one in order to avoid not only the problems of a recessionary economy but also the potential problems of increased inflation, and this policy has been examined now by Congress on three occasions in this calendar year: in early spring before final action on the first concurrent resolution, at the time of the first concurrent resolution, and now at the time of the second concurrent resolution. I assure the Senate that no problem has been higher on the agenda of the Budget Committee than the examination of that problem, how you achieve a proper balance between the spending requirements of Government programs and the need to stimulate the economy and the burdens that we impose on our people by way of taxes.

I think the resulting policy, as to which Senator ROTH clearly on the record is opposed totally by voting against every budget resolution, has been supported by Congress, as a whole, on at least three separate occasions in this calendar year.

What this amendment would do is this: It would increase the fiscal year 1978 deficit from $64.7 billion to an unacceptable high area of $76 billion. The Senator speaks of business confidence. I wonder how business confidence would be supported by that kind of an increase in the deficit. We already face the difficulty of achieving a balanced budget bv 1981, beginning with a deficit of $64.7 billion in 1978. How credible would be our argument that a balanced budget by 1981 is still our goal if we arbitrarily increase the deficit this year to $76 billion, which would be the new figure?

Second, a major tax reduction this year would undoubtedly limit our ability to produce a tax reform package of the kind the economy needs. We know that a major tax reform package will be proposed this year, and its goals should be these: to encourage capital formation, to simplify our tax system, and to improve tax equitv. A tax cut will be necessary to achieve those goals. And I fail to understand how anyone who has been exposed to tax writing legislation in this Senate over the years would disagree with that point.

A tax reform package involving these kinds of goals must be accompanied by a tax cut as a practical matter if we are to achieve it.

The PRESIDING OFFICER (Mr. ANDERSON). The Senator's 10 minutes have expired.

Mr. MUSKIE. I yield myself another 5 minutes.

An across-the-board rate cut will not remove impediments to capital formation. It will not simplify the tax system. It will not improve tax equity.

Thus, it would be unwise, in my judgment and in the judgment of the Budget Committee, to lose the revenue associated with an across-the-board rate reduction when what is needed is tax reform. And to pretend that you can get tax reform after you have given away your tax cut I think is simply to be legislatively unrealistic in the extreme.

Finally, Mr. President, as we contemplate other problems with which this country is confronted, the cost of health care, the cost of welfare reform, the need to develop alternative energy sources and the capital requirements that may be involved, the tax incentives that may be required, the need to develop mass transportation systems and the public role that has yet to be defined fully, as one contemplates those kinds of problems, and others, to eliminate future revenues now in a misguided tax cut would be to

limit our options in the future with respect to those problems.

These are the reasons, Mr. President, and I tried only to supplement the statement of my good friend from Oklahoma, Senator BELLMON, why the Budget Committee has taken the position it has on a permanent tax cut now. We oppose it for all these reasons.

May I say, finally, that no one has been a more articulate proponent of the concept of permanent tax cuts as against temporary tax cuts than the Senator from Oklahoma. He has already stated his own philosophical view that tax cuts are a more effective stimulus than some spending programs.

Nevertheless, putting all of the facts with which the Budget Committee had to deal in the context of his own philosophical beliefs, he had reached the same conclusion that I have. So that this conclusion is not the product of ED MUSKIE's liberal philosophy, or of HENRY BELLMON's conservative philosophy. It is a practical judgment.

As Senators know, we used to make economic policy on the floor of the Senate by ad hoc decisions of the kind involved in the Roth amendment, ignoring the overall context and balance that needed to be struck, the problem of setting priorities, the problem of fitting our spending and revenue policies into some rational economic goal. We used to do it that way. Apparently, it is the desire of some on the floor of the Senate to return to that way of doing business.

That way of doing business produced all kinds of consequences which led to the adoption of the Budget Reform Act. It led to excessive spending. It led to spending on low priority programs. It led to tax and spending programs that did not respond sensitively enough or quickly enough to the needs of the economy. It led to the proliferation of Government as new programs and new agencies, that might not have otherwise been justified if a system of priorities had been in effect came into existence and proliferated, created the administrative chaos with which every Member of this body, I think, takes exception now, the public mood being what it is.

So what I am saying, Mr. President, and I have said over and over again on the floor of this Senate, is we have a budget process. It is Congress means for setting economic policy and a majority of this Senate has supported those resolutions and the policy after understanding its composition.

Senator ROTH does not believe in what we have done. He believes in the process because he supported it, but he does not support its results. I suggest that those of us who contributed to the policies which have been developed under that process should look carefully at his amendment for that reason as well as for the other substantive reasons which I have tried to outline.

Mr. President, I reserve the remainder of my time.

Mr. ROTH. Mr. President, in view of the fact that I have expended considerable time in the hearings on Mr. Lance, and was not able to come down here, the Senator from Utah and the Senator from California have both very generously agreed—and I want to ask at this time if they are willing—to permit me to have 10 minutes of the time that has been allocated to both of them for the subsequent amendments.

Mr. HAYAKAWA. I am happy to agree to that.

Mr. MUSKIE. I think in order to do that we would need unanimous consent.

Mr. ROTH. Yes. I wanted to ask them publicly if they were agreeable.

Mr. MUSKIE. Is that 10 minutes from each?

Mr. ROTH. Ten minutes from each, to be taken from their time.

Mr. MUSKIE. As I understand, the Senator's request is that the time available to each of them on their amendments be reduced by 10 minutes, and that that 20 minutes be allocated to the Senator from Delaware?

Mr. ROTH. That is correct.

The PRESIDING OFFICER. Is there objection?

Mr. MUSKIE. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. I thank all the Senators concerned in permitting this modification to be made.

Mr. President, I think it is very important to make two points at the beginning. First, what I am proposing is in accordance with the budget process. It is true, and I take great pride in the fact, that I was a key architect in the formation of the new budgetary process; but I think it is only fair to point out that the purpose of the budgetary process is to permit debate and discussion on all alternatives, not only in the Budget Committee but on the floor of the Senate as well, so that the will of the Senate can be determined.

Mr. President, it is true that I have voted against the budget resolutions because they do not reflect what I believe to be sound economic policies for the future growth and development of this Nation. But before I get into some discussions on that, I would like to make very clear, because I think the issue has been clouded, what we are proposing here.

What my amendment does, and the only thing that it does, is permit Congress to enact a tax cut if it deems it desirable for 1978. If this amendment is not adopted, we will be prevented, under the budget resolution, from doing so. That is all it does.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. ROTH. I would like to continue, if I may.

Mr. MUSKIE. The Senator does not wish to hear my question?

Mr. ROTH. I yield on the Senator's time, yes.

Mr. MUSKIE. I wish to make the point that the budget process inescapably establishes a budget resolution which imposes limitations applied to revenues and spending. Is the Senator saying it is unwise, as a permanent thing, to have that kind of restraint?

Mr. ROTH. What I am saying, in answer to the distinguished chairman, is that I think that under present conditions, it makes sound economic sense that flexibility be provided for a tax cut during the current year.

Mr. MUSKIE. Should we not have, then, a budget resolution at all?

Mr. ROTH. All I have suggested is that I am offering an amendment to the resolution to provide for that flexibility.

Mr. MUSKIE. Some other Senator may think yours is not big enough, and this may be a restraint on him.

Mr. ROTH. Mr. President, I would just point out that a part of the budget process is to permit the consideration of individual Senators' thoughts.

Mr. MUSKIE. Of course.

Mr. ROTH. There is nothing beholden or sacred about what the Budget Committee recommends. We are here right now to see whether the Senate agrees or disagrees with what the committee has recommended. All I am proposing at this time is, because of the economic circumstances, I happen to think it is wise, very wise, to permit flexibility during this year to permit Congress to propose a general tax reduction.

Mr. MUSKIE. If the Senator will yield again on my time, the point I am making is that the idea of flexibility, as I understand the Senator's definition, is that that flexibility ought to be available to any Senator. If that is the case, then any number adopted by the Senate as a whole is an undesirable restraint upon the flexibility available to Senators.

The budget resolution was adopted in the spring. The revenue numbers the Senator is talking about are the revenue numbers adopted by the whole Congress. The Senator says that is an undesirable lack of flexibility; so the inescapable conclusion, as I see it, is that the Senator is against any limitation on revenue collections in budget resolutions that does not conform to his own economic views.

Mr. ROTH. I shall answer; then I would like to proceed with my discussion.

In answer to what the distinguished Senator has said, it is my position that, because of the economic conditions in this country today, a general tax reduction is very much in order. I believe, therefore, that that flexibility should be built into the general budget resolution.

I emphasize again that we are not today proposing any specific tax cut. If the budget resolution gives us the authority to move forward with a general tax reduction for fiscal year 1978, then, of course, what kind of tax reduction will be enacted will have to be determined according to the congressional processes, which necessarily means that the House Ways and Means Committee as well as the Senate Finance Committee and the House and the Senate together, ultimately with the approval of the President, will determine what that general tax reduction should be.

It is a mistake and an error, as far as I am concerned, at this stage to confuse this amendment to the budget resolution with a specific or particular tax reduction.

It is true that I intend to continue to fight for an across-the-board tax rate reduction for working Americans, be-

cause I think it is the most important thing that can be done to provide jobs and to get our economy moving.

In all candor and all honesty, it seems to me that the thrust of the arguments of those opposing my amendment is the same one made year in and year out, because they want bigger spending and more Washington involvement. Mr. President, if there is one message that it seemed to me was very clear in the campaign last fall—and our President, who was elected, ran on that platform—it was that we should have less Government, less Washington, and less involvement in the life of the average American.

The fact that I have voted against every resolution does not mean that I am against the budgetary process. It means I was against the budget resolution proposed and amended on the Senate floor.

What I am trying to say is that these budget resolutions, every year, have reflected increases in Government spending, and that is the basic argument being made today against my amendment: "We cannot have any tax cut because we have to prepare for more Federal spending."

I say that there are always areas where we can have more Federal spending, but what concerns me—I say to the distinguished chairman, the Senator from Maine, and to the distinguished ranking Republican member, the Senator from Oklahoma, read that article in this week's Newsweek. The American people are fed up with high taxes. They are concerned about the fact that they are faced with downward mobility. The great American dream is no longer here. The American dream of buying a home, of sending your children to college, of taking a vacation—these are what make up the American dream, and this is what has propelled the American economy forward. But we are hearing the same old kind of arguments that have been made year in and year out, that have gotten us into this horrible combination of inflation and unemployment: "Well, we have to have more tax revenue because we need more Government spending."

What I am saying is that I have voted against those resolutions because I think what needs to be done—and somewhere, somehow, we have to make a start—is to bring down the size of the Federal Government.

I support a lot of these new programs, but I think much of the money we are spending could be better spent.

I am saying that a general tax reduction, if we do what Mr. KENNEDY proposed, is the way to provide more funds for more Federal programs and to have growth in the economy.

Mr. President, the economic indicators today are such that a general tax reduction is in order. I do not think there is any particular need of once again reviewing why I think that is desirable. I believe it is desirable because, as Mr. Heller said about the Kennedy proposal, by giving the private sector the opportunity to operate, we had people working, we had more productivity, we had people saving, we had more people move out of the ranks of unemployment and into meaningful jobs in the private sector, and, by doing so, we reduced many of the costs of spending—something like $14 billion for every 1 percent of unemployment. The whole thrust of the operation was to provide more revenue for the Federal Government so that new programs which were needed could be financed and supported.

That is all I am trying to do today, to provide the opportunity for this Congress to enact a meaningful tax reduction which will have that effect. What it would be like would remain to be seen. I have my own ideas as to what it should be.

I believe it is desirable because it is about time we start listening to middle America, the working people, and give them an opportunity to once more enjoy upward mobility and to further promote the economy of this country.

Mr. President, I yield the floor.

Mr. MUSKIE. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator only has 4 minutes remaining.

Mr. MUSKIE. I was told I had 7 minutes a moment ago.

The PRESIDING OFFICER. Some of that time was used. Four minutes remain.

Mr. MUSKIE. I think there is an essential correction of the RECORD to be made. No. 1, I have been in the Senate 19 years. There have been no increases in personal income taxes in all that period, except for the temporary surtax in the midyears of the Vietnam war. But there has been a series of tax cuts over that period.

There have been increases in payroll taxes tied to increases in social security benefits. With respect to personal income taxes, the fact is that, as a percentage of personal income, income taxes were 10.8 percent in 1967 after the Kennedy tax cut, and were 10.7 percent of personal income in 1976. So there has not been this steady increase in income taxes that the Senator from Delaware implied in his statement.

Finally, Mr. President, I would repeat the essential objections to this amendment. If adopted, it would throw into disarray the economic plan which the Congress as a whole adopted early in the spring, which the Budget Committee recommends implementing with the second budget resolution.

It would face us with an increase in the deficit for 1978 of over $11 billion.

It would result in a permanent tax cut which would close our options, or sharply reduce our options, for tax reform and to deal with some of the other problems with which we are confronted, such as the cost of national health insurance, the cost of welfare reform, some of the energy problems we face, some of the mass transportation problems we face, and some of the environmental problems we face.

If we want to close off those options, abandon our own economic plan, then we should vote for the Roth amendment. If we choose not to stick with what the Congress put in motion in the spring by way of a budgetary and economic program and plan, throwing the whole process overboard in terms of what it has produced this year, then vote for the Roth amendment. If Senators do not want to do that, then vote against the Roth amendment.

That is the essence of the issue. I am content to yield back the remainder of my time.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. ROTH. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator has 12 minutes remaining.

Mr. ROTH. Let me make one brief comment.

In answer to the distinguished chairman that there has been no tax increase, I believe the average American would, in substance, disagree very sharply with that. It is a well known fact that inflation has caused a substantial tax increase for every American. As a matter of fact, I think CBO says that for every 1 percent increase in inflation, there is a 1.5 percent increase in taxes.

One of the things which I think has concerned so many of us is that in a very real way inflation has served the purposes of Government. By pushing more people into higher tax brackets, more funds flow into the Federal Government. The Federal Government is thereby able to finance new programs without voting to increase any taxes for that purpose.

Mr. MUSKIE. Will the Senator yield for a question? I have no time left.

Mr. ROTH. I will be happy to yield.

Mr. MUSKIE. May I point out that inflation is not an enacted tax increase. The Senator did not distinguish between increases resulting from inflation and increases resulting from deliberate congressional policy.

Secondly, just as inflation increases tax receipts, it also increases the cost of Government. It increases the level of interest payments, it increases the cost of many spending programs. Most of the increases in the Federal budget over the last year are attributable to inflation and the impact of unemployment on the levels of our people. So this increase in taxes related to inflation is not free money available to the programs.

Mr. ROTH. I would like to make two points:

One, as far as the man or woman back home, inflation has directly the same effect as increasing taxes. It can be argued that the policy of the Government has promoted inflation and thereby indirectly increased taxes.

On the second point, I think it is only fair to say that it has been shown that the Government does get taxes in addition to the inflationary increased cost of Federal programs.

I do not want to argue technicalities, but I am basically concerned with the impact on the average working man and woman. All I can say on that point is if we talk to any of them in Delaware or elsewhere, I am sure we will find the majority feel that taxes, in effect, have been increased.

I will be happy to yield——

Mr. MUSKIE. Mr. President, may I ask for the yeas and nays at this point?

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROTH. I yield to the Senator from Utah.

Mr. HATCH. I would like to add to this discussion. With regard to some of the remarks of my dear friend and colleague, Senator BELLMON, I believe that a 10-percent permanent reduction in personal income tax rates may actually result in a smaller net revenue loss than the $11.4 billion proposed.

The $11.4 billion was the net revenue loss projected by the Congressional Budget Office, using their econometric models. However, all the conventional econometric models do not adequately estimate the revenue flows from a reduction in the tax rates. This is because they only reflect the increase in personal disposable income resulting from a tax cut. They in no way take into account the change in the relative attractiveness of work as opposed to leisure and consumption as opposed to investment. Thus, they are not constructed to take into account, it seems to me, the incentives to work longer, to work harder, to save more, to take greater risks, to be more innovative, et cetera, which are produced by what we are arguing for here today, a tax cut.

These shortcomings of the econometric models have been acknowledged by Dr. Alice Rivlin, by Mr. Bert Lance, and by Chase Econometrics. They are not recognized by the Budget Committee or most of the Congress. Therefore, I propose reducing the revenue figure in the second concurrent resolution by the greatest projected net revenue loss.

I think that the opponents to the Roth amendment have been speaking basically against the tax cut on the basis of these econometric models and have not taken these reflows into consideration.

Mr. MUSKIE. Will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. MUSKIE. The $11.4 billion comes out of the amendment of the Senator from Delaware.

Mr. HATCH. That is true.

Mr. MUSKIE. Obviously, the Senators fear that may be the revenue consequences and they want to put plenty of room in the budget resolution to cover the $11.4 billion.

If we are ever going to have our own personal econometric model in order to control our votes on these tax measures, we are going to have the kind of chaos of the Smoot-Hawley tariff era, when we used to write tariff policy on the floor of Congress.

The $11.4 billion figure, as I am using it, is in Senator ROTH'S amendment. I gather the same thing is in the amendment of the Senator from Utah.

Mr. HATCH. I understand that. The point I am making here is that it is one thing to say we are going to have $11.4 billion less in revenue, based upon faulty econometric models, which have been admitted to be faulty.

Mr. MUSKIE. If the Senator is citing Dr. Rivlin and Mr. Lance as authorities for that statement, I challenge it.

Mr. HATCH. I am citing the fact that all three have admitted that we are not taking into account the supply side feedbacks that could occur from a tax cut and the other econometric models upon which the Budget Office has based this figure.

Mr. MUSKIE. On the contrary, I have checked with the CBO and the reflows are taken into account with respect to the $11.4 billion figure. To estimate on this kind of thing is not a perfect art and far from a science. But to leap from that point to the conclusion that they are phony, upon what do we rely for the expert data upon which to base policy judgments?

Mr. HATCH. All I can say is I do not know who told the Senator that, but that is not true.

Mr. MUSKIE. I think our contacts with CBO are relatively close.

Mr. HATCH. That is the point I am making. I believe, and I think the Senator will find, on closer check, that Rivlin, Lance, and Chase Econometrics admit that they have not taken these into consideration and that they should be taken into consideration. In fact, Chase is going to change its econometric model as a result of some of the suggestions that have come inevitably from the arguments we are making here, today, frankly, from some of the people working with me.

Also, I might add that Senator LONG has complained about this, that we have really made some faulty projections in revenue estimates.

Mr. MUSKIE. As I say, I, myself, would agree, on the basis of testimony we have taken for 3 years, that these models are not perfect instruments for estimating anything. But we have to use what we have at the moment in order to maintain some consistency in policymaking. If each of us is to enjoy the privilege of coming to the floor and, individually, changing these estimates to suit ourselves on the basis of our own evaluation of what the models ought to be producing, we shall have utter chaos on the floor. That is all I am saying.

To say they cannot be improved—of course, I am not going to put myself in that position. But to say, on the other hand, that the Senator has now come upon a perfect model is again something I am not prepared to say.

Mr. HATCH. Neither am I prepared to say that, except that we know the models that have been used are not perfect, are far from perfect, in fact are imperfect.

Mr. MUSKIE. So we toss out everything?

Mr. HATCH. No, but I hope the Senator is not advocating the position that individual Senators cannot come on the floor with amendments that may be appropriate and may, in fact, be accurate and may, in fact, be important to this country and may, in fact, save the average Joe American Taxpayer from being ripped off.

Mr. MUSKIE. I am not saying that. I think it is permissible for me to say, on the basis of the provisions of the amendment itself, that what we are talking about is an $11.4 billion reduction in revenues.

Mr. HATCH. I think everybody agrees to that.

Mr. MUSKIE. Because that is what the amendment says. What the Senator has been trying to persuade us of is that it is not really going to be $11.4 billion. It is going to be something less. I have to take the amendment at face value and I am not going to agree to a verbal amendment, on the basis of the Senator's personal econometric model, that it is not $11.4 billion we are talking about, it is something less.

Mr. HATCH. I understand the Senator's argument very well. But my argument, and that of the distinguished Senator from Delaware, is that it is incomprehensible to us not to take into consideration that every tax cut in the last 30 years except one, to my knowledge—I cannot remember which one that was, but I think I have to allow an exception for one—has resulted in a net revenue gain rather than a loss.

Mr. MUSKIE. That, I challenge. The Senator cannot tell me that Dr. Rivlin and Mr. Lance and others support that, because that very proposition has been put to more than one economist before our committee.

Mr. HATCH. Does the Senator challenge the 1964 Kennedy tax cut?

Mr. MUSKIE. No, I do not challenge the tax cut, but I do challenge Senator ROTH'S conclusion that that tax cut produced an increase of $54 billion in Federal revenues, because there is nothing in the record to support that kind of arithmetic.

That is not to say it had no stimulative effect. Of course it had a stimulative effect. May I remind the Senator that, as of 1977, the percentage of personal income which is paid to the Government as individual tax receipts is, today, 10.7 percent, as compared to 10.8 percent after the Kennedy tax cut.

Mr. HATCH. The Senator will admit, however, that the Kennedy tax cut did result in a net revenue gain?

Mr. MUSKIE. No, it resulted in some stimulus to the economy, which I was for. I voted for it. I was here.

Mr. HATCH. I know, and that is why I am surprised he is not voting for it now.

Mr. MUSKIE. I made a similar argument, but I have never made the exaggerated claims with respect to its effect on Federal revenues that I have heard here this morning.

Sure it was a stimulus.

Mr. DOLE. Mr. President, the amendment before the Senate would provide the reduction in revenue floor to accommodate a major across-the-board tax cut during the 1978 fiscal year. The Senator from Kansas has long been a proponent of tax reduction for every American. The time to act on substantial tax relief is now and adoption of this amendment would be an important first step.

ECONOMY SLOWING DOWN

Several days ago it was reported by the Department of Labor Statistics that unemployment increased from 6.9 percent to 7.1 percent. The unemployment rate for black teenagers is about 35 percent. These figures are alarming.

Budget Committee economists analysis indicated a slowdown in economic growth for the third and fourth quarter of 1977.

The administration has added billions of dollars to our deficit without boosting business and consumer confidence. This amendment would clear the way for a tax cut next year and thus assure economic recovery.

TAXES CONTINUE TO INCREASE

Over the past decade, taxes, which are the most visible portion of the cost of Government, have expanded their percentage of the family budget more rapidly than any other cost-of-living item. Since 1950, Government spending has increased by nearly 600 percent for every man, woman, and child in America. By contrast, per capita clothing, food, and shelter expenses grew at about 170 percent, 145 percent, and 200 percent, respectively, over the same period.

Government spending has grown astronomically and so have the income taxes, payroll taxes, and other taxes needed to finance it. In fact, it was not until the first week in May that the average American worker earned enough income to pay all his taxes—Federal, State, and local—for this year.

Mr. President, if we want to do something to help the average working American, we need a tax-cut which would provide relief for a significant percentage of the taxpaying population.

SPENDING SHORTFALL

Mr. President, there is room in this budget for a tax cut. An article in Business Week magazine this week reminds us that the Federal spending shortfall—funds budgeted for use but not spent—was $11 billion last year. The shortfall is expected to reach $12–$14 billion in the current fiscal year. The article suggests that this may be the result of "overestimating" by the administration.

Mr. President, I ask unanimous consent that the article may be printed in the RECORD.

Based on the shortfalls experienced in fiscal year 1976 and fiscal year 1977, it has been estimated that the shortfall in fiscal year 1978 could be $10 billion or higher. If these funds are not to be used, Mr. President, it seems to this Senator unreasonable and inappropriate tax policy to continue to collect these funds from the already overburdened taxpayer.

The amendment we are considering would make it possible to provide these tax cuts, and to free up this additional money to help stimulate the economy.

Mr. President, the overburdened American taxpayer has waited long enough. Passage of this amendment will be a sign that Congress recognizes the tax burdens of our constituents.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ANOTHER SPENDING GAP HAUNTS WASHINGTON

The federal budget shortfall, which helped slow the economy in 1976, is back in an even more disruptive form. This time the government's inability to spend appropriated funds to help fuel the economy could produce a spending gap of $12 billion to $14 billion by the time fiscal year 1977 ends on Sept. 30. Moreover, the shortfall could persist into next year, contributing additional drag on a recovery that is already slowing.

Administration spending estimates have dwindled steadily since last February, when federal outlays for the year were estimated at $417.4 billion by the Office of Management & Budget. The abandonment of President Carter's tax-rebate proposal, which included $3.2 billion worth of $50 checks technically classed as government expenditures, trimmed the spending target to $414 billion. The drop from that target since then has been dramatic.

FALLING FORECASTS

The OMB and the Treasury Dept. started reporting underspending by a host of federal departments and agencies last spring. By July 1 the OMB's mid-session budget review reported that federal spending was running at a $406.4 billion annual rate. OMB Director Bert Lance predicted that some agencies would catch up later in the year. But only days later, he revised the figure to $404 billion.

With only a month to go on the current fiscal year, there is almost no chance that agencies will be able to close the gap. Administration sources, noting that the annual spending pace was only $398.4 billion through July 31, expect the final tally to reach $401.5 billion to $402 billion. But Capitol Hill budget experts are betting on a flat $400 billion.

So far, underspending is across the board. Some major examples: $1.5 billion in defense; $1.8 billion in foreign military sales; $600 million at the Health, Education & Welfare Dept.; $300 million in the Labor Dept.'s job-training programs, plus an additional $600 million in its public-service employment program; $800 million at the Environmental Protection Agency; and $600 million in the unemployment trust fund, where the jobless rate among insured workers has run below expectations.

DOWN ALL OVER

One bemused Administration official thinks that there is "a built-in bias in the budget that tends to overestimate outlays early in the planning process." This source adds: "We're down a bit all over the place, which makes me suspect this will keep happening in fiscal 1978."

For the past year, the OMB has been demanding that department and agency chiefs improve their spending forecasts. Now it wants them to spend what they legitimately can before this fiscal year runs out. Failure could have serious consequences. Last year's shortfall of $11 billion was tagged by the Congressional Budget Office as one cause of the second-half lull in the recovery. The CBO estimated that the shortfall cost the economy about half a point in real gross national product for six months.

Now CBO Director Alice M. Rivlin has predicted that real GNP in the second half of 1977 will grow by only 4%. When the Administration forecast 5% growth, it assumed a smaller shortfall. Thus the shortfall may again cost the economy a point of growth on an annual basis.

The inability of government to count on budgeted money moving into the spending stream as planned augurs badly for 1978. The second half of Carter's stimulus program is supposed to kick in on Oct. 1 to buoy the economy and cut unemployment. Council of Economic Advisers Chairman Charles L. Schultze, who lost the battle to retain the tax rebate last winter, consoled himself with the expectation that a major job-creation program would pick up the slack in fiscal 1978—rising to a peak annual spending rate of $21 billion by next spring. The continuing shortfall problem makes Schultze's expectation more a hope than a certainty.

POLITICAL TOLL

The shortfall also has political consequences. It plays hob with the efforts of Senate Budget Committee Chairman Edmund S. Muskie (D-Me.) and House Budget Committee Chairman Robert N. Giaimo (D-Conn.) to control congressional spending. The congressional budget process almost collapsed last spring over their battle to hold down appropriations for fiscal 1978. And Muskie will soon go to the mat with farm state lawmakers over an agriculture bill that exceeds the 1978 ceiling.

So the Administration's uncanny ability to "save" billions of dollars by accident weakens the hand of the Budget Committee and the case for spending restraint on Capitol Hill.

The PRESIDING OFFICER. All the time on the amendment has expired.

Mr. STONE. Will the Senator yield for a unanimous-consent request?

Mr. HATCH. Yes, I yield.

Mr. STONE. Mr. President, I ask unanimous consent that Nancy Foster of my staff may have the privilege of the floor during debate and votes on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Arkansas (Mr. MCCLELLAN), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Minneosta (Mr. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from New York (Mr. JAVITS), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

On this vote, the Senator from New Mexico (Mr. SCHMITT) is paired with the Senator from Oregon (Mr. HATFIELD). If present and voting, the Senator from New Mexico would vote "yea" and the Senator from Oregon would vote "nay."

The result was announced—yeas 23, nays 63, as follows:

[Rollcall Vote No. 357 Leg.]

YEAS—23

Allen	Domenici	Helms
Baker	Durkin	Laxalt
Bartlett	Garn	Proxmire
Byrd, Harry F., Jr.	Goldwater	Roth
Curtis	Hansen	Schweiker
Danforth	Hatch	Stevens
Dole	Hayakawa	Thurmond
	Heinz	Zorinsky

NAYS—63

Anderson	Eagleton	Matsunaga
Bayh	Eastland	McGovern
Bellmon	Ford	McIntyre
Bentsen	Glenn	Melcher
Biden	Gravel	Metcalf
Brooke	Hart	Metzenbaum
Bumpers	Haskell	Morgan
Burdick	Hathaway	Moynihan
Byrd, Robert C.	Hollings	Muskie
Cannon	Huddleston	Nelson
Chafee	Inouye	Nunn
Chiles	Jackson	Pearson
Church	Johnston	Pell
Clark	Kennedy	Percy
Cranston	Leahy	Randolph
Culver	Long	Ribicoff
DeConcini	Magnuson	Riegle

Sarbanes	Stafford	Tower
Sasser	Stennis	Weicker
Scott	Stone	Williams
Sparkman	Talmadge	Young

NOT VOTING—14

Abourezk	Javits	Packwood
Case	Lugar	Schmitt
Griffin	Mathias	Stevenson
Hatfield	McClellan	Wallop
Humphrey	McClure	

So Mr. ROTH's amendment was rejected.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. MUSKIE. Mr. President, it is my information that there are two more amendments pending, following the one on which the Senate just acted. There are 50 minutes on each. I do not believe that 50 minutes will be required on each. It might take as little as 30 minutes. I do not know of any other amendments that are definite at this point.

Mr. ROTH. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. ROTH. The Senator from Delaware does have an additional amendment. I say to the chairman that I have to return to the Lance hearings. I expect to be back in time, but that is beyond my control.

Mr. MUSKIE. I will do my best to protect the Senator, but the Senator understands that the time is running. Within the limits of that time, I will do my best to protect the Senator.

Mr. ROTH. If the Senator will notify me, I will get here.

Mr. MUSKIE. I do not know which of the other two amendments is to be called up at this point. Does the Senator from Utah have any information and can he enlighten me on that?

Mr. HATCH. Senator HAYAKAWA has an amendment, but I do not know where he is. Let me suggest the absence of a quorum.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the time for the quorum call be charged to neither side.

The PRESIDING OFFICER. Without objection, it is so ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MORGAN). Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HAYAKAWA. Yes.

Mr. MUSKIE. Mr. President, on behalf of the distinguished Senator from Virginia, Senator HARRY F. BYRD, Jr., I ask unanimous consent that John I. Brooks, of his staff, may have the privilege of the floor during the consideration of this pending measure and the votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HAYAKAWA. Yes.

Mr. BELLMON. Mr. President, I make the same request for Michael Shorr of the Committee on Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order, please. Those conversing in the aisles will please retire to the cloakroom.

UP AMENDMENT NO. 785

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) for himself, Mr. HATCH, and Mr. ROTH proposes unprinted amendment No. 785;

On page 1, line 7, delete the numeral and insert in lieu thereof "$383,600,000,000".

On page 1, line 9, delete the numeral and insert in lieu thereof "$12,000,000,000".

On page 1, line 11, delete the numeral and insert in lieu thereof "$489,400,000,000".

On page 2, line 2, delete the numeral and insert in lieu thereof "$447,900,000,000".

On page 3, line 17, delete the numeral and insert in lieu thereof "$6,600,000,000".

On page 3, line 18, delete the numeral and insert in lieu thereof "$9,000,000,000".

On page 3, line 21, delete the numeral and insert in lieu thereof "$22,100,000,000".

On page 3, line 22, delete the numeral and insert in lieu thereof "$22,400,000,000".

On page 4, line 3, delete the numeral and insert in lieu thereof $174,300,000,000".

On page 4, line 4, delete the numeral and insert in lieu thereof "$142,100,000,000".

On page 4, line 16, delete the numeral and insert in lieu thereof "$8,600,000,000".

On page 4, line 17, delete the numeral and insert in lieu thereof "$8,700,000,000".

On page 4, line 22, delete the numeral and insert in lieu thereof "$400,000,000".

On page 4, line 23, delete the numeral and insert in lieu thereof "$500,000,000".

Mr. HAYAKAWA. Mr. President, I am disappointed that the Senate has not seen fit to adopt Senator ROTH's amendment to adjust the revenue figure in the budget resolution in order that a 10-percent across-the-board reduction in the personal income tax rates could be accommodated in fiscal year 1978. I think it should be clear that this revenue figure adjustment does not guarantee passage of such a tax rate reduction. Without this adjustment in the revenue figure, however, it would be impossible for the Congress to enact this type of income tax cut within the next fiscal year.

Time and time again, this body has refused to enact a reduction in personal income tax rates. In May we were told to wait for the President's tax reform proposal in September. Well, it's September, and we do not have a tax reform package from the administration. And in addition, it is becoming clear that the administration is not really interested in cutting taxes.

Quite the contrary, although the President is talking about cutting income tax rates, he is also talking about taxing employee benefits that have heretofore never been taxed as income. This in combination with the President's energy taxes will result in a net increase in the tax burden on the American people. This is how the President plans to balance the budget by 1981.

Calculations made from the administration's 5-year budget projections by the House Budget Committee minority show that, rather than balancing the budget by holding back Federal spending, the President plans to increase the tax burden on the American people to a higher level than it has ever historically reached since the Korean war. During this period, the Federal tax burden on the American people has averaged about 18.6 percent of GNP. Presently, the Federal tax burden is about 19.6 percent of GNP. By 1981, the President plans to raise the Federal tax burden on the American people to a historical high of 21 percent or more, higher than that achieved even during the Vietnam war.

Mr. President, I ask unanimous consent to insert in the RECORD at this time tables prepared by the House Budget Committee minority showing this tax information. as well as those showing that the President will not achieve a balanced budget without this increase in the tax burden.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

PROJECTED SURPLUS/DEFICIT OF CARTER BUDGET UNDER VARIOUS TAX BURDEN ASSUMPTIONS (CARTER LONG-RANGE ECONOMIC ASSUMPTIONS)

[In billions of dollars]

[1] Calculated from Office of Management and Budget *Midsession Review of the 1978 Budget.*

Mr. HAYAKAWA. I do not believe that this is the proper approach to balancing the Federal budget. The tax burden on the American people is already too high. This high tax structure is destroying the incentives of our people to work and to produce, to invest and save their money. In other words, this high level of taxation produces a drag on our economic growth. Increasing the tax burden will only produce more of an economic drain and it is doubtful whether the president will be able to achieve the rate of growth his projections indicate will be required to reach a balanced budget in 1981, even with the increased level of taxation. This is why, Mr. President, I believe that the Senate should not wait for the President's tax package in order to reduce the tax burden on the American people.

However, Mr. President, since the Senate is unwilling to accept the personal income tax cut because it will increase the deficit, I am offering an amendment which would again adjust the revenue figure to accommodate a 10 percent across-the-board reduction in personal income tax rates, and also reduce budget outlays by a comparable amount. According to CBO estimates, a 10-percent reduction in personal income tax rates would result in a net revenue loss of $11.4 billion in fiscal year 1978. In order to cut budget outlays by $11.4 billion I have made the following reductions in functional spending totals:

Mr. President, may I ask for order?

Mr. CURTIS. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senate will please come to order. Will those conversing on the floor of the Senate please retire to the cloakroom? The Senator has suspended until we have order in the Senate.

Mr. HAYAKAWA. I thank the Chair.

Function 450, the community and regional development, would be reduced by $1.4 billion;

Function 500, education, training, employment and social services would be reduced by $4 billion;

Function 600, in ome security, would be reduced by $4.5 billion;

Function 850, revenue sharing, would be reduced by $1 billion; and finally,

Function 920, allowances, would be reduced by $0.5 billion.

Let me explain the rationale for these particular cuts.

Mr. CURTIS. Mr. President, will the distinguished Senator yield?

Do I understand the Senator's proposal to be in two parts, one calling for a tax reduction and the other one calling for a comparable amount in expenditure reduction?

Mr. HAYAKAWA. Yes, the distinguished Senator from Nebraska is quite right.

Mr. CURTIS. It has been the history of tax reductions when they are kept within bounds that they increase the revenue rather than decrease the revenue. Does the Senator accept that premise?

Mr. HAYAKAWA. Yes, I believe it is true.

Mr. CURTIS. In this case where you not only reduce the taxes but the expenditures also, it is not very likely that the increase in revenue will be greater than usual because on the face of it it does not add to the deficit and what it will do to the economy is add to the venturesomeness of our people and their desire to go ahead and build a strong and growing economy? Does the Senator believe that?

Mr. HAYAKAWA. The Senator from Nebraska is entirely right. I think that the benefits will be far greater than the pure monetary amounts involved in the tax cut and in the expenditure cuts, that is, there will be an incentive effect.

Mr. CURTIS. Is it not true that one of the things that is holding back our economy in the private sector is the awareness and the fear that it brings of the constant growth of Federal expenditures?

Mr. HAYAKAWA. One hears this constantly. There is the discouragement of people in savings and investment because of this constant fear of increased Federal taxation. That is quite right.

Mr. CURTIS. I thank the Senator.

Mr. HAYAKAWA. So, then, let me proceed by explaining the rationale for these particular cuts:

At the time of the third concurrent resolution on the budget for fiscal year 1977 substantial amounts of money were added to functions 450, 500, 600, and 850 as part of a stimulus program. This additional money was added in budget authority, and in every case except revenue sharing, there was no significant increase in fiscal year 1977 outlays. However, this additional budget authority is now appearing as substantial increases in outlays in 1978. I believe that the American people would prefer to reduce spending in these functional areas to more normal levels and receive a permanent tax cut in their place.

For instance, budget authority for community and regional development had already been increased 66 percent in the second concurrent resolution on the fiscal year 1977 budget above the level for that functional area in fiscal year 1976. In the third concurrent resolution on the budget for fiscal year 1977, this budget authority was increased even more, so that the total increase over the fiscal year 1976 level of budget authority was 124 percent

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HAYAKAWA. I yield.

Mr. MUSKIE. I wonder if we might ask for the yeas and nays at this point. We have enough Senators in the Chamber.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. I thank the Senator.

Mr. HAYAKAWA. May I proceed, Mr. President?

The PRESIDING OFFICER. Yes.

Mr. HAYAKAWA. In the education, training and social services function, budget authority had been increased 13 percent in the second concurrent resolution over the fiscal year 1976 level.

In the third concurrent resolution, budget authority was increased even more so that the total percentage increase over fiscal year 1976 was 43 percent. Outlays on revenue sharing were increased a total of 34 percent in the third concurrent resolution over the fiscal year 1976 level of spending. And budget authority in the income security function was increased 23 percent over the 1976 level of spending.

None of this additional spending for stimulus programs has had any affect on the economic recovery to date. The spending on these programs has progressed at an even slower rate than anticipated, and very little spending has occurred so far on any of these stimulus programs. The one weak point in the economic recovery to date, which is recognized widely by economic advisers, has been business investment spending. The increased spending on these so-called stimulus programs will do nothing to improve business confidence. However, a reduction in personal income tax rates would allow individuals a greater after-tax return on savings and investment, thus encouraging them to save and invest their money. A tax cut will increase business confidence, spur business investment, and result in greater real growth and the creation of permanent, productive jobs in the private sector. This is the one fiscal policy alternative that would do the most to spur business investment, yet we continue to ignore it. A permanent tax cut will also remove the disincentives that have developed as a result of inflation moving individuals into higher and higher effective income tax brackets.

The rationale for my final cut, that in function 920, is different from that for the other spending cuts, function 920, of course, is allowances. Federal employees are now scheduled to receive a 7.05 percent cost-of-living increase in their salaries this coming October. If my amendment were adopted, they would receive a different package. In October they would receive a 3.5 percent raise, but in addition, they would receive a 10-percent

reduction in their income tax rates. This reduction in their taxes would affect not only the income from the raise, but their total income. Therefore, under my alternative, Federal employees would receive a smaller raise, but they would also receive a tax cut which they would not receive under the present alternative, and in dollar terms, they would be better off. That is, their after-tax income would be greater than it is now.

Mr. President, I do not feel that a lengthy discussion is necessary here. Senator ROTH has already eloquently outlined the economic reasons for this tax rate reduction. Those who supported Senator ROTH's proposal were willing to leave room for the permanent tax cut without insisting upon comparable reductions in budget outlays. However, since the majority of the Senate is unwilling to do this, we have decided to present in addition to the tax cut comparable spending cuts. What we are in effect doing is substituting one form of stimulus for another form of so-called stimulus. We believe that this permanent reduction in the personal income tax rates will do much more to spur our economic recovery than these massive spending programs, which will only benefit special interest groups. We believe the Senate has a clear choice here. It can continue to defend its pet spending projects, keeping the special interest groups happy, or it can choose to offer the American people a much needed and deserved reduction in their income tax rates. I personally favor giving every American citizen a benefit. A permanent tax cut is the way to do this. I hope the Senate will see the wisdom of this alternative and adopt my amendment.

Thank you, Mr. President.

Mr. CURTIS. Mr. President, will the Senator yield me some time?

Mr. HAYAKAWA. Yes; I yield time. I yield to the Senator from Nebraska.

Mr. CURTIS. Mr. President, I rise in support of the proposal of the distinguished Senator from California.

In preface to that, I state this: The budget law was passed by the support of many people in the United States who wanted the budget brought under control and the budget balanced. It is my belief that the vast majority of those supporters of the budget law did not want the budget process or the Budget Committee to become fine tuners in a failing attempt to improve our economy. They wanted a balanced budget.

I am also convinced that the idea of a welfare state and the preservation of our private enterprise system are totally incompatible. We have to choose one or the other. The welfare state is a failing doctrine. What Congress has done in promoting a welfare state has assured a continuous depression. The evil of our present budget system is clearly shown in that it is a means by which Congress agrees in advance to a huge deficit and then we say we are pure, we are doing our job because we are not exceeding the pre-agreed deficit.

My primary reason for supporting this proposal is because it offers a clear vehicle to reduce expenditures. If we do that, and reduce tax rates at the same time, we will increase the available revenue. But we will still have too much Government.

Now, it will be said, "How can Senator HAYAKAWA's plan work?"

Well, he has outlined specific places for cutting $11.4 billion. One of those items is function 600, income security, which he would reduce by $4.5 billion.

Mr. President, that is in the realm of possibility. The Senator from Nebraska has authored legislation in this particular field to substantially take care of that, and I will enumerate it.

There is pending before the appropriate committee of the Senate a National Welfare Reform Act of which the Senator from Nebraska is a principal sponsor in the Senate. Here are some of the items that are proposed, and that can be done without injury to the poor and unfortunate of the country:

We can, for instance, revise the formula for persons with high outside income.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CURTIS. May I have some more time?

Mr. HAYAKAWA. I am glad to yield the Senator some more time.

The PRESIDING OFFICER. All time of the Senator from California has expired.

Mr. CURTIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CURTIS. How much time was allocated to the Senator from California?

The PRESIDING OFFICER. The Chair is advised that the Senator from California yielded 10 minutes of his time to the Senator from Delaware, which left him 20 minutes.

Mr. CURTIS. May I have some time off the bill?

Mr. MUSKIE. May I say to the Senator, there is not much time left on the bill, because time on these amendments comes out of the time on the bill. I will be happy to yield 5 minutes to the Senator out of my time on this amendment.

Mr. CURTIS. I appreciate that, but I do not want to deprive the Senator.

Mr. MUSKIE. No, I am not going to use it all.

Mr. CURTIS. We need the time because we do not have the votes. If you can give me some votes, I would give up my request for the time.

Mr. MUSKIE. I would assume that in giving the Senator more time, I am giving him the equivalent of votes.

Mr. CURTIS. The Senator leaves me speechless.

Revisions of eligibility and grant formula in reference to persons with high outside income, specifically changing the present "$30⅓" income disregards, 4-month rule, and insertion of a gross income ceiling in our welfare program, would result in a saving of $1 billion.

Elimination of voluntarily unemployed persons from caseloads, and other inappropriate beneficiaries such as students, strikers, and illegal aliens, $200 million.

Strengthened work requirements, such as mandated job search and community work experience programs, $200 million.

More aggressive fraud control efforts, including photo-identification and access to records for cost checking, $100 million.

Enhanced quality control performance, including tolerance levels and rewards and penalties based thereon, $600 million.

Improved child support performance through parent locator service and State use of child support incentive payments, $200 million.

Resource utilization changes, such as pro rata reductions when a welfare family lives with a noneligible caretaker, or two welfare families live together, $100 million.

That totals $2.4 billion, under the welfare program.

Under food stamps—and these are amendments I have already offered on the floor:

Gross eligibility ceiling at poverty index plus $100 standard deduction would save $700 million, and it would not take food away from one hungry person in this country.

Revision in purchase requirement to reflect consumer expenditure survey on what families normally spend for food, $500 million.

Strengthened assets test—there is none in the law now. There is no assets test on foodstamps, $300 million.

Strengthened work requirements, as in AFDC, $200 million.

Elimination of inappropriate beneficiaries. such as students, strikers, and aliens, $200 million.

Retrospective accounting, $800 million.

That is a total of $2.7 billion.

Now, when we go overboard in some of these programs, it automatically makes people eligible for medicaid. Automatic savings in eligibility and benefits by AFDC reforms and those in SSI as they occur, $1 billion saved in medicaid—not from taking it away from the needy, but from those who should not have it.

Oh, I wish that great and powerful Budget Committee would turn their attention to reducing the cost of Government by attacking the job of too many programs and too big items in here, rather than assuming it cannot be done.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. CURTIS. I am happy to.

Mr. BELLMON. I believe the Senator will agree with me that these programs to which the Senator refers are entitled programs, that are put in place by the authorizing committees and put in place by the full Congress. There is no way the Budget Committee can change the law.

Mr. CURTIS. That is correct.

Mr. BELLMON. We tried, 2 years ago, to get the Finance Committee to change the law to the extent of $2 billion, and we got into all kinds of trouble with the Finance Committee chairman and the ranking minority member of that committee.

There is no way the Budget Committee can change the law. We have to make room in our resolution for what the law requires.

Mr. CURTIS. But there is a way in which you can recommend changes in the law and report to the Senate as to what would be saved.

The reference the Senator made was in reference to the Budget Committee's

effort to determine the details of the tax laws.

Mr. BELLMON. That is what the Senator is suggesting now, that we determine the entitlement programs.

Mr. CURTIS. No, that you bring in a budget that says that if Congress changes the law and cuts these programs by a certain amount, we could reduce expenditures by that amount.

Mr. MUSKIE. But, if the Senator will yield, all we did on the tax bill was to provide $2 billion of tax expenditure reductions, and we got nowhere with the Finance Committee.

Mr. BELLMON. And you interpreted that as an unjustified encroachment by the Budget Committee on your jurisdiction.

Mr. CURTIS. Well, I think it was.

Mr. BELLMON. Other committees would feel the same way.

Mr. CURTIS. You did not bring it in as a recommendation.

Mr. MUSKIE. Of course we did. It was in the committee report.

Mr. CURTIS. No, you brought it in as something to be accomplished by your action.

Mr. MUSKIE. But you, just a moment ago, voted for a similar thing. You voted for an $11.4 billion tax cut, which, if included in the resolution, would mean we as a committee would have mandated that the Finance Committee change the tax law. Now, you objected to that last year; yet you voted for it just a few minutes ago.

Mr. CURTIS. No, no; I concede to the Budget Committee the right to set levels.

Mr. MUSKIE. That is what we did last year and this year.

Mr. CURTIS. Not to write the details of tax law.

The PRESIDING OFFICER. The 5 minutes of the Senator from Nebraska has expired. We are now on the time of the Senator from Maine.

Mr. MUSKIE. On the assumption that I took at least 2 minutes of that time, I yield the Senator from Nebraska 2 additional minutes.

Mr. CURTIS. The Senator is most gracious. I thank the Senator.

I reiterate, I appreciate the gift of time and I would appreciate much more his gift of some votes.

Here are the ways we can save this money: under SSI, improved quality control, performance, and tolerance levels, $200 million.

Mr. BELLMON. If the Senator will yield, SSI is the responsibility of the Finance Committee.

Mr. CURTIS. Yes.

Mr. BELLMON. If the Finance Committee will make provision for those savings, I assure the Senator the Budget Committee will accommodate those savings.

Mr. CURTIS. All I am reading from is the pending legislation of the Senator from Nebraska.

In the food stamp items which I have read, it would bring about a reduction of $2.7 billion. As I recall, the distinguished Senator from Oklahoma attempted to help me on some of those. I appreciated that very much. I did not get any help from the majority members of the Budget Committee.

My complaint against the tax activity of the Budget Committee is twofold. I might as well lay it out in the open.

One is I do not think it is their purpose to determine the details of the tax program but to set levels.

Second, I think they have added to an erroneous contention in this country. That is that if we just make some change called tax reform there would be plenty of money for everything. That perhaps was not intended, but the country gets that idea. The only way we can have any relief is to reduce expenditures, and the only way we can reduce expenditures is to reduce the size of the welfare state. We have to choose in this country between the welfare state and our present economic system.

The PRESIDING OFFICER. The Senator's additional time has expired.

Mr. CURTIS. I thank my distinguished friend for yielding the time.

Mr. HAYAKAWA. Will the Senator yield for a brief moment?

Mr. MUSKIE. Yes.

Mr. HAYAKAWA. Mr. President, there are a couple of clerical errors in the amendment I submitted. I would like to correct those. I send a corrected copy of the amendment to the desk.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

On page 1, line 7, delete the numeral and insert in lieu thereof "$383,600,000,000".

On page 1, line 9, delete the numeral and insert in lieu thereof "$12,000,000,000".

On page 1, line 11, delete the numeral and insert in lieu thereof "$489,800,000,000".

On page 2, line 2, delete the numeral and insert in lieu thereof "$448,300,000,000".

On page 3, line 17, delete the numeral and insert in lieu thereof "$5,600,000,000".

On page 3, line 18, delete the numeral and insert in lieu thereof "$9,000,000,000".

On page 3, line 21, delete the numeral and insert in lieu thereof "$22,100,000,000".

On page 3, line 22, delete the numeral and insert in lieu thereof "$22,400,000,000".

On page 4, line 3, delete the numeral and insert in lieu thereof "$174,300,000,000".

On page 4, line 4, delete the numeral and insert in lieu thereof "$142,100,000,000".

On page 4, line 16, delete the numeral and insert in lieu thereof "$8,600,000,000".

On page 4, line 17, delete the numeral and insert in lieu thereof "$8,700,000,000".

On page 4, line 22, delete the numeral and insert in lieu thereof "$400,000,000".

On page 4, line 23, delete the numeral and insert in lieu thereof "$500,000,000".

Mr. HAYAKAWA. Mr. President, I would like to include Senator HELMS and Senator CURTIS as additional cosponsors of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I yield myself 10 minutes.

Mr. President, this amendment includes the Roth tax cut amendment which the Senate has just rejected. I believe the argument on that amendment was sufficiently comprehensive so it is not necessary to repeat the applicable elements of that argument on this amendment. I will address myself to the spending cuts proposed by the distinguished Senator from California, the principal sponsor of this amendment.

I would like to make the point, and I think it is a legitimate point, Mr. President, that both the Senator from California and the Senator from Nebraska yesterday voted to increase spending in the agriculture function by $700 million. The effect of that, of course, was to increase the deficit, to increase the debt, and make it more difficult to achieve a balanced budget.

I cite that not so much to needle these two Senators as to make the point that what the Budget Committee is faced with is to try to accommodate the views of 100 Senators, the views of all authorizing committees, and the views of the Appropriations Committee in undertaking to present a budget resolution to the Senate.

The Senator from Nebraska chose to describe the deficit in this budget resolution as something we recommended on its own merits. That deficit is the product, may I remind Senators, of the program spending that is contained in the resolution, all of which is a reflection of recommendations by Senate committees, and we did not provide in the budget resolution all that all authorizing committees requested.

So the Budget Committee does not initiate spending. It simply responds to requests for spending and has done so with restraint. It has done so by adjusting total requests. The deficit numbers that come out are the mathematical result of those decisions.

When we come to the floor and the Senate, as a whole, adds to that spending, who is responsible for that? The Budget Committee?

This amendment is offered on the assumption that spending cuts are easy. Well, if spending cuts in other programs are easy, may I ask the Senator from California, why did he not demonstrate that yesterday by voting against a specific spending increase? Each of these proposals has a constituency. That one had a farm constituency. But there are other constituencies across the country. Each of them watch what we do. When a vote like yesterday is taken and carried, then these other constituencies say, "Why can't we have more?" So the city people come in and they want more. The jobless come in and they want more. The veterans come in and they want more. Everybody wants more.

The Senator from Louisiana, the distinguished chairman of the Finance Committee, is fond of saying that from his cynical point of view—and he is not necessarily cynical but sort of pragmatic—that the rule with respect to new taxes is "Don't tax you, don't tax me, tax the fellow behind the tree."

Well, we could apply that here. "Don't cut you. Don't cut me. Cut the fellow behind the tree."

Yesterday, I take it the Senator from California and the Senator from Nebraska voted to cut the fellow behind the tree. Now the Senator from California has identified the people he sees behind the tree in the proposed cuts he has offered. That is the situation in which we find ourselves.

Let me say this about the second budget resolution: The Budget Committee, in considering the second resolution, engaged in careful deliberation on spending for social programs as well as all other programs in the budget. As a matter of fact, the second resolution represents cuts in social programs and an increase in the agricultural function of $1.25 billion, which was made possible by cuts in social programs. That is what happened in the second concurrent resolution.

In fact, the functional totals in this resolution are equal to or less than the first resolution targets for all human resources functions.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a table showing spending totals for the human resources functions in the first and second budget resolutions. The net result is a reduction in budget authority for those purposes of $2.3 billion, and a reduction in outlays for those purposes of $1 billion.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Function	1st resolution		2d resolution	
	Budget authority	Outlays	Budget authority	Outlays
Education, training, employment and social services	26.8	27.2	26.1	26.4
Health	47.9	44.3	47.7	44.2
Income security	179.9	146.7	178.8	146.6
Veterans' benefits and services	20.25	20.2	19.9	20.2
Total	274.85	238.4	272.5	237.4

Mr. MUSKIE. Thus, the second resolution for social spending is tighter than the Congress agreed to last spring. Almost all the 1978 spending, may I say in addition, is contained in bills the Senate has already passed. What the Senator is proposing is to cut spending which is already a part of law. Almost all the supplementals assumed in the second resolution, such as for forward funding of CETA public service jobs, were assumed in the first resolution as well. The second resolution also anticipates enactment of savings legislation in the health and income security functions.

With the economic recovery still far from complete, it would be poor timing, Mr. President, for Congress to reduce spending below the levels Congress adopted earlier in the year. Unemployment remains over 7 percent. Unemployment of blacks has actually surged upward to 14.5 percent. President Carter has expressed concern about the need to ameliorate this situation.

To suggest budget cuts in job creation programs and in programs designed to alleviate human suffering is to suggest a completely inappropriate course of action, a course contrary to both Presidential and congressional policy up to now.

Further, Mr. President, in order to implement the budget cuts in these functions proposed by the Senator from California, we would have to have a rescission of about $9 billion of actions already completed or underway in the Senate.

In other words, we would have to undo what has already been done as the result of the appropriations process and by the Senate and the Congress as a whole if we were to adopt this. We would have to encourage the President to rescind actions already taken in order to implement that.

I ask unanimous consent that a table illustrating this impact be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Second budget resolution proposed outlays in functions 450, 500, 600, 850, 920	$194.1
Hayakawa amendment	−11.0
Remainder	182.7
Action completed and underway as of September 1 (5 functions above)	191.7
Cut required in action completed and underway (5 functions above)	−9.0

Mr. MUSKIE. Mr. President, this act would bear heavily on the States and local governments who are already budgeting the general revenue sharing and countercyclical funds which are now law. Congress would have to rewrite the law and take back this money just 3 weeks before the start of the fiscal year, totally disrupting the budget process in these localities.

I also note, Mr. President, that the reduction of the announced Federal pay raise which is proposed by this amendment, would, again, require amendment to existing law and would work a severe hardship on loyal Federal employees who are counting on these funds to meet the rising cost of living.

More than that, the Senator's amendment treats different classes of Federal civilian employees differently from others. It would not apply to DOD civilian Federal employees. It would apply only to non-DOD civilian employees, thus creating an inequity, for which I have heard no justification whatsoever.

Mr. President, there is only one way to deal with the kind of responsibilities that Congress faces when it considers the priorities of Federal spending. That is to do what we now do in the Budget Committee and in authorizing committees: Consider, program by program, service by service, the requirements; hold them down to the minimum that our judgment tells us is needed to meet real problems; and then act, on the basis of that selective judgment, to determine what resources should be made available to meet these program needs. To come in here and, without that kind of consideration, just propose arbitrary cuts, many of which would require changes in existing law which the Budget Committee cannot make, which the Senate has not indicated a disposition to make, is simply unreal.

The PRESIDING OFFICER. The Senator's time has expired. Twelve minutes remain.

Mr. MUSKIE. I yield myself 2 more minutes.

With respect to the proposals of the distinguished Senator from Nebraska, I will say that, every time he has made his opposition to budget resolutions known, he has offered his own specific ideas as to how it can be done. He handed to me a 2-page list of proposals dealing with several welfare programs. I am happy to ask unanimous consent to have that list printed in the RECORD so that the record may reveal he has presented them to me.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Aid to Families with Dependent Children (from S. 1719, Curtis-Duncan, National Welfare Reform Act of 1675):

	Billion
Revisions in eligibility and grant formula re persons with high outside income (change in "$30 and ⅓" income disregards, four-month rule, and insertion of gross income ceiling)	$1.0
Elimination of voluntary unemployed persons from caseloads (and other inappropriate beneficiaries, e.g., students, strikers, illegal aliens)	.2
Strengthened work requirements, such as mandated job search and community work experience programs	.2
More aggressive fraud control efforts, including photo-identification and access to records, for cross-checking	.1
Enhanced quality control performance, including tolerance levels and rewards and penalties based thereon	.6
Improved child support performance, through Parent Locator Service and state use of child support incentive payments	.2
Resource utilization changes, such as pro rata reductions when welfare family living with non-eligible caretaker to two welfare families living together	.1
Total	2.4

Food Stamps (S. 1993, Buckley-Michel, National Food Stamp Reform Act of 1975; reflects Curtis amendments rejected in Senate Agriculture Committee and on floor):

	Billion
Gross eligibility ceiling at poverty index plus $100 standard deduction	.7
Revision in purchase requirement to reflect Consumer Expenditure Survey on what families normally spend for food	.5
Strengthened assets test	.3
Strengthened work requirements, as in AFDC	.2
Elimination of inappropriate beneficiaries (students, strikers, aliens)	.2
Retrospective accounting	.8
Total	2.7
MEDICAID	
Automatic savings in eligibility and benefits as AFDC reforms (and those in SSI) occur	1.0
SSI	
Improved quality control performance, with tolerance levels and more accurate redeterminations	.2
Total	1.2
Grand total	$6.3
Of the above amount, 50% of the AFDC savings are state-county. Deduct from total	1.2
Net	5.1
Income Security	4.1
Health	1.0

Mr. MUSKIE. I say, Mr. President, commenting on these items generally, and I shall look at them specifically when I have the opportunity to do so, that we have asked the Committee on Finance, for example, to save $300 million in health and $300 million in income security spending. I understand that the chairman of the Committee on Finance feels that this amount of savings for fiscal 1978 may be impossible. If that is his judgment, it is an important judgment. He is the chairman of the committee which can recommend legislation to effect the changes. If that committee finds it difficult to do, I fail to understand how the Budget Committee can do so.

Incidentally, with respect to the tax issue which the Senator from Nebraska has raised, there was nothing in last year's budget resolution detailing the tax reforms that the Budget Committee thought needed to be achieved. We said that tax reforms raising a certain total amount of revenue seemed to be a reasonable budget goal in the public interest. We left it to the tax-writing committee and to Congress as a whole to determine the details. We did not. We subsequently voted individually as Senators on specific tax reform proposals, but the Budget Committee never recommended a detailed tax reform proposal and never would. We do not regard that as our responsibility.

In the same way, we do not regard it as our responsibility—though some of us might welcome it if we were to be perfectly frank—we would not even try to impinge on committee responsibilities to detail program changes.

We are not that kind of committee, we were not given that kind of authority. That is why the law says that, by March 15, other committees will report to us so that we can have the benefit of their judgments. We depend a great deal upon those judgments and will continue to do so. But, then, when we are criticized because we did not assume the jurisdictional authority of these other committees to be detailed and to be specific, I have to remind Senators that that is not the nature of our present jurisdiction and authority.

With that, Mr. President, I urge rejection of this amendment.

Mr. BELLMON. Will the Senator yield for a second?

Mr. MUSKIE. I yield to my good friend from Oklahoma.

Mr. BELLMON. I wonder if the chairman of the Budget Committee remembers, as I do, that in 1977, when the budget resolution came from our committee, we anticipated a $500 million savings in the food stamps, AFDC, and social security programs, and we got nothing, exactly zero.

Mr. MUSKIE. That is right.

Mr. BELLMON. I am curious as to why the Senator from Nebraska, who is on the Finance Committee which has jurisdiction over those programs, or many of them, was not able to help us out in achieving these savings we asked for. The simple action of the Budget Committee does not produce the savings. It takes the actions of the authorizing committees to accomplish the savings that the Budget Committee anticipates.

Mr. CURTIS. I think I have.

Mr. BELLMON. The savings were not realized.

Mr. CURTIS. Oh, no. I have only one vote there. But I offered to the Senate the opportunity to reduce the agricultural budget by $2 billion.

Mr. BELLMON. What happened to the $500 million that the Budget Committee asked the Finance Committee to accomplish in the AFDC and social security programs? Did the Finance Committee bring forth a detailed proposal?

Mr. CURTIS. I supported it.

Mr. BELLMON. The Senator from Nebraska is asking the Budget Committee to make certain savings. We asked for these savings and the Finance Committee did not respond.

Mr. CURTIS. As to the items on these entire 2 pages, I have voted for every one of these.

Mr. BELLMON. That is the action of the Senator from Nebraska. I am asking what the Finance Committee did to support the Budget Committee request for this saving? The saving was anticipated in our 1977 budget resolution and nothing happened.

Mr. CURTIS. I can only answer for one member of the Committee on Finance. It does not require much research for me to assure the Senator that what I am saying is correct, because I am against the welfare state and voted against the creation and expansion of practically all of them.

Mr. BELLMON. Let me ask the Senator a further question.

In the 1978 budget, the Budget Committee wanted a $800 million savings in health care, plus a $600 million saving in welfare programs. This totals $1.4 billion. Are we going to get that from the Committee on Finance?

Mr. CURTIS. May I ask this: Was it included in the Budget Committee estimate that the administration's recommendation is that we just put a ceiling on the amount of increase in hospital care, if that were included? That is purely a demagogic proposal, without any substance, and cannot work.

Mr. BELLMON. The Budget Committee does not have the responsibility nor the authority for detailing what savings should be made. We simply asked that the Finance Committee save $800 million in health care and $600 million in welfare.

Does the Finance Committee have a proposal for that saving?

Mr. CURTIS. The Senator from Nebraska, as one member of the Finance Committee, has a proposal now before the Finance Committee that would save $1 billion in health programs.

Mr. MUSKIE. If the Senator will yield, I understand what the Senator's own personal preferences would be and what he would write into law if he had sufficient votes and authority.

But the Budget Committee has to deal with what the committee process produces in this Senate. We cannot write the Senator from Nebraska's budget resolution. We have to write a resolution that reflects the consensus of the Senate committees in the Senate.

For example, authorizing committees this year asked us to provide a total of $540.9 billion in budget authority. We provided $39.7 billion less than that.

Authorizing committees requested a total in outlays of $474.4 billion. We provided $15.4 billion less than that.

We do our best to exert downward pressure on the requests of committees, on the Senate's inclination to increase spending from time to time—as we did yesterday—and often without success—as yesterday—and the Senator from Nebraska and the Senator from California voted against the Budget Committee yesterday.

Mr. CURTIS. No. I offered amendments here on the floor.

Mr. MUSKIE. I am talking about yesterday's vote, which was the vote that decided the issue.

What the Senator offers that he does not get support for in his committee is something different.

Yesterday, we had a specific issue which was going to determine whether or not this budget resolution authorized an additional $700 million in spending and the Senator from Nebraska voted for the spending.

That tells me a lot more than some bill the Senator introduced that did not get enough votes to pass. Yesterday's action passed. It became the official action of the Senate.

Both my friends, the Senator from California and the Senator from Nebraska, voted for it. That is their prerogative. All I am saying is that other Senators vote their prerogatives, too, and we cannot control their votes any more than we could control the Senator's votes yesterday.

Mr. CURTIS. Well, the——

Mr. MUSKIE. If I may, I yielded 7 minutes to the Senator.

So the best we can do is try to exert downward pressure on everybody, try to insure that the right priorities are reflected, and are the reflection of the consensus in the Senate. Then when we come to the floor we are told from time to time, "Mr. Chairman, you're not meeting the responsibilities of the Budget Act, you're reporting deficits, you're reporting excessive spending."

I have not found many people in this Senate who are consistent in arguing that philosophy. When I find one, I am going to illuminate him. I do not find many who are consistent.

Mr. CURTIS. Will the Senator yield for 20 seconds?

Mr. MUSKIE. Yes.

Mr. CURTIS. On the total votes on this floor on agriculture, I have voted for a net, not counting the increase I voted for yesterday, a net of $1.3 billion over what is in the budget, and the net vote is what counts.

Mr. MUSKIE. Over what is in the budget?

Mr. CURTIS. I voted for that much reduction.

Mr. MUSKIE. But the point is that the numbers in this budget resolution, and those who vote for them, are what opens the door to others to increase agricultural spending.

When we raise the ceiling on a function, we do not identify what the Senator would spend. We identify what the Con-

gress as a whole is authorized to spend, and that is what was done yesterday.

Mr. CURTIS. It was very well identified.

Mr. MUSKIE. It was not. The budget resolution does not itemize programs.

Mr. CURTIS. No. Everybody knew this was not $700 million that we were trying to take out of the food stamp program. It was very well identified.

Mr. MUSKIE. It was well identified, but the numbers the Senator recommended for the budget resolution was not S. 275 that is coming up today. The numbers we put in the budget resolution yesterday are not earmarked for S. 275. They are earmarked for any spending in that function and food stamps do not happen to be in that function.

Mr. CURTIS. They are in the——

Mr. MUSKIE. But they are not in that function.

The PRESIDING OFFICER. The time of the Senator from Maine has expired. All time on the amendment has expired.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent to add to the list of sponsors on my amendment the name of the Senator from Idaho (Mr. McCLURE).

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment, as modified, of the Senator from California. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Arkansas (Mr. McCLELLAN), the Senator from Illinois (Mr. STEVENSON), and the Senator from California (Mr. CRANSTON) are necessarily absent.

I further annonuce that, if present and voting, the Senator from Minnesota (Mr. HUMPHREY) would vote "nay."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from New Jersey (Mr. CASE), the Senator from Oregon (Mr. HATFIELD), the Senator from New York (Mr. JAVITS), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. McCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), and the Senator from New Mexico (Mr. SCHMITT) would each vote "yea."

The result was announced—yeas 16, nays 69, as follows:

[Rollcall Vote No. 358 Leg.]

YEAS—16

Bartlett	Hansen	Roth
Byrd, Harry F., Jr.	Hatch	Schweiker
Curtis	Hayakawa	Scott

So Mr. HAYAKAWA's amendment, as modified, was rejected.

Mr. MUSKIE. Mr. President, may I say to my colleagues that we have another amendment coming up sponsored by my good friend from Utah, Senator HATCH. We have each agreed to cut our remarks to the bare minimum, and I will say we will have another vote in 20 minutes, at the most 30 minutes.

Mr. HATCH. I think less than that.

Mr. MUSKIE. Less than that I suspect.

UP AMENDMENT NO. 786

Mr. HATCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. SASSER). The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH), for himself, Mr. HAYAKAWA, and Mr. ROTH, proposes an unprinted amendment in the nature of a substitute No. 786.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $383,600,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $12,000,000,000;

(2) the appropriate level of total new budget authority is $488,900,000,000;

(3) the appropriate level of total budget outlays is $448,300,000,000;

(4) the amount of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors is $64,700,000,000; and

(5) the appropriate level of the public debt is $778,900,000,000, and the amount by which the temporary statutory limit on such debt should be accordingly increased is $78,900,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares, pursuant to section 310 (a) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):

(A) New budget authority, $113,700,000,000.

(B) Outlays, $107,300,000,000.

(2) International Affairs (150):

(A) New budget authority, $8,100,000,000.

(B) Outlays, $6,400,000,000.

(3) General Science, Space, and Technology (250):

(A) New budget authority, $4,800,000,000.

(B) Outlays, $4,600,000,000.

(4) Natural Resources, Environment, and Energy (300):

(A) New budget authority, $24,300,000,000.

(B) Outlays, $20,300,000,000.

(5) Agriculture (350):

(A) New budget authority, $2,000,000,000.

(B) Outlays, $6,100,000,000.

(6) Commerce and Transportation (400):

(A) New budget authority, $20,000,000,000.

(B) Outlays, $19,100,000,000.

(7) Community and Regional Development (450):

(A) New budget authority, $7,800,000,000.

(B) Outlays, $10,100,000,000.

(8) Education, Training, Employment, and Social Services (500):

(A) New budget authority, $25,400,000,000.

(B) Outlays, $25,700,000,000.

(9) Health (550):

(A) New budget authority, $46,500,000,000.

(B) Outlays, $43,100,000,000.

(10) Income Security (600):

(A) New budget authority, $174,300,000,000.

(B) Outlays, $142,900,000,000.

(11) Veterans Benefits and Services (700):

(A) New budget authority, $19,400,000,000.

(B) Outlays, $19,700,000,000.

(12) Law Enforcement and Justice (750):

(A) New budget authority, $3,700,000,000.

(B) Outlays, $3,900,000,000.

(13) General Government (800):

(A) New budget authority, $3,700,000,000.

(B) Outlays, $3,700,000,000.

(14) Revenue Sharing and General Purpose Fiscal Assistance (850):

(A) New budget authority, $9,400,000,000.

(B) Outlays, $9,500,000,000.

(15) Interest (900):

(A) New budget authority, $41,700,000,000.

(B) Outlays, $41,700,000,000.

(16) Allowances (920):

(A) New budget authority, $500,000,000.

(B) Outlays, $600,000,000.

(17) Undistributed Offsetting Receipts (950):

(A) New budget authority, —$16,400,000,000.

(B) Outlays, —$16,400,000,000.

Mr. MUSKIE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. Mr. President my budget amendment cuts every budget category by 2.5 percent except for three. It calls for a tax reduction of 10 percent. It cuts every budgetary category by 2.5 percent except for the following three: The interest category, and the category called "offsetting receipts" are not touched. This is because the interest on the Federal debt cannot be cut because the debt is there. The offsetting receipts category is not a spending category.

On the "allowances" category I have taken about half of the money for the Federal pay raise out. This cuts the 7-percent pay raise by less than half.

It is time as far as I am concerned to give our hardworking taxpayers a pay raise by cutting their taxes.

Mr. MUSKIE. Mr. President, point of order. There is not order in the Chamber.

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order.

Mr. HATCH. I think it is time we give our hardworking taxpayers a pay raise by cutting their taxes, and that I am taking some out of the Federal budget and the Federal pay raise to give the taxpayers themselves a pay raise.

The other point I would like to make is that Federal workers are taxpayers, too, and I hesitate to take money away from them except for the fact that since they are taxpayers they will be better off with about a 3.5-percent raise and a 10-percent tax cut than they are with a 7-percent raise. So I felt it was justified from that standpoint.

The Congress has voted down tax cuts five times so far this year—three times in the House, twice in the Senate. Also, in addition the administration killed the tax rebate; the Senate voted down the Griffin amendment to index the income tax, and as a result the taxpayers still suffer the double penalty of inflation; the administration has brought a huge energy tax bill to the Congress which the House has passed; the IRS is trying to tax fringe benefits. Everything is done to raise taxes and spending and nothing to lower them. Many of my colleagues never worry about the deficit when they want to increase spending.

When we want to cut taxes a number of my colleagues then start to worry about the deficit. They say, "What would you cut spending-wise in order to cut taxes?" Of course, my great friend, the Senator from California (Mr. HAYAKAWA), offered a menu of spending cuts in order to give the taxpayers a break.

These apparently were not accepted, were not liked, and so I offer another menu here of a 2.5-percent tax cut across-the-board on the ground that this does not hurt any spending program because there is a 2.5-percent bureaucratic waste—I believe considerably more than that—in every spending program.

I want to stress that a minimum spending cut translates into a significant 10-percent across-the-board permanent tax rate reduction for all taxpayers. I would just like to add and ask whose side are we on, the spending bureaucracies or the hard-working taxpayers of America?

I think this is a reasonable approach, and I urge my colleagues to accept it. There is a lot more I would like to say, but I think I will reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BELLMON. Mr. President, I yield myself 5 minutes. Let me ask the distinguished Senator from Utah a question or two so that I can better understand the amendment.

The amendment would reduce all the functions 2.5 percent except, as I understand it, three functions. Those are the interest on the national debt—and what are the other two?

Mr. HATCH. There is interest on the national debt, the offsetting receipts are not touched; and we, because of just figuring out the numbers, reduced the Federal pay raise about half.

Mr. BELLMON. This would reduce every other category except those three by 2.5 percent?

Mr. HATCH. Only generally. In other words, I am saying there is at least—and I would submit considerably more than—a 2.5-percent bureaucratic waste in the rest of the categories, in each of those categories.

Mr. BELLMON. Let us take the defense function, for instance. What would be the total dollar cut in the defense function under the Senator's amendment?

Mr. HATCH. It would not have to come out of the hard defense components. In other words, my 2.5 percent would be a 2.5-percent dollar figure that the various committees would allocate within the various functions. They would not have to disturb any programs they did not want to. It would give them total leeway, total discretion, to find the bureaucratic waste and bungling amounting to 2.5 percent of the budget and cut it out.

I submit that I would be very shocked if they cut it out of the hard defense budget. However, if they find bureaucratic waste and bungling there they should cut it out there.

Mr. BELLMON. The Senator on his own does not know where this bureaucratic waste is to be found, is that the case? He is simply suggesting to the various authorizing committees that each of those committees is overspending by 2.5 percent.

Mr. HATCH. I am sorry.

Mr. BELLMON. I say the Senator has not identified where this bureaucratic waste is to be found.

Mr. HATCH. This is going to be identified by the colleagues who have direct responsibility on looking at those various categories.

I wish to correct my prior statement. I think I misled my friend and colleague from Oklahoma. Every category would be cut by 2.5 percent and our intention, of course, is to reduce bureaucratic waste and bungling on other unnecessary budgetary items.

Mr. BELLMON. Every category except the three previously mentioned would be cut by 2.5 percent.

Mr. HATCH. That is correct.

Mr. BELLMON. What is the dollar cut in the defense category?

Mr. HATCH. It would be within 2.5 percent, whatever that is.

Mr. BELLMON. The national defense category is $110.1 billion. The Senator proposes to cut $2.75 billion out of that category, is that right?

Mr. HATCH. My outlay would be $107,300,000.

Mr. BELLMON. A reduction of $2.75 billion.

Mr. HATCH. I do not know. But it would be whatever 2.5 percent of it is.

Mr. BELLMON. For the record, let me state that a 2.5-percent cut of the defense budget is $2.75 billion.

Mr. HATCH. That would be fine.

Mr. BELLMON. $2,750,000,000. Does the Senator intend to take it out of the personnel side. He is talking about bureaucratic waste.

Mr. HATCH. That is going to have to be determined by the Senate's appropriate committees.

Mr. BELLMON. The committees of the Senate ask for more money, not less, in the various categories. The budget resolution we have before us is $4 billion less than the Armed Services Committee asked for initially and less than the President's budget.

Mr. HATCH. I understand that. What I am saying is, if my amendment is agreed to, they are going to have to cut 2.5 percent out, and the intent of it is to cut it out of any area that is wasteful.

Mr. BELLMON. Does the Senator have any indication that the Armed Services Committee is of a mind to accommodate this kind of a cut? Since they have asked for more money and since the administration has asked for more money, the Budget Committee is under the impression there is no intention on the part of the Armed Services Committee to cut by 2.5 percent.

Mr. HATCH. The purpose of this amendment here today is to give all Senators a chance to vote on whether or not they want a 2.5-percent reduction in spending by Congress. I presume that we will know from the votes after they are cast whether the members of the Armed Services Committee want that type of reduction or not. If they do not they may vote against my amendment. I am saying, because we are sick and tired of the overwhelming spending practices of the Federal Government, and I have to admit I hate to take it out of the defense budget, but because of the overwhelming amounts of expenditures in the Federal Government, we have recommended that we have not only a tax reduction but that we have a reduction in spending equivalent to the tax reduction. That way we think the economy will be stimulated, overall the defense system would be bolstered, overall this country would be bolstered because we would have a more effective and more stable economy. Overall we would come out of the economic woes that are besetting us at the present time. That is the theory behind this particular amendment.

Mr. BELLMON. Let me call the Senator's attention also to function 600, the social security category.

Mr. HATCH. The social security category, as I understand it, like education has lumped in it other programs—training and employment, and social services.

Mr. BELLMON. It is function 600.

Mr. HATCH. Where is it? I see.

Mr. BELLMON. It is the income security function, function 600. The total authorization under this amendment for income security is $146.6 billion. If my calculations are right, a 2.5-percent cut amounts to $3,365,000,000 in that. Where does the Senator intend to save that? There is very little bureaucracy involved with social security. Most of that money goes directly out to the retired people.

Mr. HATCH. No, that is not true. That is not what I have been reading. I have been reading that that system is as fraught with bureaucratic bungling and expense as any other system, and I think probably that is part of the problem. The categories in the income security area are Federal supplemental, unemployment benefits, and child nutrition programs.

Mr. BELLMON. Those go directly back.

Mr. HATCH. Let me finish. There are many others besides these. But there are some pretty important categories here. I cannot imagine anybody cutting social security that will go to the aged.

Mr. BELLMON. I cannot either. That is why I am raising the question.

Mr. HATCH. Let me answer it then. There are the Federal supplemental unemployment benefits. I can imagine cutting that. There is the child nutrition program. I cannot imagine cutting that. There is low-income housing. I can imagine cutting that.

But as to food stamps, we have evidence that is up to 50 percent fraught with fraud. That is a $5 billion program this year.

There is AFDC, of course, social security, and there are other categories.

I submit to the Senator that there are areas in here that are just fraught with fraud.

Mr. BELLMON. If the Senator will yield, we have had legislative proposals before the Senate trying to change the food stamp program, and in every case we do not cut it; we add to it. I can agree with the Senator's desire to see some economies effected in these programs. But at the present time the mood of Congress is not to cut back in food stamps. But now the Budget Committee has to take this into account. We cannot come in with a budget that flies in the face of the votes of the Senate and the laws than that are on the books.

Mr. HATCH. I do not know why not. I do not think the Budget Committee is just an adding machine. It has the ability to put pressure on these committees to be responsible and when we spend 5 billion bucks for a program that 10 years ago, 12 or 14 years ago was $14 million, there is something wrong when we have all kinds of reports all over America that we have up to a 50-percent fraud in that program. I am tired of the American people paying for it and I think it is reasonable to ask for a 2.5-percent cut.

Mr. BELLMON. I think he should make the argument when dealing with that legislative matter. The Senate had expressed its will on the food stamp program since the Senator has been here. All the Budget Committee and budget process can do is to make room for the entitlement programs that are on the books.

Mr. HATCH. Wait a minute. If what the Senator is saying is true——

Mr. BELLMON. The program is not $9 billion. It is little over $5 billion.

Mr. HATCH. No, if the Senator adds the amounts in the farm program I understand it is up to $9 billion in the farm bill.

Mr. BELLMON. The cost of the food stamp program is slightly more than $5 billion.

Mr. HATCH. Let us say it is $5 billion. That is a lot of money when it started out as just a multimillion dollar program back in 1964.

Let me add this on this point. I do not mean to take such overly a strong issue with my dear friend from Oklahoma, but I wish to make this point: I think the Budget Committee is a lot more than an adding machine. If that is all it is, then I do not think it needs all the staffing that either the majority or minority has. I think it is about time we start utilizing that committee to get rid of some of the fraud and some of the ripoff that the American taxpayers have been paying for. I will say this: I know of the great efforts that the distinguished Senator from Oklahoma has personally put forth to try and do exactly that. But I have never been under the impression that the Budget Committee is made up just of accountants or just of auditors or just of adding machine calculators. I think it is a very powerful committee and if it exerts its pressure and power it can do an awful lot, and I think has done some this year to alleviate some of the spending practices in Congress.

If the Senator wants to get on each one of these I think we can and if we had 2 or 3 weeks I think we could go in and show them all. I do not think the distinguished Senator from Oklahoma would dispute that in every one of these categories we can find a 2.5-percent waste in Federal funds. I do not think anyone would argue against that. I am surprised to find the Senator arguing against it.

Mr. BELLMON. Mr. President let me say to my friend from Utah that months have been spent by the Budget Committee doing the very thing that he has recommended and that is trying to find places where savings can be realized.

Mr. HATCH. I understand.

Mr. BELLMON. Let me point out now again—this has already been put in the RECORD today—that the Senate authorizing committees requested budget authority this year of $540.9 billion and outlays of $474.4 billion. The Budget Committee recommendations are $39 billion less than that in budget authority. So we have, in effect, trimmed out almost $40 billion from budget authority, and the outlays in this resolution are $459 billion, which is a reduction of $15 bililon on the outlay side. So we had not acted as an adding machine. We very carefully examined the programs, and I am asking the Senator to do the same thing. He has been talking about saving $3.6 billion out of the food stamp program and the total cost of that program is $5.3 billion.

So you are talking about cutting it by 60 percent, and that is absolutely unrealistic.

Mr. HATCH. It is not all on the food stamps. We are going to give——

Mr. BELLMON. But I think we have to look carefully at what we are trying to do. When you talk about a 2.5-percent cut, it sounds easy, but when you look around to try to find where to make that cut, it is not easy. The budgetary process is not that wasteful, and in fact we think there is very little waste that can be identified at this point.

Mr. HATCH. I would submit that if this question could be put to a referendum of the taxpayers who pay for it, I would be surprised if there is anyone in America, except those who are extreme on either side, that would not feel that we could cut 2.5 percent across-the-board on Federal spending and be a heck of a lot better off than we are right now. I do not think anyone would disagree with that.

Mr. BELLMON. You are saying cut $2.75 billion from national defense, cut $3.665 billion from income security, and I simply want to say that after having lived with these programs for several months, I do not believe that kind of cuts can be made without seriously hampering the operations of these programs. In addition, we would be cutting agriculture, which we added $750 million to yesterday, by $170 million; we would be cutting education by $660 million. Health would be cut $1.1 billion.

Mr. HATCH. No; if I may intervene just for a second, we are not cutting education; we are cutting general categories. Education is just one subcategory under education, training, employment, and social services. Social services is a huge category.

Again, if we would ever get down to specifics, we would have hundreds of pages of categories where we could make cuts.

All I am saying is that in addition to making a $2.5 billion cut in expenditures across the board, we are asking the Senate to cut $11.4 billion in taxes, and at the same time reduce Federal spending by about the same amount.

The cut in taxes will infuse this economy with incentives, put more people to work, create more jobs, provide more money coming into the Federal Government, and create more revenues while at the same time cutting the spending of these bureaucratic agencies that are, as far as I am concerned, running rampant at this time in our society.

It is not the simple problem that I think is being made out here. It is a matter of trying to do both: to stimulate the economy through a tax cut that benefits every taxpayer in America, to give incentive for the economy to grow, to provide jobs; and at the same time to cut the almighty Federal spending that is running us right down the tube. And hopefully in the end, because of the stimulation on one side and the cutting on the other, to balance this budget, so that the American people will have more confidence in the future, the American business community will have more confidence in the future, and even we as Senators will have more confidence in the future, because the people will be so pleased with what we are doing for the country.

Mr. BELLMON. Mr. President, I do not wish to delay the Senate. These issues have been fully discussed both today and in earlier debates.

I would simply say that the Budget Committee, in general, is in agreement with what the Senator is trying to do. We feel we have accomplished, as much

as it is possible to accomplish, the very things the Senator recommends.

As I mentioned, we made very substantial reductions in both budget authority and outlays requested by the authorizing committees. There simply is not $2.75 billion of cuts in the defense function available in this budget without seriously weakening the defense posture of this Nation. There is not room to make a $3.665 billion reduction in function 600, the income security function, without taking money away from worthy individuals who depend on those incomes, the retired, the dependent children, and others who are unable to fend for themselves; and as attractive as it is to say we are going to take a meat ax and whack out 2.5 percent from every category, the fact is it is impossible to make it on that basis.

I assure the Senator that the Budget Committee is anxious to make reductions wherever it can be done. We have already accomplished the objective this amendment strives for, and I believe the amendment represents a serious overkill, one which the Budget Committee cannot approve.

I am prepared to yield back the remainder of my time.

Mr. HATCH. Mr. President, I would just like to add that I believe the Senator from Oklahoma has done everything within his power to accomplish the objective he states. He has tried to cut the budget and get some restraints in the Senate; but he is only one person in a huge Congress. I have deep respect and regard for him; but, on the other hand, what we are trying to do is really put pressure on Congress to do what Senator BELLMON thinks we should do also, and that is get some restraint in our spending practices around here.

I think this is the way to do it, and the only way to do it. I wish it were more than 2.5 percent, to be brutally frank about it; and I think there will come a time when it is going to be more than 2.5 percent. It will have to be. I think it is better for us to voluntarily do it now rather than later.

Mr. President, I yield back the remainder of my time.

Mr. BELLMON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. HUMPHREY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Illinois (Mr. STEVENSON), the Senator from Colorado (Mr. HART), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. HUMPHREY), would vote "nay."

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from New Jersey (Mr. CASE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from New York (Mr. JAVITS), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), and the Senator from New Mexico (Mr. SCHMITT) would each vote "yea."

The result was announced—yeas 19, nays 64, as follows:

[Rollcall Vote No. 359 Leg.]

YEAS—19

Allen	Hansen	Roth
Bartlett	Hatch	Schweiker
Byrd, Harry F., Jr.	Hayakawa	Scott
	Helms	Stevens
Curtis	Laxalt	Stone
Durkin	Nunn	Zorinsky
Garn	Proxmire

NOT VOTING—17

Baker	Javits	Packwood
Case	Lugar	Pell
Griffin	Mathias	Schmitt
Hart	McClellan	Stevenson
Hatfield	McClure	Wallop
Humphrey	McGovern	

So the amendment was rejected.

UP AMENDMENT NO. 787

Mr. ROTH. Mr. President, I send an amendment to the desk and ask that it be considered

The PRESIDING OFFICER. The amendment will be stated. The legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH), for himself and Mr. BIDEN, Mr. JOHNSTON, Mr. RIBICOFF, and Mr. DURKIN, proposes unprinted amendment No. 787.

Mr. ROTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 7, delete the numeral and insert in lieu thereof "$394,825,000,000".

On page 1, line 9, delete the numeral and insert in lieu thereof "$775,000,000".

On page 2, line 5, delete the numeral and insert in lieu thereof "$64,525,000,000".

On page 2, line 7, delete the numeral and insert in lieu thereof "$778,725,000,000".

On page 2, line 9, delete the numeral and insert in lieu thereof "$78,725,000,000".

(Mr. SARBANES assumed the chair.)

Mr. ROTH. Mr. President, my amendment is cosponsored by Senator BIDEN, Senator JOHNSTON, Senator RIBICOFF, and Senator DURKIN.

I have sent the amendment to the desk to reduce the second budget resolution revenue bill by $175 million.

This amendment is necessary to provide an allowance for the enactment of a tax credit for college education expenses.

Last year, the Senate twice overwhelmingly passed legislation to provide tax credits for college education expenses by 68 to 20 and 62 to 21. Unfortunately, the House failed to act on this legislation last year.

However, I am pleased to report that, yesterday the House, by an overwhelming vote of 311 to 76, endorsed the college tax credit for the first time. The House vote was on a similar amendment to the budget resolution to reduce revenue levels by $175 million.

I believe college tax credit is ideal when time has come. This amendment will permit such legislation to be adopted for fiscal year 1978. The type of relief will, of course, depend upon the action of the Congress.

Twenty-five of us have introduced legislation entitled the "College Tuition Tax Relief Act," which provides tax credits for full-time students at institutions of higher education and vocational schools. The amount of the credit is to be $250 the first year, increasing in incremental stages to $300 the second year, $400, and then $500.

According to the Joint Committee on Taxation, a $250 tax credit, effective for educational expenses paid after December 31, 1977, would reduce revenues by $175 million in fiscal 1978. If the credit remained at $250, the revenue impact would increase to $1.2 billion by fiscal 1981. If the credit increased to $500, the revenue impact would increase to $1.9 billion by 1981.

I believe the revenue impact would be a worthwhile and necessary investment in the future—an investment that would be returned in higher earnings, better job opportunities, and consequently, higher Federal tax revenues.

Mr. President, I am convinced Congress can, and must, enact legislation to provide tax relief to the millions of families struggling to send their children to college. According to the statistics, there is a growing number of qualified students who are prevented from obtaining a higher education because of increasing costs.

According to the College Entrance Examination Board, the average annual total cost of a public university is now $2,900 and the average cost of a private college is $4,811.

Middle-income families are especially hard hit by the increasing college education costs. There are millions of families today who are neither affluent enough to afford the high college costs nor considered poor enough to qualify for the many different Government assistance programs which their taxes make possible.

As a result, we are rapidly approaching a situation in this country where only the very affluent and the very poor will be able to attend college, and I am con-

vinced that action must be taken to ease the financial plight of middle-income Americans.

As a New York Times editorial has said, the difficulty that these parents are having in sending their children to college suggests—and I quote—"outright disaster for the vast majority of American middle-class famliies in the $12,000 to $20,000 range who are considered too affluent for Federal or State scholarship aid."

The editorial goes on to urge the Federal Government—and I again quote—"to open its eyes to a clear and present danger—that college gates are being shut to increasing numbers of able, middle-class young people on economic grounds alone. Nothing less is at stake than the future of an open, upward-mobile democratic society."

Other newspaper accounts, including the recent Newsweek, indicate that people with even higher incomes are having great difficulty sending their children to college.

Mr. President, earlier this year, the Senate Finance Committee's revenue recommendation to the Budget Committee included an allowance for the college tax credit because of the strong probability that the full Senate would again pass this legislation. Although the Budget Committee deferred action on any recommendations regarding specific tax proposals, the distinguished Chairman of the Budget Committee did assure me that there was room in the Senate's version of the Budget Resolution for the college tax credit.

Unfortunately, this revenue leeway disappeared during the House-Senate conference on the first budget resolution. As I mentioned earlier, the House yesterday voted to provide an allowance for the enactment of the college tax credit. A Senate vote for this amendment will not insure the enactment of college tax credits. It will merely insure that an allowance has been made in the budget resolution if Congress decides to enact college tax credits.

I believe the Senate should reaffirm its strong commitment for college tax credits, and I urge my colleagues to vote for the adoption of this amendment.

Mr. President, I yield the floor.

Mr. MUSKIE. Mr. President, I yield myself 5 minutes.

Mr. President, I oppose the amendment of the Senator from Delaware and, in due course, when we both use what time we want, I will move to table the amendment.

My argument is as much addressed to that procedure as it is to the substance of the amendment.

The effect of the amendment offered by the Senator from Delaware (Mr. ROTH) would reduce the budget resolution revenue floor by $175 million to accommodate enactment of a college tuition tax credit.

It is inappropriate, Mr. President, as a matter of procedure for the budget resolution to be a vehicle for expressing Senate approval of individual tax provisions, such as the tuition tax credit, which have not been previously considered by the appropriate substantive Senate committees. Otherwise, the budget resolution will be fulfilling a function of a forum for evaluating individual structural tax proposals—a role it clearly was not intended to fill.

There is, as the record discloses, considerable controversy over the merits of a college tuition tax credit. The administration opposes it: both the Treasury Department and the Department of Health, Education, and Welfare oppose it. A significant segment of the higher education community also opposes it. In these circumstances, the credit should be given close Senate scrutiny before it is assumed as part of the congressional budget. However, this close scrutiny has not been given to the credit.

The amendment should be rejected because the credit would result in extremely high, long-term revenue losses and increased budget deficits. The $175 million first year cost is only the camel's nose under the Treasury's tent. The version of the credit introduced earlier this year by Senator ROTH would lose $1.1 billion in the first full year, and over $2 billion annually when it is fully phased in. Now these estimates assume only a maximum credit of $500 per qualifying student, as provided in the current version of the bill. However, Mr. President, $500 does not go very far any more in paying for college tuition and expenses. Thus, if the credit were enacted, once the principle is a matter of law, you can be sure subsequent efforts would be made to enlarge the credit to $750, $1,000 or even more. Thus, the ultimate annual cost of the credit will be extremely high at a time when the Congress may well be trying to pay for numerous highly attractive but costly programs such as National Health Insurance.

Moreover, these high-revenue losses would result from a tax credit which would constitute inappropriate tax policy and inefficient education policy. The credit would constitute inappropriate tax policy because it would complicate the tax forms of large numbers of taxpayers at a time when the Congress has made tax simplification a major priority of tax legislation. The credit also would be relatively difficult to enforce and administer in terms of the relatively low maximum benefit available to each recipient.

A college tuition tax credit, Mr. President, also would constitute inefficient education policy. Federal grant and loan programs more effectively deal with increasing tuition costs than a tax credit because such programs target relief to the specific needs of particular families. On the other hand, the tax credit approach would provide the same benefits to families regardless of income or actual education expenses. Wealthy families would get the same credit as low-income taxpayers. Families with children in already subsidized State and local public colleges would get the same credit as families with children in more costly private institutions. The credit would rarely constitute the financial assistance necessary to allow a student to attend college.

Furthermore, Mr. President, to a substantial extent, a widely available tax credit would enable colleges to raise tuition rates. This would nullify the benefits of the credit to families and students. And in the case of persons not qualifying for the credit, it even would raise their education costs.

Mr. President, for all the reasons I have mentioned briefly—inconsistency with the intent of the budget process, high cost, and inefficiency—I urge the Senate to reject the Roth amendment.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. MUSKIE. Two more minutes, Mr. President.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, I have received a letter from the Secretary of Health, Education, and Welfare dated September 9, 1977, in which he stresses at somewhat greater length the points I have made. If I may, for example, read from one paragraph, he says:

> There is no question that college costs are rising and that many families must make hard choices to finance college education. Reduction in a family's standard of living or increased borrowing is often necessary to meet educational expenses. However, there are many combinations of grant and loan programs which would deal with that problem better and more fairly than a program of tuition tax credits, by distributing assistance according to the severity of the particular family's problem. For example, a highly paid professional sending his child to a low-tuition community college would get as large a benefit under some proposals as a blue collar worker sending his child to an expensive private college with no other aid. A family with income so low that it pays no tax would receive no aid at all. The "solution" proposed by such legislation badly matches the problem.

He then says:

> A tuition tax program would be a radical departure from policies underlying present direct Federal expenditures for education. Two factors presently determine the amount of aid a student receives from Office of Education programs: the family's ability to pay, and the cost of the chosen college. When ability to pay is subtracted from cost, we have need, and in this sense all the Office of Education programs are need based. Perhaps, as some argue, different ways of determining need should be considered, or assignment of responsibility for meeting need among different programs could be improved. I cannot, however, imagine endorsing a student grant program which would completely discard need as a relevant factor in the manner of some tuition credit proposals.

Mr. President, I ask unanimous consent that the full text of the letter be printed at this point in the RECORD, and I am happy to yield my good friend from Massachusetts, Senator KENNEDY.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF
HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., September 9, 1977.

HON. EDMUND S. MUSKIE,
Chairman, Committee on Budget,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: You have inquired with respect to the use of tuition tax credits to provide aid to families with college age students.

There is no question that college costs are rising and that many families must make

hard choices to finance college education. Reduction in a family's standard of living or increased borrowing is often necessary to meet educational expenses. However, there are many combinations of grant and loan programs which would deal with that problem better and more fairly than a program of tuition tax credits, by distributing assistance according to the severity of the particular family's problem. For example, a highly paid professional sending his child to a low-tuition community college would get as large a benefit under some proposals as a blue collar worker sending his child to an expensive private college with no other aid. A family with income so low that it pays no tax would receive no aid at all. The "solution" proposed by such legislation badly matches the problem.

This, of course, implies an answer to your question regarding whether such a program would target Federal funds to those who need assistance. Such grants would have little relationship to need because almost all students, even those attending low-tuition public institutions, incur sufficient tuition charges and other expenses to be eligible for the maximum credit. A reduction in the allowable credit would occur only where the student received grant or scholarship assistance, and, since today most grants and scholarships are awarded on the basis of need, such a reduction would almost always result from receipt of a need-based grant or scholarship.

A direct targeted grant program in which both family ability to pay and costs of attendance determine the amount of the student's grant is a desirable way of equalizing educational opportunities, and is highly complementary to loan programs. However, for many of the upper-middle income families which would likely benefit from a grant program such as a tax credit proposal, I suspect a loan program would be preferable. What they need most is to spread college costs over an extended number of years, as is currently done under the Guaranteed Student Loan program. I think most of these families, when faced with large college costs in a particular year, would prefer a $2,500 long term 7 percent loan to a $250 to $500 grant. Where the issue is not ability to pay, but convenience, I believe the loan alternative becomes the more desirable.

The distribution of benefits under a grant program patterned after some proposals would appear to be inequitable among income groups. Benefits would be largely the same, despite differences not only in college costs, but also in income. We estimate that at least 60 percent of tax credit benefits would probably go to families with incomes of $18,000 or more—which are considerably better off than the national average. Further, only 30 percent of the benefits would go to families sending children to private colleges, although they have almost 60 percent of the financial need of all families likely to benefit from the credit.

A tuition tax program would be a radical departure from policies underlying present direct Federal expenditures for education. Two factors presently determine the amount of aid a student receives from Office of Education programs: the family's ability to pay, and the cost of the chosen college. When ability to pay is subtracted from cost, we have need, and in this sense all the Office of Education programs are need based. Perhaps, as some argue, different ways of determining need should be considered, or assignment of responsibility for meeting need among different programs could be improved. I cannot, however, imagine endorsing a student grant program which would completely discard need as a relevant factor in the manner of some tuition credit proposals.

Sincerely,

JOSEPH A. CALIFANO, Jr.

Mr. MUSKIE. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. MUSKIE. I yield 5 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I support the position of the Senator from Maine.

This proposal is unwise tax policy, and it is unwise education policy, and I hope that the Senate will not approve it.

If we examine this amendment and calculate the cumulative cost of the amendment by 1982, we would find it to be in excess of $9 billion. Here we are at 2:15 p.m., with three Members of the U.S. Senate talking about an amendment of reducing tax revenues by $9 billion.

It is extraordinary to me, as one who has been struggling in the areas of education, health, housing, legal service programs, programs for the elderly, and other major social programs, that when we come to the floor and ask for $5 million or $7 million or $10 million, many in this body immediately react that we are breaking the budget and adding to the deficit. They look at any direct appropriation with a microscope. However, when it comes to tax expenditures, the door of the Treasury is wide open.

It is interesting, as the Senator from Maine has pointed out, that many of the leading educational groups—the National Student Lobby, the Coalition of Independent College and University Students, the American Council of Education—and other education groups, as well as the students themselves, are strongly opposed to this amendment. As the Senator from Maine has pointed out, they see what the likely prospects are—if we provide across-the-board tax credits, it will follow, as the night follows the day, that the universities and colleges will raise their tuition fees by enough to absorb the tax credit. If this amendment is successful, the credit will be captured by the colleges and universities.

Those who hope to benefit from this tax credit would no longer obtain any benefit, and those who would not benefit—the low-income students—would have an additional burden to meet because their colleges have raised their tuition costs.

The Education Subcommittee on which I serve has examined in considerable detail the whole range of scholarship and loan programs, the work study programs and the educational opportunity programs. These programs make an extraordinary difference for the young people. In my State of Massachusetts, approximately 60 percent of the students who attend community colleges and institutions of higher education are dependent in some form on scholarship or aid programs. Those programs are absolutely indispensable. They are absolutely necessary. And they are targeted upon the needs of the students whose need is greatest.

We are talking about billions of dollars in this amendment. It would make a great deal more sense, as the students understand and as their organizations have expressed, to target those resources on areas where the need is the greatest and where the benefit can be most substantial.

Mr. President, the amendment is premature. The administration's comprehensive tax reform proposals are scheduled to be submitted to Congress later this month. The debate over the college tuition tax credit belongs in the debates on tax reform. A major goal of tax reform is to reduce the number of tax deductions and tax credits, and to use the savings to pay for across-the-board tax relief for all taxpayers, not just those with children in colleges. A tuition tax credit violates the goals of fairness, simplicity, and efficiency.

There are serious objections against the credit on the merits: First, a direct subsidy is preferable to a tax subsidy in this area. Federal grant and loan programs are better able to deal with the rising burden of college education costs, because such programs can target the relief to the specific needs of particular families.

Second, the tax credit is inequitable. It gives the same benefits to families, regardless of income, need or education expenses.

Families with incomes too low to pay taxes get no benefit at all, since the credit is not refundable.

Even for upper-middle-income families, a long-term loan would be preferable to the tax credit, because the full college costs would be spread over several years.

The benefits of the tax credit would be distributed unfairly among income groups, with 60 percent of the benefits going to families with incomes over $18,000 a year.

The benefits of the tax credit would also be distributed unfairly on the basis of college costs. Only 30 percent of the benefits would go to families with children in private colleges, although they have 60 percent of the financial need of families benefiting from the tax credit.

Third, the tax credit is inflationary. As I have mentioned, colleges will "capture" the subsidy through $250 tuition increases. Colleges are unable to do so now, with existing programs, because the direct Federal subsidies are targeted to the smaller group of needy students, and tuition cannot be raised without driving away unsubsidized students. But it is estimated that 77 percent of all students would be subsidized by the tuition credit, so colleges will find it easier to have across-the-board tuition increases.

Fourth, the tax credit is complex. It puts IRS in the education business; adds complexity to the tax laws, and it adds another layer of bureaucracy to education programs.

Fifth, as I have mentioned, college costs are not rising as rapidly as income.

Recent studies by the College Scholarship Service and the College Entrance Examination Board show that the problem is easing, with college cost inflation rates down and student aid up. For 1977–78, college inflation is estimated at 4.3 percent, compared to 7.5 percent last year, 8.8 percent the year before, and 17.3 percent in 1973–74.

In addition, scholarship money is now increasing more rapidly than college

costs—11 percent this year, and 12 percent last year. Since enrollments are down, there is more aid money to spread among fewer students.

In fact, in recent years, incomes have been growing at a more rapid rate than education costs. According to the Congressional Budget Office, the median family income grew by 73 percent from 1968 to 1975, but college costs grew by only 57 percent. The need for the tax credit is declining as family income goes up.

For these reasons, Mr. President, I believe that adoption of the credit would be a serious step in the wrong direction, and a waste of scarce Federal education dollars that could be better used in other ways.

The Senator from Delaware points out that this is an amendment whose time is due. I think it is an amendment whose time has passed, if its time ever existed.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. I yield the Senator 1 additional minute.

Mr. KENNEDY. There is no question that many families in this country are heavily pressed in trying to provide their children with the opportunity to obtain a higher education. But if we are going to provide this large amount of Federal subsidy, it should be directed in ways which are fair and equitable to the students and to the families—to the lowest income families, to the middle-income families, and to the other young people of this country. This amendment does not meet that test.

The President has announced that he is going to send an extensive tax reform program to this body in the next few weeks. We will be debating tax expenditures and tax reforms extensively, I am sure, in the early and mid part of next year. It is appropriate that we have the opportunity to debate this issue at that time. This is neither the place nor the time for favorable consideration of this amendment. I join the Senator from Maine in opposing the amendment.

Mr. President, I ask unanimous consent to have printed in the RECORD an exchange of letters on this issue between Secretary Califano of HEW and myself earlier this year. In his letter, the Secretary raised a number of these objections to the tax credit and called it a radical departure from Federal education policy.

There being no objection, the letter were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 8, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: I am writing to request your Department's analysis of the proposed tuition tax credit for education expenses. As you know, this proposal was passed by Senate last year in its consideration of the Tax Reform Act of 1976. Although the provision was dropped by the Senate-House Conference Committee, there is a continuing interest in the proposal, and it may well be offered as a rider on the Senate floor to the Administration's tax bill.

I believe that it is important for the proposed tax credit to be analyzed as a Federal education program. I would therefore appreciate receiving your comments on the measure, viewing it as a Federal program to provide financial assistance for education. It would be helpful if your analysis could recast the proposed tax credit as a direct federal grant program, equivalent to the tax expenditure, and then address such questions as:

Is there an overall need for the program?

Are the federal funds targeted to the persons that need federal assistance?

Is the form of the program—direct grants—more desirable than other forms of aid, such as loans?

Is the distribution of the benefits equitable among income groups?

Would the proposed program be consistent with the policies underlying the benefits provided by existing direct federal expenditures for education?

In sum, I would like your view as to whether the Department would support the education program contained in the proposed tax credit if it had been proposed as a direct program to be administered by HEW.

Unfortunately, there is some urgency to the proposal, since it may be offered as a rider to the tax bill coming soon to the Senate floor.

With best wishes, and I look forward to hearing from you.

Sincerely,

EDWARD M. KENNEDY.

THE SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., March 31, 1977.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: I am writing in response to your request for an analysis of proposals for the use of tuition tax credits to provide aid to families with college age students.

There is no question but that college costs are rising and that many families must make hard choices to finance a college education. Reduction in the family's standard of living or increased borrowing is often necessary to meet educational expenses. However, there are many combinations of grant and loan programs which would deal with that problem better and more fairly than a program of tuition tax credits, by distributing assistance according to the severity of the particular family's problem. For example, a highly paid professional sending his child to a low-tuition community college would get as large a benefit under some proposals as a blue collar worker sending his child to an expensive private college with no other aid. A family with income so low that it pays no tax would receive no aid at all. The "solution" proposed by such legislation badly matched the problem.

This, of course, implies an answer to your question regarding whether such a program would target Federal funds to those who need assistance. Such grants would have little relationship to need because almost all students, even those attending low-tuition public institutions, incur sufficient tuition charges and other expenses to be eligible for the maximum credit. A reduction in the allowable credit would occur only where the student received grant or scholarship assistance, and, since today most grants and scholarships are awarded on the basis of need, such a reduction would almost always result from receipt of a need-based grant or scholarship.

A direct, targeted grant program in which both family ability to pay and costs of attendance determine the amount of the student's grant is a desirable way of equalizing educational opportunities, and is highly complementary to loan programs. However, for many of the upper-middle income families which would likely benefit from a grant program such as the tax credit proposal, I suspect a loan program would be preferable. What they need most is to spread college costs over an extended number of years, as is currently done under the Guaranteed Student Loan program. I think most of these families, when faced with large college costs in a particular year, would prefer a $2,500 long term 7 percent loan to a $250 to $500 grant. Where the issue is not ability to pay, but convenience, I believe the loan alternative becomes the more desirable.

The distribution of benefits under a grant program patterned after some proposals would appear to be inequitable among income groups. Benefits would be largely the same, despite differences not only in college costs, but also in income. We estimate that at least 60 percent of tax credit benefits would probably go to families with incomes of $18,000 or more—which are considerably better off than the national average. Further, only 30 percent of the benefits would go to families sending children to private colleges, although they have almost 60 percent of the financial need of all families likely to benefit from the credit.

You ask whether the proposed program would be consistent with policies underlying present direct Federal expenditures for education. It would be a radical departure. Two factors presently determine the amount of aid a student receives from Office of Education progams: the family's ability to pay, and the cost of the chosen college. When ability to pay is subtracted from cost, we have need, and in this sense all the Office of Education programs are need based. Perhaps, as some argue, different ways of determining need should be considered, or assignment of responsibility for meeting need among different programs could be improved. I cannot, however, imagine endorsing a student grant program which would completely discard need as a relevant factor in the manner of some tuition credit proposals.

Sincerely,

JOSEPH A. CALIFANO, Jr.

Mr. JAVITS and Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. JAVITS. Mr. President, will the Senator yield me 1 minute?

Mr. MUSKIE. I yield.

Mr. JAVITS. Mr. President, I am rather pleased that I arrived in the Chamber at this particular moment.

I should like to express my agreement with Senator KENNEDY. I am the ranking minority member of the committee which deals with education, and I support very strongly our conclusions.

If there is one thing we have not learned adequately in this country as compared with other societies, it is how to deal with the need of the 15 percent. That is one thing we have not yet licked. The big things they consider vital to them are equal opportunity and education. Now we have a big agitation about merit as to earning scholarships, and so forth.

It seems to me that to go this route is very attractive. Most of my constituents love it. My mail is enormous. But I know it is not right for America. It is regrettable, but I feel, therefore, that I shall vote against the amendment.

Mr. JOHNSTON. Mr. President, will the Senator from Delaware yield me 4 minutes?

Mr. ROTH. I yield.

Mr. JOHNSTON. I thank the distinguished Senator from Delaware. I congratulate him for his leadership in this area. I am happy to join him as a coauthor.

Before I begin my remarks, I ask this question of the Senator from Maine: Did not this question come up in the Budget Committee, and did I not ask, as I recall, whether or not there was room in the resolution as drawn for $175 million for the tax credits?

Mr. MUSKIE. I checked my recollection against that of the staff. The question came up but there was no specific amendment presented, no specific proposal or addition to the second resolution to assume it. Of course, the pending amendment of Senator ROTH assumes that there is not room in the budget resolution for this program.

Mr. JOHNSTON. I do not state that as a matter of facts. I am drawing on my recollection.

I wish the staff, in the interim, would check the transcript, because either in the first or second resolution I raised the question. I believe I raised the question and the response was, there was room in the numbers as drawn for this amendment. I could be mistaken. I think the transcript will bear out what I have said. I wish the staff would check that, and perhaps it can be inserted in the RECORD on Monday.

Mr. MUSKIE. Whatever the record may be, if it is as the Senator remembers it, that is something different from a Budget Committee recommendation. The Budget Committee, as the Senator knows as a member of the committee, does not specifically approve individual items either in the revenue programs or the spending programs. We deal with appropriation bills or revenue bills that come to the floor as they do, and we measure them against the budget as the budget may stand at that moment. So there is no way of assuring Senators what the ultimate composition of the Internal Revenue Code will be at the end of a fiscal year based simply upon the numbers in the budget resolution.

What Senator ROTH had available as choices were two: One was to try to get his proposal included in a revenue measure, a tax measure, and take his chances that that would somehow be accommodated under the budget resolution without the specific approval of the budget resolution; or two, what he is doing this afternoon, which is to modify the budget resolution to specifically endorse his proposal.

He has chosen the second course, and that course is not supported by any action taken by the Budget Committee.

Mr. JOHNSTON. I understand that and, of course, I recall there was no specific amendment on it, but I thought I did recall some conversation on it.

Let me ask one question, if I may, and since my time is so limited get a brief answer, if I may. Is there room in the budget at this time for the $175 million?

Mr. MUSKIE. When one is talking about an overall revenue floor of $395 billion to say that an item of $0.175 billion could or could not be accommodated when the Committee on Finance has completed its work on the tax code is a pretty ambiguous question. I mean it may be, and that is where I would recommend to Senator ROTH that he take his proposal to the Committee on Finance which will be considering major tax reform legislation and which, presumably, also would include recommendations for tax cuts. If he can persuade them to fit it into their revenue proposals, that is one thing.

But to come to the floor and ask the Senate in a budget resolution to specifically endorse this so that the Committee on Finance would have no choice but to include it is another proposal.

The PRESIDING OFFICER. The 4 minutes of the Senator from Louisiana have expired.

Mr. ROTH. How much time do I have, Mr. President?

The PRESIDING OFFICER. The Senator from Delaware has 3 minutes remaining of debate time on the amendment, and the Senator from Maine has 1 minute remaining.

Mr. ROTH. I yield 2 minutes to the Senator.

Mr. JOHNSTON. I thank the distinguished Senator from Delaware.

Mr. President, the Senator from Delaware has correctly said this is an amendment whose time has come. I think that is so transparently true from the action of the House by voting 311 to 76, and it is supposed to be the body which is closest to the American people, and that kind of margin, I think, shows beyond any peradventure of doubt that the House is for it.

The Senate has voted for this measure in votes of 68 to 20 and 62 to 21 on two different occasions, and those votes are reflective of the broad feeling in this land that average Americans, middle class Americans, need relief from college tuition.

You do not have to be an economist to know that college tuitions are rising, and rising exorbitantly and beyond the rate of inflation, and that average Americans are eaten up by tuition.

The average Americans save all their lives to try to put their children through school, but they still have to go into debt. With all the money we spend, Mr. President, for all kinds of programs, be they social programs for the poor, which I support, and I supported the distinguished chairman of this committee on the last vote, or whether they be tax write-offs for foreign corporations or for oil companies or for anybody, we spend billions.

It is time we took a measly little $175 million to give some beginning of tax relief to people for tuition. The American people want it, the House wants it, and the Senate wants it.

Mr. MUSKIE. Mr. President, will the Senator yield? If we can do it for $175 million I will support the amendment.

Mr. JOHNSTON. Mr. President, all this does is to reduce that level by $175 million. I am quite sure it would be more than that by the time we end up with it, and it ought to be. But in a budget of the size we have here it ought to be. There is no purpose in this Government which, in my view, has any higher priority than some relief from tuition for the middle class in this country. We have helped everybody else. Every session of the Senate we come along with things for the poor and things for the rich, and it is just about time we helped middle-class people on tuition, and that is the most worthy goal I think we can get, the education of the youth of this country, and the relief in some small measure for middle-class people.

Mr. President, I think this is one of the best measures in the Senate before us this entire year, and I think the vote is and ought to be corresponding to what it has been before, overwhelming, and this is the year to pass this legislation.

I thank the distinguished Senator from Delaware.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Who yields time? The Senator from Maine has 1 minute remaining.

Mr. MUSKIE. I yield 30 seconds to the Senator from Oklahoma.

Mr. KENNEDY. Mr. President, I just had a 15-second question.

Mr. MUSKIE. I will take the question.

Mr. KENNEDY. Am I not correct that if this amendment is adopted, by 1982 the cost in terms of tax expenditures will be approximately $9 billion?

Mr. MUSKIE. That is assuming the credit stays at $500, and the prospects are it would rise above it, but the Senator is correct, $9 billion.

Mr. KENNEDY. I thank the Senator.

Mr. MUSKIE. I yield to the Senator from Oklahoma.

Mr. BELLMON. Mr. President, I wanted to simply raise the point that this is not the proper place to take up an amendment of this kind. It should be considered in the context of the fiscal year 1979 budget as part of our forthcoming tax reform legislation.

I, perhaps, could support the amendment at that time. However, I strongly oppose its inclusion in the budget resolution for 1978.

Mr. MUSKIE. Mr. President, as soon as all time has expired I will move to table the amendment of the Senator from Delaware. The Senator has another minute.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. ROTH. I just want to point out that all the arguments we are hearing today are the same old arguments that have been made year in and year out. What it amounts to is no tax relief for middle America.

Time and again there appear articles in the newspapers spelling out the fact that middle Americans are the only ones who cannot afford to send their children to college. Just last week it was pointed out in Newsweek that—

> Families are making similar sacrifices to pay for the other item of middle class life, college. Going way back in our history, the notion of the educated man has been almost synonymous with the middle class families. But middle-class families—too affluent for financial aid but too poor to afford many

colleges without it—are often being squeezed out of the educational market.

In closing, I just want to say it is about time that this Senate and this Congress listened to the demands of the middle class working people. They want the opportunity, they want the right, to send their children to college, and that is what I intend to support.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. ROTH. I yield.

Mr. LONG. Permit me to say that while I do not like this approach, I must recognize the fact that the Senate has addressed itself strongly in favor of the type of thing the Senator from Delaware is trying to do. It did it in connection with the tax reform bill, and it is clear that, when offered the opportunity to vote fairly on the merits, this is the kind of thing the Senate would like to do.

The PRESIDING OFFICER. The time of the Senator from Delaware on the amendment has expired.

Mr. MUSKIE. Mr. President, I think I have a few seconds remaining.

That being the case I yield back whatever time remains to me, and I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays on the motion to table have been ordered, and the clerk will call the roll.

Mr. MUSKIE. Will the Chair withhold that?

The Senator from Louisiana did not finish what he was saying. I am glad to yield him some time on the bill for the purpose of concluding his remarks. I do not want to be in the position of cutting him off.

Mr. LONG. Mr. President, will the Senator yield me 1 minute?

Mr. MUSKIE. I yield 1 minute to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 1 minute.

Mr. LONG. I just wish to say that, if we had some tax bill such as a tax reform bill or some measure where we raise revenue so that the Senator could have the opportunity to offer his amendment, I would not be voting for it at this point. But we are not going to have that. I do not see anywhere in the picture that we are going to be able to offer the Senator an opportunity to offer his proposal on any measure that would give the Senate an opportunity to do something about it in this 1978 fiscal year unless we do agree to this amendment. That being the case, Mr. President, I will vote for the amendment by the Senator from Delaware, feeling regretful that when we added it to a previous tax bill we were not able to bring it back from conference. That was clearly the will of the Senate at that time.

Mr. MUSKIE. Mr. President, I yield myself 1 minute on the bill to remind the Senator from Louisiana that this is not a piece of legislation. Adopting his amendment is not going to give this policy the effect of law. It would have to be implemented by actual tax legislation which the Senator has just told us is not coming down the pike. If that is the case, then I would say we should wait until the major tax reform legislation which will have effect in 1979 comes along and consider the proposal then.

The budget resolution does not create programs. It takes legislation to do that, as the Senator knows. So I think the Senator from Louisiana is giving us the best argument for not assuming this amendment in the 1978 budget resolution because it is clear legislation would not be available until the 1979 budget resolution at the earliest.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. BELLMON. If we put this money in the budget resolution and the legislation does not follow, then there is just this much money floating around in there to be spent for something else.

Mr. MUSKIE. The Senator is correct.

Mr. President, I renew my motion to table and ask for the yeas and nays.

Mr. ROTH. Mr. President, it is a clear fact that the Senator from Maine has taken time on the bill.

Mr. MUSKIE. I yielded a minute to the Senator's spokesman and took a minute myself.

Mr. ROTH. The Senator from Oklahoma spoke.

Mr. MUSKIE. All right. I will yield another minute. I simply promised Senators we would clean up this bill at a reasonable time and I do not want to delay the bill.

I yield to the Senator 1 minute.

Mr. ROTH. That is all I want.

I simply want to make the observation that the first step in getting the college tax credit is through this kind of an amendment, and I think the opportunity will come during the next year to offer that amendment. For that reason I urge that the Senate vote down the motion to table my amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to table. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. HUMPHREY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Rhode Island (Mr. PELL), the Senator from Illinois (Mr. STEVENSON), the Senator from Ohio (Mr. GLENN), the Senator from Maine (Mr. HATHAWAY), and the Senator from South Dakota (Mr. ABOUREZK) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), the Senator from Wyoming (Mr. WALLOP), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 25, nays 59, as follows:

[Rollcall Vote No. 360 Leg.]

YEAS—25

Anderson	Hart	Muskie
Bellmon	Huddleston	Nelson
Bumpers	Inouye	Nunn
Byrd, Robert C.	Javits	Pearson
Cannon	Kennedy	Sarbanes
Chiles	Magnuson	Stennis
Clark	Matsunaga	Williams
Cranston	Metcalf	
Culver	Morgan	

NAYS—59

Allen	Eastland	Metzenbaum
Baker	Ford	Moynihan
Bartlett	Garn	Percy
Bayh	Goldwater	Proxmire
Bentsen	Gravel	Randolph
Biden	Griffin	Ribicoff
Brooke	Hansen	Riegle
Burdick	Haskell	Roth
Byrd, Harry F., Jr.	Hatch	Sasser
	Hayakawa	Schweiker
Case	Heinz	Scott
Chafee	Helms	Sparkman
Church	Hollings	Stafford
Curtis	Jackson	Stevens
Danforth	Johnston	Stone
DeConcini	Laxalt	Talmadge
Dole	Leahy	Thurmond
Domenici	Long	Tower
Durkin	McIntyre	Weicker
Eagleton	Melcher	Zorinsky

NOT VOTING—16

Abourezk	Mathias	Schmitt
Glenn	McClellan	Stevenson
Hatfield	McClure	Wallop
Hathaway	McGovern	Young
Humphrey	Packwood	
Lugar	Pell	

So the motion to lay Mr. ROTH's amendment on the table was rejected.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Delaware.

Mr. ROBERT C. BYRD. Mr. President, let the record show that I vote "aye" on the adoption of the amendment.

Mr. MUSKIE. Mr. President, I am not going to request a rollcall vote on the amendment. I think the numbers are clear enough. The will of the Senate is clear enough. I have no desire myself to request the yeas and nays. There may be Senators who might like the yeas and nays. If there are, I would suggest they so indicate at this time.

I gather there is no desire for the yeas and nays, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Could we have order in the Chamber? Will Members please take their seats and cease conversations? Will Members please clear the aisle.

The Senator from Maine.

Mr. MUSKIE. Mr. President, if I may have the attention of my colleagues, to

the best of my knowledge there is only one additional amendment pending, an amendment to be offered by the Senator from Georgia (Mr. NUNN). If there are other amendments which any Senator is considering, I hope we might be informed now.

I gather not. The Nunn amendment has a 30-minute time limitation.

Mr. LONG. I do have a statement to present. It will require 15 minutes.

Mr. MUSKIE. We have 30 minutes on the Nunn amendment, though we might take less, and 15 minutes on the statement by Mr. LONG. Then we will proceed to a rollcall vote on final passage. The Nunn amendment will not require a rollcall vote.

The PRESIDING OFFICER. The Senator from Georgia.

UP AMENDMENT NO. 788

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration. This amendment is cosponsored by Mr. STONE, Mr. TALMADGE, Mr. PACKWOOD, Mr. HOLLINGS, Mr. ALLEN, Mr. CLARK, and Mr. CULVER.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN) for himself, Mr. STONE, Mr. TALMADGE, Mr. PACKWOOD, Mr. HOLLINGS, Mr. ALLEN, Mr. CLARK, and Mr. CULVER, proposes unprinted amendment No. 788.

Mr. NUNN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 11, strike $501,200,000,000" and insert in lieu thereof "$502,400,000,000".
On page 2, line 2, strike "$459,700,000,000" and insert in lieu thereof "$460,600,000,000".
On page 2, line 5, strike "$64,700,000,000" and insert in lieu thereof "$65,600,000,000".
On page 2, line 7, strike "$778,900,000,000" and insert in lieu thereof "$779,800,000,000".
On page 2, line 9, strike "$78,900,000,000" and insert in lieu thereof "$79,800,000,000".
On page 3, line 17, strike "$8,000,000,000" and insert in lieu thereof "$9,200,000,000."
On page 3, line 18, strike "$10,500,000,000" and insert in lieu thereof "$11,300,000,000."

The PRESIDING OFFICER. Will the Senator suspend until we have order in the Chamber?

The Senator from Georgia.

Mr. NUNN. Mr. President, I wish I did not have to offer this amendment. I wish that so many segments of our Nation had not suffered through one of the worst droughts in decades. I wish that tens of thousands of farmers had not seen their crops shriveled and dying in the fields.

However, as so many of us know all too well, this has not been the case. Georgia, for example, has suffered through the worst drought the State has seen since the mid-1950's. Florida, Alabama, Oregon, and many more of Georgia's sister States have sustained similar damage, and the effect on our Nation's farmers has been devastating.

I wish I did not have to offer this amendment because I wish there had never been such a disaster.

But there has. We cannot pretend it did not happen. We cannot ignore its effects, and we must accept our responsibility to provide all appropriate Federal assistance where available. It is for this reason that I am offering an amendment, on behalf of myself and Senators TALMADGE, STONE, ALLEN, HOLLINGS, CLARK, CULVER, and PACKWOOD, to increase the budget authority under function 450, community and regional development, by $1.2 billion, and outlays by $0.9 billion.

Function 450 covers the Small Business Administration's physical disaster loan program, which provides low-interest loan assistance for the refinancing, repair, rehabilitation, or replacement of property damaged as a result of a natural disaster. It is the Federal Government's primary emergency assistance loan program when there has been a physical disaster, such as a flood, hurricane, or tornado.

Only recently, however, has it been applied to situations where crop losses have occurred due to a drought. At a hearing before the Senate Small Business Committee in June of this year, I raised this issue with SBA Administrator, Vernon Weaver. As I pointed out then, and as I still firmly believe, farmers whose crops have dried up in the field have suffered just as much physical damage as though they were wiped out by a flood, tornado, or hurricane. SBA agreed with me, and as a result, determined that, where SBA's standard physical disaster criteria have been met, such assistance could be made available to farmers.

Georgia was the first State to have this program made available to farmers, on July 26, when SBA declared 127 counties and adjacent counties in Georgia a disaster area because of physical damage caused by severe crop losses due to drought during the 1977 crop year. Since then, Florida, Oregon, Alabama, Mississippi, Iowa, Idaho, South Carolina, and North Carolina have had formal designations made by SBA.

The response has been tremendous, and therein lies the problem which this amendment seeks to address.

In Georgia alone, over $171 million in SBA physical disaster loan applications have been received, with well over 3,000 applications pending, and scores more are being filed every day. It is my understanding that this could easily reach the $300 million level. Georgia is not the only State affected.

However, the second concurrent resolution on the budget for fiscal year 1978 anticipates additional disaster loans of only $100 million, with no further funds available for supplemental appropriations requirements. The House of Representatives has already voted similar authority, and unless the Senate accepts my amendment, the consequences for farmers depending on this program will be catastrophic.

As the able chairman of the Budget Committee pointed out in his opening statement on the pending measure, there is no room left, once adopted, for excess spending in any functional category. The limits contained in this resolution will be binding on the Congress, and any legislation which exceeds these limits will not be in order.

It is clear, however, that the SBA's physical disaster loan program will require more. It is my understanding that SBA has estimated the program could eventually run well over $1 billion nationwide. I think it is obvious that a supplemental appropriation of over $1 billion for one program alone will not be possible, once this resolution as it is now presented is passed, without causing inadequate funding for other important Federal programs. Therefore, once the Congress adjourns, this will mean absolutely no further moneys will be available for loans when the present amount is used up.

I do not think it is beyond reason to say that, based on current application trends, this could be as early as the 1st of November.

I do not mean in any way to imply that the Budget Committee has not done its job in presenting the present budget resolution. The simple truth is that the program has only been in actual operation for a little over 1 month, and it has been very difficult until now to predict exactly how much will be necessary to adequately fund it.

I might also say that the administration has only recently even submitted an estimate to Congress about the amount that they anticipate will be required.

Some sources, and I think my colleagues should know this, have said it could run as high as $2 billion or even $3 billion.

I certainly hope that this will not be the case. I do believe, however, that these large estimates indicate the very real need for assistance. Simply because it is presently impossible to accurately predict what the ultimate cost will be is no reason, I believe, to do nothing, to simply let the program die before it has even gotten off the ground. Yet, unless my amendment is adopted, this will be precisely the case.

There is therefore no magic in the amount I have proposed. It is based on the best available information I have been able to obtain. I think it is the minimum needed to see the program through fiscal year 1978. I think without it, we might as well announce to our drought-stricken farmers that we have terminated this important disaster assistance relief. I want to make it clear that, without an increase in budget authority, this is precisely what we will be doing.

As a former member of the Budget Committee and a consistent supporter of fiscal responsibility and a balanced budget, I do not offer this amendment lightly. I fully realize the magnitude of the increase, and for this reason, I would also like to make some observations regarding the program it will help to support.

SBA's physical disaster loan program is unique among the Federal Government's multitude of emergency relief programs in that it is the only one that I am aware of that provides loan assistance to an individual without a prior showing that the applicant was unable to obtain sufficient credit from a normal commercial source. This is very significant in the case of farmers, whose land values can often be artificially inflated,

and who might therefore be marginally qualified to receive commercial credit, and yet be unable in reality to afford the higher commercial interest rates, particularly when they have had almost total crop failure.

Unless SBA's physical disaster loan program were available to them, there would be thousands of farmers who would be effectively shut out from any individual Federal disaster loan assistance. There would also be thousands of farmers who would be out of business, particularly younger farmers who have little to operate on, and many of whom lease their land and have little equity.

It was out of concern for these farmers that I worked to make the physical disaster loan program applicable to our present drought situation. I viewed it as the only means of assistance possible for many who could not even get "in the door" otherwise. I continue to view it as a supplement to other agricultural disaster assistance programs such as those offered by the Farmers Home Administration, and not as a substitute.

I am therefore most concerned to learn, however, that just the opposite is occurring. I am informed that 80 percent of farmers seeking disaster assistance are doing so through this program. Many of these farmers would be eligible for comparable relief from Farmers Home Administration, and yet the SBA is continuing to be flooded with their applications.

For those who legitimately cannot receive assistance elsewhere, I believe the SBA's program is vitally important. However, this is the first time that SBA has applied this program to farmers, and quite frankly, they do not have the expertise to operate efficiently on the enormous scale to which this program is growing. As I noted, Farmers Home provides comparable physical disaster assistance. In adition, for that portion of a farmer's loan which exceeds $250,000 for physical damage, Farmer's Home Administration assistance is available at an interest rate of 5 percent, whereas SBA can offer such at 6⅝ percent. I would hope, therefore, that those farmers who can qualify for Farmer's Home Administration programs will use this avenue, rather than seeking to substitute that provided by SBA. To this end, I recommend that SBA consider requiring that a farmer show he is ineligible for assistance from Farmer's Home before he can be considered for SBA's physical disaster loan program.

Unless this or some other comparable approach is taken, the SBA will continue to find themselves not simply an addition to the several agricultural disaster relief programs that are available, but instead, a replacement for them. The result, as evidenced by this amendment, will be a tremendous cost unnecessarily placed on one program alone, which will delay processing of needed funds, and ultimately provide a disservice to the farmer. I also hope that Farmer's Home Administration will carefully review the administration of their programs to assure that their services are as effective and expeditious as SBA has been attempting to make theirs.

In closing, I remind my colleagues that we are talking about a loan program, and not a direct subsidy for farmers and other eligible applicants. Many farmers in Georgia have reminded me of the vast amounts of direct grants that Congress approves not only to other segments of our society, but to foreign nations as well. The SBA's physical disaster loans are not such a program: The Government will be repaid. The door has been opened by this program to thousands of our own citizens who are in need of assistance through no fault of their own.

I might also add that this applies to the flood victims in West Virginia and many others, who will also see the program run out of money unless this amendment passes.

While I think we must consider providing clear directions regarding its use, we should not now, by failing to provide adequate funding, slam this door in the face of many people in desperate need.

I urge my colleagues to adopt this amendment.

Mr. STONE. Will the Senator yield?

Mr. ALLEN. Will the Senator yield for 30 seconds?

Mr. NUNN. I yield 30 seconds to the Senator from Alabama; then I shall yield to the Senator from Florida.

Mr. ALLEN. I commend the Senator from Georgia for his amendment. I support it wholeheartedly. My distinguished senior colleague (Mr. SPARKMAN) also requests that he be a cosponsor and I ask that the Senator from Georgia make the unanimous-consent request that his name be added.

Mr. NUNN. I thank the Senator from Alabama.

Mr. President, I ask unanimous consent that the senior Senator from Alabama (Mr. SPARKMAN) be added as a cosponsor, and also the Senator from South Carolina (Mr. THURMOND), and the Senator from Florida (Mr. CHILES). Mr. CULVER, I think, is already on the amendment.

The PRESIDING OFFICER (Mr. RIEGLE). Without objection, it is so ordered.

Mr. NUNN. I yield to the Senator from Florida.

Mr. STONE. Mr. President, I strongly support and have cosponsored this legislation and the necessary assistance that it will bring to small businesses which have suffered due to the drought.

I would like to share with my colleagues the particular problems being experienced by the drought-stricken farmers within the State of Florida. Recently, I toured the drought-stricken counties of Florida, and saw firsthand the devastation that has resulted from the drought. I talked with many Florida corn farmers and received detailed accounts of what it will take for them to overcome this terrible adversity, which comes right on the heels of the Florida freeze disaster earlier this year.

The problem on which there seems to be general agreement is that the farmers who have already borrowed heavily from their local lending institution and face imminent bankruptcy have turned to the Small Business Administration for assistance. It has been only 3 weeks since the SBA began the extension of its physical property disaster program to farmers in those counties that were designated by the Presidential disaster declaration.

Within those 3 weeks—in the State of Florida alone—2,400 applications have been distributed and it has been estimated that 80 to 90 percent of these will apply for an SBA loan. The average loan will be for $90,000. As of today, over 327 applications have been filed in Florida for requested loan amounts totalling around $29 million. If one takes the specific example of Florida that I have cited, with 41 out of 67 counties eligible by SBA criteria for disaster loans, and multiplies this by two-thirds of the counties in the United States that are eligible by SBA's estimates, one can quickly get a general impression that the SBA is short of funds and desperately needs additional moneys to supplement the farmers' requests that are now only beginning to come into SBA offices around the country.

Mr. President, this amendment has my full support and I am certain this measure will go a long way to meet the needs of those farmers suffering under the burden of drought to whom we have promised disaster assistance, for whom we have set up these programs. The legislation is on the books, but without this amendment being passed in some substantial degree, the actual funding will not be there.

Mr. CHILES. Will the Senator yield?

Mr. NUNN. Mr. President, I shall yield in just a moment.

I ask unanimous consent that Mr. HELMS of North Carolina and Mr. RANDOLPH of West Virginia be added as cosponsors to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. I thank the Senator from Georgia for proposing this amendment. I associate myself with the remarks of my distinguished colleague from Florida with regard to the programs we have in the drought area of Florida, which drought was on top of a freeze that we had had earlier. It was abundantly clear to us, after our tour of the drought-stricken area, that the existing programs under Farmers Home and under the SBA programs at that time would not be able to take care of many of the problems that were there because of the different quotas that were there in regard to what the corn yield was for younger farmers that were coming into the program, for people that were leasing, or for people that, perhaps, could get credit. But if the credit was at 10 or 11 or 12 percent that they have had to pay, they would not have been able to pay it back so they would not have been able to continue in their farming operation.

So they would not have been able to continue in their farming operation and something like this was needed.

I commend the junior Senator from Georgia for his work in getting the SBA to change its criteria. I think that really is only fair, even though it has opened up this program. It might well be that probably the program will have to be looked at now. But for the life of me,

I could never explain to a farmer why in the past when a hurricane came through that someone who owned a cottage on the river was——

The PRESIDING OFFICER. The time of the Senator from Georgia has expired.

Mr. NUNN. Mr. President, I ask my colleague from Maine to yield enough time for the Senator from Florida to finish.

Mr. CHILES. Three minutes.

Mr. MUSKIE. Yes.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. That he could get the money on the low interest loan for his cottage on the basis of a disaster, a small place either on the beach or the river, but at the same time, the farmer, when his field was destroyed by that hurricane could not obtain funds for that physical disaster, and that was a tragedy. It was not fair.

I think it is fair now. I think many of us feel the answer to this program really is a meaningful crop insurance program in which we are going to cover the country, and get away from trying to pump this money into every kind of disaster around and the farmer then cannot cover himself through a national program of providing crop insurance, and we will probably have to do that.

But right now, if we do not continue some of these funds, many people in my State that have applied for these funds, because that is the existing program, know this is under the law now and would be denied the opportunity to get the funds.

Mr. STONE. Will the Senator yield half a minute for a question?

Mr. CHILES. I yield.

Mr. STONE. Is the Senator from Florida not aware, as the junior Senator from Florida is aware, of the fact that what has happened is that all these folks have filed application, the applications have been approved in principle, locally and regionally, and are sitting on the desks here in Washington because they do not have the money?

Mr. CHILES. That is exactly correct.

Mr. NUNN. I completely agree with the Senator from Florida (Mr. CHILES) regarding the crop insurance situation. The SBA's physical disaster loan program is not the best way to provide relief from disaster for farmers. It is the only way this year that it can be done, however.

The crop insurance program would be much better because farmers would not have to pay the money back. They would contribute to their insurance, perhaps subsidized by the Federal Government to some extent, but the SBA's program is the only road for many at this time.

I also believe we must take another look at some of the provisions of the applicable portions of SBA's statutes. These are not new law, but in application to farmers there may be changes that will have to be made. There may be abuses in the program that we need to take a look at. But, right now, the program is desperately needed by thousands of farmers and, even though we may have some abuse, I think it is the price we must pay to keep a vital segment of our economy going, both in our section of the country as well as in many other sections.

Mr. President, I ask unanimous consent that Mr. CHURCH be added as a cosponsor on this amendment.

The PRESIDING OFFICER. Without objction, it is so ordered.

Mr. NUNN. I thank the Senator from Maine for yielding.

Mr. MUSKIE. Mr. President, I yield myself 5 minutes.

Mr. President, I said at the outset that I discussed this with the distinguished Senator from Georgia (Mr. NUNN), with Senator STONE and Senator CHILES, and I think others, over the last 24 hours. I think we have reached an accommodation with which the Budget Committee can live for the moment.

But I think it would be useful to identify some of the budgetary problems created in this body by giving some of the background for the legislation which gives rise to this amendment.

The legislation was not considered in committee. It was added as a floor amendment, and I will read that floor amendment, which can be found on page 40338 of the CONGRESSIONAL RECORD dated December 12, 1975. It reads as follows:

> It is the declared policy of the Congress that the Government, through the Small Business Administration, should aid and assist small business concerns which are engaged in the production of food and fiber, ranching, and raising of livestock, aquaculture, and all other farming and agricultural related industries; and the financial assistance programs authorized by this Act are also to be used to assist such concerns.

There is other language in the amendment of a definitional quality, but that is the substance of it.

In due course, the question arose in the Senate debate as to what that amendment would cost, and on page 40325, this is what was said on that point:

> This adds nothing to the appropriations and adds nothing to the authorization of the Agency.

The implication was that this was simply an addition of an eligible activity to the activities already eligible for assistance under the SBA program and that the resources traditionally made available to SBA would be sufficient to take care of its traditional clients and the new one.

There were no guidelines, no consideration of any requirements that this new client might bring to the operation of SBA—simply a good will gesture to the farmers of the country that a new program was available for them. There was no consideration of the future costs—whatever consideration there was dismissed future costs. Nobody brought the Senate Budget Committee this problem, no committee of the Senate, no agency of the executive branch.

I am sure if the Budget Committee had been asked to consider disaster assistance to farmers in the circumstances described by the distinguished Senator from Georgia, the Budget Committee would have been sensitive to the problem and the emergency and would have taken steps to bring relief.

But it was not until yesterday afternoon with the budget resolution already on the floor that I was asked to consider the amendment which the Senator from Georgia has just called up.

Now, I say all this not by way of criticism of the Senator from Georgia or of the farmers whose assistance he seeks to provide. My criticism is directed at the method by which this program was created, without adequate hearings, without adequate consideration by the committees. And my criticism is directed at the agencies, specifically SBA, for not preparing this budget estimate and getting it up here so that the Budget Committees and the Congress could give adequate consideration to it.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MUSKIE. Five more minutes.

Mr. President, we do not yet have a recommendation from the President. We do not yet have a budget estimate from the administration. We do not yet have a recommendation from SBA. And we are being asked now to accommodate the budget resolution to that kind of ambiguous situation.

As I say, I think we have worked out an accommodation which is a practical one. But I am reciting this history so that those Senators who read the RECORD may begin to contemplate the consequences of some of the hasty actions that we all too often take on the floor of the Senate.

We have taken two yesterday and today that will add between them in the first full budgetary year $2.1 billion a year in budgetary cost. And we have done it in each case with only a handful of Senators on the floor during the debate, considering the consequences and understanding the facts. Then we just casually and blithely added $2.1 billion for first-year costs when those two programs are fully implemented. We do that over and over again, and then the Budget Committee gets the kind of criticism it got from Members this afternoon. We hear that the Budget Committee brings in deficits that are too high and spending that is excessive. Whose responsibility is it, in addition to the Budget Committee, to watch those kinds of consequences?

So I use the occasion of this amendment to say this. I repeat, we have tried to work it out so that the farmers who have real need and who deserve the attention of the Government will get it. But I urge upon my colleagues that we examine our habits on this floor a little more carefully and with a little greater sense of restraint than we have in the past.

Having said that, I say to my good friend from Georgia—and I appreciate the quality of the discussion we have had off the floor on this subject—that the Budget Committee obviously has not had an opportunity to consider this. So the solution we have taken is to permit some room in this budget resolution, with the understanding that either through a third concurrent resolution process and/or Appropriations Committee consideration of the program implications of the problem, we will pursue a more complete

remedy. I am perfectly willing to do that. I think the budget process should be that flexible, so that the farmers whose needs were addressed by this amendment back in 1975 will not be left hanging high and dry.

Mr. President, the issue raised by this amendment is not the kind of issue the Senate should have to deal with as it shapes the budget resolution. We should expect floor amendments to the resolution reported by your Budget Committee because Senators disagree on national priorities and on the desired level of Federal revenues and spending. But that is not the reason for this amendment. I am sure that, if the Budget Committee had known that drought-affected farmers were generating a huge flood of applications for SBA disaster relief loans, the Budget Committee would have recommended a budget resolution that could accommodate that need. I must say as one Senator that there is something very disturbing about the events that brought about this state of affairs, but I am certain that the Budget Committee would have supported adequate assistance to farmers whose crops were lost by drought.

If there is no disagreement on national priorities, why is this amendment being offered? Is it being offered because just over a month ago, when the Budget Committee was marking up the second resolution, there was not an inkling from anywhere in the executive branch that there might be a need to spend an additional $1.2 billion and as much as $2.5 billion through the SBA disaster loan fund. There was not a hint that the budget of the Small Business Administration might be expanded by fourfold in order to provide emergency credit for agriculture. There was not a word to indicate that the SBA disaster loan fund would be increased to a level 20 times the amount that the Congress had been led to expect.

This amendment is here not because of a disagreement among Senators, it is here because Federal agencies have failed to provide us with the information we need to carry out our responsibilities. And that is intolerable.

The congressional budget process was created to strengthen the hand of the Congress, and to give the Nation more effective fiscal policy. It was created so that we could make individual decisions in the light of all of the demands on Federal resources. The process established by the Congressional Budget Act is now no mystery. Each of its steps was designed to provide the Congress with information it needs to make difficult choices. The process is working well because of broad cooperation and effort throughout the Congress.

However, the Congress cannot control the Federal budget if agencies cannot, or do not, accurately estimate their need for funds. The law that made farmers eligible for SBA assistance was not recently thrust on the Small Business Administration—it was enacted in June of 1976. The drought has been a matter of concern for many months. The drought disaster areas were recognized 2 or 3 months ago. The Small Business Administration has little excuse for waiting until 10 days before the deadline for passage of the second budget resolution and then informing the Congress of its desire to increase spending by at least $1.2 billion and as much as $2.4 billion. The January budget indicated that the SBA disaster loan fund would require only $20 million in budget authority. That estimate was repeated in the mid-session review of the budget that the administration completed by the end of June. There was no mention of massive new requirements for this program when the Budget Committee staff contacted Federal agencies in preparation for our second budget resolution markup in July.

Whatever the Senate's decision is on this amendment, I am one Senator who will not accept this level of performance from Federal agencies in the future. This budget resolution will bind the Congress for the rest of fiscal year 1978. Each agency must develop the skills to provide accurate estimates of the need for budget authority and of the outlays that will result from their operations. Congress must have this information on a timely basis.

Mr. NUNN. I say to the Senator from Maine that I appreciate his position, and I understand his analysis of the amendment that was adopted in 1975.

It is my understanding—and we can have the staff check this out; I am not absolutely certain of it—that what we are talking about is SBA's 7(b)(1) program. The way the law was worded, the farmers already would have been eligible for these funds in a disaster even if that amendment, which made farmers eligible for other SBA funds, had not been adopted. We can check that. It is not really important. It does not really affect the merits of what the Senator has said. I voted against that amendment when it was presented on the floor because I did not think it had been adequately considered.

However, we are in a position now where we have virtually an entitlement program on the books, which is SBA's 7(b)(1) program. It is virtually open-ended and has been interpreted as applying to farmers. Had it not been, they could have brought suit in the courts, with a reasonable chance of success. That program is what we are trying to fund here.

I have every obligation to my farmers in Georgia, who are hurt badly, to pursue every avenue possible, to see that the funding is there for the entitlement program which others have utilized in similar circumstances. That is where we stand.

The Senator from Maine is absolutely correct about the fact that many measures are passed on this floor, the fiscal implications of which we do not adequately consider. We are doing a better job now, thanks largely to the Senator from Maine and the Senator from Oklahoma in pointing out these matters.

I agree with the position of the Senator from Maine, and I agree with the proposed compromise.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. I have 2 minutes remaining, and I want to make another point. I yield 30 seconds to the Senator.

Mr. NUNN. The administration has not come forth with any kind of really good estimates in this area. I think we all have been let down by the administration, SBA and OMB, in not coming forth sooner than they have. The first I knew about the potential for running out of money was in the last 2 days. I serve notice on SBA, OMB and the Agriculture Department that they need to turn their attention to this program. They need to propose any kind of amendments that need to be adopted in order to safeguard the taxpayers so that they will not be abused, and they need to do this immediately. We cannot wait forever on this. We will have to have their recommendations not only as to the amount of money that is going to be needed, but also any kind of changes that need to be made in existing law. That is their obligation, and I hope we will hear from them on that in the immediate future.

Mr. MUSKIE. Mr. President, do I have 2 minutes remaining?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MUSKIE. I yield myself 2 minutes on the bill.

One of the problems is this: Farmers Home loans are available in disasters. Unfortunately, for the poorer tenant farmers and those at the bottom of the pile, they cannot meet the Farmers Home Loan eligibility requirements. They must demonstrate that they have no access to other lending facilities. That requirement does not exist with respect to this. With this program existing, if we give it open-ended funding, we are just going to attract not only those who have real need but also those who could provide for their needs through Farmers Home or other lending facilities. This is just going to attract a runaway kind of program, unless we write some guidelines and some definitions and some requirements that will limit the application.

For example, the $1.2 billion in the Senator's amendment is almost twice as large as the entire budget request for SBA, and it is 10 times the size of the request for the disaster loan fund. I cite those figures just to demonstrate the kind of pressures that have been generated behind this program because of the need and because of the lack of eligibility requirements that limit the applications.

That is the sort of thing we have to address, and it is for the purpose of addressing them that I urge the Senator to accept the more modest figures we have agreed to include in the budget resolution, so that there will be ample time for the appropriate committees to write appropriate guidelines and safeguards for this program.

Mr. MAGNUSON. How much is that?

Mr. MUSKIE. We are providing $175 million in this budget resolution. I say to the Senator from Washington.

Mr. NUNN. I believe it is a rounded $0.2 billion, and I think the staff can explain the reason for that figure.

Mr. MAGNUSON. Will the Senator yield me a minute on the bill?

Mr. MUSKIE. I am happy to yield.

Mr. MAGNUSON. I had hoped that we would accept the amendment of the Senator from Georgia in the full amount. I did have some discussion in the Budget Committee, of which I am a member, that we might have this compromise. However, I ask this question: As the Senator from Georgia has well pointed out, this is only a temporary procedure for the legislative purposes here today, and we have to move ahead with this program and do something about it as fast as possible.

In my State, 33 counties are eligible. There is an immediate rush of loan applications all at once. But the complaint is that they cannot get any kind of loan. The criticism is very legitimate. Unless we are going to provide the funds, we should not have said that we were going to do something for these farmers.

There must be some immediate speeding up of this procedure and some action. I hope I have the assurance of the chairman of the Budget Committee that we can move on a third budget resolution as soon as possible, if we decide they have not been doing what they should be doing.

Mr. NUNN. I have the assurance of the Senator from Maine that he will consider a third such resolution. I do not want in any way to misinterpret him. He has not said that he would support it, but he would consider it as an item of an emergency nature and give us a chance to consider a third resolution, if it is deemed to be needed.

Mr. MUSKIE. Exactly.

Mr. NUNN. Is that a correct interpretation?

Mr. MUSKIE. Yes. May I say the Senator ought to understand and believe that the budget process is flexible enough to respond to emergencies. The method available for that purpose is additional concurrent resolutions. In this case it would be a third resolution.

I would regard the Budget Committee as obligated to respond to requests for emergency action requiring or having budgetary impact. What we might do with the requests when they come before us will depend on how we are impressed by their merits. But the process should be made available, and I assure the Senator I will see to it that it is.

Mr. NUNN. I thank the Senator from Maine.

I might say to the Senator from Washington that I have been in his State in recent weeks. I know how dry it is there, and I know you faced situations similar to what we faced in Georgia. I know the need of your farmers.

I would ask the Senator from Washington to join with Senator STONE from Florida and myself and many others in a meeting with OMB, SBA, and with the Department of Agriculture to see if we cannot iron out these difficulties in the coming week. Next week we are going to try to get together.

Mr. MAGNUSON. Just 30 seconds. You will not believe this, but although this drought has been going on out there for a long, long time, and everybody has known about it, up to yesterday there was a total of only three applications approved for the big sum of $302,000 in my State. Now, there is something wrong.

Mr. NUNN. I might also say to the Senator——

Mr. MAGNUSON. Three hundred and two thousand dollars. When millions are involved in this problem out there.

Mr. NUNN. I would also say it is my understanding that the checks, even on applications which have been approved, have been held up because the administration, having now gotten into this program, is concerned about it and, quite frankly, I understand their concern. But what we need is some rational thought and not handwringing. We need some people to examine what we really are going to do, and who can come up with some answers and make sure those who need the program get it. Those who do not absolutely need it should not be eligible. That is going to take some changes in the law and some administrative initiative.

Mr. President, I ask unanimous consent that the Senator from Washington (Mr. MAGNUSON) and the Senator from Mississippi (Mr. EASTLAND) be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 789

Mr. NUNN. I send to the desk a compromise which basically increases the budget authority and the outlays by $0.2 billion as opposed to the original proposal. This would be a compromise agreed to by the Senator from Maine (Mr. MUSKIE) that would have in mind the possibility of a third budget resolution once the administration makes its case for what is needed.

The PRESIDING OFFICER. The pending amendment is withdrawn, and the clerk will report the new one.

Mr. NUNN. I ask unanimous consent that the Senator from New Mexico (Mr. DOMENICI) be added as a cosponsor.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN), for himself and others, proposes unprinted amendment No. 789.

The amendment is as follows:

On page 1, line 11, strike the numeral and insert in lieu thereof "$501,400,000,000".

On page 2, line 2, strike the numeral and insert in lieu thereof "$459,900,000,000".

On page 2, line 5, strike the numeral and insert in lieu thereof "$65,075,000,000".

On page 2, line 7, strike the numeral and insert in lieu thereof "$779,275,000,000".

On page 2, line 9, strike the numeral and insert in lieu thereof "$79,275,000,000".

On page 3, line 17, strike the numeral and insert in lieu thereof "$8,200,000,000".

On page 3, line 18, strike the numeral and insert in lieu thereof "$10,600,000,000".

Mr. STONE. Did the Senator from Georgia include all of the original cosponsors on this amendment?

Mr. NUNN. I ask unanimous consent that all the original cosponsors on the original amendment be included in the compromise amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, this past growing season has been one of the worst, if not the worst, in South Carolina's history. That the drought and heat conditions have devastated much of the State's crops is evidenced by the fact that President Carter's disaster declaration covers nearly all 46 of our counties.

The assistance provided by the Small Business Administration's physical disaster loan program can have a beneficial impact on reducing the dimensions of this natural disaster. South Carolina has over 17,000 farms and it is conservatively estimated that as many as 60 percent are affected and will seek help from the Small Business Administration. The Small Business Administration district office advises me that to date applications totaling $28 million have been received. However, since the State only recently qualified for the program this figure will shoot up dramatically.

In cosponsoring this amendment to increase money available for this Small Business Administration program, I am persuaded by several points I wish to share with you.

First, the money provided by this amendment will go to the farmer in the form of loans. The money will be paid back. Our farmers are not looking for a handout, but they do need our help. They are hard-working people who have been affected by a terrible natural disaster that is simply beyond their ability to manage.

Second, the disaster not only has hurt the growers, but also those who supply them. The nonfarm service industry needs help, in most instances as much as the growers.

Third, the farmer is a very good risk. His roots are in the land and year after year—boom or bust—he has stayed with the land.

Fourth, the American farmer is probably the most efficient component of our economy. However, because of his efficiency he is constantly beleaguered with the problems of his market—as evidenced with boom-burst cycles and surpluses.

For these reasons and those offered by my colleagues I urge you to join with me in supporting this amendment.

Mr. MUSKIE. Mr. President, I take it that new amendments are eligible for another 30 minutes of time. I yield back my time.

Mr. NUNN. If I have any, I yield it back.

The PRESIDING OFFICER. The Chair would respond that that is not so. There are only 14 minutes remaining on the bill itself.

Mr. MUSKIE. I yield back my time.

The PRESIDING OFFICER. All time having been yield back, the question then is on agreeing to the amendment of the Senator from Georgia.

The amendment was agreed to.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MUSKIE. Mr. President, I yield the remainder of my time on the bill to the distinguished Senator from Louisiana (Mr. LONG).

May I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. I am sorry, I withdraw that.

There are not going to be any further amendments, I take it, and I simply want to straighten the parliamentary situation so that we may have a proper vote when we get to it.

The PRESIDING OFFICER. Are there further amendments?

ADDITIONAL STATEMENTS SUBMITTED

Mr. GARN. Mr. President, I will be constrained today to vote against the second concurrent budget resolution. I will do so because it refuses to acknowledge the crushing burden on the American people of taxing and spending policies.

During consideration of this bill here today, an effort was made, as it was in committee, to lower target revenue figures enough to accommodate an across-the-board tax cut. I am proud to say that that effort was led by Republicans, including my junior colleague from Utah. What is sad is that that effort was defeated and the result will be that millions of taxpayers are having their taxes increased, by the upward forces of inflation. As their inflated money income rises, with no accompanying income in purchasing power, their effective tax rate climbs, and Government gets billions more dollars to play with, without the unpleasant task of raising taxes through legislation.

In my view, that action is dishonest, and I will not be a party to it. If my colleagues want to raise taxes, let them say so, and then come in here with a proposal to do it. Let them bear the heat of an outraged electorate openly. But they will not do that. They simply decline to act, in the face of inflation, and the result is the same.

Economists from all sides agree on one point: There is not enough capital investment to generate the jobs we need, to supply the goods for which there is a demand, without inflation. The lack of capital investment can be traced directly to the lack of incentive to save or invest, caused by the confiscatory taxation allowed to exist by the Congress. A tax cut would restore the incentives of savers and investors to provide the capital which has always been the root of our success. Until this Congress learns that lesson, and is willing to restrain its appetites for more and more Government programs, our economy is doomed to its present uncertainty, and gradual decline. Overall spending targets of over $500 billion, with deficits over $60 billion, are simply more than the American people should have to tolerate. They are certainly more than I can vote for.

Mr. SASSER. Mr. President, I would like to ask the chairman to address a matter which was raised during the committee's discussion of function 300, energy and natural resources. The fiscal year 1978 Public Works Appropriations Conference Committee earlier this year considered the question of funding for the Clinch River fast breeder reactor project and decided to reserve the issue of appropriating funds for this item for a future fiscal year 1978 supplemental appropriation measure. To quote the Appropriations conference report on this matter:

> The Committees on Appropriations have consistently supported the Clinch River Breeder Reactor Demonstration; however, due to lack of enactment of authorizing legislation the conferees have deleted funding for this item without prejudice with the understanding that funding will be forthcoming by way of a supplemental immediately following enactment of the appropriate authorizing legislation.

I fully recognize that it is not the job of the Budget Committee to allocate funding for specific purposes within the various functions of the Federal budget. It only recommends upper limits on Federal spending and a lower limit on Federal revenues. But at times, during markup, the committee assumes expenditures for certain items in order to reach its recommended functional amounts.

There is, therefore, no specific provision in the fiscal year 1978 second budget resolution for funding of Clinch River. I would like to ask the Senator from Maine, however, if senators could assume that the budget the committee has recommended for the 1978 fiscal year could accommodate the possible funding of Clinch River as envisioned by the Public Works Appropriations conferees.

Mr. MUSKIE. The Budget Committee, as the Senator has correctly pointed out, does not line-item. That is, there is nothing in this document which provides funding for any specific purpose. Each senator may make his own assumptions on the precise mix of expenditure in the budget functions.

I would say to the Senator, however, that the committee's recommendation of $24.9 billion in budget authority is $9.4 billion above action completed or underway. A good portion of this difference is expected to be used for energy funding. I understand Clinch River funding would be no more than $150 million in budget authority. That being the case, it certainly could be accommodated within the $9.4 billion still available for function 300 spending if the Senate chose that program over others. But again, I would caution the Senator that the Budget Committee makes no recommendation on this or any other specific program the Senate may consider for fiscal year 1978 in this resolution.

Mr. SASSER. I appreciate the Senator's views on line-iteming, and I thank him for his attention to my inquiry.

BUDGET CEILINGS MEAN DEFICIT CONTINUES

Mr. MORGAN. Mr. President, I have to vote against the second concurrent budget resolution, which sets spending limits for the coming Federal fiscal year. Again, we are proposing a deficit in the neighborhood of $65 billion dollars, and I have to reject this approach to solving our economic problems.

This resolution is another signal to the American people that we have not been successful in eliminating wasteful spending. Deficit spending threatens the credibility of the Federal Government, and the credibility of our announced plan to have a balanced budget by 1980. Until we stop living beyond our means, the American people will continue to perceive Washington as a threat to their economic security.

By rejecting this resolution, we could show them we are serious about dealing with this problem.

A popular justification for deficits is that we can spend our way to economic recovery. The committee report accompanying this resolution states that this would be our purpose in adopting the proposed spending ceilings, and the deficit. "These large budget deficits can be eliminated only by the strong economy this budget resolution is intended to encourage," the report states.

In other words, Mr. President, the theory is that we will create a boom economy which will offset the deficit, eventually. But "eventually" never seems to get here. For 20 years such spending has failed to produce the economic wonderland we are always promised.

In fact, it is doubtful that general pump-priming will reduce unemployment among those chronically unemployed, the unskilled, the handicapped, and ghetto youth. If anything, the promise of a general expansion of the economy may well increase the sense of helplessness, rage, and frustration among the perpetually poor. If there is any expansion, they do not participate in it. We manage, by deficit spending, to raise expectations, and the Government's demand for revenue, but we do not seem to touch the unemployment problem at its core.

In the final analysis, I have to disagree with the thesis that deficit spending promotes effective growth which will eventually balance our budget. It behooves us to be only as generous with the taxpayers' dollars as they can afford for us to be. And that means we cannot expect to continue with this endless Government expansion, under the theory a strong economy will pay for it all later.

Expansion, the present budget resolution allows for. It allows, as well, for maintaining present levels of spending. It does not cut, and where it pretends to cut, it does so unrealistically. We were supposed to pretend that there will be no increase in the deficit under the resolution.

In point of fact, Mr. President, the budget resolution as drawn falsely underestimated spending which will be unavoidable in agriculture, in order to show no increase in the deficit. But the realities are different. The deficit will have to be larger than proposed last spring in the first budget resolution. American farmers have experienced drought and disaster all across this country, and to plan for a reduction in agriculture spending is simply out of the realm of possibility.

We cannot avoid extra outlays here. There are expenditures Government cannot avoid, and should not. To pretend we will ignore farmers in their time of need because of budgetary politics would be extremely short-sighted; we would just have to have a budget waiver later on, as authorizations become necessary. We cannot make an actual, overall deficit increase go away by ignoring the fact that an emergency exists in agriculture.

I do not think the American people resent this kind of expenditure anyway.

What they do resent is the endless, chronic overspending in almost every category of government, and about that we have done nothing.

We cannot continue to ignore the need to hold back, and argue for continued pump-priming Government spending, as the committee report suggests.

Mr. President, I cannot support spending ceilings which will actually increase the deficit, when we are supposedly committed to ending that deficit 3 years hence. I am cosponsoring a resolution calling for a constitutional amendment which would require a balanced Federal budget. I must take this opportunity to reaffirm that philosophy, and my belief that my constituents in North Carolina favor economic responsibility in Washington.

HOUSE CONCURRENT RESOLUTION 341

Mr. MUSKIE. Mr. President, I ask the Chair to lay before the Senate House Concurrent Resolution 341.

The PRESIDING OFFICER (Mr. RIEGLE) laid before the Senate House Concurrent Resolution 341 providing for revising the congressional budget for the U.S. Government for the fiscal year 1978.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of the House concurrent resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I ask unanimous consent to strike all of the language after the resolving clause and to insert in lieu thereof the language of Senate Concurrent Resolution 43, as amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. I ask for the yeas and nays on the House concurrent resolution, as amended.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. I thank the Chair and I thank my good friend.

Mr. LONG. Mr. President, the second concurrent resolution on the budget sets forth overall budgetary totals which are intended to be binding on the Congress. Legislation which would create a deficit greater than allowed for in the resolution, or cause higher levels of spending, or reduce revenues below the floor specified in the resolution becomes subject to a point of order. Unlike the first resolution which sets congressional guidelines—objectives desired to be achieved—the second resolution sets mandatory budgetary totals. Because of this, we must be careful to set totals which we realistically believe we can live within.

I am disappointed that the Budget Committee in shaping the totals it recommends for the second resolution has not seen fit to follow the advice of the Finance Committee with regard to what is likely to be enacted in at least two areas under Finance Committee jurisdiction. I recognize that, in acting on the budget resolution, the Senate is adopting the overall totals in that resolution and not the assumptions which the Senate Budget Committee, in its report, says led it to those totals. That issue has clearly been settled through Senate action on previous budget resolutions. Nevertheless, if the Senate adopts budgetary totals which were arrived at on the basis of unrealistic assumptions, we will have betrayed the true purpose of the congressional budget process.

In the first budget resolution, there was an assumption that significant savings could be achieved in the health care and income maintenance areas under the jurisdiction of the Finance Committee. At the same time, the assumptions underlying the first budget resolution totals also allowed for the enactment of some increased funding for welfare and social services programs. The savings in health and income maintenance could only come through enactment of certain benefit reductions in the social security program and cost controls in the medicare and medicaid programs. The Finance Committee recognized that legislation to reduce benefits and impose fiscal restraints is somewhat harder to achieve than legislation to improve benefits. We indicated our reservations whether we could really anticipate that the House and Senate could complete action in these areas in time to achieve savings in fiscal year 1978. Nevertheless, we were willing to accept those savings as goal for purposes of the first concurrent resolution.

By late July, we had received from the House a bill providing for the added spending in the welfare and social services areas. We had not, however, received legislation providing for the reductions in social security and medicare and medicaid spending envisioned in the first budget resolution. In a letter to the chairman of the Budget Committee, I pointed out that the Finance Committee did not believe it would be advisable to count on legislation being enacted in time to achieve those savings for fiscal year 1978. The Budget Committee reduced the anticipated savings but, according to its report, continues to expect fiscal year 1978 savings totaling some $700 million in these programs.

Mr. MUSKIE. Mr. President, will the Senator yield for just a moment?

Mr. LONG. I yield to the Senator.

Mr. MUSKIE. May I say to the Senator I appreciate the points he is making. I will not have time to reply, but I would like to assure him that I will include in the RECORD a statement undertaking to respond to the points which he appropriately raises. I have given the Senator all my time.

Mr. LONG. I would be happy to extend the time or do whatever the Senator would like to do about the matter.

Mr. MUSKIE. I am being pressed by Senators who are watching the clock, and I would just as soon put it in the RECORD.

Mr. LONG. I thank the Senator.

The Finance Committee certainly intends to continue working toward achieving savings in the programs under its jurisdiction. Realistically, however, the odds are not good for actually enacting legislation to reduce social security, medicare, and medicaid spending by $700 million in the fiscal year beginning less than a month from now. We have not even received legislation dealing with these areas from the House. If we adopt a budget resolution with totals which assume such savings, we may find that we have simply not lived up to the budget process.

The Finance Committee also recommended that the Budget Committee allow room in the second resolution for the enactment of legislation to improve social security financing. Actually, room must be left in the budget resolution for such legislation only because of what amounts to a technicality. Under the budget process we may not reduce revenues below the second resolution floor but nothing prevents our raising more revenues than the resolution provides for. However, because social security taxes are automatically appropriated into the trust funds, an increase in social security taxes—and we would like to increase them to make the program solvent—also raises budget authority. Because there is a very serious need to remedy the financial deficit in the social security system, the Finance Committee recommended that the Budget Committee, in setting its budget authority totals, leave room for up to $3 billion in added social security taxes—which we would like to levy to reduce the overall deficit and to make the social security fund more solvent. This in no way increases the deficit—in fact the deficit would be reduced if social security taxes are raised. However, it would give the Congress the flexibility to deal with this important issue if it is possible to do so.

However, at least technically, this budget resolution would like to deny us the flexibility we need to deal with this important issue. In other words, what the Finance Committee would like to do is to help reduce the deficit that we are facing here, not to increase it.

Since the second concurrent budget resolution is binding only as to its totals and not as to the assumptions the Budget Committee may have made in reaching those totals, a point of order will not lie against Finance Committee legislation providing additional financing. Nevertheless, such legislation will use up budget authority which other committees may be counting on for their programs. Since social security financing legislation is now being actively considered by the Finance Committee and also by the House Ways and Means Committee, it seems only prudent that the second budget resolution's totals allow for the possibility that Congress will in fact enact such legislation. I think most Senators are aware of the fact that the disability insurance fund may not be able to meet its benefit obligations by the end of 1978 unless we act to provide new funding. The retirement benefit fund is also well below acceptable levels and will be unable to meet its obligations within the next few years unless we provide additional funding in that area also. In these circumstances, the Finance Committee felt the budget resolution should allow maximum flexibility for the actions which may have to be taken to increase the funding by providing more taxes to put more revenue into those programs.

I do not intend to offer an amendment to the budget resolution. I do, however, call attention to these areas in which the assumptions which led the Budget Committee to recommend the totals contained in this resolution appear to be unrealistic from the viewpoint of the chairman of the Finance Committee.

I thank the distinguished Senator.

Mr. MUSKIE. I thank my good friend from Louisiana.

May I say that I particularly appreciate the attention he is giving to the budget process. He has learned as much if not more about it than I have. We do not always agree, but I think as time goes on as I watch the perceptiveness with which he digs into these issues we should find it possible to accommodate our views increasingly as we move along. I do not really think we are that far apart. I express my appreciation for his interest.

The chairman of the Finance Committee, Senator LONG, has raised some very important issues with regard to the second budget resolution. I disagree with the Senator, however, when he asserts that the Budget Committee's assumptions for the health and income security functions are unrealistic.

Let us review the changes in the Budget Committee's assumptions with regard to social security and welfare costs between the first budget resolution and the second. The first budget resolution assumed savings in the social security programs of about $0.8 billion. These savings were recommended by President Carter in his 1978 budget. The first budget resolution also assumed increased cash welfare costs of nearly $0.2 billion. This amount would have accommodated the public assistance bill being considered at that time by the House Ways and Means Committee. For social services, the first budget resolution assumed increased costs of $0.3 billion; again, this amount would have accommodated amendments under consideration at that time by the House. Thus, for social security, cash welfare, and social services programs, the first budget resolution assumed net savings of about $0.3 billion.

With the second budget resolution, the Budget Committee assumed increased social services costs of $0.2 billion. This change in assumptions for social services reflected action that had been taken since the first budget resolution by the Senate Finance Committee.

For social security and cash welfare programs, the Budget Committee acknowledged that the net savings of $0.6 billion assumed in the first budget resolution were probably not achievable, due to the fact that it was late in the fiscal year and no legislation had been brought to the floor of either House to achieve such savings as yet. However, the Budget Committee assumed that some net savings could be achieved in these programs in fiscal 1978, and it therefore reduced the expected amount of net savings for these program from $0.6 billion to $0.3 billion.

In reducing its expected net savings for social security and cash welfare programs, the Budget Committee was conforming to the advice given by the chairman of the Finance Committee in his letter dated July 28, 1977. In that letter the chairman said in part:

> The committee will carefully examine the possibility of achieving such savings but, given the legislative situation, it would appear somewhat imprudent to base the second concurrent budget resolution on an assumption that changes of this type can be enacted in time to produce the anticipated savings in fiscal year 1978.

The Budget Committee took this advice to mean that while not all of the savings assumed in the first budget resolution could be achieved in 1978, at least part of them could be.

Thus, the second budget resolution, as reported by the Budget Committee, assumes overall net savings in social security, and welfare, and social services programs of only $0.1 billion, as compared to the savings assumed in the first budget resolution of $0.3 billion. These changes in assumptions are reflected in the following table. I ask unanimous consent that the table appear in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

BUDGET ASSUMPTIONS REGARDING SOCIAL SECURITY AND WELFARE PROGRAMS

First budget resolution for fiscal year 1978	
Social Security:	
President's proposed savings	−777
Cash Welfare:	
House public assistance amendments	+147
Social Services:	
Child care (title XX) + IV–B as an entitlement	+330
Net savings	−330
Second budget resolution for fiscal year 1978	
Social Security and/or Cash Welfare:	
Net savings (unspecified)	−300
Social Services:	
Child care (title XX)	+200
Net savings	−100

Mr. MUSKIE. I think that these figures show that the Budget Committee, rather than being inflexible and blind to the legislative realities, has been quite flexible in adjusting its assumed savings for these programs to these realities. Indeed, that these assumed savings are possible in fiscal 1978 was demonstrated yesterday by the action of the Finance Committee when it adopted amendments to the public assistance bill, H.R. 7200, which would achieve the savings assumed in the second budget resolution. I wish to commend the chairman and the committee for this high degree of fiscal responsibility that it has demonstrated in adopting these proposals.

With regard to the assumed savings in health programs, I again maintain that our committee's assumptions have not been unrealistic. We scaled down the net savings assumed in the first resolution from $0.6 to $0.3 billion. The Human Resources Committee has already reported a measure that could achieve the assumed savings in medicare and medicaid. This measure awaits the Finance Committee's consideration. The Finance Committee held hearings on a related bill last July. Thus, legislation in this area is already well underway, and it is not inconceivable that, with the support of the distinguished chairman of the Finance Committee, this legislation could be enacted in time to achieve all or nearly all of the expected savings. I urge the chairman to give this legislation his full support.

Last, with regard to the allowance in the second budget resolution for social security financing provisions, let me explain the reasons behind the budget committee's recommendation.

First, the Budget Committee considered general fund financing of the social security trust fund deficits to be a dead issue, given the Finance Committee's decision of July 28 that general funds would not be used for this purpose. Rather, the Finance Committee has decided that it will use some form of payroll tax increases to finance the short-range social security deficits. Here again, I submit that the Budget Committee was highly realistic in recognizing that this decision by the Finance Committee effectively killed the President's proposal to use transfers of general funds to shore up the social security system.

The Budget Committee then focused its attention on the issue of payroll tax increases to finance the social security deficits. Let me make sure that the record is clear on one point right now: The Budget Committee is not opposed to taking action now to finance the social security deficits. To the contrary, I believe I can speak for the entire Budget Committee by saying that it wholeheartedly supports such action. However, the Budget Committee does have a responsibility to consider the macroeconomic effects of Federal spending and taxation policies. Almost every economic indicator points to a weak continuing economic recovery in 1978. Our staff economists estimate that the 1978 tax increase recommended by the Finance Committee staff would raise inflation in 1979 by 0.2 to 0.4 percent and would cost the economy 250,000 jobs in 1979. Given the prospect of a weak economic recovery in the months ahead, the Budget Committee feels strongly that we cannot afford such negative consequences of a tax increase in 1978.

Moreover, it is not essential to raise payroll taxes in 1978. According to the 1977 social security trustees' report, by shifting funds among the retirement and disability insurance trust funds, the combined fund reserves will not be depleted until 1982. Of course, the Budget Committee is not recommending delaying action until that year. My only point is that it is not absolutely essential to the social security funds to raise new revenues in that year, particularly in light of the economic considerations to which I have already referred. In addition, I understand that the Finance Committee staff has developed a proposal that will eliminate the entire short- and long-range social security deficits. A deferral of the tax increase from January 1, 1978 to January 1, 1979 would not significantly alter the affect of this plan. In other words, if the Finance Committee staff plan were adjusted so that social security tax increases were initiated in January 1979 rather than in January 1978, the results of the plan would be virtually the same—the elimination of the short- and long-range deficits.

One last point on this issue: The Nation has known since at least 1974 that social security deficits were impending. This is not a new issue. Nonetheless, in

its March 15 report to the Budget Committee, the Finance Committee made no recommendation for social security tax increases in 1978. The financial situation of the social security funds have not changed so drastically in the last 6 months to justify such a sudden shift in policy as the Finance Committee is now recommending. I say to the chairman, then, that if tax increases in January 1978 were not considered to be essential in March of this year, then they should not be considered essential at this time.

In closing, let me say that I do not think that the Budget Committee and the Finance Committee are so very far apart on the issues raised by the chairman of the Finance Committee. With regard to the income security savings assumed in the budget resolution, the Finance Committee has already acted to carry out savings in the amount assumed in this resolution, so that it would appear that this is no longer a point of issue between our committees. With regard to the health cost savings, the Finance Committee has already begun consideration of legislation to achieve these savings, and it does not appear impossible that such legislation could be enacted in time to achieve these savings. And last, with regard to social security financing, the Budget Committee has no objection to any action by the Finance Committee to resolve the social security deficits. To the contrary, the Budget Committee applauds any such actions by the Finance Committee. The only contention between our two committees in this area is that the Budget Committee does not believe that increases in payroll taxes in 1978 are either desirable from the standpoint of macroeconomic policy or necessary in order to resolve the short-range deficits.

Mr. LONG. May I explain to the Senator that part of my complaint is that we would like to help with the very problem we have. The circumstance that I am complaining about here today is that Senators offer amendments to increase the deficit. What we would like to do is to bring forth some legislation to reduce the deficit, and I hope we can have the help of the chairman of the Budget Committee and his committee at some future point to do that.

Mr. BELLMON. Mr. President, the Senator from Louisiana seems concerned primarily about the fact that the budget resolution now before the Senate does not provide room, in the recommended budget authority total, for increased social security taxes to take effect in fiscal year 1978. I think I reflect the views of everyone on the Budget Committee when I assure Senator LONG that the Budget Committee agrees that more revenue must be provided for the social security system. What we disagree with Senator LONG on is the question of timing. The Budget Committee concluded, based on our study of the overall economy, that a social security tax increase in fiscal year 1978 would have adverse economic effects and inhibit the recovery. One of the ideas the Senate Finance Committee is apparently considering is raising $7 billion in social security taxes in 1978 by eliminating the wage-base limit for the employer's share of social security taxes. This would raise unemployment by 0.2 percent and would raise prices by at least 0.3 percent. That is the conclusion of our staff economists drawing on the work done by CBO and other economic analyses.

Moreover, Mr. President, let me point out a couple of facts which Senator LONG knows very well:

First, the social security financing problem does not require added taxes effective in fiscal year 1978. There is sufficient money in the trust funds to continue paying social security benefits in fiscal year 1978. Indeed, by shifting some money into the disability trust fund, Congress can assure that the trust funds will be adequate until at least fiscal year 1982.

Second, there would be no barrier under this resolution to the Senate Finance Committee's reporting a social security tax increase bill with an effective date in fiscal year 1979 or beyond. Indeed, I personally think we should act on such a bill as soon as possible.

I point out that the social security financing problem was well recognized early this year, before we acted on the first budget resolution. Yet, neither did the Carter administration include any social security tax increases in its initial fiscal year 1978 budget, nor the Finance Committee ask the Budget Committee to include room for a tax increase in the first budget resolution. Indeed, the Finance Committee's March 4, 1977, letter to the Budget Committee did not even suggest that a social security tax increase in fiscal year 1978 should be considered. What has changed since March of this year? Certainly, nothing significant has happened to the balances in the social security trust funds. What has changed is that President Carter sent to Congress in May of this year a set of social security financing proposals. This apparently caused the Finance Committee to conclude that it should try to raise social security taxes in fiscal year 1978 after all. On July 28, Senator LONG, as chairman of the Finance Committee, wrote to the Budget Committee and indicated that we should allow in the second budget resolution, for "the possibility of $3 billion of added social security revenues."

Mr. President, Senator LONG and the Finance Committee have not yet made any kind of case for raising social security taxes in fiscal year 1978. Until they do provide reassurances about effects on the economy, I do not believe Senator Long is justified in his criticism of the Budget Committee. Moreover, I assume that Senator LONG would have offered an amendment to this Budget Resolution if he knew what the Senate Finance Committee would eventually conclude relative to the increase of social security taxes in fiscal year 1978.

Mr. MUSKIE. Mr. President, I think that concludes all statements and all amendments.

I yield back the remainder of my time, whatever it is, and I am ready to proceed to a vote.

The PRESIDING OFFICER. The question then is on agreeing to the concurrent resolution, as amended. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), the Senator from Maine (Mr. HATHAWAY), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Rhode Island (Mr. PELL), the Senator from Illinois (Mr. STEVENSON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that if present and voting, the Senator from Minnesota (Mr. HUMPHREY) and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from New Mexico (Mr. SCHMITT) would each vote "nay."

The result was announced—yeas 63, nays 21, as follows:

[Rollcall Vote No. 361 Leg.]

YEAS—63

Abourezk	Eagleton	Metzenbaum
Anderson	Eastland	Moynihan
Baker	Ford	Muskie
Bayh	Gravel	Nelson
Bellmon	Hart	Nunn

Hatfield	McClure	Talmadge
Hathaway	McGovern	Wallop
Humphrey	Packwood	
Lugar	Pell	

So the concurrent resolution (H. Con. Res. 341), as amended, was agreed to, as follows:

That the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1977—

(1) the recommended level of Federal revenues is $394,825,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $775,000,000;

(2) the appropriate level of total new budget authority is $501,400,000,000;

(3) the appropriate level of total budget outlays is $459,900,000,000;

(4) the amount of the deficit in the budget which is appropriate in light of economic conditions and all other relevant factors is $65,075,000,000; and

(5) the appropriate level of the public debt is $779,275,000,000, and the amount by which the temporary statutory limit on such debt should be accordingly increased is $79,275,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1977, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $116,600,000,000.
(B) Outlays, $110,100,000,000.
(2) International Affairs (150):
(A) New budget authority, $8,300,000,000.
(B) Outlays, $6,600,000,000.
(3) General Science, Space, and Technology (250):
(A) New budget authority, $4,900,000,000.
(B) Outlays, $4,700,000,000.
(4) Natural Resources Environment, and Energy (300):
(A) New budget authority, $24,900,000,000.
(B) Outlays, $20,800,000,000.
(5) Agriculture (350):
(A) New budget authority, $2,100,000,000.
(B) Outlays, $6,300,000,000.
(6) Commerce and Transportation (400):
(A) New budget authority, $20,500,000,000.
(B) Outlays, $19,600,000,000.
(7) Community and Regional Development (450):
(A) New budget authority, $8,200,000,000.
(B) Outlays, $10,600,000,000.
(8) Education, Training, Employment, and Social Services (500):
(A) New budget authority, $26,100,000,000.
(B) Outlays, $26,400,000,000.
(9) Health (550):
(A) New budget authority, $47,700,000,000.
(B) Outlays, $44,200,000,000.
(10) Income Security (600):
(A) New budget authority, $178,800,000,000.
(B) Outlays, $146,600,000,000.
(11) Veterans Benefits and Services (700):
(A) New budget authority, $19,900,000,000.
(B) Outlays, $20,200,000,000.
(12) Law Enforcement and Justice (750):
(A) New budget authority, $3,800,000,000.
(B) Outlays, $4,000,000,000.
(13) General Government (800):
(A) New budget authority, $3,800,000,000.
(B) Outlays, $3,800,000,000.
(14) Revenue Sharing and General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,600,000,000.
(B) Outlays, $9,700,000,000.
(15) Interest (900):
(A) New budget authority, $41,700,000,000.
(B) Outlays, $41,700,000,000.
(16) Allowances (920):
(A) New budget authority, $900,000,000.
(B) Outlays, $1,000,000,000.
(17) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$16,400,000,000.
(B) Outlays, —$16,400,000,000.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BELLMON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MUSKIE. Mr. President, I ask unanimous consent that consideration of Senate Concurrent Resolution 43 be indefinitely postponed.

The PRESIDING OFFICER (Mr. BUMPERS). Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I move that the Senate insist on its amendments, and request a conference with the House of Representatives thereon, and that the Chair be authorized to appoint the conferees.

The motion was agreed to, and the Presiding Officer (Mr. BUMPERS) appointed Mr. MUSKIE, Mr. MAGNUSON, Mr. HOLLINGS, Mr. CRANSTON, Mr. CHILES, Mr. ABOUREZK, Mr. BELLMON, Mr. DOLE, Mr. MCCLURE, and Mr. DOMENICI conferees on the part of the Senate.

Mr. MUSKIE. Mr. President, I would be remiss if, on this 9th day of September 1977, I did not take the occasion of the adoption of the second budget resolution to acknowledge a very special asset of the budget process and the Budget Committee.

One of the happy fallouts of the otherwise unhappy Watergate episode is that it brought to Washington an exceptional young woman who went to work for the minority staff of the Senate Watergate Committee. That committee completed its work just as the Budget Committee began its own.

Three years ago today that young woman, Gail Oliver, became the third employee of the Senate Budget Committee. Now, many budget resolutions and many, many hours of hard work and overtime later, we celebrate her third anniversary with the Budget Committee. Her loyalty and devotion to the committee's work and her unfailing good spirits have been an inspiration and a joy to the whole committee staff, so we thank Gail and commemorate her special anniversary. I do not apologize for taking the time of the Senate for saying so.

Mr. President, I thank the distinguished majority leader for his patience and I yield the floor.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I want again to express my personal appreciation, and on behalf of the Senate I am sure, to the distinguished Senator from Maine (Mr. MUSKIE) and the distinguished Senator from Oklahoma (Mr. BELLMON) for their splendid work, their very skillful management of the second concurrent resolution, and for the overall exemplary job they continue to do in a very difficult assignment.

Mr. MUSKIE. I thank the majority leader and state for the record that without his cooperation and understanding it would not be possible to do it. I am most grateful.

BUDGET WAIVER RESOLUTION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of a measure that has been cleared for unanimous consent. It is on the Unanimous Consent Calendar. I have cleared it with the distinguished minority leader.

Before doing that, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 376, a budget waiver resolution.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 246) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1731.

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 246) was agreed to, as follows:

S. RES. 246

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1731, a bill to extend the special pay provisions for physicians and dentists in the uniformed services and reinstate the special pay provisions for optometrists and veterinarians in the uniformed services.

Such waiver is necessary because section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

The special pay provisions for physicians and dentists would expire September 30, 1977, under current law.

For the foregoing reasons, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 1731 as reported by the Committee on Armed Services.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNANIMOUS CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 364 on the Unanimous Consent Calendar.

EXTENSION OF SPECIAL PAY PROVISIONS FOR PHYSICIANS AND DENTISTS IN THE UNIFORMED SERVICES

The Senate proceeded to consider the bill (S. 1731) to amend section 2 of the act of May 6, 1974, to extend the special pay provisions for physicians and dentists in the uniformed services, which had been reported from the Committee on Armed Services with an amendment on page 1, beginning with line 7, insert the following:

SEC. 2. (a) Section 302a of title 37, United States Code, is amended to read as follows:

"§ 302a. Special pay: optometrists

"(a) In addition to any other basic pay, special pay, incentive pay, or allowance to which he is entitled, each of the following officers is entitled to special pay at the rate of $100 a month for each month of active duty beginning on or after October 1, 1977:

"(1) a commissioned officr—

"(A) of the Regular Army, Regular Navy, or Regular Air Force who is designated as an optometry officer, or

"(B) who is an optometry officer of the Regular Corps of the Public Health Services;

"(2) a commissioned officer—

"(A) of a Reserve component of the Army Navy, or Air Force who is designated as an optometry officer; or

"(B) who is an optometry officer of the Reserve Corps of the Public Health Service, who is on active duty as a result of a call or order to active duty for a period of at least one year; and

"(3) a general officer of the Army or the Air Force appointed, from any of the categories named in clause (1) or (2), in the Army, Air Force, or the National Guard, as the case may be.

"(b) The amount set forth in subsection (a) of this section may not be included in computing the amount of an increase in pay authorized by any other provision of this title or in computing retired pay or severance pay.

"(c) No special pay may be paid under this section for any month after September 1978.".

SEC. 3. Section 303 of title 37, United States Code, is amended to read as follows:

"§ 303. Special pay: veterinarians

"(a) In addition to any other basic pay, special pay, incentive pay, or allowances to which he is entitled, each of the following officers is entitled to special pay at the rate of $100 a month for each month of active duty beginning on or after October 1, 1977:

"(1) a commissioned officer—

"(A) of the Regular Army who is in the Veterinary Corps,

"(B) of the Regular Air Force who is designated as a veterinary officer, or

"(C) who is a veterinary officer of the Regular Corps of the Public Health Service;

"(2) a commissioned officer—

"(A) of a Reserve component of the Army who is in the Veterinary Corps of the Army,

"(B) of a Reserve component of the Air Force, of the Army or the Air Force without specification of component, or of the National Guard, who is designated as a veterinary officer of the Army or the Air Force, as the case may be, or

"(C) who is a veterinary officer of the Reserve Corps of the Public Health Service,

who is on active duty as a result of a call or order to active duty for a period of at least one year; and

"(3) a general officer of the Army or the Air Force appointed, from any of the categories named in clause (1) or (2) of this subsection, in the Army, the Air Force, or the National Guard, as the case may be.

"(b) The amount set forth in subsection (a) of this section may not be included in computing the amount of an increase in pay authorized in any other provision of this title or in computing retired pay or severance pay.

"(c) No special pay may be paid under this section for any month after September 1978.".

SEC. 4. The amendments made by sections 2 and 3 of this Act become effective on October 1, 1977.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act of May 6, 1974, Public Law 93–274, as amended (90 Stat. 926), is amended by striking out "September 30, 1977" and inserting in place thereof "September 30, 1978".

SEC. 2. (a) Section 302a of title 37, United States Code, is amended to read as follows:

"§ 302a. Special pay: optometrists

"(a) In addition to any other basic pay, special pay, incentive pay, or allowances to which he is entitled, each of the following officers is entitled to special pay at the rate of $100 a month for each month of active duty beginning on or after October 1, 1977:

"(1) a commissioned officer—

"(A) of the Regular Army, Regular Navy, or Regular Air Force who is designated as an optometry officer, or

"(B) who is an optometry officer of the Regular Corps of the Public Health Service;

"(2) a commissioned officer—

"(A) of a Reserve component of the Army, Navy, or Air Force who is designated as an optometry officer; or

"(B) who is an optometry officer of the Reserve Corps of the Public Health Service. who is on active duty as a result of a call or order to active duty for a period of at least one year; and

"(3) a general officer of the Army or the Air Force appointed, from any of the categories named in clause (1) or (2), in the Army, Air Force, or the National Guard, as the case may be.

"(b) The amount set forth in subsection (a) of this section may not be included in computing the amount of an increase in pay authorized by any other provision of this title or in computing retired pay or severance pay.

"(c) No special pay may be paid under this section for any month after September 1978.".

SEC. 3. Section 303 of title 37, United States Code, is amended to read as follows:

"§ 303. Special pay: veterinarians

"(a) In addition to any other basic pay, special pay, incentive pay, or allowances to which he is entitled, each of the following officers is entitled to special pay at the rate of $100 a month for each month of active duty beginning on or after October 1, 1977:

"(1) a commissioned officer—

"(A) of the Regular Army who is in the Veterinary Corps,

"(B) of the Regular Air Force who is designated as a veterinary officer, or

"(C) who is a veterinary officer of the Regular Corps of the Public Health Service;

"(2) a commissioned officer—

"(A) of a Reserve component of the Army who is in the Veterinary Corps of the Army,

"(B) of a Reserve component of the Air Force, of the Army or the Air Force without specification of component, or of the National Guard, who is designated as a veterinary officer of the Army or the Air Force, as the case may be, or

"(C) who is a veterinary officer of the Reserve Corps of the Public Health Service,

who is on active duty as a result of a call or order to active duty for a period of at least one year; and

"(3) a general officer of the Army or the Air Force appointed, from any of the categories named in clause (1) or (2) of this subsection, in the Army, the Air Force, or the National Guard, as the case may be.

"(b) The amount set forth in subsection (a) of this section may not be included in computing the amount of an increase in pay authorized in any other provision of this title or in computing retired pay or severance pay.

"(c) No special pay may be paid under this section for any month after September 1978.".

SEC. 4. The amendments made by sections 2 and 3 of this Act become effective on October 1, 1977.

Mr. STENNIS. Mr. President, this bill will extend for 1 year, until September 30, 1978, the authority for certain special pays for military physicians and dentists.

The special pays are:

A special pay for physicians and dentists ranging from $100 per month to $350 per month depending on length of service.

A variable incentive pay for physicians below the rank of general or admiral who sign active duty agreements, of up to $13,500 per year.

A continuation pay for physicians of flag rank and dentists who sign active duty agreements, of up to 4 months' basic pay.

The authority for these special pays will expire at the end of this month, unless this bill is approved.

OPTOMETRISTS AND VETERINARIANS

This bill will also reinstate special pay for military optometrists and veterinarians on active duty in the amount of $100 per month. Under current law, optometrists and veterinarians who entered active duty before July 1, 1975, are entitled to this special pay but those who entered active duty after that date are not entitled to the pay. This bill would reinstate these special pays for military optometrists and veterinarians beginning October 1, 1977.

As with the special pay for physicians and dentists, the special pays for optometrists and veterinarians would continue until September 30, 1978.

SHORTAGE OF MILITARY DOCTORS

There is a shortage of over 700 physicians in the military services. The services have not been able to attract sufficient volunteers to meet all of the medical requirements of our military people. Congress has established special pays to provide extra incentives for physicians and dentists in order to recruit adequate numbers of medical personnel. Congress has also established the Uniformed Services University of the Health Sciences and the Armed Forces health professions scholarship program to help meet the need for additional medical personnel.

Without these efforts and without the extension of the special pays in this bill the shortage would be much worse.

There are also shortages in the military services of both optometrists and veterinarians and these shortages are expected to grow. Testimony by the military Surgeons General indicate that the $100 a month special pay could help in recruiting and retention of these officers.

REVIEW OVER THE NEXT YEAR

The extension of these special pays until September 30, 1978, will give the President's Commission on Military Compensation and the Department of Defense and the Congress adequate time to consider and act on a comprehensive compensation and personnel policy toward all military health personnel.

I urge the approval of the bill.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–400), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill is to extend until September 30, 1978, the current authority to provide certain pay for physicians and dentists in the uniformed services.

COMMITTEE AMENDMENT

The committee approved an amendment to provide special pay of $100 a month for all optometrists and veterinarians on active duty in the uniformed services. Under current law such special pay is provided only for veterinarians and optometrists who were on active duty before July 1, 1975. Under the committee amendment, special pay authority would expire on September 30, 1978.

BACKGROUND

Currently there are four separate special pay provisions for physicians and/or dentists.

Special pay for physicians.—Public Law 93–274 provided that a physician in the uniformed services who has completed less than 2 years of active duty is entitled to $100 a month special pay, and that a physician who has served more than 2 years of active duty is entitled to $350 a month special pay.

Special pay for dentists.—Public Law 93–274 also established that a dentist in the uniformed services is entitled to the following special pay rates: (1) $100 a month if he has not completed 2 years of active duty, (2) $150 a month if he has completed at least 2 years of active duty, (3) $250 a month if he has completed at least 6 years of active duty, and (4) $350 a month if he has completed at least 10 years of active duty.

Continuation pay for physicians.—Public Law 90–207 established special continuation pay for physicians of flag rank, certain physicians undergoing initial residency training, and dentists who extend their service on active duty. The amount paid may not exceed 4 months basic pay for each additional year the physician agrees to serve.

Variable incentive pay for physicians.—Public Law 93–274 established a variable incentive pay for physicians below flag rank (except for those serving an initial active duty obligation of 4 years or less or those serving the first 4 years of an initial active duty obligation of more than 4 years, and except for those undergoing intern or initial residency training) who undertake active duty agreements. This provision authorizes variable payments not to exceed $13,500 per year for each year the physician agrees to serve.

THE PHYSICIAN SHORTAGE

With the expiration of the authority to induct personnel into the Armed Forces in 1973, there arose a critical need to provide extra incentives for physicians and dentists to recruit adequate numbers of medical personnel. In 1972 Congress passed the Uniformed Services Health Professions Revitalization Act, which established the Uniformed Services University of the Health Sciences and the Armed Forces health professions scholarship program. In 1974 Congress established the variable incentive pay program, which provides lump-sum payments to physicians in critical specialties who have already served an initial obligation. Without these efforts, the existing shortage of physicians would be even worse. As it is, in January 1977 there was a shortage of 746 physicians—some 6.4 percent.

A Presidential Commission on Military Compensation has recently been established to review all military compensation programs. It will specifically evaluate the question of compensation policy toward military health personnel and the Department of Defense intends to review all personnel policies for all types of health professionals. Awaiting the results of this review, the committee has renewed the special pay provisions for physicians and dentists for 1 year. The committee expects to receive the recommendations of this review early in 1978. Unnecessary delays on this matter could jeopardize the quality of health care available to the armed services.

OPTOMETRISTS AND VETERINARIANS

Under present law, those optometrists and veterinarians who entered active duty before July 1, 1975 are entitled to special pay in the amount of $100 per month. Optometrists and veterinarians who entered active duty after that date are not entitled to this special pay.

There are currently shortages from the authorized levels reported by the services in both optometry and veterinary officers. Particularly in the Army, these shortages have resulted in some curtailment of veterinary and optometry services. The existing shortages are expected to grow somewhat over the next several years. To the extent that the authorized levels for veterinarians and optometrists accurately reflect the services' needs, curtailment of services may increase. Testimony before the committee by the Surgeons General of the military departments indicated that the $100 a month special pay could help in recruiting and retention of veterinarians and optometrists.

The committee amendment would reinstate these special pay provisions for 1 year. As with the special pays for physicians and dentists, special pay for all veterinarians and optometrists would continue until September 30, 1978. This extension will give the President's Commission on Military Compensation, the Department of Defense review, and the Congress adequate time to consider and act on a comprehensive program for health professionals' compensation.

The committee amendment would become effective October 1, 1977. The Committee does not intend that the reinstatement of these special pays be made retroactive for service prior to October 1, 1977.

PURPOSE OF THE LEGISLATION

The purpose of the proposed legislation is to help insure a level of military health professional staffing in an all-volunteer environment that will enable the military medical departments to continue to provide adequate health services for our Armed Forces.

Public Law 93–274 modified the special pay structure for physicians and dentists in the uniformed services. That act created a new type of special pay for physicians called variable incentive pay and amended three other types of special pay for physicians and dentists. The affected provisions are as follows:

1. Special pay: physicians (37 U.S.C. 302).
2. Special pay: dentists (37 U.S.C. 302b).
3. Special pay: continuation pay for physicians and dentists who extend their service on active duty (37 U.S.C. 311).
4. Special pay: medical officers who execute active duty agreements (37 U.S.C. 313, the new type of special pay).

Sections 302 and 302b provide a special pay for physicians and dentists in graduated amounts ranging from $100 to $350 per month depending on length of service. Section 311 provides a special continuation pay for physicians of flag rank, certain physicians undergoing initial residency training, and dentists who extend their service on active duty. The amount paid may not exceed 4 months basic pay for each additional year of agreed service. Section 313 provides a variable incentive pay for physicians below flag rank (with certain stated exceptions) who execute active duty agreements. This provision authorizes variable payments not to exceed $13,500 per year for each year of agreed service.

Section 2 of Public Law 93–274 provided that the authority for the variable incentive pay (section 313) would expire on June 30, 1976, and that the authority for the other special pays would expire on June 30, 1977, unless otherwise extended by Congress. The Fiscal Year Adjustment Act (Public Law 94–273) extended these authorities from June 30 to September 30 of the appropriate year to accord with the change in the Government's fiscal year. Subsequently, the authority for variable incentive pay was extended for 1 year to September 30, 1977. Thus, authority for all four of these pays will expire on September 30, 1977.

Historically, the two health professions covered by this legislation have been among the most difficult groups to attract and retain on active duty. As documented in our 1976 report to the Armed Services Committee on variable incentive pay for medical officers, the provisions of Public Law 93–274 significantly increased retention and recruitment of physicians. Even with this pay and under quite optimistic assumptions, however, the Department of Defense expects to remain 2 to 7 percent below authorized medical personnel end strength during the remainder of the 1970's. Medical strength was 6.3 percent below authorized strength as of September 30, 1976. If the pay provisions covered by Public Law 93–274 are not extended, these shortfalls would increase substantially.

The expectations for dental officers are more encouraging; however, without the special pays authorized for dentists, dental recruiting and retention might fall.

The Department of Defense recommends extension of these special pays for health professionals. This extension will ameliorate the significant problems in meeting physician goals which would otherwise obtain, and will give the Department of Defense time to complete a review of the personnel policies used to maintain a given health force. The optimum health force study will estimate, for different force sizes, the least-cost mix of personnel policies which still meet necessary constraints on quality, productivity, experience, and career progression. Upon completion of this review, the Department of Defense will determine whether additional legislation with respect to these two professions is necessary.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill extending the special pay provisions for physicians and dentists in the uniformed services and reinstating the special pay provisions for optometrists and veterinarians in the uniformed services.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished majority whip.

VETERANS HEALTH CARE AMENDMENTS ACT OF 1977

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of a measure on the Unanimous Consent Calendar, which has been cleared, H.R. 5027.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5027) to amend title 38 of the United States Code to clarify the requirement that medical services be provided by the Veterans' Administration in certain cases.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Veterans' Affairs with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Veterans Health Care Amendments Act of 1977".

TITLE I—CONTRACT CARE AMENDMENTS

SEC. 101. Section 601(4) of title 38, United States Code, is amended by—

(1) inserting before the semicolon at the end of subclause (ii) of clause (C) a comma and "or of a veteran described in section 612(g) of this title if the Administrator has determined, based on an examination by a physician employed by the Veterans' Administration (or, in areas where no such physician is available, by a physician carrying out such function under a contract or fee arrangement), that the medical condition of such veteran precludes appropriate treatment in facilities described in clauses (A) and (B) of this paragraph";

(2) striking out "or" after the semicolon at the end of subclause (iv) of clause (C) and striking out subclause (v) of such clause and inserting in lieu thereof the following new subclauses: "(v) hospital care, and medical services which will obviate the need for hospital admission, for veterans in a State not contiguous to the forty-eight contiguous States, except that the annually determined hospital patient load and incidence of the provision of medical services to veterans hospitalized or treated at Veterans' Administration expense in Government and private facilities in each such noncontiguous State (except in Puerto Rico) shall be consistent with the patient load or incidence of the provision of medical services for veterans hospitalized or treated by the Veterans' Administration within the forty-eight contiguous States; but authority under this subclause (v) shall expire on December 31, 1978; or (vi) diagnostic services necessary for determination of eligibility for, or of the appropriate course of treatment in connection with, the provision of medical services at independent Veterans' Administration outpatient clinics to obviate the need for hospital admission."; and

(3) inserting immediately below clause (C) the following new sentence: "In the case of any veteran for whom the Administrator contracts to provide treatment in a private facility pursuant to the provisions of this paragraph, the Administrator shall periodically review the necessity for continuing such contractual arrangement pursuant to such provisions.".

SEC. 102. (a) Notwithstanding any provision of title 38, United States Code, or of any other provision of law, the Administrator of Veterans' Affairs, upon the recommendation of the Chief Medical Director of the Veterans' Administration, shall continue, for a period ending twelve months after the date of enactment of this Act, to contract for the provision of such hospital care and medical services as were authorized (including by virtue of the enactment of this Act) to be provided to a veteran (as defined in section 101(2) of such title 38) at any time during the period beginning on the day before the effective date of this Act and ending on May 15, 1977, and shall continue to contract for the provision of such contract services as long as the Chief Medical Director finds, in each individual case, that a longer continuous period is required to complete the course of treatment for a particular disability, that such continued treatment by contract is more medically desirable than the provision of such treatment in facilities described in clauses (A) and (B) of section 601(4) of such title 38, and that such contract services are not otherwise authorized by such title.

(b) In carrying out the provisions of subsection (a) of this section, the Administrator shall insure that (1) each veteran for whom contract services are continued under subsection (a) of this section is individually informed of such veteran's rights to care under this section and title 38, United States Code; (2) prior to any discontinuation of contract services, such veteran is individually counseled (or advised when it is not possible to arrange for a personal contact) about the circumstances under which such services may be authorized under such title; and (3) to the maximum extent practicable, a determination of eligibility for the provision of contract services under the criteria set forth in subsection (a) of this section and in such title 38 is made and communicated to such veteran in writing not later than nine months after the date of enactment of this Act.

(c) Not later than April 1, 1978, and annually thereafter, the Chief Medical Director of the Veterans' Administration shall submit to the appropriate committees of the Congress, through the Administrator of Veterans' Affairs, full reports on the implementation of the provisions of this title, and such report should include a breakdown of the numbers of veterans provided treatment under the amendments made by this title and under this section and of the numbers of veterans provided contract treatment (and the average cost and duration thereof) in each State (as defined in section 101(20) of title 38, United States Code) in the categories described in the following provisions: sections 610(a), 612(a), 612(f)(1)(A), 612(f)(1)(B), 612(f)(2), and 612(g), and each subclause of section 601(4)(C) of title 38, United States Code.

SEC. 103. The amendments made by and the provisions of this title shall be effective retroactive to October 21, 1976.

TITLE II—PHYSICIAN AND DENTIST SPECIAL-PAY AND OTHER PAY AMENDMENTS

SEC. 201. (a) Section 6(a)(2) of the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 (Public Law 94-123; 89 Stat. 669), as amended by section 112(a) of the Veterans Omnibus Health Care Act of 1976 (Public Law 94-581; 90 Stat. 2852), is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978".

(b) Section 4118 of title 38, United States Code, is amended by—

(1) striking out in subsection (a)(1) "he" and inserting in lieu thereof "the Administrator", and striking out "of," after "duration" and inserting in lieu thereof a comma and "of";

(2) striking out in subsection (a)(3) "pursuant to" and inserting in lieu thereof "in accordance with" and inserting at the end thereof the following new sentence: "Not later than one year after making any such recruitment and retention determination and each year thereafter, the Chief Medical Director shall make a redetermination in accordance with such regulations; and, in the event any such determination was made more than one year prior to the date of enactment of this sentence, the Chief Medical Director shall make such redetermination not later than ninety days after the date of enactment of this sentence.";

(3) striking out "and" at the end of subsection (b)(2), striking out the period at the end of subsection (b)(3) and inserting in lieu thereof a semicolon and "and", and inserting a new clause (4) as follows:

"(4) notwithstanding any other provision of this section, up to the maximum amount of such special pay to a physician who is employed full time as a hospital Chief of Staff and who is prohibited by applicable regulations from receiving (directly or indirectly) remuneration from an affiliated institution (as defined in section 4108(b) of this title).";

(4) striking out "The" in subsection (d)(1) and inserting in lieu thereof "Except as provided in subsection (g) of this section, the";

(5)(A) striking out "Any" in paragraphs (1) and (2)(A) of subsection (e) and inserting in lieu thereof "Except as provided in subsection (g) of this section, any", and inserting at the end of subsection (e)(1) the following new sentence: "Upon completion by the physician or dentist of the number of years of service specified in an agreement under this section, subsequent agreements by such physician or dentist may be entered into for additional years of service, not to exceed four additional years, specified in any such agreement."; and

(B) striking out in paragraph (2)(A) of subsection (e) "the Chief Medical Director, pursuant to the regulations prescribed under this section, determines" and inserting in lieu thereof "the Chief Medical Director determines, in accordance with regulations prescribed under subsection (a) of this section,"; and

(6) inserting at the end of such section a new subsection as follows:

"(g)(1) The Chief Medical Director may, in accordance with regulations prescribed under subsection (a) of this section, determine categories of positions of persons paid under this section in the Department of Medicine and Surgery as to which there are sufficient problems of recruitment and retention of full-time employees to warrant excepting from the reduction required by subsection (d)(1) of this section employes in such categories. Any employee in any such category shall, upon the execution on or after October 1, 1977, and for the duration, of a written agreement to complete a period of four additional years of full-time service in the Department, be excepted from such reduction.

"(2) Any physician or dentist who is employed in a category of positions determined by the Chief Medical Director to warrant an exception under paragraph (1) of this subsection and who has not completed the years of service specified in an agreement entered into under this section prior to the time such determination is made, shall be entitled, upon completion of at least one year of service in the Department of Medicine and Surgery pursuant to such agreement, to enter into a new such agreement (notwithstanding the second sentence of subsection (e)(1) of this section) for a period of four years of full-time service in the Department, under which agreement the reduction required by subsection (d)(1) of this section shall not be made.

"(3) Any agreement under this subsection shall provide that the physician or dentist, in the event that such physician or dentist voluntarily, or because of misconduct, fails to complete the four years of service pursuant to such agreement, shall be required to refund the total amount received under this subsection, unless the Chief Medical Director determines, in accordance with such regulations, that such failure is necessitated by circumstances beyond the control of the physician or dentist.".

(c) Prior to the execution after October 1, 1977, of any written agreement entered into by a physician or dentist under section 4118 of title 38, United States Code, as amended by this Act, (1) the Chief Medical Director of the Veterans' Administration shall reevaluate, in view of the executive level pay raise, pursuant to section 225 of the Federal Salary Act of 1967, effective February 27, 1977, with respect to the Veterans' Administration, the need for special pay agreements, as authorized in such section 4118, in order to recruit and retain highly qualified physicians or dentists in each category of position in the Department of Medicine and Surgery, and report to Congress not later than October 1, 1977, on the results of such reevaluation with respect to each such category; and (2) notwithstanding such section 4118, the Administrator of Veterans' Affairs, upon the recommendation of the Chief Medical Director and based upon such reevaluations, may promulgate a rule reducing the amount of primary special pay for any such category to the extent the Administrator finds such primary special pay is not necessary to recruit and retain highly qualified physicians or dentists in such category. The promulga-

tion of any rule under clause (2) of this subsection shall be subject to the provisions set forth in subsections (b), (c), (d), and (e) of

(d)(1) Not later than one hundred and eighty days after the date of enactment of section 553 of title 5, United States Code. this Act, the Administrator of Veterans' Affairs, upon the recommendation of the Chief Medical Director of the Veterans' Administration, shall establish and implement procedures (including special language training and testing programs) to insure that all physicians, dentists, nurses, and other health care personnel employed by the Veterans' Administration in any direct patient care capacity in the Department of Medicine and Surgery achieve, not later than one year after initiating such employment or after the date on which such procedures are established, whichever is later, such basic proficiency in spoken and written English as will produce effective communication with patients and other health care personnel.

(2) Where a Veterans' Administration facility serves a substantial number of veterans with limited English-speaking ability, the Administrator of Veterans' Affairs, upon the recommendation of the Chief Medical Director of the Veterans' Administration, shall establish and implement procedures to insure the identification of sufficient numbers of individuals on such facility's staff who are fluent in both the language most appropriate to such veterans and in English and whose responsibilities shall include providing guidance to such veterans and to appropriate Veterans' Administration staff members with respect to cultural sensitivities and bridging linguistic and cultural differences.

(3) Not later than ninety days after the date of enactment of this Act, the Administrator of Veterans' Affairs shall report to the House and Senate Committees on Veterans' Affairs the steps taken and plans formulated to comply with paragraphs (1) and (2) of this subsection.

SEC. 202. (a)(1) The salary schedule under the heading "SECTION 4103 SCHEDULE" in section 4107 of title 38, United States Code, is amended by striking out "$36,338 minimum to $46,026 maximum" after "Director of Podiatric Service" and inserting in lieu thereof "$39,629 minimum to $50,197 maximum.".

(2) The salary schedule under the heading "CLINICAL PODIATRIST AND OPTOMETRIST SCHEDULE" in section 4107 of title 38, United States Code, is amended to read as follows:

"Chief grade, $33,789 minimum to $43,923 maximum.

"Senior grade, $28,725 minimum to $37,347 maximum.

"Intermediate grade, $24,308 minimum to $31,598 maximum.

"Full grade, $20,442 minimum to $26,571 maximum.

"Associate grade, $17,056 minimum to $22,177 maximum.".

(3) The amendments made by paragraphs (1) and (2) of this subsection shall be effective retroactive to October 21, 1976. Notwithstanding any other provision of law, the Administrator shall establish retroactively intermediate pay rates between the minimum and maximum pay ranges prescribed in the salary schedule under the heading "SECTION 4103 SCHEDULE" for the Director of Podiatric Service and in the "CLINICAL PODIATRIST AND OPTOMETRIST SCHEDULE" in section 4107 of title 38, United States Code, and shall apply retroactively such pay rates as appropriate to each podiatrist or optometrist to be paid thereunder.
